List of Passengers.

PASSENGERS INWARD.

By this mail.—From Hong Kong for Southampton: Brigadier and Mrs. Sutton, Maj. Fisher, R.E., Lieut. Chaplin, 67th Regt., Messrs. C. A. Winchester, and A. G. Crawford. For Marseilles: Mr. and Mrs. Gray, child, and servant, Lord Grosvenor and servant, and Mr. R. G. Sillar.

PASSENGERS OUTWARD.

Per P. and O. str. Pera, 4th Jan. 1861.—From Southampton to Singapore: Lady and Miss McCausland, Miss Cowper. To Shanghai: Mr. F. R. Gannved. To Hong Kong: Lieuts. R. Eyre and Newby, Messrs. T. W. Barker, Eustace, Stevens. From Marseilles, 12th Jan., to Hong Kong: Mr. G. Anderson, Messrs. J. Cock, W. Lent and E. Waller, Gen. and Mrs. Valero, Col. and Mrs. Ranico, Mr. N. Campo-y-Puigmarto, Mr. Ashton. To Singapore: Mr. H. F. Morbotter.

Per P. and O. str. Ceylon, 20th Jan., 1861.—From Southampton to Hong Kong: Mr. Croom, Paymaster Potter. To Shanghai: C. P. Marsden, W. H. Fittock. To Singapore: Messrs. R. Zapp and A. Baner. From Alexandria to Shanghai: Mr. G. Reddelien. From Marseilles, 28th Jan., to Hong Kong: Don Jose Castellanos, Lieut. G. Van Polanen. To Shanghai: Mr E. A. Duglere. From Gibraltar to Hong Kong: Mr. Hernandez and friend.

Per Glenclune, from London to Shanghai: Mr. Pfaff. Per Robin Hood, from London 21st Dec., 1860, to Hong Kong: Messrs. William and James Wilson.

Per Pilgrim, from London, Jan. 2, to Singapore and Penang, T. Howell, Esq.,

PASSENGERS ARRIVED OUTWARD.

At Hong Kong, from Southampton: Mr. and Mrs. A. S. Dixson, Miss Harmer, Mr. (Chief Magistrate) T. Callaghan, Mr. (Harbourmaster and Marine Magistrate) A. L. Inglis, Veterinary Surgeon Appleton, Captain Eilly, Dr. Chapman, Messrs. Platt and Smith. From Marseilles: Mr. and Mrs. T. S. Borrodaile, Messrs. J. D. Gibb, E F. Parker, R. R. Westall, J. Jackson, and L. Josephs. For Shanghai, from Marseilles: Mr. and Mrs. J. P. Tate, Mrs. Marshall, and Messrs. McLean, Birt, and Schut.

PROGRESS OF THE THIRD CHINA WAR.

FROM OUR OWN CORRESPONDENT.

TIEN-TSIN, 12th November, 1860.

Since my communication to you of the 3rd inst., the chief events of importance have been the ratification of the Treaty by the vermillion pencil of the Emperor, and the arrival of Mr. Bruce at Tien-tsin. The Treaty has been published in the *Peking Gazette*, but not before an attempt was made to escape giving publicity to it. Mr. Bruce reached Tien-tsin at 11 P.M., on the evening of the 6th, and started in two hours on horseback for Peking, hoping to arrive there previous to the withdrawing of the troops, which he has managed to do, also to be presented to Prince Kung, the Emperor's brother, who is at present acting as Regent. By last accounts from Peking, Lord Elgin and Baron Gros were occupying Yamuns, in the Tartar city, but no one had yet been permitted to enter the Imperial city; though report said that permission was to be accorded to the plenipotentiaries, and Sir Hope Grant to do so.

The troops are returning fast, the greater portion of the French force have arrived in the course of the past week—the 67th and 23rd Company Royal Engineers came in on the 10th, and the Cavalry Brigade, with the Royals and 8th Punjaubees, arrived this morning—the two latter regiments embark at once for the fleet, and proceed direct to Hong Kong, *en route* to England and India. The remainder of the army is expected in Tien-tsin in the course of the present week. Sir Hope Grant arrived last night, and is now residing on board the *Granada*, with Lady Grant, who came from Hong Kong about fourteen days ago. As soon as the troops are all dispatched from here, that are intended for England, Sir Hope and Lady Grant proceed on a trip to Japan, where they will remain until final instructions are received from England in reference to the disposal of the troops that will be left in garrison at Tien-tsin, Taku, and Shanghai. The Loodianah Regiment is to remain at the latter place.

Colonel Neale, Secretary to Legation, and the *corps diplomatique* from Shanghai, have also arrived, and are now at Tien-tsin, waiting the return of Mr. Bruce from Peking. The Temple of Supreme Felicity, where Lord Elgin resided in 1858, has been made over to the Embassy, and there Mr. Bruce will take up his quarters for the winter. Brigadier Stavely, of the 44th Foot, will command the garrison of Tien-tsin. The two batteries of Artillery that remain there are to be Armstrong ones; the guns of Barry's and Millward's batteries being handed over to those of Desborough and Govan, in lieu of the old field guns with which they are at present equipped, The troops for England will be encamped at Kowloon, the new piece of land ceded by convention opposite to Hong Kong, until the transports are overhauled, provisioned, and refitted, that are to convey them home.

The health of the troops is by no means such as could be desired. The hospital at Tien-tsin is crowded with sick, and numbers are arriving daily from Peking. The 60th Rifles are

Digitized by Google

stated to have 18 per cent. at present sick, and the other corps have non-effectives in about the same proportion. The Royals, who were 1,000 strong in China, two years ago, return not much over 500, and of these the whole are no means effective. The following is a list of the hospital ships now lying off the Peiho. The *Mauritius*, *Melbourne*, and *Sir William Peel*, steamers; the *America*, *Fauz Allum*, *Lancashire Witch*, and *Jamsetjee Jejebhoy*, sailing vessels. The 67th Regiment marched into Tien-tsin with ophthalmia epidemic amongst the men, about thirty of whom had to be removed to the hospital immediately on their arrival. Death has been at work amongst the medical staff surgeons; Major Denny and Thomson having died within the last few days, the former at Tien-tsin, the latter at Peking. Dr. Thomson was the author of a work on New Zealand, published about a year ago, and very favourably received. Four staff surgeons, three regimental surgeons, and one assistant-surgeon also, have been invalided, —altogether, notwithstanding the recent outcry about sanitary regulations, and precautions for the health of the army, though there has been by no means a great mortality, there has, nevertheless, been a very large amount of sickness, as will be evidenced by the medical statistics, should they be published—also by the very heavy expense which has been incurred for hospital ships—fevers, diarrhœa, and dysentery are stated to be the prevailing diseases. The regiments that have been most unhealthy during the campaign, are the two that came up from the Cape, namely, the 2nd and 60th. In the same way, the regiments that went from the Cape to India during the mutiny, are said to have broken down more rapidly there than any of the other corps serving in the field. Should such be actually the case, there is an apparent inconsistency in the Government, having a sanitarium at the Cape for the men whose contributions have given way in China—it would seem the preferable course to send them at once home. Whether or not, the allegation is correct that the 6th and 73rd Regiments that proceeded from the Cape to Inndia during the mutiny, were remarkable for their non-efficiency from sickness, the fact is unquestionable, as far as the 2nd and 60th are concerned in China, the latter regiment frequently having nearly a hundred men a-day unfit for duty from sickness; amd the general health of the 2nd was so unsatisfactory, on its arrival at Talien-Whan Bay, that it had to be disembarked, before it was actually determined whether any camp was to be formed there or not. My next communication will advise, in all probability, the departure of the greater portion of the army, and the Plenipotentiaries.

(FROM ANOTHER CORRESPONDENT.)

OFF THE PEIHO, November 15, 1860.

We are all on the move now. The *Cambrian*, Capt. McCleverty sailed on the 11th for Hong Kong, to relieve the *Esk*, Capt. Sir Robert McClure, who goes to Singapore as senior naval officer in the Straits.

The *Sampson*, *Magicienne*, *Fury*, and *Inflexible*, are off to England as soon as various court-martials come off, of which I believe there are a large number on different officers and men of the fleet here.

The *Actæon*, *Cruiser*, and *Slaney* arrived here on the 12th, having completed their survey of the North part Gulf of Pecheli, they have had very bad weather, with violent gales of wind. The *Slaney* has lost her foremast, the *Cruiser* having drifted on top of her off Ninghi (where the great wall of China comes down to the sea), her anchors having dragged. I did not like to mention in my last letter about the reported loss of H.M.S. *Camilla*, Commander Colville, off the coast of Japan, but I fear now there can be no doubt of it as I have seen the Commander of the Indian Navy steamer *Berenice*, who was sent out to search the coast of Japan for her. It appears that the *Camilla* left Kakodadi on the 1st of September for Nagasaki, some three days sail off, and on the 25th of October she had not arrived there, or had anything been heard of her. On the 9th of September there was a violent typhoon on that coast, the Prussian frigate *Thetis* was in it, and nearly lost, and a small steam tender the *Frauenlobe*, in company with her, was totally lost, with all hands. Two Japanese men of war also went down in that storm.

We had several deaths here lately. Lieut. Butler, who commanded the *Snap* gunboat, has just died from an attack of fever. Lieut. H. C. Lee, of the *Centaur*, has just died from concussion of the brain and fever, brought on by a fall from his horse. The master of the *Sphinx* has been invalided, and also Lieuts. Bush and Wilkinson of the *Odin*, and Sinclair of the *Sampson*.

The transports are being paid off rapidly, and the troops not ordered to remain here are all proceeding South of India, England, &c.

The Admiral is going to Hong Kong, where the *Chesapeake* is to be docked. Some 6-gun boats will be left in the Peiho now, but who remains in command of navy I do not know. I fancy some of us will go to Hope Sound, at the Mian Tan Islands, for the winter, where we are to have a coal depot; it is a small, but snug, anchorage.

The marines of the fleet have also been re-embarked. An order was issued yesterday that extra pay would be given to them, the same as the Army; but none for the blue-jackets, who have been doing all the hard dirty work on shore and afloat also, working like slaves night and day, Sundays and all, to supply the army. We have taken their stores and provisions from here to Peking without any help. It is a crying shame, and enough to cause a mutiny, and all the fault of Admiral Hope, who would not speak a word for us. I never saw men work harder or better.

For my own part, I cannot see the object of keeping a force here during the winter, as we do not keep one at Peking, which I should think it was quite worth while to do, so as to establish the fact of our having been there, and to give the Tartars time to observe our strength and their own inability to cope with or resist us; besides, I think that after seeing the wonders a residence at Canton has done, we might have worked something the same at Peking; but now, we only have a fleeting idea in the minds of the people of our strength and power, and a track of ruin and desolation along our line of march.

The river is falling fast, and the gunboats in some places ground. It is doubtful if the *Ringdove*, *Beagle*, and *Reynard* will be able to get down from Tien-tsin before the spring. The weather has been bright, dry, and cold, with very strong northerly winds.

(FROM ANOTHER CORRESPONDENT.)

NINGPO, Nov. 10, 1860.

The present campaign, and the taking of the "Celestial City," reveal more fully than ever the utter powerlessness of this Government—indeed, power has not been the reliance of the Chinese Government for ages. Deceit, stratagem, and bribery, these are the chief reliance of all officials, from the Emperor down; these constitute their politics, and their jurisprudence. He is the best officer who can use these arts to the best advantage.

We had a capital illustration of this treacherous mode of government a few days since at this place. A Cantonese pirate leader became particularly obnoxious to the officials, and they, not drring to act on their own responsibility, obtained from a high official at Hangchow a document requiring him to be beheaded. But the next difficulty was, how to execute the order. They had not the courage, and they feared they had not the power, to take the culprit openly at his residence; hence, of course, stratagem must be resorted to. He was invited by a mandarin whom he supposed to be his friend, and was, indeed, a distant relative, to take supper with him. The doomed man went unsuspectingly to his evening entertainment, and in the midst of his wine, he was suddenly surprised by a band of men from the Tao-tai's office, whither he was hurried, and in the court, amid the darkness, was unceremoniously beheaded.

The Chinese are slow to believe that the capital is entered by the Allies. The mandarin runners had taken much pains to circulate reports to the effect that the foreigners had had the worst of it, and the supposed invincibility of Sang-ko-lingsing's army and the capital gave plausibility to the report. If the Emperor now comes to terms, and the forces of the Allies soon leave the city, it will not be generally known that the capital has been taken. And it is of little consequence if it is not. The moral effect of it upon the *Imperial Government* cannot fail to be great, and produce lasting and beneficial results. The Government will have learned, for the first time, the real power of Western nations, and will, no doubt, perceive the importance of a strict regard for treaty stipulations hereafter. It will learn, also, to deal more sincerely and honourably with foreign ambassadors; and it is to be hoped that it may see the necessity of paying some regard to the law of nations, and the etiquette proper to be observed between them. The spell of his Imperial Majesty's fancied invincibility has been broken, and with it his exclusiveism must also give way.

Summary of News from the Far East.

JAPAN.

We have received the following price current from Nagasaki, dated 15th Nov., 1860. Our market for imports has been more active during the last fortnight, and the favourable news just received from Shanghai, will, of course, tend to a further improvement. Present quotations are for

Grey Shirtings, 6½ cy. $2 70c. to $2 80c.; 5½ cy. $2 40c. to $2 50c.; sales small. White Shirtings, small sales at $3; little enquiry. White Spots sold at $2 90c. to $3. Brocades, $2 90c. to $3 10c. Dyed Spots, $3 80c. Dyed Damasks, $6 to $6 25c.; offered. Dyed Brocades more inquired for; sales at $3 80c. and $4, offered for green, purple, and yellow. Chintz Furnitures, $2 50c. to $2 70c.; higher rates obtained in barter. Dimities Lawns and T-cloths; no inquiry whatever. Long Ells, $10 to $11. Spanish Stripes; no transactions. Craped Lastings, sales at $16. Velvets, 25c. to 27c. Camlets, BBB $27 to $28; $30 dollars offered for green, purple, and yellow. Camlets, X $23 50c. to $24; $26 offered for green, purple, and yellow. Sapanwood, hardly saleable at $3. Spelter, no inquiry; $9 nominal.

In Exports, also larger transactions have taken place, the news from Shanghai having induced Chinese here to commence purchasing for shipment to that port: this has already slightly affected prices, and a considerable rise may be looked for shortly. Prices of exports suitable for Chinese consumption are now full 50 per cent below what they were before the commencement of the late troubles in China. Bees-wax. Nearly all that is offered is much adulterated; pure is difficult to obtain at $35. Camphor, $17 to $20. Sulphur, $2. Vegetable Wax, first quality, $11 50c.; scarce. Iron, $2 80c. Isinglass, $20 to $26; holders firm, although a good supply. Tobacco. Fine young leaf, $4 80c. to $5 50c.; coarse, $3 50c. to $4 50c. Present stocks small, but large supplies expected shortly. Rape-seed. Supply moderate; $1 60c. to $1 80. Cuttle-fish, $5 to $9. Rape-seed Oil. Very scarce; $4 75c. to $5 25c. asked. Gall-nuts. Obtainable at $6 to $6 50c.; few transactions. Mushrooms. A good supply; purchases at $18 22c.

All quotations for produce are at per picul of 133 1-3rd lbs.

The Prince of Mito, the great opponent to foreign intercourse, is reported to have been murdered. The Prussian Minister expects to be several months in procuring a Treaty. The schooner *Frauenlob*, containing all the presents from Berlin, is said to be lost, also H.M.'s B. *Camilla* with all hands.

A case has been tried against an American citizen named Van Reed, for visiting the City of Yedo, which, it is alleged, is against the Treaty. After a good deal of vexatious delay the case was dismissed. It appears that the American Minister at Yedo was the principal instigator of the trial. The editor of the *China Mail* on this subject, says:—

"It may be remembered that Mr. Alcock published a circular lately, containing a letter from Mr. Howard Vyse, in which the editor of this paper was accused of having committed 'an unscrupulous violation of a national Treaty,' in having visited Yedo, the capital of Japan. This compliment—for such it really is—was followed by a gentle hope that the editor would return to Japan, and place himself under the jurisdiction of the British authorities there. We hope to have that pleasure whenever circumstances will allow, but we also hope before that period, to have the opinion of the Foreign Office on the question, whether it is consonant with British justice, that a British subject should be officially notified as having committed a misdemeanour, without any evidence having been taken on the subject, without his having any opportunity of refuting the charge, or explaining the circumstances, and without his having any knowledge even of such a charge being brought, until an equivalent to condemnation upon it met his eye in an official notification in the columns of a public newspaper. Mr. Vyse is a gentlemanly person, and, unless goaded by others, would not have made such a mistake. The Japanese—who are excellent judges of character, call him 'the baby,' and we should be sorry to attach any blame to him in this matter. Mr. Alcock is the responsible party, having published the circular; and, in the first instance, we shall leave H. M.'s Foreign Secretary to deal with him."

CHINA.

SHANGHAI.

The rebels are again commencing to make a stir in this neighbourhood. They have re-appeared at Sunkeang, and beaten a large body of Imperialists outside that city, and also at Tsingpoo. A report, issuing from the Taotai, is to the effect that 400 boats, full of insurgents, are on their way towards Shanghai. It seems that they are again gathering round this place, and the city authorities are in a great state of alarm. The same fear prevails at Ningpo, on which the rebels are also said to be marching, and the trade at that port has almost entirely ceased.

AMOY.

The docks at this port have been completed, and can receive vessels of 300 feet length.

SWATOW.

We learn from Swatow that the prisoners were delivered up, and everything settled peaceably, on the morning of the 7th. The prisoners were five men belonging to the gunboat *Weasel*, who were captured at the village of Bochoey. On the morning of the 5th the *Highflyer* arrived off the village, having on board two Chinese officers, deputed by Governor-General Laou, and an interpreter. The holders of the five captives required as terms of their release, perfect immunity for the raid on the foreigners at Double Island, indemnity for the effects of the gunboat's bombardment, and hostages in the shape of shroffs to guarantee the fulfilment of these conditions. The interpreter (Mr. Mayers, interpreter to the Allied Commissioners) in concert with the Chinese officers, engaged in fresh negotiations with a view to renewed hostilities should such negotiations be as fruitless as before. Captain Heath, however, we understand, had ignored the cause of the bombardment of the village by the *Weasel*, as not furnishing sufficient ground for vigorous measures, so full of risk as those undertaken, and the present arrangement has terminated the matter, with the people at least, although probably not with the British officials.

HONG KONG.

The more important events at the North appear to have excluded matters of local interest.

The Commission on Hong Kong Abuses had resumed its sittings, the Chief Justice having returned to the colony after a short leave for recreation.

The administration of the Post-office has again been the subject of comment. It does not appear to give satisfaction now it is under the Colonial Government, but it is evident that some steps to improvement have been taken. Postage stamps are to be introduced, which will obviate the loss and annoyance of procuring change for dollars, &c.

Major-General Sir Robert Napier arrived here from Peking on the 27th November, and will shortly proceed to India. At Foochow there has been a bloody and desperate conflict between the the Mandarins and some Cantonese pirates. A fire, caused by the explosion of gunpowder, took place near the cross-road to Tam Achoy's, in the Kwong-yune shop, a marine store. The true cause of the explosion cannot be learned, but it has been ascertained that the master of the shop had bought some damaged gunpowder, and, it is supposed, the gunpowder had been exposed to dry, and became ignited. Owing to the fire occurring during the day, a slight fall of rain, and prompt measures—several engines being on the spot soon after the fire became known—it was soon extinguished. Nearly a dozen bodies have been dug out from the ashes, and their appearance is revolting to look at; two or three coroner's inquests have sat on the bodies as they have been found. None of the men connected with the shop are supposed to have escaped.

An ordinance has been published for the registration of newspapers, by which bonds to the extent of £250 have to be given.

The *Christian* (French), with stores to the Peiho, fell in with a fleet of piratical junks, by which she was attacked and taken. The crew were all murdered.

The wreck of the French man of war *Isere* has been sold by auction to Captain Tucker, for $5,100.

CANTON.

The *Friend af China*, in reporting the trip of the steamer *Bopeep* to Fatshan, says,—the natives at that place were not at all alarmed, and adds, that we have heard with much pleasure that the *Hooppe* had given the *Bopeep* a permit to run in the inner waters; either in the direction of Loon-kong (the silk district), or Shek-kong (sugar district), and that early next week she will make a voyage hence to Kow-koon and back, *en route*, the several trading towns of Ping-choon, San-siak-Shek-wan, by Sie-chu-san, Shetow, Sung-kong-Lucktow and Cum-chook. These are the sort of matters we want to know, and we think, with the *Friend* at Canton, we shall have our wants attended to. It's an ill-wind that blows no good luck.

PHILIPPINES.

MANILA.

The dates from this place come down to 27th Nov., *via* Singapore, through which place they will now come during the N. E. Monsoon.

An amusing incident of the superstitions of the natives

Digitized by Google

occurred lately. A sentry, while on duty, observed, as he thought, a human form, which stood motionless, and on his firing at it, appeared to rise higher, and emit volumes of fire; he then called on his comrades to fire. They did, and never was a malignant spirit so peppered before, but as they fired the Cawfre's bulk and height went on increasing; the infernal flame from a stream grew gradually into a mighty river of fire; the eyes from red hot balls, saucers, and soup plates, had become burning worlds; the woolly locks to fiery serpents changed, the horrible form gradually filled the surrounding gloom, and when the authorities and reinforcements arrived on the spot, had expanded into invisibility to those who possessed not the eyes of faith.

The *Graham*, from Glasgow *via* Singapore, arrived on the 7th, but had no piece goods; and the *Sales*, the first vessel from Liverpool, can scarcely be expected before the middle of December. The *Fortuna*, from Boston, still keeps out. She will in all probability take most of her cargo on to Hong Kong. The market being, at this season, bare of produce, any little demand causes an advance on quotations, as has been the case during the last fortnight with unclayed sugar and hemp. The *Primera de Santander*, that left Manila 27th July for England, having experienced bad weather and thrown cargo overboard, put into Zamboanga leaky, and during a severe gale on the night of the 13th September she was driven ashore and lost only a small quantity of cargo, being saved in a badly damaged state. The *Gharra*, from England for Shanghai, with coals for Government, has put in very leaky, and is being discharged for repairs.

COCHIN CHINA.

The French troops have been inactive, and, with some difficulty, hold their own. Reinforcements from China were daily expected.

SIAM.

BANKOK.

We have been favoured with an extract from a letter from Bankok, which we think will be found useful:—

About a week ago I gave my last lecture or representation, with practical experiments, on physics and chymistry, in the Royal Palace before the King himself. He speaks a little English, and made me explain to him many things that excited his curiosity, particularly on the nature of different gases and the method of making them, during which time he either held me by the hand or leaned on my shoulder. Although he is said to possess inexhaustible treasures and be enormously rich, he gave me no proof of his generosity, and presented me with only 150 ticals, or about £25, and expressed himself much gratified with the representation. The audience consisted of at least 3,000 persons, including the great officials of the court and the ministers of state, together with their numerous retinues, and not only the Royal Queen-bee, but between two and three thousand other bees of the King's beehive, of whom, however, I could not see much, as they were concealed from the public gaze behind a sort of lattice screen.

The space of ground on which the Royal Palace stands is equal to the area of a middling-sized town in Germany, and consists of more than a hundred different buildings, each of the size and extent of a palace, and every one of these is surrounded by large courts, here and there planted with trees and shrubs. In each court is a battery of cannon of different calibre, each gun being covered over by a little building or shed, looking like a huge dog-kennel, to protect it from the rain and dust. I estimate the total number of guns in the different courts of the Palace to amount to above eight hundred, which materially prevent the possibility of any outbreak or palace revolution—a truly Asiatic way of keeping order amongst a sovereign's loving subjects.

There is perhaps no country in the world in such an abject and degraded state of slavery as this kingdom of Siam. Their king is to them not a man, but a Divinity, his title being *Phra Mongkut*, or "terrestrial God." Before him, and in his presence, every other son of man not only bows, but has to crawl on the ground, or work his way on all fours; whilst it is strictly prohibited to look up to him, under the generally received fiction that the brilliancy of so much majesty would dazzle the optics so deeply as to deprive the poor earth-worms for ever of their eyesight. Even the Crown Prince is subject to this ceremonial, the only exception made being the King's brother, the so-called Second King, a sort of sleeping partner, who takes but little interest in the affairs of the State, but enjoys a princely *appanage* of one-third of the whole revenue of the kingdom. He is styled by the title of "Majesty," inhabits a magnificent palace of his own, and contents himself with having only eight hundred wives. I may add, that he is more popular amongst the Europeans here than his brother, as he possesses a greater degree of intelligence and civilisation, and speaks fluently French and English.

Now just fancy the picture of my above-mentioned representation before the eyes of royalty! All the grandees and nobles of the land crouching on the ground in the most submissive attitude, and not daring to raise their eyes for fear of being struck blind by the dazzling light of majesty, and I alone, the son of a simple Hamburg burgher, standing erect in the midst of this vast assemblage, and talking to the King in the most free and unconstrained manner, explaining to him the mysteries of Nature.

The present sovereign of Siam is a little, old, dried-up man, of about seventy years, with the mark of a former cancer or other wound on his right cheek, and innocent of all pretensions to majestic bearing or claim of being called handsome. But he has some very beautiful children, with tolerably white skins, or rather pale olive colour. Some years ago nine of his wives presented him with fifteen sons and daughters within the space of a twelvemonth. He has altogether no less than eighty-four children, though he only married when forty years old. Up to that time he had been carefully immured in a Bhuddist convent, when on the death of his father he was released from his spiritual confinement to ascend the throne of his ancestors and be proclaimed King.

During one of the Siamese festivals (which lasted a whole fortnight) I took the opportunity of joining a hunting party, got up by the British Consul, Sir Robert Schomburg and Herr Thies, the Hamburg Consul, and make an excursion into the interior of the country. We went in two large boats, each manned by thirty native rowers, placed at our disposal by the King, in consequence of which act of royal graciousness we were of course everywhere received with the most cordial hospitality. I was greatly struck with the extreme luxuriance and beauty of the vegetation, which is equal to anything I have ever seen in any other tropical country, and forms such an agreeable contrast to the neighbourhood of Bankok, which is "flat, stale, and unprofitable."

We shot a couple of elephants, three crocodiles, an eagle, a vulture—the latter measuring 14 feet from wing to wing—innumerable monkeys, and a lot of wild pigeons and other birds of the most beautiful and brilliant plumage.

THE PRUSSIAN MISSION.

His Majesty the First King of Siam has caused it to be intimated to the Prussian Mission at present in Eastern Asia, that it will be inconvenient to him to receive the Plenipotentiary before the end of March, as during the months of January and February he will be engaged in performing two very important ceremonies connected with the Budhist religion. The first of these will consist in erecting a high pyramid, or gilt pillar, on the top of the sacred pyramidical house at the holy city of Phra Bard, and enshrining some sacred Budhist relics in two stone pagodas recently erected at that place. The holy city being situated seventy miles from Bankok, at the foot of some mountains, in thick jungle, it is necessary that a dry time of the year should be chosen for the pilgrimage thither, as his Majesty will be accompanied by his family and several of the principal officers of State, and the time occupied altogether will be about a fortnight. The second of the ceremonies which will engage his Majesty's attention, will be the welcoming and receiving the new white female elephant of Yassodhuri, which will leave her present place of abode in the end of December next, and arrive at Bankok in February. Dry weather is also essential for the safe transit of the sacred animal, as it has to traverse a mountainous and jungly road.

JAVA.

There have been no further disturbances, and nothing of interest to report from any of the settlements.

MALACCA STRAITS

SINGAPORE.

The Governor intended leaving Singapore on the 3rd Jan., for Malacca and Pinang, and he will be absent about three months.

The little steamer *Pigeon* arrived in Batavia in fifteen days from Singapore. Passengers and captain half-starved. They were obliged to stop almost daily to cut wood for fuel. There is a strong probability of the *Pigeon* being sold at Batavia, in which case she will not return to Singapore.

At a meeting of the committee at the Sailor's Home, it was resolved to close that useful, and we may add, indispensable institution, on the 1st of January, for want of sufficient aid to enable the committee to continue its existence. The amount of $90 per month is all that is at present subscribed towards its support, and only about $60 per month additional is required to carry it on.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANCHANT—On Nov. 23, Mrs. C. Anchant, of a son.

CHOPARD—At Singapore, on Nov. 17, Mrs. H. D. Chopard, of a son.

GENAEHR—At Macao, on Nov. 22, the wife of the Rev. F. Genaehr, of a son.

PERREAU—At Singapore, on Nov. 20, Mrs. George Perreau, of a son.

MARRIAGES.

BAUMGARTEN—NEUBRONNER—At Malacca, on the 21st Nov., W. Baumgarten, Esq., Collector of Assessment, to Mrs. Agnes, relict of the late T. A. Neubronner, Esq., of Malacca.

JACKSON—MURPHY—At Penang, on the 1st of December, at St. George's church, by the Rev. James Mackay, William Jackson, Esq., Agent Chartered Mercantile Bank, to Margaret, eldest daughter of the late P. Murphy, Esq., of Dublin, Ireland.

DEATHS.

BRIGGS—Lost, on board H.M.S. *Camilla*, on her passage from Hakodadi to Karawanga, aged 17, Mr. Perceval Briggs, midshipman, eldest son of John Henry Briggs, Esq., of the Admiralty, Whitehall.

BROOKE—On the 28th Oct., at Santubong, Borneo, of dysentery, Francis Basil, eldest son of J. Brooke Brooke, Esq., of Sarawak, aged 3 years and 1 month.

FITZROY—Lost, on board H.M.S. *Camilla*, in Sept. or Oct. last, in the Japan Seas, aged 25, Lieut. Almeric Hugh FitzRoy, son of Lieut.-Colonel Hugh FitzRoy, late of the Grenadier Guards.

LEES—On the 1st Nov., at Shanghai, Lieut. H. C. Lees, R.N., H.M.S. *Centaur*, eldest son of Henry Lees, Esq., Polkemmet House, Linlithgowshire, aged 27.

VON DADELSZEN—Lost, on board H.M.S. *Camilla*, while on a voyage from Hakodadi to Kanagawa, Japan, in the 23rd year of his age, Conrad Donner Collins, fourth son of G. M. von Dadelszen, Esq., of Frankfort Lodge, Clevedon, Somerset.

WYNNIATT—On the 29th Nov., 1860, of dysentery, on board the steamship *Nertham*, off Point de Galle, on his passage home from China, Commander Robert James Wynniatt, R.N., of H.M.S. *Nimrod*, and son of the late Rev. Reginald Wynniatt.

COMMERCIAL REPORT.

CHINA.—IMPORTS.

SHANGHAI.—Owing to the reported advance of the rebels on that port and Ningpo, the sales of manufactures have not been large; the following is a summary for the fortnight:—Grey shirtings, 32,000 pieces; white, 5,800 pieces; spotted shirtings, white, 5,000 pieces; coloured, 1,600 pieces; T-cloths, 7,000 pieces; brocades, 2,000 pieces; chintz, 2,500 pieces; American drills, 12,000 pieces; (stock 320,000 pieces); sheetings, 200 pieces (stock 33,000 pieces); Jeans, 3,000 pieces (stock, 40,000 pieces); longells, 700 pieces; camlets, 100 pieces Spanish stripes, 240 pteces.

CANTON.—The sales during the fortnight have not been large, which may be owing to their having been no official notification regarding the new Tariff of Duties which it was expected would come into force on the ratification of the Treaty. The followiug sales have been reported:—Grey long cloths, 18,100 pieces; white, 3,000 pieces: cotton yarn, 275 bales; brocades, 1,900 pieces; chintz, 800 pieces; American drills, 500 pieces; Jeans, 940 pieces; T-cloths, 400 pieces; long ells, 2,200 pieces: camlets, 360 pieces; lastings, 480 pieces; lead, 1,350 piculs; iron, 1,300 piculs: betelnut, 800 piculs, Sandalwood S. S. Islands, 1,350 piculs. Quicksilver, 210 flasks.

CHINA—EXPORTS.

TEA.—At Shanghai. Black: A trifling business has been transacted during the fortnight, but as merchants show no inclination to accede, we anticipate the teamen will be compelled to yield, as the stock at Ningpo will probably be hurried on here from the fear of the rebel attack on that city. Settlements are of Hohow 1,706 chests, at 19 to 21½ taels; of Ningchow 676 chests, at 29 taels; of Hoochow 427, at 20 taels; and of Flowery Pekoes 175 chests, at 30 taels; in all 2,984 chests. in addition to which 4,550 chests of contract teas have arrived, making a total of 7,530 chests, and for the season to date 37,839 ckests, against 181,954 last year, and leaving an unsold stock of 9,600 chests against 38,000 last year. Green: Operations since the mail have been almost entirely confined to foreign import of Japan tea and Pingsueys from Ningpo. High prices are talked of by the teamen, which, combined with the expected competition for the American market, and the almost certain deficient supply, will cause a very small export to Great Britain. At Foochoo: We take the following from the circular of Messrs. Fussell and Co. The settlements for the fortnight have been—Congou, 26,600 chests, at 12 to 27½ taels ship off.; Souchong, 1,520 chests, at 26½ to 30½ taels ship off.; Flowery Pekoe, 316 chests, at 26½ to 32½ taels ship off.; Oolong, 5,600 packages, at 15½ to 25 taels ship off., Scented Tea, 560 boxes, at 21½ taels ship off. The above settlements of Congou have been made at the following quotations:—Dust to common kinds, 12 to 17 taels ship off.; Good Common to good Flavory kinds, 18 to 27½ taels ship off; Ho-How kinds, 19 to 22½ taels ship off.; Ningchow descriptions, 24 to 26½ taels ship off. At Canton the settlements of the fortnight are reported as under. Congou: 13 chops Oonams and Oopacks, at 24 to 30 taels; 500 half-chests Tayshans, at 18 to 30 taels. Scented Teas: 5,000 boxes Orange Pekoe, at 20 to 30 taels, and 6,500 ditto. Caper, at 14½ to 22 taels. New Country Greens: 32 chests fine Hyson, at 54 taels; 9 chests cargo ditto, at 30 taels, and 20 chests Hyson Skin, at 20½ taels; 6,000 ten catty boxes gunpowder, and 400 half-chests imperial, at 14½ to 19 taels. At Amoy rates are down at $2, but business is active.

RAW SILKS.—At Shanghai we have had but little less anxiety shown in purchases than was alluded to in our last report, the settlements of the fortnight amounting to 5,000 bales, resulting in an advance in prices of 5 to 10 taels per pecul on all description of Tsatlees. Arrivals from the interior have been on a par with the sales, leaving us with an undiminished stock of 8 to 9,000 bales. It is reported that owing to the high value of Carolus Dollars at this port, even present rates show but little margin on the prices paid in the producing districts. Good silks still continue scarce, but of other qualities there is an abundant supply. Total settlements to date are estimated at 51,000 bales. Quotations: Tsatlees, No. 3, 395 to 405 per picul; 4, 360 to 370; 5, 330 to 350. Taysaams, No. 1, 345 to 350; 2, 325 to 330; 3, 295 to 310; 4, 250 to 290. At Canton, the settlements of the fortnight are rather larger than usual, being reported 300 piculs Loonkong and Gowkong (probably for India) and 150 piculs re-reeled Cumchook for the United States. Prices are $5 to $10 higher and the stock is small.

BATAVIA IMPORTS.—The Joachim, Christian Rolston, and Amelia, have arrived from England. Notwithstanding the dullness of the season, there have been considerable sales made of piece goods, and many articles continue in brisk demand. though not at prices that leave much margin.

EXPORTS OF TEA AND SILK TO GREAT BRITAIN.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From Liverpool, Nov. 21: Spiridion. From Newcastle: 16, Rapid. From New York: 17, Western Continent.

At HONG KONG, MACAO, and CANTON.—From London: Nov. 24, Spartan. From Cardiff: 19, Cornelius W. Edward, Maria Elisa. From Hamburg: 23, Marco Polo. From New York: 19, Samuel Russell.

At SINGAPORE.—From London: Nov. 23, Delhi. From Hamburg: 28, Washington. From Newcastle: 22, Sir Robert Jackson.

SAILED.

From FOO-CHOW-FOO.—For London, Nov. 13, Mirage, William Mitchell; 14, Anglo-Saxon. For New York, 16, Competitor.

From AMOY.—For New York, Nov. 14, Maury.

From HONG KONG, MACAO, and CANTON.—For London, Nov. 15, Milbrook; 13, Cleveland; 14, Herculean; 19, Capiolani. For Falmouth, 10, Gustav and Earnest. For Cowes, 14, Hermann.

From SINGAPORE.—For London, Nov. 23, Imperatriz (st.); 26, Asia. For Hamburg, 23, Loopuyt; 29, Maria Louisa. For Cork, 26, Princess Somawaty. For New York, 23, Lucky Star; 30, Ceylon.

From PENANG.—For London, Nov. 14, Malvern; 15, Julia.

LOADING.

At KANAGAWA.—For London: Pursuit, Ocean Gem.

At SHANGHAI.—For London: Aerolite, Snow Squall, Tung Yu, Solent. For New York: Florence, Swordfish.

At FOO-CHOW-FOO.—For London: Lauderdale. For Melbourne: Dennis Hill.

At AMOY.—For New York: Kathay.

At HONG KONG, MACAO and CANTON.—For London: Harkaway, Henry Miller, Heroes of Alma, Ranee, Gabalva, Minerva, Neville. For Liverpool: Valdivia. For Havre: Maria Elisa. For Europe: Balder. For Hamburgh: Cecilie. For New York: Conqueror, Haze, M. Whitridge, Swallow, Wizard. For Havana. Francis I., F. P. Sage, H. G. Sussana, May Queen, A. Thorndyke, Greyhound, R. del Oceano. For Sydney and Melbourne, Jupiter, Pons Alu. For San Francisco: Jacob Bell, Moonlight, Torrent.

At MANILA.—For Liverpool: Graham. For Boston: Albers. For New York: Eagle, Charmer, Templar. For Melbourne: Mountain Wave, Neptune. For San Francisco: B. Howard.

At SINGAPORE.—For London: Beatrice, Patriotess, Xephias. For Liverpool: Aden, Elizabeth. For Falmouth: Augusta Hillman. For Boston: Humboldt.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London, tea, £3; silk, £5. To New York, tea, $12; silk, $20. The advance in the price of bean cake has caused a check on the demand for tonnage to Swatow, and there is not much doing.

At FOO-CHOW-FOO.—To London, £3. 10s., at which rate several vessels are loading.

At HONG KONG, MACAO, and CANTON.—To London, £2. 15s. to £3. To New York, $10. The amount of disengaged tonnage is unusually small, as also the vessels expected. From these facts and the north-east monsoon, which will check vessels coming to these ports, the prospects of the shipping interest at present is good. The following charters are reported: Minerva, from Canton to London, at £2. 15s. The Cecilie, to Hamburg, at £3. The Comet, to New York, at $10. The Knight, from Manila to Great Britain, £3. Continent, £3. 5s. Several vessels are reported to Bankok and back, at 45c. to 50c. per picul. The Claramont, with emigrants, at £9 per head, for Demerara. The H.G. Susanna, at $65, for Havana. The Giovanni, at $66 for Callao.

At BATAVIA.—To United Kingdom, £3. 17s. 6d. Tonnage is more plentiful, and rates are well maintained. The Crouch Brothers, Exact, and Mary, load at the above rate. Several ships have been laid on for Holland, at £3. 17s. 6d. The Wilhelmina and Elise takes a cargo of sugar to the Gulf of Persia, and brings a return cargo for $17,000 in full.

At SINGAPORE.—To London, £3. 2s. 6d. to £3. 5s. The engagements for the past fortnight have been mostly from the rice ports for Europe, and a good demand still continues. There are few ships disengaged, those arriving in ballast being under charter from China, either to India or the rice ports. The charters reported are—The Delhi, to London, at £3. 2s. 6d. Richard Cobden, to Liverpool, at £3. 3s. China, for the Continent, at £3. 2s 6d.

At MANILA.—To London. Sugar, £2. 10s.; hemp, £3. 7s. 6d. to £3. 15s. To New York: sugar, $8; hemp, $8. A decline was soon expected in these rates, as produce was becoming scarce.

FRENCH CONSULS IN CHINA.

We understand from an occasional correspondent in China, that Mr. Vaucher, a Swiss appointed Vice-Consul of France in Hong Kong, has been dismissed from his authority, in consequence of having compromised himself in a personal encounter in the streets of Macao.

If the present French Minister has not been fortunate in the selection of such a representative, we have reason to suppose that the consuls generally have been better chosen by the French Government.

The following is a testimonial of gratitude addressed by the British, American, and other foreign residents in Shanghai, to Mr. C. de Montigny, Consul-General of France in China, on his departure from Shanghai to take the management of the general Consulate in Canton, which place he was unfortunately compelled to leave on account of his health, shortly after his arrival. He is now in France recovering his health, and we hope soon to see him back again in China. The following is a copy of the address:—

Shanghai, June 28, 1859.

Sir,—As the time of your departure from among us has now arrived, we, the undersigned resident at this port, wish to convey to you our acknowledgment of your past services, and our best wishes for your future career. During the long period for which you have borne the office of Consul, and latterly of Consul-General of France, at Shanghai, we have witnessed, and can bear testimony to your untiring efforts and zeal in promoting the interests of all, whether those of your countrymen or of foreigners generally, and in removing the difficulties and impediments which must necessarily arise in opening a Chinese port to foreign intercourse. With every good wish for your future prosperity and success—We are, &c. Signed: Dent and Co.—Russell and Co.—Lindsay and Co.—Augustine, Heard and Co.—Oriental Bank Corporation, pp. W. Lamond, Sub-Manager—Turner and Co.—Smith, Kennedy, and Co.—Harkort and Co.—Fletcher and Co.—Wetmore, Williams and Co.—George Barnet and Co.—Bower, Hanbury and Co.—Gibb Livingston and Co.—W. R. Adamson and Co.—Blenkin, Rawson, and Co.—Chartered Mercantile Bank of India, &c., pp. Richard Newby, Manager—Thomas Platt and Co.—Gilman and Co.—Birly, Worthington, and Co.—H. THE CANTON PRIZE MONEY.—A notice has been issued from the Admiralty that the officers and men of her Majesty's late ship *Raleigh*, who were not draughted into other ships on the China station, but were sent to England or otherwise disposed of, and who appear to have been three months on that station to the eastward of Singapore, will be allowed to participate in the grant now in course of distribution.

RUSSIAN CONVENTION WITH CHINA.—The *Nord* publishes the following telegram:—St. Petersburg, January 9. General Ignatieff and Prince Kung signed and ratified at Peking, on the 2nd of November, an additional convention of the Treaty of Tien-tsin. This convention confirms the demarcation agreed upon as regards the right of traffic along the Amoor and the Oussouri. Trade is free across the new frontier. Russian traders may go to Peking. Russian consuls and factories will be established at Kashgar and Ourga. There will be a monthly mail between Kiahkta and Peking.

Continental Intelligence.

FRANCE.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Jan. 8, 1861.

The documents relative to China by the French official organ are given, as was expected, in all the Paris journals, but in most cases without comment. The *Pays*, however, has the following reflections on the subject :—

The despatch of Baron Gros to the Minister of Foreign Affairs will have been read with curiosity, full of interest and sympathy. Whatever concerns the external power of France and the prestige of our arms never finds the public cold or indifferent. The French army is the most striking expression of the national genius. We may admit some inferiority in other respects, but in the battle-field our glory gains to-day over all. As Baron Gros justly says, our success in China is complete, and surpasses all the hopes that were formed. The populations of those distant countries must have been greatly moved by the spectacle presented to them—the representative of the Emperor of the French entering the immense city of Peking with 2,000 of our soldiers for a *cortege*; the flags of our army and navy floating victoriously before the palanquin of the ambassador, which was borne by coolies decked with tricoloured insignia; the treaty of Tien-tsin and the seals of the embassy carried at the head of the procession by four non-commissioned officers of different corps; then a section of our artillery, and the streets along which the *cortege* passed lined by our soldiers—such was the spectacle presented at 6,000 leagues from France, in the midst of astonished mandarins, and of crowds who are complete strangers to our manners and habits, and it excites the imagination as much as it calls forth patriotic sentiments. Our history will inscribe with pride these brilliant events.

The *Moniteur*, in its summary of political news, says :—

It has been remarked that at the time at which the Holy Father delivered his allocution before the Sacred College, the recent event accomplished in China, which must have given sweet consolation to the Chief of the Church, were not known at Rome. In learning these great results of the victories of the French, namely—the bishop nominated by the Holy See replaced in possession of his flock, and the old church of Peking restored to divine worship—the heart of the Holy Father must have felt delight at the thought that the Roman Catholic faith has in the soldiers of France such intrepid defenders even in the most distant parts of Asia.

A Paris letter in the *Independance* has the following :—

General approbation has been expressed here at the refusal of General Montauban to take part in the destruction of the Summer Palace of the Emperor of China, because that refusal is ascribed to the desire of the general not to assume the responsibility of the seemingly barbarous character of such a measure. It is, however, right to observe that of all the means employed by the Allies to constrain the Chinese Government to accede to their requirements, the act in question, which cost the life of no one, was the most efficacious. It appears, besides, from the English documents published, that the French authorities only refused their co-operation in the act, because they feared that, instead of hastening the re-establishment of peace, it would have a contrary effect, by causing the Tartars to adopt desperate resolutions. Events have proved that on this occasion Lord Elgin, whose humane sentiments are well known in England, judged the situation more correctly; perhaps if at the beginning the plenipotentiaries had acted with the same energy and severity, and had refused to enter into any nagotiations until they were beneath the walls of Peking, the war would have ended much sooner.

Among the promotions in the Legion of Honour are two Grand Crosses, Generals Rohault de Fleury and General Montauban, and one Grand Officer, General Fulgue d'Oraison. M. Michel Chevalier, Grand Officer, and M. Escayrac Delauture, Commander. The Emperor has also conferred upon General Ignatieff, Envoy Extraordinary and Minister Plenipotentiary of Russia in China, the Cross of Grand Officer of the Legion of Honour, as an acknowledgment of the willing assistance he never ceased to give to the French Commissioner Extraordinary during the negotiation of the Treaty which has just been signed at Peking.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Jan. 7, 1861.

The great event of the day is the final acceptance on the part of the King of the resignation of Mynheer Rochussen, hitherto Colonial Minister. About a fortnight ago the Second Chamber, in the discussion of the Budget, after having previously passed without a single dissentient voice the first ten items, threw overboard altogether the eleventh—the Colonial Budget—by a decided majority of 41 to 28 votes, in a very full house, there being only three members absent. In the course of the debate Mr. Rochussen made a long and very brilliant speech on the advantages to be derived from the introduction of free labour in Netherlands India, and in defence of the colonial policy followed by the present Cabinet, but to no purpose, and after the division he tendered his resignation. The King repeatedly begged him to retract it, but finding him resolved to retire, he has, at length, just consented to accept his resignation, and appointed Mr. Lotsy, the Naval Minister, to undertake, provisionally, the current business of the Colonial department till arrangements are made for the definitive filling up of the vacant post. It is not yet known who is to be the new Colonial Minister. Many persons have been named by the industrious quidnuncs. Amongst others, it is rumoured that the appointment has been offered to the ex-Minister, Mr. G. L. Baud, who, however, is said to hesitate, or, at all events, to propose conditions.

The King has appointed a commission for drawing up a new code of criminal law for Netherlands India. The object sought to be gained is the alteration of the Code Napoleon, now in force in that country, and to bring it more in accordance with the ideas of the natives and their ancient laws, and adapt it to their present requirements. The members of the new Commission are Mr. Junius van Hamert, Mr. Attorney-General François, and Professor Keyser, of the University of Leyden, whilst Mr. A. de Pinto, the barrister, will undertake the functions of Secretary to the Commission.

Offers have been made to the Dutch Government by Messrs. Glass, Elliott and Co., of East Greenwich, after laying the Rangoon and Singapore telegraph cable, to employ their staff of engineers in raising and repairing the Singapore and Batavia telegraph, which appears to be helplessly broken. It is not known what reply the Government has returned to this offer.

The King has granted a charter to Messrs. H. Hope Loudon, P. J. Landry, W. R. Baron van Tuyll van Serooskerken, and Steengracht van Osterland, all residing at the Hague; Mr. J. van Vollenhoven, of Rotterdam, E. A. Berkmans de Weert, and G. L. J. van Hucht, of Harlem, for the formation of a joint-stock company, with limited liability, and head-quarters at the Hague, for working the mines of tin, and other metals, in the Island of Billiton, under the style and title of the "Billiton Company."

A petition has been received at the Colonial Office from the Dutch residents in Japan, complaining of the insecurity of their lives and property in that country, and of their being the continual victims of the oppression and chicanery of native officials. They state that the Netherlands Consuls and Vice-Consuls residing in the ports of Japan opened to foreign trade act as if they were there more by sufferance than by right of treaty, and enjoy neither the respect and confidence of the natives, nor authority to protect their own countrymen. They, therefore, respectfully call the attention of Government to this very unsatisfactory state of things, and hope to see their position ameliorated.

By virtue of a Royal Decree, H.M.'s screw steamer *de Berkel*, now lying at Helvoetsluys, is ordered to be commissioned immediately for service in Netherlands India. The command of this vessel is given to Lieutenant of the First Class, P. van der Velde-Erdbrink.

In pursuance of another Royal Decree of the 20th of December last, No. 66, the fourth-class steamer *de Vecht* is ordered to be put in commission on the 16th of January, and to proceed from Helvoetsluys to the East India station. Lieut. H. A. Modderman is appointed to the command.

The number of vessels that arrived at this port during the past year amounted to 1,980, whilst 1,949 sailed. Among the former 354 were from British ports, 198 from Java, and 9 from Sumatra. Amongst the departures were 94 vessels for Java, 6 for Sumatra, 8 to Singapore, 1 to Kanagawa, and 5 to the Cape and China.

Mr. J. Loudon, one of the chief officers of the Civil Service in Netherlands India, now in this country on leave of absence, has been decorated by the King with the Insignia of the Royal Order of the Netherlands' Lion.

Accounts have been received by Government of the safe arrival of H.M.'s steam corvette *Harlemmermeer*, Lieut. Commander de Koning, on the 25th of November, at Santa Cruz, Teneriffe. She continued her voyage to India on the 28th of the same month. All well on board.

In Holland ladies are considered as perfectly capable of conducting intricate and responsible mercantile operations. Many of the banking houses and commercial firms in this city are carried on by the widows of their original founders. By Royal Decree of the 15th ultimo, No. 59, just published in the official *Staats-Courant*, Mrs. Jane Wollenhoven, Directress of the Association for Marine Assurances in this city, has been granted

Digitized by Google

an extension of her former concession, for ten consecutive years, commencing from the 1st of January, 1861.

Mr. Th. Kroes is appointed Vice-Consul at Shanghai for H.M. the King of the Netherlands.

Official accounts received here by the last overland mail state that the revenue of the Custom-house department in Java and Madura, during the month of August last, amounted to 1,103,316 florins, and for the first eight months of the year to 6,687,505 fl., showing an increase of 923,467 fl. against the corresponding period of the previous year, and of 1,359,597 fl. as compared with 1858.

At the adjudication of the contract for the delivery of 3,200 tons of iron rails for the Dutch and Rhenish Railway, offers were sent in by sixteen different contractors, ten of which were from British companies and private firms, three Belgian, two French, and only one Dutch.

From Harderwyk we learn that the number of recruits at that depôt for service in the East Indies amounts to 400 men, exclusive of 315 Swiss and Germans enlisted under the former regulations, and now doing duty with the field and service companies of the 2nd and 7th Regiments of the line at the Helder and Flushing, as reported in my former letters. In consequence of the great suspicion excited in the minds of the Dutch as to the fidelity of foreign recruits, the latter will remain with the regiments into which they were drafted, and be employed on home service, whilst the vacancies in the regiments in India will be filled up by recruits enlisted in Holland.

The number of students now matriculated at the Dutch Universities is as follows:—Leyden, 608; Utrecht, 459; Groningen, 241; and Delft (Royal Academy), 254: total, 1,562.

PASSENGERS INWARD.

Per *Johanna*, Capt. Piccardt, at Brouwershaven, from Java: Mr. B. H. Egberts.

Per *Princess Amelia*, Capt. van Ryn, at Amsterdam, from Samarang: Col. du Cloux, Mr. and Mrs. Anemet, Col. Sloos, Miss Lammerding-Berlage, five invalided soldiers.

Per *Kinderdyk*, Capt. Zwanenburg, at Brouwershaven, from Batavia: Messrs. J. and G. Louten Slager.

Per *Philip van Marnix*, Capt. Duinker, at Amsterdam, from Batavia: Mrs. and Miss Crone.

Per *Nicot*, Capt. Amess, at Amsterdam, from Batavia: Mr. J. W. Buchner.

PASSENGERS OUTWARD.

Per *Jason*, Capt. Lammerts, from Rotterdam to Batavia: Mr. and Mrs. L. C. Kniphorst, Mr. and Mrs. Vogelenzang, Mrs. M. Meertens, Misses M. Peynenburg, M. Janssen, A. Evers, A. Refelt, M. Steens, M. Niberding, A. de Fisenne, A. Teeuwissen, J. van Cutsem, C. van Gemert, J. P. Berden, and J. Borber; Messrs. A. van der Does de Bye, Praeger, Coblin, de Villeneuve, van Delden, P. Janssen, A. de Gries, A. Vis, J. van den Bandt; one Javanese servant.

Per *Robertus Hendrikus*, Capt. Mulber, from Rotterdam to Batavia: Mr. W. Maschhaupt.

Per *Cheribon*, Capt. Coers, from Rotterdam to Sourabaya: Mr. and Mr. H. T. Tweehuys, Mr. and Mrs. Borger and three daughters.

Per *Celebes*, Capt. Reuvekamp-Gilk-, from Amsterdam to Batavia: Messrs. de Vries and Eschauzier.

Per *Sourabaya Packet*, Capt. Olivier, from Amsterdam to Batavia: Messrs. Verbeck and Dekker.

Per *Van Galen*, Capt. Brandligt, from Amsterdam to Batavia: Mr. and Mrs. C. van Cattenburg, Mrs. J. M. van Erp, Taalman Kip, Mrs. E. N. van Dorp, and four children.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, Dec. 31.

According to an official statement published in the last number of the *Naval Journal*, there are at present nineteen Russian ships-of-war, with 380 guns, 247 officers, 4,365 sailors and marines, and with engines of 5,150-horse power, now stationed in the Pacific, from China to the mouth of the Amoor. They are as follows:—On the east coast of Siberia the corvettes *Boyarin*, *Voyvoda*, and *Griden*, the clippers *Dschigit*, *Opritschnik*, and *Strelok*; in the Sea of Japan the frigate *Swietlana*, the corvette *Posnadik*, and the clippers *Najesdnik* and *Rasboinik*; on the voyage to the Amoor *via* England, the frigate *Oleg*, the corvette *Kalewala*, and the clipper *Abreg*, and six gunboats in China, Japan, and the mouth of the Amoor.

The commission of scientific officers charged with the examination of the auriferous deposits discovered in the Amoor country terminated its exploring labours on the 15th of August last, having ascertained two localities, one of which promises important results. It is situated near the river Modolakane, which falls into the Modolane, and this latter into the Oldoy, one of the tributaries of the Amoor. According to the assays made, the quantity of pure gold contained in every hundred poods of sand is one zolotnik, and the grains are of middling size. The spot is at the foot of Mount Solkodone, which rises precipitately at the southern end of the high range of broken rocks between Stanovoy-Krebete and the Amoor. It is considered by the geologists of the expedition as highly probable that the gold deposits belonged originally to that locality, and are washed down to the valley by the rains with the other detritus of those mountains. The commission, however, did not explore that district, their official instructions requiring them to confine their investigations to the more immediate neighbourhood in the first instance. As gold seeking will be thrown open to the public after next year, the above-mentioned locality is likely to become the future resort of many private gold-hunters.

Information has been received here that a French scientific expedition is being organised at Paris, and will very shortly leave Europe for the purpose of making further explorations in Eastern Siberia and the Amoor country. The expedition is placed under the care of Dr. G. Meynier, and the well known ethnographer Louis d'Eichthal, and has been furnished with voluminous scientific instructions from the Academy of Arts at Paris. The needful inquiries have been made here through the French Embassy, whether the Russian Government will afford them the necessary protection and support, which, it is needless to add, have been most willingly acceded to by the Imperial Government, which is ever ready to conduce to the advancement of science and promotion of general knowledge.

The last accounts received here from the Amoor state that the *Zeya*, one of the four river steamers built at the establishment of Messrs. Godeffroy and Son, at Hamburg, has been put together and launched, her first trip up the Amoor having proved a perfect success. Besides a crew of fourteen men, she took forty-five travelling passengers, 1,200 lbs. of luggage, and 720 lb. of postal goods. The second of these boats, the *Onon*, was also completed, and had made a successful trial trip up the Ussouri, one of the tributaries of the Amoor, with a gunboat in tow, and troops for the customary relief of the garrisons of the military posts on Lake Chauka on board.

DENMARK.

The King of Denmark has established a consulate at Swatow, and given the appointment to Mr. L. P. Hirschfeld, a merchant of that place, and son of the highly respectable head of the eminent firm of Messrs. H. Hirschfeld and Co., at Altona. This selection has created some astonishment at Copenhagen, as it is well known that he served in the Schleswig-Holstein army in 1849 and 1850, and fought at the head of his company in several actions with the Royal Danish troops.

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

NEW YORK, December 25, 1860.

Our money market and stock securities have seriously fluctuated since our last advices. The unsettled political condition of the country, in spite of spasmodic reactions, continues to be felt with greater or less severity in all branches of our commercial and financial affairs. The recent arrivals of gold from England, with accounts of more to come forward, have had, however, quite a favourable effect on our securities, and have stayed the downward tendency.

MONETARY AND COMMERCIAL.

I have to report continued dulness, and in the absence of sales of importance of all kinds of East India goods, prices are nominal, while some descriptions have only been forced off at concessions on former rates.

I have no exports of any kind to report to China since my last letter; and, indeed, but little to India or to Australia. The clearances also have been comparatively few. The transactions in teas have been light, and quotations for the most part nominal. While the war continues in China shippers do not appear desirous of sending goods to that market. Not a bale of domestic goods was shipped last week for China. There is some inquiry for a vessel or two to load for Hong Kong; but in the absence of shipments of moment, rates of freight are nominal.

TEA has been quite neglected since my last letter, and sales confined to jobbing lots to the trade, at prices which have not varied materially from last quotations.

INDIGO.—This article has not escaped the general dulness, and we have only to notice sales of 18 cases of Manila at 45c. to 80c., 6 months, and 4 chests of Madras at 80c., 6 months.

DRUGS.—The market has been inactive for nearly all descriptions. Among sales making have been 25 cases East India Castor Oil, and 10 baskets No. 1, at $1 07½c., and 20 baskets Annato, at 20c. to 25c. Refined Camphor is held at 40c., 6 months.

GINSENG.—A sale of 2,000 lbs. of Southern have been made for shipment to China, at 50c., 6 months.

INDIA RUBBER is without sales, and quotations nominal.

HEMP.—There is nothing doing, and quotations are nominal.

TIN.—There is dothing doing in pigs, and we have no change to notice.

COFFEE.—The market has been quiet for the past fortnight, and sales limited. Among the light sales have been 350 mats Java at 16 to 16½c.,

Digitized by Google

4 months. Other sales have embraced small lots. Rio at irregular prices. The failure of a large house in Baltimore, of Messrs. Kirkland, Chase & Co., heavy holders of coffee, sugars and Indian goods, has had a depressing influence on coffee. Their liabilities are estimated at $500,000.

SUGARS have been dull and inactive, and heavy losses sustained by holders. To relieve the market large shipments have been made to Europe in bond. The failure of a large importing and refining house, Messrs. Plume & Lamont, for $500,000 or $600,000, tended to check operations in the trade, and to depress prices. We have not a sale of Manila or East Indian sugars to report.

SPICES.—Sales have been confined to small lots, Pepper mostly. At private, 50 bags Pimento sold at old rates. In other descriptions of East Indian goods there has been but little or nothing doing. We refer to Nankin, Pongee Silks, Hides, Rattans, Sugar, &c.

ARRIVALS.—Dolphin, Hoyt, at Boston, Dec. 11, from Penang; St. Louis, Jacobs, at New York, Dec. 15, from Singapore; Edgar P. Stringer, Winsor, at New York, Dec. 13, from Manila; C. Hall and Argonaut, at New York, from Foo-Chow, Dec. 20; Contest, from Canton, Dec. 22; at Boston, Dec. 22, Starlight.

DEPARTURES.—Str. Fire Dart, Johnson, from New York, Dec. 6, for Hong Kong; Rocket, Saunders, from Boston, Dec. 17, for East Indies and China.

LOADING.—At NEW YORK, for Hong Kong: Daylight, Sanger; Benefactor, Corning. For Kanagawa and Nagasaki: Zenas Coffin, Riddell. For Shanghai: Union, Wiley.

THE PEACE IN CHINA.

THE EARL OF ELGIN TO LORD JOHN RUSSELL.

British Embassy, Peking, Oct. 25th, 1860.

My Lord,—Prince Kung's communication to me, of which the translation was forwarded in my despatch to your lordship of the 10th instant, and of which I furnish a duplicate translation herewith, was by no means a satisfactory document. Although we were receiving, day by day, fresh evidence of the barbarous treatment which our fellow-countrymen, who had been illegally arrested, had experienced at the hands of the Chinese authorities, and although I had constantly stated in my letters to him that I could not entertain proposals for the establishment of peace until they should have been restored, he makes in it no allusion to them at all; on the contrary, he refers somewhat flippantly to peace as already existing, complains of the advance of the army to the Palace of Yuen-min-yuen, and endeavours to make conditions respecting the cession of the gate of the city, with the manifest intention of giving to that act the appearance of an arrangement entered into for mutual convenience, rather than of an absolute surrender. To have accepted such a communication as satisfactory, and as the basis on which an agreement for the final settlement of our differences with China might be built, would have been, in my judgment, to compromise the most important objects for which this costly expedition was undertaken. The people of China would have been ere long informed that we had been baffled by the defences of Peking. In the more secret councils of the Imperial Court it would have been argued that the arrest of the prisoners had been a successful measure, as it had, in some degree at least, paralysed our movements, and gratified the resentment of the Emperor, without entailing any specific penalty. Low as is the standard of morals which now obtains in China on such points, we should, in my opinion, have still further lowered it if we had not treated the act in question as a high crime calling for severe retribution.

Such being the convictions at which I had arrived after a full and anxious consideration of all the circumstances of the case, and of the obligations which those circumstances imposed upon me, I had to determine how I could best give effect to them, but here I found myself beset with difficulties of no common magnitude.

Lieut.-General Sir Hope Grant, as your lordship will perceive from my correspondence with him, of which a copy is transmitted herewith, held the opinion that his army must commence its march towards Tientsin on or before the 1st of November; and, further, that any attack on Peking, or on the public buildings contained therein, unless preceded by some fresh provocation on the part of the Chinese, would be inconsistent with the conditions on which he had accepted the surrender of the Anting gate of the city. Baron Gros was, on the other hand, most desirous that we should take no step which might prevent us from obtaining the signature of the Convention and the ratification of the treaties of 1858. On this point I entirely agreed with his excellency; but I confess that I attached more importance to the impression which we might leave behind us on our departure from this place than to any formal stipulations by which the Chinese authorities would bind themselves. It was necessary, therefore, to discover some act of retribution and punishment sufficiently severe to produce the required effect, and yet capable of such rapid execution that it would be possible after it had been accomplished to complete, before the 1st of November, the treaties of peace, and such further measures as might be immediately necessary to put them into operation. This had to be done without attacking Peking, or anything within Peking, and in such a manner as to make the blow fall on the Emperor, who was clearly responsible for the crimes committed; without, however, terrifying his brother, whom he had left behind him to represent him, as to drive him from the field.

The destruction of the Yuen-min-yuen Palace, coupled with the exaction, as a preliminary to negotiations, and in name of compensation to the sufferers, of such a sum of money as could be raised on the spot by the Government, seemed to me to be the only combination which fulfilled all these conditions. I had also at one time resolved to require that a monument should be erected at the expense of the Chinese Government, stating the circumstances of the arrest and murder of the British subjects illegally captured, who had died from the effects of their ill-treatment in prison, and the penalty which had been inflicted for the deed; but this proposal I finally abandoned for reasons which I have explained elsewhere.

As the destruction of Yuen-min-yuen is, however, an act to which exception may with great apparent reason be taken, it is my duty before closing this despatch to say a few words respecting the only modes of inflicting a specific punishment for the crime in question which, limited as were my means of action for the reasons above stated, I could have adopted as substitutes for that measure.

I might, perhaps, have demanded a large sum of money, not as compensation for the sufferers, but as a penalty inflicted on the Chinese Government. But independently of the objection in principle to making a high crime of this nature a mere money question, I hold on this point the opinion which is, I believe, entertained by all persons without exception who have investigated the subject, that in the present disorganised state of the Chinese Government to obtain large pecuniary indemnities from it is simply impossible, and that all that can be done practically in the matter is to appropriate such a portion of the customs revenue as will still leave to it a sufficient interest in that revenue to induce it to allow the natives to continue to trade with foreigners. It is calculated that it will be necessary to take 40 per cent. of the gross customs revenue of China for about four years in order to procure payment of the indemnities already claimed by Baron Gros and me under instructions from your lordship and the French Government.

Embarrassing questions respecting the occupation of Chinese territory are involved in this arrangement, and I do not think that it would be advisable to bind the Chinese Government by engagements which would cause the term of liquidation of these indemnities to be indefinitely extended.

Or, I might have required that the persons guilty of cruelty to our countrymen, or of the violation of a flag of truce, should be surrendered. But if I had made this demand in general terms, some miserable subordinates would probably have been given up, whom it would have been difficult to pardon and impossible to punish. And if I had specified San-ko-lin-sin, of whose guilt, in violating a flag of truce, evidence sufficient to ensure his condemnation by a court-martial could be furnished, I should have made a demand which, it may be confidently affirmed, the Chinese Government would not have conceded, and mine could not have enforced. I must add, that throwing the responsibility for the acts of Government in this way on individuals, resembles too closely the Chinese mode of conducting war to approve itself altogether to my judgment. Having, therefore, to the best of my judgment, examined the question in all its bearings, I came to the conclusion that the destruction of Yuen-min-yuen was the least objectionable of the several courses open to me, unless I could have reconciled it to my sense of duty to suffer the crime which had been committed to pass practically unavenged. I had reason, moreover, to believe that it was an act which was calculated to produce a greater effect in China, and on the Emperor, than persons who look on from a distance may suppose.

It was the Emperor's favourite residence, and its destruction could not fail to be a blow to his pride as well as to his feelings. To this place, as appears from the depositions of the Sikh troopers, copies of which were enclosed in my despatch to your lordship of October 13, he brought our hapless countrymen, in order that they might undergo their severest tortures within its precincts. Here have been found the horses and the accoutrements of the troopers seized, the decorations torn from the breast of a gallant French officer, and other effects belonging to the prisoners. As almost all the valuables had already been taken from the palace, the army will go there, not to pillage, but to mark, by a solemn act of retribution, the horror and indignation with which we were inspired by the perpetration of a great crime. The punishment was one which would fall, not on the people, who may be comparatively innocent, but exclusively on the Emperor, whose direct personal responsibility for the crime committed is established, not only by the treatment of the prisoners at Yuen-min-yuen, but also by the edict enclosed in my despatch of the 22nd October, in which he offers a pecuniary reward for the heads of the foreigners, adding, that he is ready to expend all his treasure in these wages of assassination.

I have now submitted as full a statement as it is in my power to furnish, of the motives which determined the tenor of the despatch which I addressed to Prince Kung, in replying to his communication to me of the 12th instant. I conclude by enclosing a copy of it, and a translation of the rejoinder which it called forth.—I have, &c.,

ELGIN and KINCARDINE.

THE AMERICAN MINISTER AND THE EMPEROR.

Lord Elgin forwards an autograph of the Emperor, found in the Summer Palace, relating to the American Embassy:—

Camp before Peking, Oct. 21, 1860.

My Lord,—I have the honour to enclose herewith the translation of a draft note in the vermilion pencil (and therefore purporting to be the Emperor's autograph) found with several other papers at the Palace of Yuen-ming-yuen. It relates to the question of the presentation of the American Minister, Mr. Ward, to the Emperor, when he visited Peking last year. It is important, inasmuch as it contains a distinct assertion on the Emperor's part, to the effect that Mr. Ward's offer to pay to him the same marks of respect as to his own President was absurd, because it implied the placing of China on an equal rank with the barbarian nations. The Emperor's affectation of superiority is not in itself of much consequence to other sovereigns, but it has an unfavourable bearing as regards the validity of the Treaty rights which they obtain from him on behalf of their subjects, because it imparts to them in some sort the character of concessions made of pure grace by a suzerain to vasssals, and enjoyed therefore, under some not very definable conditions of fealty.—I have, &c.

To the Lord John Russell, &c. ELGIN and KINCARDINE.

(Translation.)

Draft of an Imperial Rescript in Vermilion, that is, in autograph, found in the Palace of Yuen-ming-yuen, on the 7th October, 1860:—

"We have this day perused the reply of the American barbarians to the communication of Kweiliang and his colleagues.

"(It shows that) in the matter of their presentation at Court nothing more can be done to bring them to reason. (1) Besides, these barbarians, by their averment that their respect for his Majesty the Emperor is the same as that they feel for their pih-li-si-tien-teh (President), just place China on a par with the barbarians of the south and east (2), an

Digitized by Google

arrogation of greatness which is simply ridiculous. The proposition of yesterday, that they should have an interview with the princes, need not either be entertained."

(1) Lit. There cannot be any more good means for bringing them round (to the right way). Argument is exhausted, so let the question of an audience drop.

(2) The Miran, ancient barbarians of the south, the I of the East.

THE RATIFICATION OF THE TREATY.

"British Embassy, Peking, Oct. 26.

"My Lord,—In my despatch of the 23rd inst. I enclosed the copy of letter from myself to the Prince of Kung, fixing the 24th inst. for the signature of the Convention of Peking, and for the exchange of the ratifications of the Treaty of Tien-tsin.

"I have now the honour to report that, on the day appointed, I went to the Hall of Ceremonies, which is near the southern wall of the Tartar city, accompanied by Sir Hope Grant and several officers of rank, and attended by an escort, furnished by order of the Commander-in-Chief, I found the Prince of Kung already there, surrounded by a large number of Mandarins of distinction.

"After the exhibition of our respective full powers, we proceeded to the signature of the Convention, which does not materially differ from the draught transmitted to your Lordship from Tien-tsin in my despatch of the 8th of September. Two Articles have, however, been added to those contained in that draught, the one legalising emigration and the other ceding to her Majesty that portion of the township of Cowloon which is included in the lease granted to Harry Smith Parkes, Esq., C.B., on behalf of the British Government, by the Governor-General of the Two Kwang.

"The signature of the Convention was followed by the exchange of the ratifications of the Treaty of Tien-Tsin, and, as the Chinese form of ratification is different from ours, I thought it proper to require that the Prince of Kung should certify on the face of the document, under his signature and seal, that the form adopted was binding on the Emperor.

"A minute, recording the proceedings which had taken place in connection with the exchange of the ratifications, was then drawn up in duplicate, and signed and sealed by the Plenipotentiaries, of which duplicates one was delivered to the Prince of Kung, and the other to me.

"I enclose herewith the Convention of Peking, duly signed and sealed by myself and the Prince of Kung, the Treaty of Tien-tsin ratified by the Emperor of China, and the minute certifying the act of ratification, signed and sealed by the Plenipotentiaries, and I have committed these important documents to the care of Mr. Loch, my private secretary, in order that he may in person deliver them to your Lordship.

"I commend Mr. Loch to your Lordship's favourable consideration. He was illegally seized and cast into prison by the Chinese authorities on the 18th ult., while engaged in the discharge of his official duties, and his conduct under very trying circumstances was in the highest degree creditable to him.—I have, &c., "ELGIN and KINCARDINE.

"The Lord John Russell."

THE PRISONERS.

"British Embassy, Peking, Oct. 26.

"My Lord,—When I addressed to your Lordship my despatch of the 13th inst., of the total number of 26 British subjects seized by the Chinese authorities on the 18th ult., while under the protection of a flag of truce, 13 only—namely, Mr. Parkes, Mr. Loch, and eight Sikh troopers, had been returned. Since that date two Sikh troopers have been restored to us alive, though suffering severely from the effects of ill-treatment; and 12 corpses have been given up, among which have been recognized the remains of Lieutenant Anderson, Mr. De Norman, and Mr. Bowlby.

"Of the regrets inspired by the sad fate of Lieutenant Anderson and M. De Norman I have already written. Mr. Bowlby was the correspondent of *The Times*. He made the passage from England in the same steamer as myself, and I became acquainted with him during the voyage. I deplore his loss, not only because he was a highly accomplished and well-informed gentleman, but also because from the conscientious and liberal spirit in which he addressed himself to the investigation of the singularly complicated problems presented by the moral, social, political, and commercial condition of China, I had conceived the hope that he would be the means of diffusing sound information on many points on which it is most important for the national interests that the British public should be correctly informed. The other corpses sent in are those of eight Sikh troopers and of one English dragoon.

"Of the British subjects captured, therefore, Captain Brabazon, of the Royal Artillery, is alone unaccounted for. The silence of the Chinese authorities, who always plead ignorance of his fate when questioned on the subject, and rumours which reach us from various quarters, lead us to fear that he must have met a violent death. It is reported that, together with a French gentleman (a priest, acting as interpreter to General de Montauban), he was beheaded after the action of the 21st ult., by direction of a Chinese General who was wounded on that occasion, and who in his exasperation is said to have ordered that these two prisoners, who chanced to be in his power, should be executed. I am inclined to credit this report, although I have no positive evidence of its accuracy. Captain Brabazon was an officer of much promise, and held the appointment of Deputy-Assistant-Quartermaster-General of Artillery.

"I have, &c.,

"The Lord John Russell, &c." "ELGIN and KINCARDINE.

MR. PARKES' STATEMENT.

Lord Elgin in forwarding Mr. Parkes' most able and interesting statement—which we presume has been handed by his Lordship to the Government paper at Shanghai for publication—says:—

Mr. Parkes' consistent refusal to purchase his own safety by making any pledges, or even by addressing to me any representations, which might have embarrassed me in the discharge of my duty, is a rare example of courage and devotion to the public interest; and the course which he followed in this respect, by leaving my hands free, enabled me to work out the policy which was best calculated to secure his own release, as well as the attainment of the national objects entrusted to my care.

CONVENTION BETWEEN HER MAJESTY AND THE EMPEROR OF CHINA.

Signed, in the English and Chinese languages, at Peking, October the 24th, 1860.

Her Majesty the Queen of Great Britain and Ireland, and his Imperial Majesty the Emperor of China, being alike desirous to bring to an end the misunderstanding at present existing between their respective Governments, and to secure their relations against further interruption, have for this purpose appointed plenipotentiaries, that is to say—her Majesty the Queen of Great Britain and Ireland, the Earl of Elgin and Kincardine; and his Imperial Majesty the Emperor of China, his Imperial Highness the Prince of Kung, who, having met and communicated to each other their full powers, and finding these to be in proper form, have agreed upon the following convention, in nine articles:—

ART. I.

A breach of friendly relations having been occasioned by the act of the garrison of Taku, which obstructed her Britanic Majesty's representative when on his way to Peking for the purpose of exchanging the ratifications of the treaty of peace concluded at Tien-tsin in the month of June, one thousand eight hundred and fifty-eight, his Imperial Majesty the Emperor of China expresses his deep regret at the misunderstanding so occasioned.

ART. II.

It is further expressly declared that the arrangement entered into at Shanghai in the month of October, one thousand eight hundred and fifty-eight, between her Britannic Majesty's Ambassador, the Earl of Elgin and Kincardine, and his Imperial Majesty's Commissioners, Kweiliang and Hwashana, regarding the residence of her Britannic Majesty's representative in China, is hereby cancelled; and that, in accordance with Article III. of the Treaty of one thousand eight hundred and fifty-eight, her Britannic Majesty's representative will henceforward reside permanently or occasionally at Peking, as her Britannic Majesty shall be pleased to decide.

ART. III.

It is agreed that the separate article of the Treaty of 1858 is hereby annulled, and that in lieu of the amount of indemnity therein specified, his Imperial Majesty the Emperor of China shall pay the sum of eight millions of taels in the following proportions or instalments, namely—at Tien-tsin, on or before the 30th day of Nov., the sum of 500,000 taels; at Canton, and on or before the 1st of Dec., 1860, 333,333 taels, less the sum which shall have been advanced by the Canton authorities towards the completion of the British Factory site at Shameen, and the remainder, at the ports open to foreign trade, in quarterly payments, which shall consist of one-fifth of the gross revenue from customs there collected. The first of the said payments being due on the 31st day of Dec., 1860, for the quarter terminating on that day.

It is further agreed that these moneys shall be paid into the hands of an officer whom her Britannic Majesty's representative shall specially appoint to receive them, and that the accuracy of the amounts shall, before payment, be duly ascertained by British and Chinese officers appointed to discharge this duty.

In order to prevent future discussion, it is moreover declared that of the eight millions of taels herein guaranteed, two millions will be appropriated to the indemnification of the British mercantile community at Canton, for losses sustained by them, and the remaining six millions to the liquidation of war expenses.

ART. IV.

It is agreed that on the day on which this Convention is signed his Imperial Majesty the Emperor of China shall open the port of Tien-tsin to trade, and that it shall be thereafter competent to British subjects to reside and trade there under the same conditions as at any other port of China by treaty open to trade.

ART. V.

As soon as the ratifications of the Treaty of one thousand eight hundred and fifty-eight shall have been exchanged, his Imperial Majesty the Emperor of China will, by decree, command the high authorities of every province to proclaim throughout their jurisdictions that Chinese choosing to take service in the British colonies, or other parts beyond sea, are at perfect liberty to enter into engagements with British subjects for that purpose, and to ship themselves and their families on board any British vessel at any of the open ports of China; also, that the high authorities aforesaid shall, in concert with her Britannic Majesty's representative in China, frame such regulations for the protection of Chinese emigrating, as above, as the circumstances of the different open ports may demand.

ART. VI.

With a view to the maintenance of law and order in and about the harbour of Hong Kong, his Imperial Majesty the Emperor of China agrees to cede to her Majesty, the Queen of Great Britain and Ireland, and to her heirs and successors, to have and to hold as a dependency of her Britannic Majesty's colony of Hong Kong, that portion of the township of Cowloon in the province of Kwang-Tung of which a lease was granted in perpetuity to Harry Smith Parkes, Esq., Companion of the Bath, a member of the Allied Commission at Canton, on behalf of her Britannic Majesty's Government, by Lan Tsung Kwang, Governor-General of the Two Kwang.

It is further declared that the lease in question is hereby cancelled; that the claims of any Chinese to property on the said portion of Cowloon shall be duly investigated by a mixed commission of British and Chinese officers; and that compensation shall be awarded by the British Government to any Chinese whose claim shall be by the said commission established, should his removal be deemed necessary by the British Government.

Digitized by Google

ART. VII.

It is agreed that the provisions of the Treaty of 1858, except in so far as these are modified by the present Convention, shall without delay come into operation as soon as the ratifications of the treaty aforesaid shall have been exchanged.

It is further agreed that no separate ratification of the present Convention shall be necessary, but that it shall take effect from the date of its signature, and be equally binding with the treaty above mentioned on the high contracting parties.

ART. VIII.

It is agreed that as soon as the ratifications of the Treaty of the year 1858 shall have been exchanged, his Imperial Majesty the Emperor of China shall, by decree, command the high authorities in the capital and in the provinces to print and publish the aforesaid treaty and the present Convention, for general information.

ART. IX.

It is agreed that as soon as this Convention shall have been signed, the ratifications of the Treaty of the year 1858 shall have been exchanged, and an imperial decree respecting the publication of the said Convention and Treaty shall have been promulgated as provided for by Art. VIII. of this Convention, Chusan shall be evacuated by her Britannic Majesty's troops there stationed, and her Britannic Majesty's force now before Peking shall commence its march towards the city of Tien-tsin, the forts of Taku, the north coast of Shang-tung, and the city of Canton, at each or all of which places it shall be at the option of her Majesty the Queen of Great Britain and Ireland to retain a force until the indemnity of eight millions of taels, guaranteed in Art. III., shall have been paid.

Done at Peking, in the Court of the Board of Ceremonies, on the 24th day of October, in the year of our Lord 1860.

(L.S.) ELGIN and KINCARDINE.
Prince KUNG.

THE FRENCH DESPATCHES FROM CHINA.

The *Moniteur* continues the publication of documents connected with the late proceedings in China. In a report from the Commander of the French Corps of Operations in that country to the Marshal Minister of War occurs the following account of the plundering of the Summer Palace :—

"After a rather difficult march we reached the village of Yuen-ming-yuen at 7 o'clock; we followed a road paved with granite flags, and we passed over a handsome bridge leading to the Imperial Palace, the entrance of which faces the bridge, and is distant only 200 metres; the road between the bridge and the palace is bordered on the left by a row of stately trees; on the right is a large square containing a row of fine houses, the residences of the principal mandarins.

"Before bivouacking I determined to examine the entrance of the palace, which was closed by a very strong gate, and by barriers on the right and left. It was said that there were Tartars in the courts and gardens inside the gates. I immediately sent two companies of marine infantry to examine the entrance of the palace and the wood behind, as well as my orderly officer, Lieutenant de Pina, of the navy. This officer, hearing a noise inside, summoned them to open the gates, and, receiving no answer, he had a ladder brought and scaled the wall, followed by Ensign Vivenon. On reaching the top they saw Tartars armed with spikes, bows and arrows, and muskets, who appeared ready to defend the gate. On perceiving our officers these men retired, and Lieutenant de Pina got over the wall to open the gate to our troops.

"At that moment the Tartars returned to attack M. Pina, and a conflict took place between him and the men who were hastening up. He bravely resisted, and fired some shots with a revolver, but was wounded in the left hand and the right wrist. The Marines went to his assistance and to that of their officer, M. Vivenon, who had received a ball in the side, and the Tartars, after a useless resistance, took to flight in disorder, leaving behind them three men killed, and carrying off several wounded.

"The noise of the firing having attracted me to the spot, I made General Collineau come up with the brigade, and occupy strongly the first court-yard of the palace, not wishing to advance further during the night in an unknown place. About 700 or 800 Tartars, who were behind a series of palaces which extended to the woods, might have attempted to disquiet our men. But the night passed without events, and the next day, very early in the morning, I went to the palace, accompanied by Generals Jamin and Collineau, by the chief of my staff, and the English Brigadier Pattle, with whom were Major Sley, of the Queen's Dragoons, and Col. Fowley. A company of infantry preceded us, to assure our march, but the palaces were completely evacuated by the Tartars.

"I was anxious that our allies should be present at this first visit to the palace, which I suspected must contain great riches. After passing through several apartments of indescribable splendour, I had sentinels placed everywhere, and I selected two artillery officers to see that no one entered the palace, and that everything should remain as it was until the arrival of General Grant, who was sent for immediately by Brigadier Pattle.

"The English officers having arrived, we consulted what we had better do with all these riches, and we appointed three commissioners of each nation, with instructions to set apart the objects of greatest value as curiosities, so that an equal division might be made; it would have been impossible to think of carrying away the whole of the property, our means of transport being very limited.

"Soon after a further search led to the discovery of a sum of about 800,000f. in small ingots of gold and silver. The same commission also proceeded to make an equal division between the two armies, which gave about 80f. to each of our soldiers. The division among the men was made by a commission which was composed of all the chiefs of the corps, and of the different branches of the service, and was presided over by Gen. Jamin. The commission, having deliberated in the name of the army, declared that the latter desired, as a souvenir, to make a present to the Emperor, the Empress, and the Prince Imperial, of the whole of the curious articles carried off from the palace.

"The army was unanimous in approving this offering to the chief of the State, who will consider it as a mark of gratitude of his soldiers for having been sent on the most distant expedition that was ever undertaken.

"At the moment of the division between the two armies I insisted, in the name of the Emperor, that Lord Elgin should make the first choice for the Queen of England.

"Lord Elgin selected a baton of command of the Emperor of China, in green jade, of great value, and mounted with gold. A second baton, similar in every respect, having been found, Lord Elgin in his turn resolved that it should be reserved for the Emperor of the French. There was, therefore, perfect equality in this first choice.

"It would be impossible for me to describe to you, Monsieur le Maréchal, the magnificence of the numerous buildings which succeed each other over an extent of four leagues, and which composes what is called the Summer Palace of the Emperor, being a succession of pagodas, all containing gods in gold, silver, and bronze, of gigantic dimensions. One deity in bronze—a Bouddha—is about 70 feet high; gardens, lakes, and objects of curiosity heaped up for centuries past in the midst of buildings of white marble, roofed with dazzling varnished tiles of all colours, add to that the view over a delightful country, and your Excellency will have but a very feeble idea of what we have seen.

"In each of the pagodas there exist, not objects, but whole storerooms of objects of every kind. To mention to you only one fact: there are such quantities of the finest silk goods that we have wrapped up in pieces of silk all the articles which I send to his Majesty.

"What makes one sad in the midst of all these splendours of the past, is the carelessness and waste of the present Government, and of the two or three which preceded it. Nothing is taken care of, and the most beautiful things, with the exception of those which ornament the palace which the Emperor inhabits, are in a deplorable state of degradation.

"In one of the pagodas, that of the carriages, at half a league from the inhabited part of the palace, we found two magnificent English vehicles, a present from the embassy of Lord Macartney. They, as well as their gilded harness, were in the place where they must have been placed forty-four years ago, without a particle of the dust with which they were covered having been ever removed.

"It would require a volume to describe all I have seen; my greatest regret is that I have no photographer attached to the expedition, so that I might lay before the Emperor the picture of what language cannot express."

THE FRENCH CONVENTION.

The following is the French Plenipotentiary's description of the ceremonial which attended the signing of the Treaty of Peace in the Hall of Ceremonies, Peking, a summary of which has already appeared in our columns. The communication is addressed by Baron Gros to the Minister of Foreign Affairs :—

Peking, 26th Oct.

Monsieur le Ministre,—I hasten to forward to you a copy of the Convention which I signed yesterday with Prince Kong, the Emperor's brother, and I send you also a copy of the minute of the exchange of the ratifications of the Treaty of Tien-tsin, an exchange which took place at the same sitting. Our success is complete, and exceeds all my hopes.

On the 25th, the day fixed for the signature of the Convention, I left the city at eight in the morning, and re-entered it officially with 2,000 men of all arms, forming a cortege. The flags of the 101st and 102nd Regiments of the Line, and that of the Marines, preceded my palanquin, which was borne by eight coolies in livery, with tricoloured fringes on their caps.

The treaty of Tien-tsin and the seals of the embassy were carried before me by four sub-officers of different corps; a detachment of horse artillery followed my palanquin, and after them marched several battalions of infantry. A body of infantry lined a part of the road in the interior of the city.

At the entrance of the town, fifteen mandarins, in full costume and on horseback, came to receive, compliment, and conduct me to the Prince, who was waiting at the Li-Pou, or Tribunal of Rites. It took us nearly two hours to arrive at the Li-Pou, and we passed through crowds of people, who were more curious than ill-intentioned.

When my palanquin entered the courtyard which preceded the hall prepared for the signature of the Convention, this young prince rose with all his suite, and advanced towards me; I, in consequence, made the bearers stop, and alighted in order to join the Prince before he had crossed the threshold. He held out his hand to me, and I took it with an inclination of the body, at the same time thanking him for having been kind enough to send mandarins to receive me at the gates of the town. I added that I was happy to come to sign with him a treaty of peace, which I firmly hoped would never be broken; and I said afterwards that I expressed the sentiments of the Emperor of the French in forming the most sincere wishes that such might be the case. The Prince gave me his hand a second time, and pointed to an arm-chair which had been prepared for me at his left, which is the place of honour in China. General de Montauban was placed at my left, and the officers of his staff and of the army occupied the left side of the saloon. M. de Bastard and M. de Vernouillet, secretaries, and two interpreters of the mission were between the Prince and myself. A crowd of mandarins, with buttons of all colours, occupied the right side of the hall. The Prince and those present wore robes of ceremony, and the former had a double string of ornaments of amber round his neck. The Prince alone had no button in his cap, which was of the kind generally worn in winter.

Each having taken his place, I requested that his Imperial Highness would please to first sign the four Chinese texts of the Convention of Peking, and I first signed the four French texts. When the signatures were given and the seals affixed to the eight copies, I said to the Prince that, peace being happily restored between the two empires, a salute of twenty-one guns would be fired by the French artillery, and I announced to him that I should immediately request the commander-in-chief of the

LONDON, SATURDAY, JAN., 12, 1861.

REBELLION IN CHINA.

AFTER a ten years' revolution in the southern provinces of the Empire—those regions from which in a great measure the supplies for the capital are drawn—we cannot be surprised to hear that a new movement of insurgents has taken place in one of the northern provinces of China, contiguous, indeed, to Pechili itself. It appears by the rumours afloat in Shanghai, that a certain opulent banker in Shansi, who was accustomed to accommodate the Emperor when in pecuniary difficulties, had been duped by the officials. He had on a late occasion lent money, which had been speedily returned; soon afterwards the demand came again for a larger sum; in his simplicity he forwarded the last re-payment in common with his own pure gold. Alas! he had been repaid with spurious metal, and his having proffered it again as a loan might have been his ruin, but for his friends, who rallied round him to oppose the Imperial extortioners. Thus the new Shansi rebellion is simply a case of the people taking the power into their own hands, and seems to show a determined opposition to unjust oppression. The outbreak is, we think, ominous of a coming storm. The whole fabric of China is now shaken, and the moral effect of this continual disturbance of social order and trade is being felt throughout the length and breadth of the land. The shock to the Imperial Government which has recently occurred will be known on the confines of Thibet and throughout Tartary. The charm is broken; the enemy has reached Peking, and planted his colours on its walls. Happy is it for the Manchus that that banner was not the ensign of the Ming revolutionists, but the flag of a nation ready to treat for peace, and hopeful yet in their future good faith.

As regards the original insurgent bands, of whom we have expressed our views pretty clearly of late, we find them at their old pursuits again—sacking and burning—pillaging every town and village within their reach, and leaving the wretched inhabitants who chose to re-establish themselves but a slender hope of permanent security. Notwithstanding all we have heard of their doctrines and practices—albeit the reports are various and many sided—we cannot agree with our great contemporary, *The Times*, that "we have no certain knowledge "upon the subject." It is by cross-examination of the witnesses, and by the diversity of their evidence, which often arises from mere partizanship, that we must hope, nay, we are able, to arrive at sufficient certainty. If we seek to strengthen some foregone conclusion, we have only to turn to the pages of the Blue-Book for Mr. Wade's views, or to the works of Mr. T. T. Meadows or Mr. Scarth for theirs. Mr. Wade has depicted the state of affairs in Nanking like a faithful historian; he has described things as they lay before his eyes, and related facts told him by rebel soldiers and officers themselves; besides this, he has translated rebel documents, which surely are to be relied upon. If we cannot judge them out of their own mouths, what other evidence can be so strong as their own story told by themselves? Mr. Wade finds the suburbs of Nanking a desert, with all its former glory swept away; no trade was allowed up to that time; two or three chandlers' shops and old-clothes shops were the sum of the trade allowed in the vicinity. "Within Nanking there was even greater desolation. The "number of houses standing is very great, but there is a "lamentable dearth of population, and a total absence of com-"mercial life of any kind." While the vices common among Chinamen, especially opium-smoking, were practised in the city to the extent of one-third of the population. And if we turn to some of their printed papers, we shall find enough to confirm us in our conclusion, that a creed which has produced such direful fruits must contain articles militating against the truth. If the following are not the effusions of fanatics, no words can express more clearly blasphemy against God and inhuman cruelty towards man:—"The King of the East redeems "from sickness; he is a holy spirit. The Father sent him "down with a commission to exterminate the demons (*i. e.* the "Chinese). In ransoming the sick he suffered equally with the "Elder Brother (*i. e.* Jesus Christ). The Father and Elder "Brother set us to rule the Heavenly Kingdom (*i. e.* China). To "sweep away and exterminate the devilish spirits; foreign "younger brethren of the Western Ocean (Europeans). Join "us in doing service and extinguishing the reptiles." Here God is robbed of his honour, and his attributes are given to another. Foreigners are insulted, too, by being called "younger brethren;" and the theme of the whole appears to be nothing short of "extermination" of the Chinese people who resist them. The proceedings of these revolutionists have manifested too plainly the earnestness and reality of their denunciations and threats. Facts have been a comment upon the words, and the words help us to explain the facts.

By the Tenth Article of the Treaty of Tien-tsin, it is stipulated that "British merchant ships shall have authority to "trade upon the great river (the Yang-tse)." With this branch of our China trade in view, we may look forward either to a collision between the rebels and our men-of-war, or to a peaceable settlement of the country by the laying down of the rebel arms. It is our opinion that the revolutionists on the banks of the Yang-tse will have but an ephemeral existence as soon as our trade begins to develope itself in that direction. And even without this their character and prospects bespeak an early demise. Lord Elgin says, in his despatch to the Earl of Malmesbury, dated Shanghai, January 5, 1859:—"The tone of "the natives with whom I conversed certainly left on my mind "the impression that they viewed the rebellion with feelings "akin to those with which they would have regarded earth-"quake or pestilence, or any other providential scourge. When "I come to describe the state of the towns which I visited, "your lordship will probably see the grounds for the opinion "that it is not so very surprising that the peaceful inhabitants "of China should form this estimate of their interest in these "revolutionary proceedings, from which some of their enthu-"siastic friends among foreigners at one time expected such "great results." But enough! This is the testimony of another eye-witness.

Naval and Military.

There have been no special movements in connection with China, excepting the arrival of the *Albatross* and *Epsom* from Hong Kong, with naval and military invalids.

The *Albatross*, hired sailing transport, Captain Pearson, arrived at Spithead on the 3rd inst., with 165 naval invalids, seamen and marines, from Hong Kong, from which port she sailed on the 19th of July last, calling in at the Mauritius and the Cape of Good Hope, and sailing from Simon's Bay finally for England on November 5. Fine weather was experienced throughout the passage until nearing the Western Islands, since which time the ship has had a full share of the late tempestuous weather. Fifteen deaths have occurred on the passage home. The ship has 200 tons of Government stores on board, and has been towed into the harbour from Spithead, for discharge.

The *Epsom* arrived at Plymouth on the 7th inst., in tow of her Majesty's ship *Spiteful*, with 120 naval and military invalids, in charge of Captain Smeet, of the 21st Madras Native Infantry. The *Epsom* left Hong Kong on the 5th of August, the Cape on the 18th, and St. Helena on the 28th of November. She touched at Falmouth, and telegraphed to this port for assistance; the *Spiteful* was accordingly sent.

It is decided that officers selected for the Commissariat from the army shall, upon being transferred, receive the regulation value of their commissions. As the pay and advantages of the commissariat are substantial, we (*Army and Navy Gazette*) have no doubt that candidates will soon come forward in sufficient numbers.

Mr. Frederick Cleave, C.B., paymaster R.N., late secretary to Rear-Admiral Charles Talbot, in command at Queenstown, is appointed Steward of Greenwich Hospital, in the room of Mr. John Elliott, R.N.

Major Milman's No. 2 battery, 9th Brigade of Royal Artillery, stationed at Ballincollig, is about to be supplied with an armament of Armstrong guns, &c., from Woolwich Arsenal, the whole of which are awaiting transport and will be shipped in a few days, the old guns to be returned to Woolwich.

The *Undaunted*, 51, one of the improved class of large screw frigates building, was launched from Chatham yard on the 1st. Though nominally passed as a frigate, she is considerably larger than most of the line-of-battle ships now afloat, being only two feet less than the screw three-decker, *Prince of Wales*, 131 guns, launched a short time since at Portsmouth, and nearly double the tonnage of many of our line-of-battle ships built a quarter of a century ago.

It appears from the last official return, recently published, that there are at present being built in the various dockyards for her Majesty's Government 43 vessels of war, carrying from 1 to 91 guns respectively, and each of from 80 to 1,250-horse power—viz., Eleven at Pembroke—the Aurora, 51 guns; the Defiance, 91; the Nassau, 4; the Newport, 5; the Pandora, 1; the Perseus, 17; the Shearwater, 11; the Tartarus, 4; the Triumph, 91; the Tweed, 51; and the Zealous, 91; seven at Woolwich—the Alligator, 22; the Bristol, 51; Caledonia, 91; the Dartmouth, 36; the Repulse, 91; the Sylvia, 4; and the Wolverine, 21; six at Chatham—the Belvidera, 51; the Bulwark, 91; the Myrmidon, 4; the Rattlesnake, 21; the Reindeer, 17; and the Royal Oak, 91; five at Deptford—the Columbine, 11; the Endymion, 36; the Favourite, 22; the Rattler, 17; and the Speedwell, 5; four at Devonport—the Africa, 11; the Ister, 36, the Ocean, 91, and the Robust, 91; four at Portsmouth—the Chanticleer, 17, the Dryad, 51, the Glasgow, 51, and the Royal Alfred, 91; at Millwall, the Lily, 4; at Glasgow, the Black Prince, 36; at Jarrow, Newcastle-on-Tyne, the Defence, 22; at Sheerness, the North Star, 22; at Poplar, the Resistance, 16; and at Newhaven, the Tyrian gunboat. During the last three months 11 men-of-war have been completed and launched—viz., four from Deptford—the Newcastle, 51, the Rapid, 11, the Rosario, 11, and the Zebra, 17; from Millwall, the Eclipse, 4, and the Star, 4; from Devonport, the Liverpool, 51, and the Petrel, 11; from Chatham, the Undaunted, 51; from Blackwall, the iron-plated frigate Warrior, 36, and from Plymouth, the Trinculo gunboat.

Sir John Pennefather is about to resign the Aldershot command, and it is not unlikely that either Sir Richard Airey, the Quartermaster-General, or Sir William Codrington, from Gibraltar, will succeed him.

The Colonelcy of the 23rd Royal Welsh Fusiliers is vacant by the death of Lieutenant-General Rainey. It is very probable that Major-General George Macdonald, an old Peninsular and Waterloo officer, will be selected for this post.

The Isle of Wight mail packet, while proceeding between Ryde and Cowes, recently, was struck near the stern by a shot from the shore, where gunnery practice was going on. The captain, fearing some serious damage was done, prepared to lower his boats to save his passengers. The steersman had just altered his course, or the shot would have raked the stern and probably have killed some of the passengers.

Mr. Hobbs, of this dockyard, has been appointed temporary accountant at Sheerness, vice Mr. Allen, who has proceeded to China.

In accordance with orders to that effect received from the Horse Guards all the recruiting parties for the East India depots, at this garrison, are to be called in, in consequence of the intention of the authorities to reduce each of the Indian regiments by 100 men, making the total strength of each 1,100 bayonets. Only one recruiting party for each regiment is to be detached from the depot for recruiting.

The appointment of chief paymaster to the Royal Artillery and Royal Engineers at Woolwich, which has been held for some time past by Major Marvin, R.A., is about to be abolished. The payment will in future be made by the respective brigade paymasters, that of the Riding-house establishment having been intrusted by the War Department to Paymaster Gibbs, Horse Brigade. Major Marvin will in consequence withdraw from the service on a retiring pension, to which his long services entitle him.

In a few days a competitive examination will be held to determine the admissions to the Royal Regiment of Artillery. For the honour and advantage of serving her Majesty in this distinguished corps there are no fewer than 250 candidates. These competitors will be subjected to a most searching examination in various branches of learning and science, and, in accordance with the results of the trial, a certain select number will receive the appointments for which all have been laboriously contending.

Several announcements have been made in the obituary of persons who were on board H.M.S. *Camilla*, by which it is assumed that that vessel has actually foundered, with all hands, off the coast of Japan.

Dr. Robert Beith (1852) has been removed, at the recommendation of Sir John Liddell, from his post as surgeon of H.M.S. *Majestic*, to the appointment of staff surgeon and medical storekeeper at the Royal Naval Hospital, Plymouth, vice Dr. George Mackay (1852), sent to Hong Kong.

According to the statement after inspection, the condition of the screw steam flagship *Royal Albert*, 121, Capt. Henry Lacon, at Devonport, is so doubtful, that a special report has been made, and until the result of the deliberation on that report is known, it is uncertain whether she will continue in commission.

The guns of the Tower, and all the naval and military arsenals, fired a salute of 21 guns in celebration of the peace with China.

MR. JAMES MACDONALD ON CHINA.

A long letter has been published in the *Daily News* from the pen of this gentleman, lately a merchant at Shanghai, in which there is a great deal of astute knowledge shown on our affairs in that country. We select the following:—

And now that the contest is ended, what is our position in China, and what have we gained or lost? We have, indeed, established our minister at Peking by force, when peaceable efforts would in time have accomplished the same end, and left no resentments behind. But we have expended perhaps ten millions of money not to be recovered, and wasted many valuable lives. Owing to the revival of the rebellion we have seen our sales of British manufactures reduced from 300,000 or 400,000 pieces a month to less than half of that quantity; while, as before said, tea has been greatly enhanced in cost. And so far from our living in greater security at the ports, these wars have agitated the Chinese and imperilled our safety, even amidst a mild and quiet population like that of Shanghai. Let essayists and romancers boast as they may of dictating a peace under the walls of Peking, but no true soldier will glory in triumphing over a foe who in the field had only bows and arrows, gingalls, and rusty swords, wherewith to confront the rifle and Armstrong gun. Such victories are only less disastrous than defeat. However ignorant of the art of war these Chinese-Tartars now are, they have shown proofs of courage and devotion; and men who fear not death may yet hope to learn how to defend their country. By this war we have fearfully aggravated the disordered state of China. Twelve months ago there was every hope of the speedy suppression of the rebellion. But when the expedition took Chusan in April last the Chinese army besieging Nanking appears to have become completely demoralised, and its officers in despair to have concluded that the deluge had indeed overtaken them. A *sortie* took place, the commander-in-chief was killed; many of the men, mere militia, then fraternised with the rebels. The cry passed to Soochow, and the mass of murderous brigands poured down to the plunder of the rich cities of the Chinese Netherlands. Chinkiangfoo, the best military position in Central China, commanding the Yangtsekiang, last visited by me in 1856, and recovered from the rebels shortly after, was left unattacked by them; their object was the booty of the famous silk country. Who that has travelled through these fine districts, as I have often done, can think without sorrow on the horrors to which the inhabitants, lately so prosperous, have now become a prey? Ruthless slaughter, wherever resistance was made, towns and villages burnt without mercy, and thousands in their agony driven to self-destruction.

Mr. John Scarth has replied to Mr. Macdonald, and of course defends the rebels. He says:—

"Mr. Macdonald says that 'it is groundless to assert that the Tartars are more averse to Christianity than the Chinese. Yet since the days of Kanghi, the first grand Emperor of China under the Manchoo dynasty, each of his successors has issued edicts against Christianity; missionaries have suffered persecut on and martyrdom; and in one reign alone three hundred Christian churches, which had existed during the Chinese dynasty, were destroyed. Kanghi made the Roman Catholic priests useful in showing him how to cast cannon; but these same men were imprisoned and tortured by his successor. Many public documents, especially Sanko-lin-sin's memorials to the Emperor, prove that the 'doctrine of Jesus' is despised and considered dangerous by the Tartar rulers of China, and it has been well said that the very edicts against Christianity have assisted to make it known in the empire. With Tartars opposed to it, and the Chinese who are in revolt against the Tartars making an attempt to propagate Christianity, even without the much-needed foreign assistance to correct the errors, you may judge whether or not Mr. Macdonald's zeal has carried his ideas away from facts.'"

THE PEACE WITH CHINA.

On the 28th Dec. the Lord Mayor received the subjoined communication from Lord Elgin, under date of Peking, Nov. 1. At that time Mr. Cubitt had not assumed the office of chief magistrate, a circumstance which will account for the letter being addressed to him in his capacity of a member of Parliament, and as a private friend of the noble earl:—

"Peking, Nov. 1, 1860.

"My dear Sir,—As you took an interest in my mission to China, you may be pleased to hear from me that I am actually at Peking, and that peace is concluded between Great Britain and this country. China is now opened up to Christianity and commerce, and if foreigners, both authorities and private individuals, conduct themselves towards the people of the country with consideration and fairness, I hope that all the advantages gained by the British Treaty of 1858, and supplemented by the British Convention of 1860, will be retained, whatever dynastic changes take place in the empire. I hope soon to see you in London, and am meanwhile, yours very truly, ELGIN and KINCARDINE.

"Mr. Alderman Cubitt, M.P., London."

The following letter has also been addressed by Lord John Russell, Secretary of State for Foreign Affairs, to the Lord Mayor:—

"Foreign-office, Dec. 27, 1860.

"My Lord,—I have the honour to acquaint you that Mr. Loch, private secretary to the Earl of Elgin and Kincardine, arrived at the Foreign-office this evening at seven o'clock, with despatches from his Lordship, enclosing a convention putting an end to hostilities with China, signed on the 24th of October last by his lordship with the plenipotentiary of the Emperor of China.

"I have the honour to be, my lord, your lordship's most obedient humble servant, "J. RUSSELL.

"The Right Hon. the Lord Mayor."

Following an ancient custom, the Lord Mayor, on the receipt of this communication, caused a copy of it to be posted on the Mansion House, where, though its interest had been anticipated by the newspaper press, hundreds of people paused to read it during the day.

JAPANESE BOTANY.—We are glad to perceive, from the *Gardener's Chronicle*, that Mr. Veitch, sent out by the Horticultural Society as a collector of seeds and plants, has commenced his labours under favourable auspices, being attached to the embassy at Yedo. Thus we shall again see the value of private enterprise in English hands, and how far more efficient it proves than missions entrusted to mere Government agents.

THE PEACE IN CHINA.

(*Continued from page* 83.)

French army to cease all acts of hostility which were not purely of a defensive character, and this I did at once to General de Montauban.

That part of the programme having been fulfilled, the exchange of the ratifications of the Treaty of Tien-tsin was proceeded to: but Prince Kong first called my attention to the fact that he had come, full of confidence and without a single Tartar or Chinese soldier, and placed himself in the midst of the whole French army. I replied that this confidence proved to me that his Imperial Highness knew the good faith of the sovereign whom I had the honour of representing, and whose orders I had to execute.—Accept, &c., BARON GROS.

The following is the treaty of peace concluded at Peking on the 26th October, 1860, between the Emperor of the French and the Emperor of China:—

His Majesty the Emperor of the French and his Majesty the Emperor of China, wishing to put an end to the difference which has arisen between the two empires, and to re-establish and secure for ever the relations of peace and friendship which existed between them, and which regretable events have interrupted, have named for their respective representatives the following personages: The Emperor of the French, Jean Baptiste Louis Baron Gros, Senator of the Empire, Ambassador and High Commissioner of France in China, Grand Officer of the Imperial Order of the Legion of Honour, Knight Grand Cross of several Orders, &c., and his Majesty the Emperor of China, Prince Kong, member of the Imperial family, and High Commissioner:

Who, after having exchanged their full powers, found good and in due form, have agreed to the following articles:—

ART. I.

His Majesty the Emperor of China has seen with pain the conduct practised by the Chinese military authorities at the mouth of the river of Tien-tsin, in the month of June last year, at the moment when the Ministers Plenipotentiary of France and England there presented themselves, on their way to Peking, in order to proceed to the exchange of the ratifications of the Treaties of Tien-tsin.

ART. II.

When the Ambassador, High Commissioner of the Emperor of the French, shall be in Peking to proceed to the exchange of the ratifications of the Treaty of Tien-tsin, he shall be treated during his stay in the capital with the honours due to his rank, and all possible facilities shall be afforded him by the Chinese authorities, that he may fulfil without obstacles the high mission confided to him.

ART. III.

The Treaty signed at Tien-tsin on the 27th June, 1858, shall be faithfully executed in all its clauses immediately after the exchange of the ratifications spoken of in the preceding article, subject, it is well understood, to the modifications which may be made therein by the present Convention.

ART. IV.

The fourth article of the Treaty of Tien-tsin, by which the Emperor of China engaged to pay the French Government an indemnity of 2,000,000 taels, is annulled, and is replaced by the present article, which raises to the sum of 8,000,000 taels the amount of the indemnity. It is agreed that the sums already paid by the Custom House of Canton, on account of the 2,000,000 taels stipulated by the Treaty of Tien-tsin, shall be considered as having been paid in advance, and on account of the 8,000,000 taels referred to in this article. The stipulations made in Art. 4 of the Treaty of Tien-tsin, on the mode of paying the 2,000,000 taels, are annulled. The amount of the sum which remains to be paid by the Chinese Government, on account of the 8,000,000 taels stipulated by the present Convention, shall be provided for by setting apart the fifth of the gross revenues of the custom-houses of the ports opened to foreign commerce; and the payments shall be made at intervals of three months, commencing on Dec. 31. This sum, specially reserved for the indemnity due to France, shall be paid to the Minister of France, or his delegates, in Mexican piastres, or in sycee silver, calculated at the rate of exchange on the day of payment. A sum of 500,000 taels shall, however, be paid on account beforehand, in one sum, and at Tien-tsin, on the 30th November next, or earlier if the Chinese Government thinks proper. A mixed commission, appointed by the Minister of France and the Chinese authorities, shall determine the regulations to be followed for effecting the payment of the whole indemnity, for verifying its amount, giving a receipt for it, and, in short, for fulfilling all the formalities required in such cases.

ART. V.

The sum of 8,000,000 taels is allowed to the French Government as an indemnity for the expenditure which the circumstance of taking up arms against China compelled it to incur, as also to compensate the French and the persons under French protection who were despoiled of their property when the factories at Canton were burnt down, and likewise to indemnify the Roman Catholic missionaries who have suffered in person or property. The French Government will divide that sum between the parties interested, whose claims shall have been legally established, and in proportion to the said claims; and it is agreed between the contracting parties that 1,000,000 taels shall be set apart to indemnify French subjects or persons under the protection of France for the losses they have suffered or the ill-treatment they have undergone, and that the remaining 7,000,000 shall be appropriated to meet the expenses occasioned by the war.

ART. VI.

In conformity with the Imperial edict issued on the 20th of March, 1846, by the august Emperor Tao Kouang, the religious and charitable establishments which were confiscated from the Christians during the persecution of which they have been the victims shall be restored to their owners by the instrumentality of his excellency the French Minister in China, to whom the Imperial Government shall cause them to be transferred, with the cemeteries and buildings appertaining thereto.

ART. VII.

The town and port of Tien-tsin, in the province of Petcheli, shall be open to foreign commerce, on the same conditions as the other towns and ports of the empire where that commerce is already permitted, and that shall take place from the date of the day of the signature of the present Convention, which will be obligatory for the two nations without it being necessary to exchange ratifications of it, and which shall have the same force and value as if it was inserted word for word in the Treaty of Tien-tsin. The French troops which occupy that town may, after the payment of the 500,000 taels mentioned in Art. 4 of the present Convention, evacuate it, and go and establish themselves at Taku and on the northern coast of the Shang Tong, whence they will afterwards retire on the same conditions as will preside over the evacuation of the other points which they occupy on the coast of the empire. The commanders-in-chief of the French forces shall, nevertheless, have the right of wintering their troops of all arms at Tien-tsin if they think proper, and of not withdrawing them until the moment when the indemnities due by the Chinese Government shall have been entirely paid, unless it may suit the commanders-in-chief to make them leave before tha period

ART. VIII.

It is also agreed that as soon as the present Convention shall have been signed, and as the ratifications of the Treaty of Tien-tsin shall have been exchanged, the French forces which now occupy Chusan shall evacuate that island, that those which are before Peking shall retire to Tien-tsin or to Taku, on the north side of the Shantong, or into the town of Canton; and that in all these places, or in each of them, the French Government may, if it thinks right, leave troops up to the moment at which the total sum of 8,000,000 taels shall be entirely paid.

ART. IX.

It is agreed between the high contracting parties that, as soon as the ratifications of the Treaty of Tien-tsin shall have been exchanged, an Imperial decree shall order the superior authorities of all the provinces of the empire to permit every Chinaman who may wish to go into countries situated beyond the seas, to establish himself there or to seek his fortune, to also embark with his family, if he desires, in the French vessels which may be in the ports of the empire opened to foreign commerce. It is further agreed that, in the interest of these emigrants, to assure them full liberty of action and secure their interests, the competent Chinese authorities, in concert with the Minister of France in China, shall adopt such regulations as will give to these engagements, always voluntary, the guarantees of morality and validity which they ought to possess.

ART. X.

It is well understood between the contracting parties that the tonnage dues, which, by mistake, were fixed in the French Treaty of Tien-tsin at five maces (about 15 sous each) per ton, on vessels guaging 150 tons and upwards, and which, in the treaties signed with England and the United States in one thousand eight hundred and fifty-eight, are fixed at four maces only, shall only amount to that sum of four maces, without having to appeal to the last paragraph of Art. 27 of the Treaty of Tien-tsin, which gives France the formal right to claim the treatment of the mos favoured nation.

The present Convention of Peace has been made at Peking, in quadruple, on the twenty-fifth of October, one thousand eight hundred and sixty, and there signed by the respective plenipotentiaries, who have affixed thereto the seal of their arms.

Baron GROS.
Prince KUNG.

THE RUSSIAN HELP TO LORD ELGIN.

A correspondent of the *Journal de St. Petersbourg*, writing from Irkoutsk on the 30th of November, gives the following account of the part taken by the Russian envoy, General Ignatieff, in the recent negotiations at Peking. After narrating the advance of the Allies and defeat of the Chinese, the Russian correspondent says:—

"Meantime, our Plenipotentiary, General Ignatieff, had left Tien-tsin and joined the army of the Allies. Close on Peking they were still undecided as to whether they ought to enter so populous a city or not; they had sent a summons to the Chinese before the 1st of October, threatening a bombardment in case of non-compliance. General Ignatieff pointed out to them on the map the residence of the Russian embassy, and received the assurance that it should be respected. At the same time he obtained a safe-conduct for Colonel Baluzek, sent to inquire into the condition of our mission inside the besieged city.

"The Colonel found all the members of the mission in excellent health, and informed General Ignatieff of the fact. At the same time the General received a letter from the brother of the Bogdy-Khan and from the high dignitaries intrusted with the Regency, who, in the name of the friendship which for two centuries has existed between China and Russia, entreated our Plenipotentiary to save China from perdition, and to undertake the office of intermediator between them and the Allies.

"Finding that the Chinese were inclined to enter into negotiations, the Allies, acceding to the representations of our Plenipotentiary, consented not to enter Peking, not to burn the palace that had been sacked, and to encamp their troops on the walls of the town, on which they placed their guns, pointed towards the interior of the city. General Ignatieff entered Peking in the first week of October with a *suite* of 14 Cossacks and alighted at the Russian Embassy. All the high dignitaries immediately waited upon him. He explained to them that they must at once accede to all the demands of the Allies, to which they consented. . . . . .

"General Ignatieff explained to them that the barbarous treatment of the European prisoners was an infraction of the law of nations, and would call down upon them the vengeance of all Europe, even of Russia, despite the friendship of two centuries; and that to save China they must at once consent to every demand of the Allies. Thanks to the good offices of the Russian Plenipotentiary, the English Ambassador made his entrance into Peking on the 12th of October, was received in the Palace of Foreign Affairs, and before leaving it ratified the treaty, and concluded a supplementary convention. On the following day the French Ambassador did the same.

Digitized by Google

"When the Treaty was concluded General Ignatieff gave a dinner at the Russian Embassy to the Plenipotentiaries of France and England and their suites. During the dinner a courier arrived quite unexpectedly from Irkoutsk, M. Schismareff, sent by Count Mouravieff-Amourski. The appearance of a courier from Siberia produced a great effect upon our guests, especially when they learnt that M. Schismareff had done the journey from Irkoutsk through Mongolia, in carriage and on horseback, in fourteen days."

Spirit of the Press.

THE PEACE WITH CHINA.

THE TIMES.

The Park and Tower guns have given formal expression to the fact that England is at peace with China, and, although the tardy *Gazette* disappointed the public expectation last evening, the official history of the negotiation is now before the public. This collection of despatches is most interesting in its circumstantial narrative. As scene succeeds scene, we have in quick succession the fence of dexterous diplomatists; the pomp of war brought forward to coerce, to terrify, and to punish; the episode of Asiatic craft, and treachery, and cruelty; then the honest indignation of the outwitted and outraged European, the pillaged palace, the cringing Asiatic, and the surrendered city; then, once again, the surrender of the bodies of the tortured prisoners, and the Palace flaming in retribution; the recital of the woes of the captives; and, finally, the solemn ceremonial of the atonement, and the great reconciliation amid the relics of a faded splendour. All these scenes pass on in these historic papers with a certain grave sequence from which the grotesque and the ridiculous must be carefully eliminated. To these papers a later generation will refer when they ask, as their fathers have vainly asked, what may be the magnificence of this "Forbidden City," what the grandeur of those official palaces, the depositories of such tremendous power, what the dignity and wisdom of those almighty governors upon whose will hang the destinies of one-third of the human race? Men who come after us will wonder at the trusting credulity which existed before the year of grace 1860. They will laugh, perchance, at the lightness with which their predecessors trusted in the Chinese scholars who believed all things of this Imperial system. They will laugh when they find that under the guidance of these scholars we advanced, almost with reverence, as to the keystone of social order, to this great school of Confucius; that we found there a knot of blind old men, whose only quality was an admixture of timid levity and selfish cunning, and that we found the result of their craft to be a starving people, living in a mouldering assemblage of huts, and the shells of palaces now sinking in dust and filth. We were told that we were about to put our hands upon a crouching lion, and we found that the beast was stuffed and moth-eaten. Throughout all these proceedings we may trace the difference between the Chinaman and the Tartar. The Tartar Prince is unlettered, passionate, and brave, the Chinese literate is always crafty, perfidious, and timid, and both are probably corrupt. When Sang-ko-lin-sin ordered Mr. Parkes and his companions into captivity, he was probably actuated by sudden passion; when the Mandarins toned his sufferings to exact unison with the object required of him, they were actuated by policy. They would have got nothing by killing him, and they hoped to make use of him. As time wore on, and Mr. Parkes's resolution did not swerve, circumstances changed, and they were afraid to kill him. When it was decided that he was to go back, it was their obvious interest to use him well. Again, Brabazon and the Abbé de Luc were killed by a Tartar general in hot blood; the other prisoners were evidently in the hands of the Chinese, for they had been taken before the Board of Punishments at Peking, and had been carried through the gardens of the Summer Palace of the Emperor. Inhuman as the conduct of their gaolers was, we do not believe they intended their death. Heaven forbid that we should say one word to extenuate the guilt of the wretches who starved and tortured our friends and countrymen! They knew well enough what suffering they were inflicting, but, as we believe, they did not know what the result would be. They bound the Europeans as they would have bound Chinese, only more tightly, according to their ideas of their greater strength. The thin-blooded Chinamen live through their torments, and can endure the starvation under which, together with the wounds inflicted by the cords, our countrymen died. We see that when Captain Anderson died the treatment was a little ameliorated. The Chinamen desired at once to gratify their cruelty and to avoid the retribution to be expected for an actual murder. Mr. Parkes was too considerable a personage to permit the operation of any other motives save those of policy, but the others were kept to be restored, and were tortured for revenge. It is not our intention to go through the provisions of this Treaty until the public have had an opportunity of reading the whole of the documents. We have no right to subject it to adverse criticism, for it contains no article which we have not strenuously for the last three years pressed upon all who were concerned in conducting the negotiations. Some have already urged that the indemnity might very fairly have been doubled, and there would not be much difficulty in showing that China, which has for some years now past been absorbing the silver of the Western nations, is quite able to pay any sum it might be just to demand. But Lord Elgin was probably bound by his instructions, and the instructions were given at a time when the circumstances were different from those which existed when the Convention was signed. We shall be surprised to find any other item upon which, in our present state of information as to the requirements of our commerce with the Chinese, it will be easy to raise a cavil.

DAILY NEWS.

We can now look back upon the course of the war in China from its commencement to the return from Peking, and compare it as a whole with its results. What sufficiency, what completeness, strike us whenever we get a glimpse of the Army! At a word it moves with automatic regularity, and its operations are marked with mechanical precision. Then it has been remarkably fortunate. It has not been surprised with any unexpected development of Tartar skill such as that by which the disaster of the Taku Forts last year is explained. The enemy has proved the same presuming, blustering, and incompetent foe we have so long known in China. But for this rudeness of the soldiery of the Celestial Empire the eminently satisfactory services of our army might be called brilliant. All that an army could do this army has done; and the chief use of the expedition is to prove how little that is, and how absolutely necessary it is that we should at once revise the policy we have hitherto pursued in China. If that lesson is well learned, the ten millions or so which the British taxpayer will have to pay for this war will not be thrown away. Another fond dream of the abettors of this war was the destruction of the war party in China, by the personal punishment of its chiefs. The imaginary "Old Mandarins" of Peking have figured in the literature of the war like the *anciens partis* in the articles of M. de Cassagnac. They were the authors of all evil, and their doom was certain from the moment we got to Peking. Arrived there, our Ministers and Generals have been obliged to remember that war is not a judicial process but a political expedient. The horrors of war would be aggravated tenfold if the combatants, each of whom always asserts that he has a right on his side, were to pretend to vindicate besides their own interests the cause of public justice, and hostilities would only end with the destruction of the weaker party if that party saw its executioner in its opponent. Lord Elgin, in his despatch to Lord John Russell, well discusses this question with reference to the brutal treatment of our countrymen, for which, if for anything, a strong personal chastisement should have been the reward. He says:—"I might have required that the persons guilty of cruelty to our countrymen, or of the violation of a flag of truce, should be surrendered. But if I had made this demand in general terms, some miserable subordinates would probably have been given up, whom it would have been difficult to pardon and impossible to punish. And if I had specified San-ko-lin-sin, of whose guilt in violating a flag of truce evidence sufficient to ensure his condemnation by a court-martial could be furnished, I should have made a demand which, it may be confidently affirmed, the Chinese Government would not have conceded, and mine could not have enforced. I must add that, throwing the responsibility for the acts of Government in this way on individuals resembles too closely the Chinese mode of conducting war to approve itself altogether to my judgment." All this is so sensible that everybody is sure to approve of it now. The great Mandarins, instead of being degraded, have been treated with. This may not be poetical justice, but it is the rule of peace and war among civilised nations.

GLOBE.

The whole story of the Chinese expedition is full of interest, but among the documents published last night, by far the most interesting is that despatch to Lord Elgin wherein Mr. Parkes recounts the history of his capture and captivity. His simple narrative at the outset shows how unjust it was to throw upon him the burden and responsibility of the capture of the other prisoners. He acted throughout, as in duty bound, eager to stop, if possible, the frantic violence of the war party, and eager also, in any case, to snatch the English and Sikhs within the enemy's lines out of their hands. Had he chosen to sacrifice De Norman, Anderson, and Bowlby, and the sowars, he might easily have done so, and have ridden off, like Mr. Loch, into the quarters of Sir Hope Grant. He preferred the nobler part—to save, and not to desert, and peril his own liberty and life, rather than abandon his countrymen. That it was possible at first for Mr. Parkes to have got away is shown by the fact that Mr. Loch did get away, and that he rode back to Tung-chow, accompanied by Captain Brabazon. Events show that then it was too late to escape, but they also show that the surprise and treachery were planned, and that the nefarious scheme embraced a perfidious attack upon the army and the capture of as many prisoners of rank as possible. Failing to shake the firmness of Mr. Parkes, who would not exchange his prison quarters for the more luxurious accommodations of a temple, unless Mr. Loch enjoyed the same privilege, he repeatedly told the mandarins that if they killed the prisoners the only result would be a terrible vengeance upon them, he boldly and gallantly urged what was for his country's good, and never sacrificed his public duty to his private safety.

THE ALTERED POLICY IN RUSSIA.

It is easy to perceive, and idle to conceal, that a great and a beneficial change has come over the policy of the Russian Empire, internal as well as external. The abolition of serfage, the relaxation of the passport system in reference to strangers, and more especially in reference to Englishmen, and the greater freedom allowed during the last few months to the press, are evidences of the benevolent disposition and the wiser policy of the young Emperor Alexander. Espionage too, in domestic society, and among the servants and retainers of the boyards, is greatly mitigated; and, although official corruption is nearly as great in Russia as it was in 1855, the young Emperor struggles against it with amazing pertinacity and the calmest courage; and there is reason to believe, if life and health be spared to him for ten or for twenty years, that he may reform a system which eluded the vigilance of Alexander I., and defied the uncontrolled and vehement will of Nicholas. Our own international relations with Russia are, we are happy to say, improved and improving. The military and civil authorities in the Crimea have shown some solicitude for the remains of the British brave who lie in a distant land; and during the progress of these two last Chinese affairs, since 1858, Russian diplomatists and officials have conducted themselves as might be expected from Christians and gentlemen imbued with the humanising influences of European and Western civilization. Their functionaries in China, whether military, naval, or civil, have acted a moderating and friendly part, and have on all occasions endeavoured to mitigate, when they could not restrain, the obstinacy and brutality of the Chinese. The Russian telegraph has transmitted with celerity and care important news to this country: items of intelligence from the scene of operations in China that were looked for not merely with great public, but with a thrilling and painful private, interest. These are amenities which would, under any circumstances, call for recognition and acknowledgment, but which specially invite it, considering that Great Britain and Russia have been so lately at feud. The trans-

Digitized by Google

mission of early intelligence to our Minister at St. Petersburg, however, though a courteous and friendly act, is not to be compared to the kindly services and cordial sympathies which General Ignatieff and all the members of the Russian Mission had the opportunity of exhibiting to Lord Elgin and his suite, to the Commander-in-Chief and the officers of the British army. These services are gratefully acknowledged by Lord Elgin in two letters to General Ignatieff, published in the *Extraordinary Gazette*, which, with the Russian General's reply, deserve to be recorded as equally creditable, equally honourable, to both parties. The occasion was one, it may be said, to invite sympathy and to call forth generous and humane feelings. Truly it was so; and nobly did the Russians respond. They evinced their horror at the barbarities perpetrated by the Chinese in burning words of grief and indignation, and they placed their cemetery at the service of the British and French Plenipotentiaries for the reception of the mangled remains of the natives of the two great nations. Not content with this passive sympathy, the members of the Russian Mission, its priests, and servants, followed the remains to the tomb, mingling their tears and their regrets with the comrades and countrymen of those who had been so barbarously tortured.—*Morning Post.*

THE RUSSIAN SERVICE TO LORD ELGIN AT PEKING.

We should be ashamed not to bring our contribution to this great work of correcting erroneous convictions, and we proceed at once to earn and to claim the proper amount of credit for destroying a popular error which is especially rife at this moment. Now, it is generally believed all over England that the British expedition to China has been very successful in attaining the objects for which it was despatched. We are under the impression that the storm of that Taku Fort was rather a dashing thing, and that it worked so strongly upon the Tartar mind, that Sang-ko-lin-sin galloped off straight to Peking and endeavoured to induce the Mandarins to make peace at once. It is further thought that when by jibes and reproaches the Tartar Prince was once more forced to return to the charge, he did so with very depressed hopes of success, and that after being again well thrashed he quite despaired of any victory, except over a small escort or a flag of truce. We had allowed ourselves to believe that when the Emperor fled away amid the snows up to his Hunting Palace at Zehol, he was actuated by fear of the approach of those terrible and invincible Barbarians for whose heads there was no market price at Peking, with any prospect of immediate delivery. We have listened favourably to the suggestion that the destruction of the Summer Palace was looked upon by the Chinese as a strong act of power, and that the occupation of the defences of Peking was a very decisive fact, tending to induce the Chinese authorities to come to terms. It has been said, by what was thought good authority, that Prince Kung himself was from moment to moment lamenting the delay in the completion of the Convention, complaining that any moment might be fatal, for that the population of Peking were only watching for some fact which they might interpret into a sign of the commencement of a bombardment of the city, and they would arise and sweep away the Tartar dynasty and the whole Mandarin system. Such has been the common belief, and the innocent conviction has followed that it was under the pressure of the arms of the Allied forces that China succumbed, that the Treaty of Tien-tsin was ratified, and that the Convention of Peking was signed. No such thing: it is all a vulgar error. Admiral Hope might just as well have been defending the quarantine harbour at Malta, and Sir Hope Grant might equally as well have been drilling unpractised battalions at Aldershott. The military successes had nothing whatever to do with it. The real hero of the whole affair has never been known. He has at last shown himself. He comes forth to us ushered by a no less authoritative gentleman-usher than the *Journal de St. Petersburg*. That hero is General Ignatieff. It is he who has done it all. In our impression of yesterday we gave the corrected history of this affair. It may be generally premised that some disturbance had happened, that some military operations had taken place, and that great confusion was prevailing. This was the state of affairs when General Ignatieff, the Plenipotentiary for Russia in those parts, saw that the moment had arrived for effective intervention. He resolved to breathe peace over the troubled waters. On this errand, with an escort of fourteen Cossacks, he set forth from Tien-tsin. Master of the position, he passed through the lines of the two hostile armies and entered the city of Peking. Galloping unquestioned through the streets, he alighted at the Russian Embassy. Immediately the fame went forth that the necessary man had arrived! The Mandarins, who were probably at that moment engaged in the ingenious amusement of torturing their prisoners, desisted from their recreation, and went to prostrate themselves before the man of the hour. It was for him to tell them what to do, and they would obey. It was Russia who had been for two hundred years the friend of China, and General Ignatieff was Russia. Then outspoke Ignatieff, and his word was the law of China. He commanded that they should cease from tormenting the prisoners, under pain that Russia would cease from giving to China those proofs of friendship which she has afforded her for two hundred years, and lo! the Mandarins ceased from tormenting, and hastened to collect their prisoners, that they might be delivered up. General Ignatieff spake once again, and ordained that the Chinese should accede to all the demands which the Allies had made. Again the Mandarins were submissive. The ratifications were produced, the Convention was signed, the smart money was paid down, and Ignatieff having, in half an hour, settled the whole affair, invited all parties to an excellent dinner.—*Times.*

Literature.

A Personal Narrative of Two Years' Imprisonment in Burmah, 1824—26. By Henry Gouger. John Murray, Albemarle-street.

Had the volume before us been published a few months earlier, it might have been deemed a "paradox," but now, unhappily, "the time gives it proof." The events chronicled by the prisoner in Burmah are so strange, so painful, so startling, that at any other time than the present the reader would ask in wonder, almost with incredulity, "Can such things be?" Now, alas, we know from the terrible episode in the Third China War that this, even more than this, is possible, and as we turn over page after page of Mr. Gouger's harrowing narrative we are reminded more and more forcibly and more and more sadly of the sufferings of those brave men so recently the victims of Oriental cruelty. A third part of a century has elapsed since the occurrence of the events here narrated, and it is saddening to reflect that they have been reproduced in yet more dread intensity and with still more fatal results in the year which has just closed.

Mr. Henry Gouger, the author of the work under notice, tells us that he left Calcutta for the port of Rangoon in June, 1822, partly in the hope of recovering his health, and partly with the expectation of realising a fortune by a mercantile venture in the Burmese Empire. In due course our merchant reached Rangoon, then, as he informs us, a miserable dirty town, containing 8,000 or 10,000 inhabitants. The reception was a friendly one, and encouraged him to prosecute his journey to Amerapoorah, then, as now, the capital of the Empire; although shortly after his arrival the Court removed to Ava. His description of the noble river Irrawuddi, though less minute, is scarcely less interesting than that given in the "History of the last Mission to the Court of Ava," by Major Yule. On Mr. Gouger's arrival at the capital he was received by the King, the nobles, and, indeed, by all classes, almost with cordiality. Here, to his great surprise, he met a fellow countryman, a "Mr. Rodgers," who had passed the greater part of his life among this semi-barbarous race. There was a complete scramble for Mr. Gouger's Manchester goods, and his £3,000 in merchandise were speedily converted into £8,000 in specie. Here, however, arose his first difficulty. He had been honourably paid for his commodities, but he was at a loss to know what to do with the money. The exportation of gold and silver, and, in truth, of almost all other commodities of value, was forbidden by the Burmese Government, and the issue of Mr. Gouger's trading seemed to necessitate his continued residence in the country. After a brief visit to Calcutta he returned to Burmah in contemplation of a lengthened residence and a prosperous career. Scarcely, however, had our author reached the capital, ere there were rumours of war, or rather there was that uneasiness which generally precedes a state of actual war. Mr. Gouger complains, and he has reason to complain, of the conduct of Lord Amherst's Government in neglecting to warn the unwary traveller of the risk he was incurring. To this neglect Mr. Gouger does not hesitate to attribute his subsequent sufferings.

It soon became evident that the position of the "white foreigners" was a very dangerous one. Mr. Gouger's assistant (a Mr. Richardson), who had accompanied him from Calcutta on this second venture, effected his escape with more speed than dignity. The war commenced—Rangoon was bombarded, and of course our adventurous merchant was accused of being a spy. It must, indeed, be admitted that appearances were against him, and although we are horrified at the treatment he experienced, we are by no means surprised at his arrest. Here commences the painful interest of the story; but we must leave to the reader of the book itself the details of the "Two Years' Imprisonment in Burmah." Mr. Gouger seems to have been looked upon as the arch-traitor, but there were associated with him in his captivity Drs. Judson and Price, the American missionaries, Mr. Rodgers, to whom we have already referred, and three or four others. Let us only say that the picture of the Neapolitan dungeons under the Bourbon rule, even as painted in the bold outline and with the strong colouring of Mr. Gladstone's pencil, is a mild and attractive one compared with that now presented to us of the *Let-ma-Yson*, or death prison in Burmah. After two years of intense mental and bodily suffering, Mr. Gouger was liberated on the demand of the British General, Sir Archibald Campbell, and he has lived to tell the strange adventures which befel him in his youth to another generation. To the numerous reflections of a general character to which the perusal of this narrative naturally gives rise we cannot now advert, but we must just refer to the two more prominent ones which have occurred to us. The first is this, that the people of Burmah generally, like those of China, are *not* opposed to European intercourse, and that civilization in both cases is retarded, *not by the wishes of the people, but by the policy of the rulers.*

Digitized by Google

If, however, Major Yule has correctly pourtrayed the present Burmese monarch (and we have reason to believe that he has), we may hope that the policy of that empire will henceforth be less assimilated to that of the Tartar rule. Our other reflection is obvious enough, viz., that strict adherence to our word, and undeviating integrity, are essential in our dealings with these semi-civilized races. Of this the narrative before us affords a curious illustration. We performed our part of the treaty obligations; that is to say, when the stipulated portion of the indemnity was paid, we withdrew our troops. On the other hand, to the people of Pegu we acted unfairly, every reader of history knows with what lamentable results.

Our admiration of Mr. Gouger's work has induced us to exceed our accustomed limits, but we cannot conclude without referring to the spirit and the literary style of the composition. The author tells us that, never having followed literary pursuits, he was diffident of his powers of description. He need not have been. In our estimation the style has high merit. It is clear, vigorous, and unaffected. In a word, the narrative bears throughout the impress of *truth*, and is evidently the work of a man who possesses an intellect of no mean order, cultivated taste, and, more than this, a heart humbly thankful to the Providence that preserved him amid the horrors of his captivity.

We find in an American journal some interesting facts concerning Japanese Literature—both from a literary and commercial point of view. At a late meeting of the New york Ethnological Society, Mr. Ewbank presented the report of the interview of the Committee with the Japanese. They learned that in Japan reading and writing are almost universal, and that there is a large Japanese literature; the censorship having been established only about fifty years ago. Their books are very cheap, and illustrated books have been common for ages. The Committee saw an illustrated book on the quarrying and smelting of copper, one of a series of industrial handbooks, with which they were very much struck. They say that it conveys the knowledge it treats of in fewer words than are used in our prefaces or introductions, and that the illustrations are so full and plain that the ordinary English readers can be at no loss as to any particular. Fourteen pages are occupied by outline pictures, slightly shaded and coloured, representing all the details and operations, from quarrying to marking and packing the copper. Then thirteen more pages are filled with the tools used, each part being separately drawn, with its name annexed. This is so minute as to give all the baskets, pokers, hammers, pincers, tongs, bellows, tubs, shovels, moulds, stamps, with which to mark the ingots, and scales for weighing them. The bellows act on the principle of our double-acting pumps. This book was printed in colours. The Japanese said they were "much plenty." The price of this was only fourpence or fivepence. The report says, that so far as regards the production of a cheap and useful literature, Japan may be said to have been centuries in advance of Europe. Measures have been taken to open a correspondence with some of the learned men of Japan. While on this subject we may call attention to Captain Sherard Osborn's little book on the Japanese, published by Messrs. Bradbury and Evans, which, although well received by the public, has not, we think, yet had full justice from the critics. Nothing can surpass the piquancy, the oddity, and originality of its bright coloured drawings of Japanese Life by native artists. The picture of the strong lady controlling a restive horse at her side, by placing one foot upon the reins while she calmly surveys the landscape before her, really exhibits a totally new species of humour and extravagance.

DR. MACGOWAN IN LIVERPOOL.

At one of the lectures recently delivered in Liverpool by Dr. Macgowan, the Rev. Canon McNeile took the chair, and introduced the lectures in the following terms:—

It afforded me much pleasure to be able to comply with Dr. Macgowan's request, that I would preside on this occasion. I felt an attraction both to his subject and to himself. Recent events have invested China with a peculiar interest to us all. The transition from war to peace: from the military occupation of the gates of Peking, and the sacking of the Summer Palace of the Emperor, to the evacuation of Peking and the signing of a treaty, bears a stronger resemblance to the shifting scenes of a fictitious drama than to the stubborn and gradual realities of human life. True, indeed, it is, our respected lecturer has no information to give us concerning the stipulations of the treaty, or the material guarantee by which their execution is secured. Neither can he tell us, what at this moment every English heart longs to know, concerning the yet unreturned prisoners. But he has much, and of lively interest to tell us concerning that strange people, with whom we are brought into such strange collision. I need not bespeak your attention. But one word about the lecturer himself. He comes among us in the interesting character of a *Medical Missionary*. The combination of medical practice and missionary enterprise is consecrated by very sacred recollections. We recall the first Christian Mission under the Great Apostle of the Gentiles, and the medical missionary, who formed one of the apostolic band; and we affectionately desire that a large measure of the blessing which rested on the work of that "beloved physician" may attend the labours of our friend and brother here present, so that what was so pointedly and beautifully said in two Latin lines concerning St. Luke, may be found truly applicable to Dr. Macgowan:—

"Lucas Evangelii, et Medicinæ munerepandit
Artibus hinc, illine Religione potens."

I do not expect you all to understand this, much less to enter into its expressive terseness. But I will tell you how it has been paraphrased into English:—

"Saint Luke, by medicine and religion joined,
Relieves the body and renews the mind.
Blest in both labours—dark diseases part,
And darker ignorance forsakes the heart.
Thrice happy Luke, commissioned from on high,
Restores to life, and teaches how to die.*"

THE LATE MR. DE NORMANN.—A correspondent writes to the editor of the *Fife Herald* as follows:—"It may interest many of your readers to learn that Mr. De Normann—whose cruel death is so widely deplored—though bearing a foreign name, was closely connected with Scotland. He was the only, and a posthumous, child of Baroness de Normann, third daughter of General Douglas Maclean Clephane of Torloisk. He belonged to some of the oldest families in Fife—Douglas of Kirkness, Lundin of Auchtermairnie, Clephane of Carslogie—and he was related to several noble English families, being cousin-german to the Marquis of Northampton. He was in his 29th year; and it may be added that those who knew him best could furnish the largest additions to the distinguished testimony borne by Lord Elgin, in his despatches, to his high character, and gallant spirit, and pure manners, and uncommon attainments." Baroness de Normann, mother of the lamented Attaché to the British Embassy in China, is staying with the Marquis and Marchioness of Northampton, at Castle Ashby, Northamptonshire.

THE LATE MR. BOWLBY.—The following appears in the *Sunderland Herald*:—"The arrival of the China mail has at length removed all doubts as to the fate of our accomplished townsman, Mr. T. W. Bowlby, the special correspondent of *The Times*. The removal, by a terrible death, of one of the most distinguished ornaments of our profession, and respecting whose safety the mind of the country had alternately been agitated by hope and fear for several weeks, warrants us in giving a few random jottings of his career, for which we are mainly indebted to his old schoolfellow and intimate friend, Mr. Thomas Burn, jun., solicitor, of this town. Thomas William Bowlby was the son of Thomas Bowlby, a captain in the Royal Artillery; his mother was a daughter of General Balfour. He was born at Gibraltar, and was the eldest of a numerous family, and when he was yet very young his parents took up their residence in Sunderland, where his father entered upon the business of a timber merchant. After leaving school he was articled as a solicitor to his cousin, Mr. Russell Bowlby, who at that time practised in this town. On the completion of his clerkship he went to London, and spent some years as a salaried clerk in the office of a large firm in the Temple. About the year 1846 he commenced practice in the City with Messrs. Laurence and Crowdy, and for some years he enjoyed a fair practice. But the profession of the law was not adapted to his peculiar tastes, and much of his time was spent in literary studies, and in the company of some of the literary celebrities of the metropolis. He was a most enthusiastic admirer of Shakspeare, and was ever ready with a quotation from his writings. Shortly after he commenced practice, Mr. Bowlby married Miss Meine, the sister of his father's second wife, and on the death of her father, Mrs. Bowlby became possessed of a considerable fortune. In 1848 Mr. Bowlby first became connected with the great journal in whose service he has lost his life. At that time the tide of revolution was surging over almost the whole continent of Europe, and immediately on its reaching Berlin Mr. Bowlby was despatched by *The Times* as its special correspondent. In that capacity he visited several parts of the Continent, and soon after his return to England he contributed to this paper several articles on the condition of Hungary. During the railway mania Mr. Bowlby got into pecuniary difficulties, which caused him to leave England for a short time; but it must be stated to his honour that he soon after made arrangements for the whole of his future earnings to be applied in liquidation of his debts. On his return to this country he was for some time associated with M. Jullien, and made arrangements in different continental towns for that gentleman's unrivalled musical performances. Mr. Bowlby, although he did not pretend to be master of any instrument, had a thorough knowledge of musical science. We next hear of him in Smyrna, where he was engaged in one of the departments connected with the construction of a railway (probably the very railway the opening of a section of which is telegraphed as we write—the Smyrna and Aden), but his labours there were abruptly terminated by the failure of Mr. Jackson, the contractor. He then returned to England, and remained unemployed until he was engaged to proceed to China as the special correspondent of *The Times*. The terms of his agreement were worthy of the leading journal of the empire—£1,500 a year, with liberty to draw upon the concern to any amount that might be required for the efficient discharge of his duties. Mr. Bowlby proceeded to China in the same steamer as Lord Elgin and Baron Gros, with whom he was shipwrecked, and his account of the loss of the *Malabar* at Point de Galle has probably never been excelled as a piece of free and dashing descriptive composition. Mr. Bowlby was a man of most amiable disposition, and of good conversational powers; his age would probably be about forty three. He has left a widow and five children, most of whom are of tender years; but it is some satisfaction for the country to learn that the widow and orphans will be amply provided for by the indemnity which will be wrung from the treasury of his responsible murderers." It is reported that the proprietors of *The Times* have settled a handsome pension on the widow of Mr. Boulby. She will also be the recipient of a portion—probably £10,000—of the £100,000 procured by Lord Elgin from the Chinese specially for division among the unfortunate prisoners.

COMMERCIAL POSTSCRIPT.

CITY, SATURDAY AFTERNOON.

At a public tea sale held on the 10th, 17,365 packages passed; 4,678 sold, of which 4,382 were without reserve. The sales went off very heavily, we quote from ½d. to 1d. decline on black leaf congou, since the last sale of January 2.

ARRIVALS NOT INCLUDED IN TABLE.—Jan. 9, at London, from Singapore and Sarawak, General Wyndham; from Rangoon, Solon. 8,

---

* The Paraphrase is by Dr. Mac Neile.

at Liverpool, from Rangoon, Suomi. 4, at Brouwershaven, from Batavia, Alblasserward, Nova Zembla, Abel Tasman; off Scilly, from Foo-chow-Foo, Peterborough. 10, at Liverpool, from Rangoon, Senator; at Clyde, from Manila, Britannia. 6, at Bronwershaven, from Batavia, Ternate. 10, at Liverpool, from Akyab, Emma Matilda. 8, at St. Nazaire, from Batavia, Condor; at Bordeaux, Rose Marie Louise; at Texel, from Sourabaya, Julie Claire. Dec. 25, at Boston, from Manila, Starlight.

DEPARTURES.—January 8, from Cowes for Batavia, Sydpolen; from Newcastle for Sourabaya, Hendrina, Stad Yierikzee, M. Driedrika. Dec. 26, from off the Lizard, for Batavia, Staatsraad van der Hoeven.

SPOKEN.—Mercedes (Fr. ship), Bordeaux to Hong Kong 1 Oct., 30 S. 31 W, Souburg, Rotterdam to Batavia 4 Dec. 3 N. 24 W. Petronella Catharina, Batavia to Holland 7 Dec. 2 N. 21 W. Jumania? (brig), Penang to London 19 Oct., 6 S. 94 E.

CASUALTIES.—The whole of the cargo of the Ardville, from Macao to London, on shore at Ambletause, has been landed, and will be forwarded to London. The Sicilie (Dutch vessel) Schol, from Rotterdam to Macassar, put into Pernambuco, Dec. 7. with damage to sails and spars, but was expected to continue her voyage about the 26th,

Monetary and Commercial.

The liquidators of the Eastern Archipelago Company have called a meeting of the shareholders for the 15th inst., when they will submit an accounts howing the progress made in the winding up.

The shares of the Labuan Coal Company experienced a considerable advance to-day, advices having been received confirming the favourable opinion of the mines, and stating that any quantity of coal can be procured at cheap rates. The agent writes:—"I quite agree with the original statement of Mr. Smith, the mining engineer, that the colliery will prove an extraordinarily lucrative adventure, and will supply the whole East with coal." The prospects of the undertaking are also considered to have been much benefited by the conclusion of peace with China, and the consequent probability of a greatly extended trade.

An explanation has been received of the mode in which news from Peking reaches St. Petersburg. The recent speedy telegrams regarding the Chinese Treaty were transmitted, it appears, in the usual way. The Russians have a regular courier system from Peking, with relay horses, and the despatches are delivered up to the first telegraph-office in connection with St. Petersburg which the bearer can reach. The route is *via* Mongolia, Kiakhta, and Irkutsk, and the common mail reaches the latter place within sixteen days of its departure from Peking. From Irkutsk to St. Petersburg seventeen days are required to the telegraph-office at Casan.

The *Money Market Review*, which has already established for itself a high reputation as a financial organ, has commenced, we perceive, a new and very useful feature with the present year in financial memoranda, and a summary or chronicle of leading events and dates, &c., which will be found useful for speedy reference.

The line of submarine cable to connect Malta and Otranto with Corfu, in order to form a duplicate line from Malta to London, has not yet been laid, owing to an accident to the steamer *William Cory*.

The dispute in the tea trade between the wholesale merchants and the brokers has been amicably arranged by a compromise; the brokers abandoning the charge of lot-money on all lots of tea below the value of £15; formerly it was charged on all above £5.

THE RANGOON AND SINGAPORE CABLE.

We noticed in our last that the vessels which were to convey this cable would be fitted with iron tanks, so that it might be submerged, to prevent heating. The Admiralty, however, have ultimately determined upon laying it between Malta and Alexandria. The steamer *Queen Victoria*, with a portion of the cable on board, went ashore on the 1st inst., and it is feared may become a total wreck, under Mount Edgecumbe, in Plymouth Sound. The stores and cable have been in course of removal for some days, and it is expected will be all saved. The vessel struck while being removed up to the yard at Keyham, for the purpose of pumping water on the heated cable.

THE RED SEA CABLE.

The differences lately existing between the Red Sea Telegraph Company, and Messrs. Newall and Co., the contractors, in respect to the alleged faulty condition of the cable have been amicably adjusted, and measures will be taken soon to replace the injured cable in the Red Sea.

The following statements respecting the bullion movements of the past half-year are from Messrs. Pixley, Abell, and Langley:—

Statement of Import of Bullion into London from undermentioned Places during Six Months ending 31st December, 1860:—

1860.	Gold.	Silver.	Total.
Belgium	£31,460	£40,500	£71,960
France	289,972	1,441,355	1,731,327
Hanse Towns	8,970	30,550	39,520
Holland	4,500	300	4,800
Russia	56,400	800	57,200
Spain and Portugal	71,400	85,570	156,970
Gibraltar	180	2,400	2,580
Malta	11,696	12,452	24,148
Alexandria	1,200	4,030	5,230
Cape of Good Hope, Cape Verd and Sierra Leone	65,100	—	65,100
United States	2,464,900	138,000	2,602,900
Mexico, Central America, West Indies, &c.	426,200	2,364,065	2,690,265
Brazils	92,339	—	92,339
Australia	3,616,000	—	3,616,000
Total	7,140,317	4,020,022	11,160,339
Amount imported during the six months ending June 30, 1860	6,051,833	5,730,169	11,782,002
Total imports, 1860	13,192,150	9,750,191	22,942,341
Total imports, 1859	£25,960,880	£17,180,468	£43,148,348

Statement of Export of Bullion from London to undermentioned Places during Six Months ending 31st December, 1860:—

1860.	Gold.	Silver.	Total.
Belgium	£50,600	£1,750	£132,350
France	6,922,676	541,133	7,463,809
Hanse Towns	12,510	104,160	116,670

ARTICLES OF IMPORT.

TEA.—During the past fortnight transactions have been unusually limited. The arrivals have been large; but importers generally have refrained from offering their teas, and we therefore have but little subject for remark. The few sales made have been at easier rates, especially in the new Kaisows and Monings, which show 1d. per lb. decline on the former, and 2d. per lb. on the latter. Scented teas also show a reduction of 1d. per lb. Greens have sold steadily, but quietly, at full prices. A small public sale took place on the 2nd inst., and a further sale is declared for the 16th inst. The stock on the 1st January of all descriptions of black, was, in London, 46,783,164 lbs., and 6,148,787 lbs. of green. The total delivery in London for the present year has been 68,647,794 lbs. of black, and 10,339,916 lbs. of green. The stock at Liverpool was 2,221,140 lbs. of black, and 28,906 lbs. of green. The total delivery in Liverpool for the present year has been 6,895,884 lbs. of black, and 664,825 lbs. of green. The imports in London from Jan. 1 to Dec. 31 have been 76,914,158 lbs. of black, and 10,071,873 lbs. of green, and at Liverpool 5,601,491 lbs. of black, and 343,045 lbs. of green.

SILK.—The imports of Shanghai silk during the past year have fallen short by 9,000 bales and the delivery 13,000 bales. In Canton sorts 1,550 bales, and an increase in Japan of 7,200. Messrs. Durant and Co., state, the chief feature of the year, and almost the only feature, was the importation from Japan—a most welcome and seasonable addition to our sources of supply. The only drawback to its advantage is the very small "breaks" in which it comes forward, but this is comparatively unimportant, and will, no doubt, be remedied in time. The grand point is, that it promises to be an increasing supply, and that the nature of the silk is intrinsically good, and much of it of a size to render it especially

Digitized by Google

available. We might also mention as a feature the increased export of Asiatic silk to the Continent, and it has been considerable. The public tables mark it as nearly 30 per cent., and yet with all this it is not supposed that foreign consumers are holding larger stocks than our own. For the last three weeks they have been very reluctant buyers, and for some time previously had not taken any large quantity. Of China Silk we have little to remark, except that the proportion of good silk, both tsatlee and taysaam, is unusually small, and that all is more or less objectionably coarse. The supply of taysaam until quite recently had been very small, but the falling off in the consumption has more than kept pace with the diminution in the supply, so that lately we have had a serious fall in prices of all but the best classes. Chinese Thrown Silk has been in bad odour for many months. A very large proportion of the imports was of very inferior description, and even for the best we have had but a limited demand, so that although without any fresh imports for several months, prices of all but the very best are very low, much below all former precedent. Of Canton Silk we were without any supply till the month of August, then it came forward rather freely, but unfortunately the quality fully shared in the general inferiority of all silk from China, and the condition was abominable—internally wetted, apparently, solely for the object of increased weight; prices, too, were felt to have been pitched too high, so that with the additional misfortune of the limited demand for the goods to which it was more especially applicable, it has not moved off rapidly. The "heap" of "Korats" under this head remains almost without diminution. There is no object for which it is applicable in this country, and foreigners take it very slowly.

STATE OF THE WAREHOUSES IN LONDON, ENDING JAN. 1, 1860 & 1861.

	Stock Sold. Jan. 1, 1861	Jan. 1, 1860	Unsold Stock. Jan. 1, 1861	Jan. 1, 1860	Delivered. Dec. 1860	Dec. 1859
China	4743	6570	11583	6029	4192	4453
Japan	1057	112	1304	—	611	—
Canton	869	969	1102	1982	157	201
Chinese Thrown	1146	898	2107	1553	288	345

We have no material alteration to notice since the last mail. The cargo by *Challenger* sold readily on landing, and the chop Tsatlees realised full rates (23s. being paid for thirds), but on Taysaams importers were obliged to submit to some further reduction in price. Within the last few days there has been less disposition to operate, and the more recent arrivals by *Ballarat* and overland are for the most part unsold. The following are the present quotations:—

	s. d.	s. d.	Superior. s. d.	s. d.
Tsatlee, No. 1 and 2	23 6 to	25 0		
„ No. 3 and 4	20 6	23 0		
„ No. 5	19 0	20 0		
Taysaam	14 0	18 0	19 0 to	21 0
Ditto, long reel	17 0	18 0	18 0	19 0
Canton	9 0	17 0	17 0	18 0
Chinese thrown	17 0	21 0	22 0	23 0
Japan	16 0	20 0	22 0	30 0
Yuenfa	14 0	25 0		

SUGAR, RICE, PEPPER, SPICES, HEMP, TIN, COFFEE, SAGO, and other articles of Eastern Import, usually given in our report, remain nominal at our last quotations, with very trifling transactions. Yesterday a parcel of 3,858 boxes of Japan Wax were brought to sale, and partly sold at for good block 58s. to 62s. Saucer 64s. to 65s. These quotations may be considered 2s. to 3s. lower.

COPPER.—There have been no sales of Japan imported by *Fairy*.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from England during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£67,853
Foo-Chow-Foo	—	—
Hong Kong	—	4,755

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s. to £6. 15s.; nail rods, £7. 5s. to £8; hoops, £9 to £9. 10s.; sheets, single, £9. 10s. to £10; Staffordshire bars, £8 to £8. 10s.; rails, £5. 10s. to £7.

STEEL.—Swedish keg, £17. 10s. to £18.

COPPER.—Sheet and sheathing, 11½d.; yellow metal, 9¼d.

TIN.—132s. for block; 133s. for bar. Tin plates, best charcoal, I.C., 30s. to 31s. per box.

LEAD.—English pig, £21. 5s. to £22. 10s.; shot, patent, £24. 10s.; sheet, £22. 2s. 6d. to £22. 5s.; spelter, £19. 10s.; zinc, English sheet, £25. to £26; quicksilver, £7 per bottle.

The export of metals for the past year has been as follows:—

To SHANGHAI.—Yellow metal, 65 tons; sheet copper, 5; iron in bars, 2,270; hoops, 169; sheets, 49; nail rods, 6,462; spelter, 386; tin plates, 956 boxes; lead in pigs, 1,274 tons; in sheet, 18; steel, 30; quicksilver, none.

To HONG KONG.—Yellow metal, 311 tons; sheet and sheathing, 105; iron in bars, 2,022; hoop, 348; sheet, 125; nail rod, 4,025; spelter, 70; zinc, 15; tin plates,, 2,087 boxes; lead in pigs, 3,123; in sheet 50; steel, 71; quicksilver, 254,603 lbs.

To SINGAPORE.—Yellow metal, 149 tons; copper sheathing, 120; iron in bars, 912; hoop, 174; sheet, 51; nail rod, 2,372; spelter, 108; zinc, 30; tin plates, 100 boxes; lead in pigs, 154; in sheet, 70; steel, 425.

To MANILA.—Yellow metal, 5 tons; copper sheathing, 79; iron in bars, 752; hoop, 71; sheet, 134; nail rod, 107; zinc, 16.

To BATAVIA.—Yellow metal, 15 tons; copper sheathing, 141; iron in bars, 1,043; hoop, 250; sheet, 273; nail rod, 406; spelter, 94; tin plates, 1,520 boxes; lead in pigs, 5 tons; in sheet, 20; steel, 89.

MANCHESTER MARKETS.

According to the last circular of Mr. Sam. Mendel, of Manchester, the market has had a decided check, owing to the advance in the value of money. Sales are impracticable without some concession. Spinners and manufacturers, however, do not press sales, as they have a supply of orders. Cotton yarns, Nos. 16-24, are quoted at 10¾d. to 11d., and 28-32 at 11¾d. to 12d.; grey shirtings, 39-inch, of 7lb., 7s. 4½d., 8¼lb., 9s. 6d., and 9lb., 10s. 6d.; Maddapollams, 8s. 3¾d. to 8s. 4½d. long cloths, 8s. 9d. to 8s. 10½d.; T-cloths, 5s. 6d.; spot shirtings, 10s. 1½d.; brocade, 10s. 6d.; damasks, 16s. 6d.

Shipping Intelligence.

From SINGAPORE.—At London: Guyon, Reward, Hawthorn, Oryx, Queen Mab, Captain Cook, Anglia, Eliza Thornton. At Liverpool: Conference, John N. Cushing. At outports: Zambesi, Brockelman, Johanna Kepler, Anna Maria.

From MANILA.—At London: Menam. At Liverpool: Idas, Monsoon, Matilda. At Cork: Recorder, Arizona, Meliora.

From PENANG.—At London: Jalawar, Germania, Three Bells, Toronto, Beucleuch, Malvern.

From BATAVIA.—At London: Richard Thornton. At outports: Chili, Eberhard, Albert Borsig, Heno. At Falmouth: Koning Willem III.

FREIGHTS AND CHARTERS.

Rates of freight current for vessels on berth to Shanghai, 50s. to 60s. per ton, weight and measurement. To Hong Kong, 50s., weight and measurement. To Singapore, 35s., and Penang, 45s., weight or measurement (nominal). To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement.

Arrivals of tonnage being very light, business is unusually quiet, even for the holiday season—the attention of the shipping interest having been to a great extent engrossed by the annual freight reports of the leading shipbrokering firms. The writers of nearly all these circulars agree in representing the shipping business of last year as considerably better than for several previous years, and they attribute the improvement to two causes, viz., the Chinese war and the deficient harvest; the former circumstance having tended to improve freights in the long trades by withdrawing a large amount of tonnage for the transport service, and the latter cause having operated as favourably upon the short trades, by creating a demand for tonnage for conveyance of cereals from the United States and Canada. Of the future, caution is displayed in prophesying the course of freights. Some appear to think that the shipping interest has entered upon a fresh career of prosperity; but others consider the improvement of 1860 temporary, and resulting from exceptional causes, which are not of a permanent character. The total export of coal from this country to foreign ports reached about 7,000,000 tons last year.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 50s. China and Manila, 50s. to 60s.

CASUALTIES.

The John Romilly is loading cargo ex-Scotia, Ward, from Sourabaya, which put in here July 12, leaky, &c., and was declared irreparable.

The Seaforth, Marshall, from Liverpool to Batavia, put back to Milford Dec. 19, leaky, and with loss of boats, bulwarks, &c., having experienced severe gales. She bore up on Dec. 9 from Cape Finisterre.

The Primera de Santander, from Manila to Queenstown, has been totally lost.

The Scotia, Ward, from Sourabaya to Amsterdam, which put into St. Helena, July 12, leaky, was sold there by auction Nov. 15.

The Isaad (Dutch barque), from Java to Rotterdam, was spoken 50 days out, Nov. 23, in lat. 29 S., lon. 10 E., with loss of fore top-gallant mast, fore mast-head, and jibboom.

The General Windham, Harrison, from Singapore to London, which put into Cape Town Oct. 22, leaky, was lightened of 250 tons of cargo, but the leak was not found. She was supplied with a steam-pump, and proceeded for her destination on Nov. 15.

The Dolphin, Hoyt, from Penang, which arrived at Boston Dec. 11, was in contact Nov. 3, in 24 N., 62 W., with the Grand Turk (schr.), of New York, and lost flying jibboom, &c.; the schooner lost cathead, jibboom, &c.

The ship Ardville, Capt. Barclay, bound from Macao to London, with a cargo of silk and tea, was wrecked near Ambletense on the 1st January. All the crew were saved. She is being unloaded; 3,300 packages of cargo had been saved in good condition. The ship was lying in a tolerably good position on the 2nd inst., but had driven far up on the beach.

The Queen Victoria (s. s.), with the Rangoon telegraph cable on board, grounded on the beach under Mount Edgcumbe, in Barnpool (Plymouth) 2nd January—two tugs were sent to her assistance, but she could not be got off. She had 12 feet water in one compartment, and her after part was under water at high tide.

The Granger, from Newport for Hong Kong, has put into Queenstown with loss of boats, sails, &c.

The St. Louis, Jacobs, which arrived at New York Dec. 15, from Singapore, was 20 days N. of Bermuda, during which time had heavy westerly gales, split sails, stove bulwarks, carried away head rails, &c.

The Mary Ann, Alexander, which arrived at Deal, Jan. 6, from Foo-chow-Foo, encountered on 21st Dec., in lat. 44 N., long. 26 W., a very severe gale, which lasted 60 hours, veering round to the eastward, in which she suffered extremely, carrying away part of main rail bulwarks, and straining topsides and decks very much. On the 31st Dec. and 1st Jan., off the Caskets, she encountered another strong gale from the W.S.W.

The Canoe (brig), Barens, from Batavia to Hamburg, put into Mauritius 5th Dec., leaky, making 16 inches water per hour at sea, and with part of cargo thrown overboard, having experienced a heavy gale.

The Batavia (ship), of and for Amsterdam, from Batavia, got ashore on the Kentish Knock, 4th Jan., but was assisted off next day after discharging part of cargo in smacks, and throwing about 30 tons overboard; she then proceeded in tow for London. Four bales tobacco have been landed at Ramsgate.

The Jessie Beazley, Tilby, arrived at Liverpool, from Canton, struck on a coral reef, 7th Oct., in Gaspar Straits, but got off in about 16 hours by shifting cargo.

———

At ST. HELENA, Nov. 1.—Conception, Tubon, from Manila, and sailed for Cadiz; 2, Medora, Hinds, from Singapore, and sailed for Queenstown or Falmouth; 8, Hawthorn, Swinborn, from Singapore, and sailed 10, for London; 10, Julie Claire, Vosteroom, from Batavia, and sailed for Amsterdam; Ardville, Barclay, from Macao; 11, Rose, Stephens, from Singapore, and sailed 12, for Liverpool; Alblasserwaard, v Lindern, from Batavia, and sailed 12, for Rotterdam; Hollandria, Wap, from Batavia, and sailed 14, for Amsterdam; 12, Yssel, Maarschalk, from Batavia, and sailed for Amsterdam; 14, Jalawar, Rochfort, from Bassein, off St. Helena, November 10, Batavia from Batavia.

At ST. HELENA, Nov. 15.—Holland, Auffnorth, from Batavia; Resident, v Son vd Hoff, from Batavia, and both sailed 16, for Amsterdam; 16, Thomas Sparks, Bruce, from Foo-chow-Foo, and sailed for Cowes; Emigrant, St. Juan, from Manila, and sailed for Havana; Sappho, Elve, from Manila, and sailed 17 for Queenstown; 17, Mary Ann, Alexander, from Macao, and sailed for London; 18, Borneo, Edwards, from Singapore, and sailed for Boston; 19, Valparaiso, Kok, from Batavia, and sailed for Rotterdam; 20, Rose Marie Louise, Carrier, from Batavia, and sailed 21, for Bordeaux; 23, Catharina Wilhelmina, Popken, from Batavia, and sailed 24, for Amsterdam; 25, Maggie, LeGeyt, from Canton, and sailed 26, for London; Ida, Soderberg, from Sourabaya, and sailed 26, for Rotterdam; 27, Epsom, Buckland, from Hong Kong, and sailed for London; 28, Mary Hillegonda, Boreman, from Padang, and sailed 29, for Rotterdam; Allegonda Jacoba, Deurholtz, from Batavia, and sailed 29, for Amsterdam. Off St. Helena, Nov. 13, Condor, Barbe, from Java, for St. Nazaire; 23, Jessie Beazley, from Canton to Liverpool.

At SIMONS BAY, Oct. 27.—H.M. Tpt. Albatross, from Hong Kong.

At TABLE BAY, Oct. 30.—Loevesteyn, Rorick, from Batavia for Amsterdam, leaky; Alliance, de Carteret, from Hong Kong, sailed Nov. 2, for Monte Video; Nov. 4, Acmel, Dunesen, from Amoy; 16, Conference, Webster, from Singapore; 18, Falcon, Sullivan, from Hong Kong; 21, Anna Maria, Hurst, from Cardiff, for Manila, to stop a leak; Oct. 22, Dacotah, Radford, sailed for China; 30, New York, Sweeney, for Japan.

———

PASSAGES FROM CHINA.—Among the best passages in the present season is that of the ship *Kelso*, Capt. Coulson. This vessel left Macao on the 19th Sept., and, owing to the prevalence of southerly winds, did not reach Anjer until the 30th Oct., or 40 days. From this point she made the Cape on the 21st Nov., and passed St. Helena on the 27th—6 days—being one of the most rapid runs on record. On the 1st inst. she arrived off Deal, thus counting only 40 days from the Cape and 102 from Macao. But for the detention in the China Sea Capt. Coulson would have made one of the quickest passages yet recorded. We understand that he takes command of a very fine new ship, now building in the North, to be called the *Chanticleer*, and will proceed to Hong Kong on the first voyage.

Curtis on Manhood—New Edition.—A Medical Essay on Nervous Diseases.
Just published, the 120th thousand, with numerous plates in a sealed envelope, price half-a-dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE, with plain directions for perfect restoration to health and vigour. By J. L CURTIS, 15, Albemarle-street, Piccadilly, London.

CONTENTS:

INTRODUCTORY CHAPTER on the Physiological Structure and Functions of the Reproductive Organs.
CHAPTER II.—Causes of Spermatorrhœa and Impotence; Early Vicious Indulgences; Dangers of Neglect.
CHAPTER III.—A Review of the various Disqualifications of Marriage—whether resulting from the Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection.
CHAPTER IV.—The Author's plan of Treatment Medical and Moral, with observations on a new and successful mode of detecting Spermatorrhœa and other Urethral discharges by microscopic examination.
CHAPTER V. and VI. on the modern Treatment of Gonorrhœa and Syphilis.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

"We feel no hesitation in saying, there is no member of society by whom the book will not be found useful—whether such person hold the relation of Parent, Preceptor, or Clergyman."—Sun.

Mr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by letter, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Mr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty Years; nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

HOLLOWAY'S PILLS AND OINTMENT.—EARLY MEASURES.—If anything were required to demonstrate the necessity of early attention to all chest complaints, full proof is given by the Registrar-General. During last week 166 died of bronchitis, 95 of pectoral inflammation, and 150 of consumption. How dreadfully appalling is this catalogue! And doubly distressing, when we reflect how many might have been saved by the early employment of Holloway's remedies. This Ointment should be diligently rubbed twice daily upon the back and chest, even for the merest cough or slightest cold. The trouble of the operation is very trifling, when compared with the present ease afforded and future risk removed. Holloway's Pills should be simultaneously taken to confirm the cure.

AN OXFORD MAN, who holds an appointment in King's College, is desirous of meeting with ONE or TWO GENTLEMEN who wish for assistance in their studies for the University or the Civil Service Examinations. He will not object to pupils whose education has been neglected. Terms moderate.
Address, S. H. N., Post-office, Northaw, by Barnet (N)

LEA AND PERRINS'
CELEBRATED
WORCESTERSHIRE SAUCE.

PRONOUNCED BY CONNOISSEURS TO BE THE ONLY GOOD SAUCE," AND APPLICABLE TO EVERY VARIETY OF DISH.

EXTRACT of a LETTER from a MEDICAL GENTLEMAN, at Madras, to his Brother, at WORCESTER, May, 1851.

"Tell LEA and PERRINS that their Sauce is highly esteemed in India, and is, in my opinion, the most palatable as well as the most wholesome Sauce that is made."

EXTENSIVE FRAUDS.—Lea and Perrins having discovered that several of the Foreign Markets have been supplied with spurious imitations of their "Worcestershire Sauce," the labels of which closely resemble those of the genuine Sauce, and in one or more instances with the name of L. and P. forged, they have deemed it their duty to caution the public, and request purchasers to see that the names of Lea and Perrins are upon the Wrapper, Label, Stopper, and Bottle.

L. and P. further give notice that they will proceed against any one who may infringe upon their right, either by manufacturing or vending such imitations, and have instructed their correspondents in the various parts of the world to advise them of such infringements.

Wholesale and for Exportation by the Proprietors, Lea and Perrins, Worcester; Crosse and Blackwell, and other Oilmen and Merchants, London.

Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, fee Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Heralds' College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanics' Institute, 25, Cranbourn-street, corner of St. Martin's lane, London, W.C. The Heraldic Colours for Servants' Liveries, 5s.

STAMP YOUR OWN PAPER—with Arms, Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSING PRESS, 15s. Best Make, 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS—For Lady & Gentleman—5s. each. 50 Embossed Envelopes, with Maiden Name printed inside, 1s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Cards, printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Emblazoned for Painting on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

ARMS, CRESTS, &c., Engraved in the Best Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letters 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall Marked), Engraved with Crest, 12s.; Large Size, for Arms, 75s. On receipt of P. O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Movable Numbers, 2s. 6d; Crest Plate, 5s., with the necessary directions for use. Post free Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

FIRE. — DESTRUCTION OF THE PLANT, STOCK, and PROPERTY of the Largest Ropery and Ship Chandlery in the Country, Messrs. Frost, Brothers, of Shadwell, London. PRESERVATION of Books, Papers, and Cash, in MILNER'S SAFE, standing by the side of two other safes, (not Milner's) the contents of which were consumed.—See "Times," Sept. 7, 1860.
TO MESSRS. THOMAS MILNER AND SON,
Liverpool, and 47A, Moorgate-street, City, London.
Gentlemen,—We have very great pleasure in bearing testimony to the efficiency of your "Patent" Fire-resisting Safe. In the destructive fire which destroyed the whole of our premises on Sunday morning last, our books, papers, and cash, which were in the safe we purchased from you in March last, were all preserved; and this is the more remarkable because the contents of two other safes, not of your manufacture, standing in the same office within two feet of your safe, were consumed. Our most sanguine hopes have been realised in this severe test, and we leave you at liberty to make use of this letter in any way you may wish.—We are, Gentlemen, yours, &c.
FROST, BROTHERS.
Shadwell, London, Sept. 8, 1860.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE, via EGYPT.
PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

CONCLUSION OF THE THIRD CHINA WAR.

REPORTED MURDER OF MR. ADKINS AT PEKING.

There is an almost incredible report abroad, not contradicted, that Mr. Adkins, her Majesty's representative at Peking, was decapitated on the withdrawal of the Allied troops. This is by no means an improbable contingency, considering the animus which must exist among the higher powers at Peking, notwithstanding the apparently favourable change which is said to have come over the countenance of Prince Kung,—on which sun-shine latterly took the place of the cloud which overshadowed it at the signing of the Treaty,—and the late interchange of friendly visits between that Imperial personage and the Allied Ambassadors.

It will be remembered that when the Allied army lay before Peking, San-ko-lin-sin was said to be not very far off, at the head of 50,000 Tartar troops, denominated the flower of the Celestial army, which had not yet been at hands with the Allies. The "Chinese hero" would, in all probability, be biding his time, watching the course of events. It most probably was he that counselled that apparently friendly demeanour, latterly assumed by Prince Kung towards the Allied ambassadors, so different from that which distinguished him at the ratification of the Treaty, and the signing of the Convention—inspiring him and his Imperial brother with the hope of his (San-ko-lin-sin's) powerful assistance at the proper moment. The Allied ambassadors, having finished negotiations to their own satisfaction, take their departure with their formidable body guard, leaving behind one devoted man to make arrangements for Mr. Bruce's residence at the capital. Chinese vanity interprets the retirement of the army from Peking into a retreat. Now is the time to blot out the disgrace and humiliation forced upon them by the hated invaders. We can imagine the fierce eagerness with which the placards announcing the ratification of the Treaty are torn from the walls, at the suggestion of San-ko-lin-sin, who assures the authorities of his protection. The detested foe are scattered far and wide. The solitary 3,000 men at Tien-tsin, are deemed an easy prey to the Tartar sword. Why, then, should they suffer the presence of the only one of the hated race remaining amongst them?

When we reflect upon the conduct of the Chinese, in the treatment of the men whose remains now rest in the Russian Cemetery, in the face of an unconquerable army marching towards the capital, may we not be prepared to hear of any treachery perpetrated, by the Government or its myrmidons, on one thus left unprotected, when that army had turned its back upon the scene of its peaceful triumph, but whence it had not departed without leaving the mark of its vengeance?

ARRIVAL OF TROOPS AT HONG KONG.

The *Hong Kong Register* says:—Since the arrival of the Seikh cavalry and infantry in Hong Kong, considerable excitement has been created by the sale of the "loot" taken by them at the destruction of the Summer Palace at Peking; the items consisting chiefly of rich fur garments, said to have been, lately, the property of the Emperor and the ladies of his harem; silks in the piece, plain, damask, and embroidered in gold and silver; trinkets of every description, &c. Many of the buyers are said to have obtained great bargains. However, the tall heroes of the Punjaub have latterly made out that they were not wise in their generation, in parting with their stock in trade at such "a ruinous sacrifice," as the shopkeepers have it, and have accordingly raised their demands, and the price now asked for an Imperial second-hand, is an object to any but a long purse. The Chinese, among whom

Digitized by Google

an immense sensation was created by the sight of these veri table relics of their Imperial master, eagerly bought up a large quantity in the first days of the sale, giving in exchange counterfeit Mexican dollars, of which there are said to be thousands in circulation at present in the colony. Thus the spoilers of the Egyptians are spoiled by the Egyptians, and the base coins in the pouches of many of our gallant Seikhs, will be so many whetters to the keenness of their blades, if ever again they come to blows with the cheating Celestials.

CHUSAN EVACUATED.

Chusan is partly evacuated, Major Blamire 99th Regiment, Captain Gaynor 99th Regiment (Town Major), Captain Gilton R.M.L.I., and J. P. Hughes, civil magistrate, remain, as also the military police, to await the evacuation of the island by the French. A great part of the commissariat stores, laid in for the army in the north during the winter, were to be sold by auction on the 10th instant. This is an economical move, as it was seen that the expense of removing them would amount to more than their worth.

On the 4th ult., Brigadier Jephson and staff, with the naval and military chiefs in command of the British forces at Shanghai, were invited to a grand banquet by their Excellencies the acting governor of the province, the intendant, and the provincial judge. The guests, twenty-four in number, went in grand state to the palace, attended by a numerous guard of honour. The band of the 44th Regiment performed during dinner. The gallant party returned to their quarters highly pleased with their entertainers, and the good cheer provided for them. This presents a contrast to the state of feeling which prevented the civility of even an ordinary cup of tea at the signing of the Treaty.

Our own correspondent's letter from the North has missed this mail.

Summary of News from the Far East.

CHINA.

SHANGHAI.

Political affairs in the north of China are reported to be progressing favourably. The first instalment of the indemnity has been paid up. The troops were embarking from Tien-tsin and the Taku Forts as fast as they arrived there. Several transports have sailed for Hong Kong and India. General Sir Hope Grant, K.C.B., and staff have arrived here.

Lord Elgin and suite have also arrived, and the Convention of Peking, the Treaty of Tien-tsin, with the Tariff and Trade Regulations are this day published by authority. A decree by the Emperor of China, confirming the aforesaid Treaty and Convention, is posted on the walls and public buildings of the city and suburbs of Shanghai.

It is intended that measures shall be taken by the authorities to open the river Yang-tze-Keang to foreign trade forthwith, under Article X. of the Treaty of Tien-tsin.

No further news of rebel movements have reached us. They are still in possession of the country about fifteen miles from Shanghai, and are reported to be in force.

Lord Elgin and Sir Hope Grant are about to start for Japan.

FOO-CHOW-FOO.

A most horrible butchery of 200 wretched men has taken place here, under circumstances of the greatest cruelty. Those persons, who are said to have been boatmen, in pursuit of their lawful occupation, were arrested by the authorities as pirates, and summarily executed, after the Chinese manner of dealing with criminals, which is too horrible for description.

AMOY.

From Amoy, also, a correspondent of the *Friend of China* reports the execution of a batch of six kidnappers, who were taken in the act of carrying off a man, tied neck and heels, through the open streets at night. On being examined, under the influence of the lash, one of them, the ringleader, confessed to having kidnapped and sold 154 of his countrymen to the slavers, and that in this traffic he had realised this year about $5,000. Feeling that pardon was hopeless, he made many revelations to the mandarin before whom he stood, and declared that he did not fear death, as he knew that he would be forthwith born again into the world, where he would have the pleasure of selling a few more of his countrymen, which so exasperated his judge, that he ordered him to be crucified, and his five accomplices to be simply beheaded.

HONG KONG.

The *China Mail* says:—Various reports have been going about in regard to the disposal of land on the Kowloong side, and it is well that correct information should be published in regard to it. We are informed that the military and naval authorities have made some exorbitant demands in regard to the new piece of ground which has been added to the colony. Fifty acres are all that has been necessary for them in Hong Kong, but they want three hundred and twenty acres on the Kowloong side, swallowing up the most valuable sea frontage. Sir Hercules Robinson has objected to this grant as excessive in itsdemands; and it is obvious that a large portion of the sea frontage should be available to the public for the use of storehouses. Another of his Excellency's plans, we believe, is to run out deep-water piers, at which ships might load and unload; and a small steamer, we should think, would soon find it profitable to ply between the two shores.

We are glad to see that the Executive Council has taken a decided step in regard to the Civil Service Abuse Commission; and has called on Mr. Caldwell to reply to the charges which have been brought against him. This step has been necessitated by Colonel Saumarez's term of office having expired; but it is also fortunate on other grounds. As the matter was going on, months and years might have elapsed before the matter was brought to a conclusion. The sittings have already extended to seventeen, being thus almost equal to those of the Caldwell Commission of 1858, and vastly more deficient in interest. It must, as the *Register* observes, have been "dreary work," and the point in question is scarcely commensurate with the amount of labour expended on it. The only question which has been opened up is, whether Mr. Caldwell is fit to remain in the Government employ. If any serious accusation has been established against him, by all means turn him out of the public service. If nothing has been established but what was patent and acknowledged, then let his accuser be put out of court, and let the Council adopt some means of making the inquiry more definite and the accusers more responsible.

On Monday the 12th Dec. last, a very serious fire broke out in the upper part of house 272, East-street, Taipingshan. The fire originated casually during the burning of some joss-papers. The building, being an old one, and containing much wood, assisted the rapid spreading of the fire into the opposite side of the street, from whence it advanced into the upper and lower Lascar roads, and then into Hollywood-road and back, turning by the large joss-house. The alarm having been given at the police-station, the main body of the force was soon in attendance with the police engines. One, placed at the seaside, played into the other, and this one into the North block of Lower Lascar Road, where the progress of the conflagration was stayed, and the fire ultimately exhausted itself. Great exertions were made by the police and also by the military, of whom the Engineers deserve especial praise. A number of French sailors were also on the spot, making themselves useful. No lives were lost, but we regret to hear that the loss of house property was considerable, though the inmates were enabled to save a great part of their personal effects. Eighty-one horses, valued at $40,000, were destroyed, besides other property estimated at $16,000. Not less than 2,173 persons were residing in these houses at the time when the fire commenced.

The late misunderstanding with regard to the Hong Kong Club has terminated in a satisfactory manner, the better part of the seceders having yielded to the inexorable decree which, at one time, was regarded as insulting to the credit and pocket of our gallant Navy and Army.

The steamship *Ly-ee-moon*, Captain N. Hill, after a thorough refit, made a trial trip to Macao. She left the harbour shortly after 10 A.M., and made the run by the outer passage to Macao in 2 hours 29½ minutes, returning by the Cap-sing-moon in 2 hours 35 minutes. She goes outside to adjust her compasses, previous to taking her station betwixt this and Shanghai.

ANOTHER PROTEST AGAINST THE P. AND O. COMPANY.

The undersigned, passengers in the P. and O. Company's steamer *Columbian*, from Suez to Ceylon, India, and China, are unwilling to separate without recording their emphatic protest against the treatment they have received; and although aware that protests have frequently been made by passengers, and as frequently disregarded by the directors of the company, yet they consider it a duty they owe to the public to state their dissatisfaction, and the causes for it.

The main reasons for their discontent are the following:—"That having paid first-class fare from England to their destinations, and being entitled to first-class accommodation in a first-class ship, they have been in their opinion provided with neither. The *Candia* not having reached Suez in

Digitized by Google

time, and the directors not having even one spare first-class steamer at that important station, the passengers and mails were put on board a ship which cannot be called adequate either in steam-power or accommodation."

In short, the necessities and comforts of the passengers are little regarded here, where alleviations to the inevitable trials of a voyage in a hot climate are specially needed; and it is against this disregard, and more particularly against the neglect of the managers of the company to meet duly the contingency of the loss or delay of a st amer, that this protest is directed. But while expressing their discontent with the conduct of the directors of the company, the passengers desire to cast no reflection on the officers of the ship, from whom they have received uniform courtesy.

CANTON.

The *Friend of China*, on the Foreign Customs, says:—It may, we think, be concluded that the Customs service in China, under foreign inspection, is destined to be the ingredient for cementing together the wide division between the policies of the east and the west? The materials, however, are but partially good; and it behoves foreign powers to be careful how they go on with the manipulation. On the side of the Chinese we have long practised venality and the deepest corruption to work with;—on ours, the greed which invariably follows and becomes a second nature in those who have no nobler employment than the collection of revenue for one with whom they have no patriotic connection. The collection of a country's duties under a foreign inspectorate, indeed, is a novelty in the world's history;—but few will deny that it is a necessity,—a necessity not so much for Chinese as for foreign protection. Prior to the establishment of this new system, the old worked in this wise. A, being desirous of investing a thousand pounds in tea, shipped to that value under the strictest formalities—B, similarly desirous, in the same vessel placed tea obtained without payment of duty. A and B. both go home in the ship, and have occasion for money directly they reach their port. Who realizes most readily?—B of course.—That individual goes into the market and sells his tea for "prompt" just so much per pound short in what he has saved by cheating the Chinese Government—while A, to realise at all, has to sell at the same price, so entailing on him, individually, a loss of the same sum as the Chinese Government lost.

The following are from the *Friend of China*:—

The British West India emigration ship *Sebastopol* left her anchorage off Shameen this morning with under 300 Chinese on board; the number required for her capacity being 350. Between one thing and another, however, a full cargo is difficult to be got; and there is some talk, we hear, of closing the establishment entirely.

PLACARD DENOUNCING COOLIE EMIGRATION.

An entreaty that (official) proclamation may be made, granting what is asked, to save the lives of the people.

Heretofore, when the foreign devils concocted plans for buying men of China who became subject to their venomous hands, they were worse than swindlers, and it was called (buying) pigs. They took men and made beasts of them, and no relief was vouchsafed. Not only were they made to commence the cultivation of sandy wastes, and were worn out in the labour of penetrating forests, but they were even required to descend into the depths of the sea, as bait for the *beche de mer*.

The steamer *Bo-Peep* has started on her first business trip in the inner waters. As circulated, she went to Pingchow, Lan-sheck, Shek-wan, See-tong, She-tow, Loon-kong, Luk-low, and Cum-chook, and returned in safety the following day. On Monday next, at eight, she starts again, and on this occasion will extend her voyage to Kow-kong, being back again off Houam, it is anticipated, by Tuesday evening. The passage-money for Europeans is only ten dollars, and the money's worth in novelty may be depended on.

His Excellency Baron Gros came up to Canton in H.I.M.'s *Deroulede*. Both debarkation and re-embarkation were unattended by British officers at the landing-place, from which we infer that the visit has hardly to be looked as strictly official. Two salutes of nineteen guns from the heights, however, told their own story.

PHILIPPINES.

MANILA.

The mail of 10th October reached Manila on the 29th Nov.

There has been no arrival of manufactured goods, but the *Sales* from Liverpool is expected in the course of the present month, and also the *Maria Rosario* from Singapore with some English goods. The *Fortuna* went on to Hong Kong, taking, as expected, the whole of her piece goods and the greater part of her provisions, &c. She also takes on nearly 4,000 bales grey drills and sheetings, landed from the *Golden City*, leaving comparatively few American goods in the market. There is little of interest to notice as regards produce, prices of which continue without alteration.

An order was published yesterday, increasing the proportion of silver payable to Government for various articles of purely local interest, with the exception of cigars; which are in future to be paid half in gold and half in silver. This was attempted to be enforced some years ago, but given up after a very short trial. The low Exchange now current will unfortunately assist Government in carrying out the measure, which is simply increasing the cost some 5 to 6 per cent., but those who order cigars will, for the future, be less able to estimate their cost, and the alteration is to be regretted on this account, as likely to lessen the demand for the produce of the factory, and also on account of the effect it may sometimes have on the currency, which Government professed to expect would be permanently settled by the establishment of a Mint that ought to be in operation in less than three months from the time selected for making this change.

MALACCA STRAITS.

SINGAPORE.

The P. and O. Company's steamer *Emeu*, with the London mails to 10th Nov., arrived on the 15th Dec., the Dutch steamers *Batavia* and *Koningen der Nederlanden* from Batavia on the 20th and 21st Dec. respectively, and the P. and O. Company's steamer *Peking* from Hong Kong with the homeward mails, 22nd Dec.

Two further stoppages have taken place in the bazaar:—Koo-chan, for about $52,000; Yong-Keat, for about $25,000. The assets in the former estate consist in great part of house and landed property, the statements of the value of which are so conflicting that it is as yet very uncertain what the out-turn may be. In the latter, payment has been guaranteed in full, at 3, 5, and 6 months date. These continued failures, keeping up the feeling of distrust towards the bazaar dealers, contribute to curtail the transactions in piece goods, and to render what is usually a dull season of the year, even more than ordinarily so.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BREMNER—On the 8th inst., at Caranjah Lodge, Douglas-road, Canonbury, the wife of Dugald Bremner, Esq., of a son.

CAREW—At 9, Notting-hill-terrace, the wife of Lieut. George O'Brien Carew, H.M.'s Indian Navy, of a daughter.

GABY—On the 13th inst., at 23, Charlotte-street, Bedford-square, the wife of Captain J. D'Oyley Gaby, P. and O. Company, of a son.

HOGG—On the 16th inst., at 23, Princes-terrace, Princes-gate, the wife of Lieutenant-Colonel Hogg, of a son.

JOHNSTON—On the 15th inst., at The Grove, Yoxford, Suffolk, the wife of A. R. Johnston, Esq., of a daughter.

JONES—On the 24th inst., at Chepstow-place, Bayswater, the wife of Edmund Jones, Esq., Rangoon, of a son.

LINSTEAD—At Hong Kong, on the 29th of November, the wife of T. G. Linstead, of a daughter.

———At Macao, on the 11th, the Lady of his Excellency the Governor, of a daughter, still-born.

MARRIAGES.

HEYWOOD—FOSTER.—On the 10th inst., at Saxby, Barton-on-Humber, by the Rev. F. A. L. Foster, M.A., Arthur Henry, third son of Sir Benjamin Heywood, Bart., to Margaret Helen, youngest daughter of the late John Frederick Foster, Esq., of Alderley Edge, near Manchester.

HILL—CLARKE.—On the 10th inst., at the parish church, Godalming, by the Rev. Charles Dallas, incumbent of Farncombe, Albert Hill, Esq., of Bruce Castle, Tottenham, to Henrietta, third surviving daughter of Thomas Clark, Esq., of Netherwood, Godalming.

HOWELL—HALL.—On the 24th inst., at St. James's, Piccadilly, by the Rev. Hugh Howell, rector of Llanfirnach and Penrith, Pembrokeshire, and uncle of the bridegroom, John Richard Howell, second son of H. W. Howell, Esq., of Glasgant, Carmarthenshire, to Sarah, widow of the late Cuthbert Collingwood Hall, Esq., and granddaughter of the late Admiral Lord Collingwood.

JONES—MYERS.—On the 23rd Oct. last, at St. Luke's, Halifax, Nova Scotia, by the Right Rev. Hibbert Binney, D.D., Lord Bishop of the diocese, John Matthew Jones, Esq., of the Middle Temple, barrister-at-law, to Mary, youngest daughter of Colonel W. J. Myers, late 71st Regt., Highland Light Infantry.

VACHER—FRANKLAND.—On the 12th inst., at the British Legation, Frankfort-on-the-Maine, by the Rev. H. E. Cruttwell, M.A., H.B.M.'s Chaplain, Major F. S. Vacher, 3rd (the Duke of Wellington's) Regiment, to Eliza Henrietta Augusta, only surviving daughter of Sir Frederick William Frankland, Bart.

DEATHS.

HILL—On the 7th inst., at Shavington, Market Drayton, aged 83, Eliza, widow of Colonel Sir Robert C. Hill, C.B., late of Prees Hall, Salop.

Digitized by Google

HYDE—On the 18th inst., at his residence, Westbourne-terrace, Hyde Park, London, Charles Chicheley Hyde, Esq, late of Bengal Civil Service, aged 67.

JARDINE.—On the 11th inst., in Dumfrieshire, Joseph Jardine, Esq., senior partner in the firm of Jardine, Matheson and Co., of China.

MAUNOIR—On the 16th inst., at Geneva, Professor I. P. Maunoir, M.D., aged 92.

NICKLE—On the 6th inst., at Whitehead's-grove, Chelsea, Miss Jane Nickle, only surviving sister of the late Major-General Sir Robert Nickle.

PARSONS—On the 20th inst., at Exmouth, Devon, Retd. Rear-Admiral W. Parsons, aged 77.

RADFORD—On the 21st inst., Rear-Admiral Samuel Radford, K.H., at his residence, Notting-hill, W., aged 76, beloved and regretted by all. His end was perfect peace.

THOMSON—At Peking, on the 4th November, Dr. Thomson, Principa Medical Officer of the Second Division.

WILKINSON—On the 19th inst., at his residence, 6, Leighton-grove, Camden-town, of dysentery, Commander J. J. Wilkinson, R.N., aged 70.

WOODGATE—On the 12th inst., at Paris, aged 80, Colonel William Woodgate, formerly of the 60th Foot.

COMMERCIAL REPORT.

CHINA—EXPORT.

TEA.—At Shanghai, the purchases are of Ningchow, 6,846 chests, at tls. 27 to 29; of Souchong 110 chests on teamen's account; of Kaisow 640 chests at 26; of Hohow kinds 5,822 chests, at tls. 19 to 21½; of Hohow 427 chests, at tls. 20 to 22; Flowery Pekoe, 1,041 chests, at tls. 30 to 49, making in all 14,886 chests, including contract teas, and for the season to date 45,191 chests against 188,228 chests last year, and leaving in stock 9,000 chests against 35,000 chests same time last season. Green: During the month a few chops of Fychew and Tinkai teas have arrived and were placed upon the market, for which the American houses, as we anticipated, competed with great avidity, and the stock was soon exhausted, the teamen obtaining an average of 36 taels all round for the Tinkai chops. At Foo-Chow, Messrs. Fussell and Co. report:—The teamen have shown great willingness to realise their produce, which has led to a good business, the settlements of Congou amounting to 34,600 chests, some parcels of which show a decline of fully ½ to 1 tael on good common to good flavoury kinds. Some 4,000 chests Congou (included in the settlements) have been shipped on native account, as their orignal cost cannot be obtained in this market. The teamen report that there are some 5,000 to 6,000 packages country greens close at hand, and that during the next month we may receive about 10,000 to 12,000 packages. The position of the new crop is as follows:—At Canton a decline in prices may be quoted of ½ to 1 tael. Three parcels of the chop of new greens referred to in our last circular were taken at high prices; some 12.000 packages are daily expected to reach Canton, and it now seems pretty certain that a large supply will come forward to that port. The total arrivals of new Congous to date are 357 chops; settlements amounted to 242 chops; leaving a stock of 115 chops.

SILKS.—At Shanghai a considerable business has been done, settlements for the month being estimated at 9,500 bales, leaving an unsold stock of about 6,000 bales. From the quotations below it will be seen that prices have advanced from 10 to 20 taels per picul during the month. The silkmen arriving from the country report prices as being even higher than before, and that the better descriptions are difficult to obtain at all. The total settlements from 1st July to date are estimated at 55,000 bales, against 36,500 bales for the corresponding period last year. Quotations are for Tsatlees, No. 1, taels 435 to 445 per picul; 2, 415 to 425; 3, 390 to 405. Taysaams, No. 2, taels 320 to 335 per picul; 3, 290 to 305.

DRUGS AND SUNDRIES.—Cassia Lignea: the Canton market is dull at $18 per picul. No sales are reported and the stock is computed at 1,500 pls. The Macao market has been swept by the purchase of 2,000 pls. at $16 50c. to $16 75c. Cassia Buds, still no supplies. Cassia Oil is very dull, and no sales reported. At Canton it is quoted $270 to $275 and at Macao $10 less. At the former the stock is given at 15 pls. and at the latter 40 pls. Star Anniseed: no sale reported—there is a stock of 500 pls. at Macao for which about $15 is asked.

CHINA IMPORTS.

Messrs. Walker, Borradaile, and Co., in their Circular, report:—Our market has not been active during the past fortnight, most of the sales having been in barter against tea purchases, but we hope it will soon respond to the improvement in our political relations with the Chinese. Cotton yarn, Nos. 16-24, and Grey Shirtings of medium heavy weights, are in request at advanced rates; other articles generally neglected. The difficulty of obtaining storage for coals, necessitates the step of cargoes being sold off afloat to clear the ship, and consequently although stocks are moderate, prices are low. English steam are quoted deliverable from the ship at $11 to $11 50c.; and Sydney, $7 to $7 50c.

EXPORTS OF TEA AND SILK TO GREAT BRITAIN SEASON 1860-61.

For Sydney and Melbourne: Jupiter, Stately. For San Francisco: Kingfisher, Jacob Bell, Torrent, Mary Whitridge,

At MANILA.—For London: Albrera, Edwin Fox. For Liverpool: Alavesa, G. B. Carr, Graham. For Cadiz: America. For Boston: Albers, John Hand.

At SINGAPORE.—For London: Augustine. For Liverpool: Elizabeth. For Glasgow: Syren. For Bordeaux: Dartagnan. For Boston: Humboldt. For New York: Mary Goodell.

At PENANG.—For London: Clara, Zenobia. For Boston: Edward. For New York: Ceylon.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: £2. 10s. for tea; £5 for silk. To New York: $12 for tea, $20 for silk. Business has been dull till within the last few days in consequence of the rise in price of bean, cake, and cotton, these being the principal articles of export at present. The amount of disengaged tonnage in port is small.

At AMOY.—A good business is still being done in coast wood, and suitable craft find ready and remunerative employment. The charters are—Henry and Oscar to Wangchu and back, 35 days for $3,000; J. H. Becha, 25 days for $2,000; Richard, to Singapore and Batavia, 35 days for $1,800; Albatross to Wangchau and back, 40 days for $3,500.

At HONG KONG, MACAO, and CANTON.—To London, £3. To New York, no quotation. There is a good demand for suitably-sized vessels, which is caused by the dearness of rice and emigration. The charters are—For London: Waverley, Queensberry, Standard, Bankside, at £3. For Liverpool: Scawfell, and Patna, at £3. There are 11 vessels for Bankok and back, at 47c, to 60c.

AT MANILA.—To London, £2. 12s. 6d. for clayed sugar, £3. 15s. for hemp. The charters are—Edwin Fox, for London; Alvesa and G. B. Carr, for Liverpool, at above rates.

At SINGAPORE.—To London, £3. 7s. 6d. There is a good demand for shipping in the rice trade, nnd nearly all the vessels have been laid on for this voyage. The charters are—Beloochee, from Akyab to London, £3. 5d.; or Liverpool, £3. 2s. 6d.—Norden, for Moulmein, with timber, at £4. 2s. 6d. for United Kingdom, or £4. 12s. 6d. for the Continent.—Virginie, to Falmouth for orders, at £3. 2s. 6d.

CASUALTIES.

HONG KONG.

The Queen of the Seas, from Liverpool to Woosung, has not been heard of, up to the 28th Nov., and it is feared she has encountered a hurricane.

A boat, belonging to the Earl of Clare, missed the ship in boisterous weather and could not fetch, and all on board were frozen to death.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA: Dec. 5, Leonidas. From Boston: 3, Mermaid. From China to England and Continent: Nov. 24, Kohinoor; Dec. 1, Thetis; 2, Palmerston, Janet Willis; 4, Anglo Saxon; 5, Lady Agnes, Duff, Ocean Mail, Le Lion, Cepiolani. To New York: 24, Surprise; Dec. 3, Maury; 5, Competitor. From Batavia to Continent: Nov. 26, Johanna Wagner; 28, Maria Catharina; 30, Kosmopoliet, Jeda. Continental Intelligence.

FRANCE.

The *Patrie* says:—"The last accounts from Shanghai mention a report as being current in that place, to the effect that the Emperor of China would, in the spring, send his brother, Prince Kung, as Ambassador Extraordinary to Paris and London."

Two Chinese ornaments have arrived at the Tuileries. They were sent by General de Montauban to the Emperor after the capture of the Emperor of China's Summer Palace, where they were found. They were used for burning perfumes, and are a very curious specimen of Chinese industry. The Emperor expressed his admiration of the ornaments and ordered that they should be placed in the Salle d'Apollon.

It is stated that orders go out by the last mail, recalling the greater part of the French troops now in China.

French journals announce that a commemorative medal will be struck for the soldiers who have taken part in the Chinese expedition. Various plans are being discussed (says the *Constitutionnel*), and one of them is, that the ribbon should be yellow, and bear, as a black woof in the warp, the Chinese characters signifying "Peking," or "Capital of the North."

The *Abeille du Nord* of St. Petersburg has the following on the treaties of France and England with China:—

"Has England or France concluded peace in the most advantageous manner? will be the question of newspaper readers. . . . Evidently the French. Lord Elgin was extremely stiff with his cunning enemies; he had the palace of Bogdy-Khan burnt down, and threatened to destroy another palace situated at Peking, if £100,000 sterling were not immediately paid to the families of the prisoners who were killed. The suite of Prince Kung had the greatest difficulty in the world to induce him to receive amicably the English ambassador. In addition to this, it was rumoured that his lordship entertained the design of placing on the throne the chief of the insurgents of Nankin. Are not these facts sufficient to cause the Chino-Mantchou Government to feel greater hatred to the English than heretofore? Now, look at what the French did! General de Montauban was always favourable to the reigning dynasty; he opposed the destruction of the palace of the Bogdy-Khan, and was ready and willing to content himself with £65,000 sterling for the families of the persons killed. Is it then surprising that Prince Kung felt great friendship for the French general? It may be that England, one of these days, will reproach France with her policy in the campaign of Peking; but in any case it is evident that France, having known how to acquire the good graces of the Chinese Government, has, in definitive, gained more than England."

The same journal, on the Russian treaty, says:—

"The additional treaty of the 14th November, which was signed nineteen days after those concluded by the allies, traces in a precise manner the new Russo-Chinese frontier, gives to Russia the right to have four instead of two consuls in the towns of the Bogdy-Khan, opens to Russian merchandise an entrance into China all along the frontier, and permits more frequent postal stations to be organised between Kiakhta and Peking. Are not these concessions sufficient to make the Russian treaty as important as those of the allies?"

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, Jan. 15.

When I informed you in September last of the loss of the Imperial clipper *Plastoon*, on her return from the North Pacific station, I hazarded the opinion that the real origin of the accident that caused the explosion would never be satisfactorily ascertained, "as the survivors profess the most profound ignorance on the subject, whilst those who would have been able to give an explanation of the mystery are lying with the vessel itself at the bottom of the Baltic." An official inquiry has been held, as I anticipated, the result of which, however, is very vague and unsatisfactory. It appears that suspicions were entertained that a man named Savelieff, who was rated as gunner on board the unfortunate vessel, had taken the desperate resolution to blow up the powder magazine, to avenge himself on the officers for alleged cruelty. It was proved at the inquiry, by the unimpeached testimony of his surviving shipmates, that he had been very cruelly treated, and on the day of the catastrophe was sentenced to the *knout*, or cat-o'-ninetails, which punishment was to take place in the evening, when he had finished his work in the powder magazine. It was therefore suggested that he had set fire to the ship on purpose to escape the punishment and be revenged on his tormentors at the same time. But the Court of Inquiry, in the absence of any proof in corroboration of the above surmises, very properly abstained from adding to his memory the stigma of such an atrocious and diabolical act. They returned a verdict that the catastrophe took place from causes unknown,

Digitized by Google

and the survivors are ordered to be indemnified for their losses, and replaced in their several stations in the Navy List.

The Emperor has conferred the decoration of Knight Grand Cross of the Order of St. Stanislaus on General Ignatieff, his Majesty's Ambassador in China, in appreciation of his services in regard to the new treaty of Peking, and also in consideration of his friendly mediation between the Chinese Government and the diplomatic representatives of England and France.

Another proof of the march of civilisation towards the East is the Government plan, now perfected, of founding a new university at Saratoff for that and the six contiguous provinces; the expenses of the establishment will be borne by a trifling tax raised on the land. Considering the immense geographical extent of territory which these provinces take up in the map of Russia, the pecuniary part of the question offers no difficulties, and may be considered as settled, whilst the measure is hailed with enthusiasm and gratitude by the inhabitants of those remote provinces who have hitherto enjoyed no other means of giving their sons the advantage of a higher course of education than the very onerous and expensive one of sending them to the distant universities of Moscow or St. Petersburg.

A letter lately received here from the Amoor states that during the past summer the colonists of that district have been much annoyed by the great number of bears which had come down, from the mountain forests that they usually haunt—a thing hitherto quite unprecedented. In several of the villages ten or more head of cattle, while quietly grazing in the meadows, have been suddenly attacked and carried off by these unwelcome visitors. At the station of Bajarsk, a peasant named Gregory Netchajeff, an old man passed sixty, succeeded in shooting, singlehanded, an enormous bear, whose skin he took off with the assistance of a postillion who was accidentally passing, and brought it home over his shoulders in triumph. It is generally supposed that this unusual emigration of these ferocious animals is caused by the prodigious quantities of insects that swarm in the forests during the hot weather, and greatly annoy Master Bruin by stinging him in the mouth, nose, and ears.

From a statistical paper published in a Ministerial journal, we learn that the number of periodicals of all descriptions printed in Russia (without including Poland and Finland) amounted on the 1st of January this year to 310, against 291 the previous New Year's-day, showing an increase of 19. Of this number 142 are published at St. Petersburg, 45 at Moscow, 10 at Riga, 11 at Dorpat, and 10 at Odessa. With regard to the languages, 230 are in Russian, 38 in German, 29 in French, 5 in Armenian, 2 in English, 2 in Esthonian, 3 in Lettish, 1 in Georgian, and the rest mixed.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Jan. 21.

Owing to the extraordinary pressure of the ice produced by the severity of the winter, the dykes have in many parts of Holland given way and caused extensive inundations, accompanied by heavy losses of cattle and horses, whilst many of the houses have been carried bodily away, and in several instances the death of their inhabitants has to be deplored. The most melancholy accounts continue to be received from Salt Bommel, Goricken, and the neighbourhood of Herzogenbusch. In the mean time great and praiseworthy exertions are being made all over the country to alleviate the distress of the sufferers. In every town and almost in every village committees of relief have been formed, and their appeals to the sympathies of the rich in favour of the distressed, have everywhere met with the most ready and gratifying response. At Rotterdam, the Hague, and in this city, balls, concerts, lotteries, exhibitions, and other public amusements are organised for charitable purposes, the proceeds of which flow in very freely.

Although in this country we are accustomed to severe winters, the present one is an exceptionally hard one, the cold being more intense than it has been for the past thirty years. Not only are the rivers, lakes, and canals frozen over, but many of the islands on the north coast are cut off from communication with the main land by broad bands of ice which have formed round them in the sea, interrupting the navigation and not strong enough to bear the weight of sledges. Great distress prevails in consequence, as fishing and field operations are out of the question, and thus many thousands are thrown out of employment for the time.

On the other hand, a great deal of money is made by other trades. Furs, fuel, sledges, and skates are in great demand, and have risen considerably in value, in many instances as much as 100 per cent. The frozen rivers present everywhere the usual appearance of life and animation so frequently and successfully represented on canvas by the painters of the Dutch school. Crowds are seen every day on the ice, amusing themselves in sledging and skating, whilst temporary towns of tents, booths, and wooden houses offer the public the attractions of warm beverage, refreshments of all kinds, music, dancing, and all the other *agrêments* of a fair on land. One day last week a detachment of the 6th Regiment of Infantry, under the command of Capt. Sasburg, with their arms, accoutrements, and in full marching order, and acompanied by the regimental band—all on skates—appeared on the ice near Haarlem, and went through a series of military evolutions, with as much precision and apparent ease as if on dry ground, to the great admiration of a large crowd of spectators. The effect produced by their perfection in wheeling was much applauded by the public who were present at this novel military spectacle; the whole corps, when seen from a little distance, having the appearance of a vast glittering machine, turning round on its own axis as on a pivot.

Count van Zuylen van Nyevelt having resigned his office of Minister for Foreign Affairs, the King has accepted his resignation. It is currently reported, and generally believed, that the Count will relieve Mynheer Pahad, the present Governor-General of Netherlands India, whose term of service in that responsible situation has nearly expired. As the Count is a member of the Second Chamber of the States General, this arrangement will necessarily involve a fresh election, as, if he accepts the appointment, he must, of course, vacate his seat. The new Minister for Foreign Affairs is Baron L. N. van der Goes van Dirksland, one of the equerries of H. R. H. Prince Frederick of the Netherlands, who has already taken the oaths and been installed in the duties of the Foreign Department.

Lord Napier, H.B.M.'s Minister Plenipotentiary and Envoy Extraordinary at the Hague, had a private audience of the King on the 15th inst., to present his letters of recall, and to take leave. On the 19th his lordship left the Hague. The current duties of the Embassy will be carried on by the Secretary of Legation till the arrival of the newly-appointed Ambassador, Mr. Buchanan, who is expected in a few days.

Mr. J. D. Kruseman, formerly Director-General of Finances in Netherlands India, died at the Hague on the 13th inst. He was born 16th May, 1794.

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

NEW YORK, January 8, 1861.

MONETARY AND COMMERCIAL.

The news of peace having been concluded between the Allies and the Emperor of China has been hailed as an event of importance, and already active preparations are on foot to engage in its trade. Houses holding stocks of heavy domestic cotton goods have advanced their prices, though it is too early, yet, for the effect of the news to be developed.

The trade in teas since our last report has ruled steady, with a fair amount of sales to the private trade. Silks have remained without change, and with light sales. Though most descriptions of China or East Indian goods have been inactive, yet more inquiry has prevailed since our last report, and prices have assumed more strength, in some kinds, and some better rates have been obtained. The appearance of the market at the close of the year wore an improved and more encouraging aspect.

Our financial affairs have undergone almost daily fluctuations; but, with receipts of specie, and the improved condition of the produce markets, together with some advance in the rate of sterling exchange, our stocks have exhibited greater buoyancy and firmness.

Recently large quantities of goods of nearly all descriptions have gone into warehouse, either to avoid paying duties, or to be on hand for re-exportation, should circumstances render the measure necessary. It is estimated by some persons that the goods now on hand amount to $30,000,000. Only about $600,000 were thrown upon the market last month, against about $2,000,000 for the same period during the two preceding years.

Bankers' 60 days' bills on London have been sold at 103c. to 106c., and produce bills ranged at about 100c. to 103c. The large orders from England to buy up our stocks have caused a great rise. Money has exhibited greater ease, and first-class paper could be had at 10c. to 12c., and second ditto at $1 15c.. The receipts of gold from California are large for the season, but the aggregate for the year has fallen off, compared with several previous years.

The ten millions of Treasury Notes, for which bids were authorised to be received by the Government, were decided on the 28th ult. The amount proposed for were at rates of interest varying from 8c. to 35c. per cent., and only $2,500,000 was bid for at that, while proposals were invited for $5,000,000. The money was needed to enable the Government to discharge the January interest. The Secretary of the Treasury declined to accept the bids; when banking institutions, with private individuals in his city, stepped forward and took the whole $5,000,000 at 12c.

Digitized by Google

per cent. per annum. The fault of Congress was that, in the present reduced receipts of duties from imports they did not pledge the public lands for their future redemption. Instead of this, the Republicans, wishing an excuse to augment the revenue from imports, by raising the tariff rates, passed a law this session, donating the public lands to actual settlers.

TEA.—The sales have been light since our last report; 1,000 packages black have been sold on private terms. At the close a better feeling prevailed. Since the news of peace in China, the market has not opened, so far as to indicate its effects.

SPICES.—The business has been light. 1,000 lbs. No. 1 nutmegs have been sold at 42½c.; Race ginger, in lots, at 7c. to 7½c.; cloves, at 7¾c. to 8c., cash; and 50 bags pepper on private terms. 50 bales cloves, at 7¾c.; 30 cases cassia, at 7¼c.; 300 bags pimento, at 4½c., in bond, cash; 2,000 lbs. Java cinnamon, at 35c.; and 500 mats cassia, at 18½c. to 19c., six months.

HEMP continues heavy, and no sales of importance have transpired in any description.

COFFEE.—The market continues to be inactive. Among the sales have been 500 mats Java at 15c., cash, and 650 bags Government Java on private terms.

INDIGO.—There has been nothing of moment doing; and, in the absence of sales, prices are nominal.

TIN.—The market continues to be depressed, while prices are irregular and sales very limited. Banca is offered at 28c. to 29c., and Straits at 26½c. to 27c.

SUGARS.—The market has improved, and exhibited more steadiness. Among the sales in the past week we noticed 2,000 bags China on private terms, and some lots of Manila at 5½c.

DRUGS.—Sales of No. 1 shellac were made at 55c., 6 months; opium is offered at $5, 6 months; ginseng, since the news, is held with more firmness, but we have no sales of moment to notice.

ARRIVALS.—Contest, Steele, at New York, Dec. 20, from Canton; Christopher Hall, Freeman, at New York, Dec. 20, from Foochow; Magenta, Sears, at New York, Dec. 21, from Foochow; Argonaut, Norton, at New York, Dec. 22, from Foochow; Starlight, Howes, at Boston, Dec. 25, from Manila; Kate Howe, Burkett, at Boston, Dec. 29, from Manila; Hussar, Howland, at New York, Dec. 30, from Batavia; Winged Racer, Trurdy, at New York, Dec. 31, from Foochow.

LOADING.—At New York, for Hong Kong: Daylight, Howqua, Benefactor. For Kanagawa and Nagasaki: Zenas Coffin. For Shanghai: Union. No vessels up at Boston, for China, &c.

THE PEACE IN CHINA.

OFFICIAL DESPATCHES.

LORD ELGIN TO LORD JOHN RUSSELL.

"Tien-tsin, Nov. 13, 1860.

"My Lord,—I have the honour to enclose herewith a translation of a despatch which I received from the Prince of Kung, on the 2nd of this month, embodying an edict from the Emperor, which directs that the Treaty of Tien-tsin of the year 1858, and the Convention of Peking of the year 1860, shall be published throughout the empire. Your lordship may remember that by the terms of the last article of the Convention in question the withdrawal of her Majesty's forces from Peking is made contingent, *inter alia*, on the issue of the Imperial edict to the above effect, and that this stipulation was the subject of a correspondence between Lieutenant-General Sir Hope Grant and me, the copy of which was transmitted to your lordship in my despatch of the 31st ult. The language of the edict forwarded to me by the Prince of Kung is very full and satisfactory. It amounts to a ratification and adoption by the Emperor of the Treaty and Convention in the most public form. I must add that the Prince has shown every disposition to give effect to it. The documents referred to have not only been published *in extenso* in the *Peking Gazette*, but have also been printed on placards and posted about the city in all conspicuous places. These proceedings will, it may be hoped, go far to insure the faithful execution of their provisions.

"The despatch in which the Prince communicated to me this edict was preceded by another, in which he enclosed, and requested me to forward, letters respecting the cession of the Kowloon Peninsula, the payments due at Canton on the 1st of December next, and the legalisation of emigration, which had been addressed by him to the local functionaries, whose duty it will be to see these measures carried out. A translation of that despatch is also transmitted herewith.

"On the 7th inst. Mr. Bruce reached Peking, having hastened up from Shanghai, in compliance with my request. His arrival was most opportune, as it was very important that before my departure from the capital I should be able to confer with him on various matters, and more especially on the subject of the place of residence for the future of her Majesty's representative in China. Mr. Bruce informed me that he was perfectly willing to take up his abode in Peking at once. On consultation with Baron Gros and General Ignatieff, however, I found that the latter was about to leave Peking for the winter, and that the former was of opinion that it would not be advisable that M. de Bourbollon should establish himself in the capital until the spring. I considered it therefore to be my duty to advise Mr. Bruce to return with me for the present to Tien-tsin, and to remain there until a suitable residence should be provided for him in the capital. In order, however, that there might be no misapprehension on the part of the Chinese Government in reference to this point, we selected a house which we thought might be adapted to the purpose, and which was procurable on easy terms, and we accepted the services of Mr. Adkins, one of the student interpreters, a very promising young man, who volunteered to remain at Peking, and to superintend the arrangements necessary for putting it in order. I think it right to mention that Mr. Wade, Mr. Parkes, and Mr. Morrison severally intimated to me their readiness to stay at Peking if I thought that the public interest would be promoted by their doing so.

"Having taken these measures I wrote to Prince Kung to express to him my sense of the good faith which he had evinced in the matter of the publication of the Treaty, and to inform him that her Majesty's forces would at once retire to Tien-tsin. I added that I proposed to pay him a visit, with the view of taking leave of him, and that I should bring with me Mr. Bruce, who had just arrived at Peking. I enclose a copy of the letter which I addressed to the Prince on these subjects, and of his reply.

"In introducing Mr. Bruce to the Prince of Kung on this occasion I was especially desirous to convey to the latter the impression that the rank and authority of the former were in no degree inferior to mine. Accordingly, when the visit which I had offered in my letter took place, after conversing for some time very amicably with the Prince, I requested the interpreters to inform him that with us the person representing the Sovereign always holds the highest rank; that, peace being happily concluded between the countries, my task was at an end; that Mr. Bruce, therefore, resumed his functions as the Queen's representative in China, and that I proposed, with the Prince's permission, to cede to him the seat of honour which I was then occupying. On the following morning the Prince returned our visit, and I purposely absented myself, in order that Mr. Bruce might receive him alone. They had a long and somewhat interesting conversation, in which, as in several interviews which he had previously had with me, the Prince showed much less reserve than the provincial functionaries with whom we have formerly dealt ever dared to do in discussing delicate questions, such as the advisability of the mission of a Chinese Ambassador to England. Mr. Bruce took occasion to state that his correspondence would be henceforth with the Chinese Minister for Foreign Affairs at the capital, and that though he was returning to Tien-tsin until his residence at Peking was prepared for his reception, he would be at hand and ready to come up at any time if public business required his presence.

"Before the Prince left I entered the room to thank him for having paid me a visit of adieu, and we parted on good terms.—I have, &c.

"The Lord John Russell, &c." "ELGIN and KINCARDINE.

MR. BRUCE TO LORD JOHN RUSSELL.

"Tien-tsin, Nov. 16.

"My Lord,—I have the honour to report that, in consequence of the despatch addressed to me by the Earl of Elgin, I left Shanghai in her Majesty's ship *Furious*, and reached the mouth of the Peiho on Sunday, the 4th November. Finding that the unfavourable reports of the state of affairs which had arrived at Shanghai before my departure were without foundation, I proceeded next day to Tien-tsin, where I was informed by Admiral Heape that the army was to leave Peking on the 7th or 8th, and by starting immediately on horseback I was able to reach Peking on the morning of the 7th.

"Lord Elgin will have informed your lordship of the grounds on which it was decided that the Ministers should not take up their residence immediately at the capital. I was, however, presented to the Imperial Prince Kung as her Britannic Majesty's Minister in China. He returned the visit next morning before our departure, and I took that opportunity to press strongly on his consideration the situation of the province of Kiang-soo, the fact that the presence of the Allied troops alone preserved Shanghai from falling into the hands of the rebels, and the impossibility of our occupation being prolonged indefinitely. I urged upon him the necessity of immediate steps being taken to restore the authority of the Imperial Government in the province, and represented to him that he was misled in supposing that our interest would lead us to hold Shanghai for the Imperialists, if the province and the principal marts in it remained in the hands of the rebels. I pointed out to him the anomalous position in which I was placed in upholding the authority of a government which pursued a hostile and defiant course of policy towards us against the insurgents whose professions and declarations, at all events, were couched in a friendly spirit. I hinted that the best means of counteracting these impressions, which could not fail to act unfavourably on opinion in England, would be to send an ambassador as a pledge of the intention of the Chinese to conduct their foreign relations in a different spirit.

"The Prince listened with great attention and interest. He expressed himself as greatly obliged for imformation, much of which was new to him, in terms which certainly seemed to recognise the benefit his Government would thus derive from direct personal intercourse with foreign Ministers.

"After the interview, we left for Tung-chow, and arrived at Tien-tsin on Monday, the 12th inst., where I propose staying for the present.

"Before quitting Peking, it was arranged that a house in the immediate vicinity of the Russian establishment should be taken for her Britannic Majesty's Legation, and Mr. Adkins, one of the student interpreters, who has considerable acquaintance with the language, and is steady and discreet, was left in possession of it, with the full assent of the Prince Kung. He is to put the house in order, so as to enable me, at an early date, to take up my residence there.

"I informed Prince Kung of my resolution not to accept any provincial authority as Imperial Commissioner, to correspond with him or the Foreign Minister at the capital, and of my readiness to proceed there at any amount of inconvenience, should business of importance require my presence.—I have, &c., "FREDERICK W. A. BRUCE.

"The Lord John Russell, &c."

MR. ADKINS TO MR. BRUCE.

"Peking, Nov. 12, 1860.

"Sir,—I have the honour to report that immediately after your Excellency's departure, on the 9th inst., I took possession of the building which has been chosen for the residence of her Majesty's representative in this city. I was assisted in every way by the local authorities, and one of the magistrates of the city accompanied me to the spot.

"The disposition of the people seems to be friendly enough, and in my rides and walks about the city I am as free from molestation now as I should have been while the Allied forces were before the city.

"Report says that Sang-ko-lin-sin has within the last few days been summoned to Jehol, to wait upon the Emperor.

"Several days must elapse before his Majesty can return to the capital,

Digitized by Google

as the memorial advising him of a final settlement of the foreign business was only despatched yesterday.

"The city gates are most of them open now, and the inhabitants, who fled on the approach of the Allies, are returning in large numbers.

"I have, &c., "T. ADKINS.

"His Excellency the Hon. F. W. A. Bruce, C.B., &c."

COLONEL ST. GEORGE FOLEY TO LORD JOHN RUSSELL.

"French Head-Quarters, Tien-tsin, Nov. 17, 1860.

"My Lord,—I have the honour to inform your lordship that their excellencies the Earl of Elgin and Baron Gros, finding it necessary to delay their departure from Peking for some days, Sir Hope Grant requested General de Montauban to remain with his force until the ambassadors should be ready to proceed to Tien-tsin. General de Montauban declined stopping after the 1st of November, on the score of the uncertainty of the weather, but signified his intention of leaving a battalion of five hundred men of the 101st Regiment, with two guns, as an escort for Baron Gros.

"On Sunday, the 28th ult., the bodies of the unfortunate French prisoners were interred in the Portuguese burying-ground, outside the north-west gate of the city. Almost all the English officers off duty attended. The Roman Catholic Bishop of Peking and the Bishop's coadjutor were present.

"On the 30th ult., at 9 A.M., the ceremony of re-opening the French Roman Catholic church in the Tartar city was performed. Baron Gros, the two bishops, General de Montauban, with their staffs, and most of the French officers attended.

"The Bishop of Peking, in his discourse, expressed in grateful terms his acknowledgments to her Majesty Queen Victoria, and the English army in China, for the assistance the latter had rendered to the cause of Christianity. The ceremony was much marred by the rain which fell, the roof of the church being in a very dilapidated condition.

"On Thursday, the 1st of November, General de Montauban started with his force, leaving a battalion of the 101st Regiment, with two guns, as an escort for Baron Gros, and after a prosperous but very cold march reached Tien-tsin on the 6th inst.

"His excellency Mr. Bruce passed us during the night of the 5th inst., *en route* for Peking.

"On the 12th inst. his excellency the Earl of Elgin and Sir Hope Grant arrived from Peking, and M. de Bourboulon from Shanghai. Mr. Bruce returned on the 13th.

"On the 15th inst. the Allied naval and military Commanders-in-Chief, with the sanction of their excellencies the Plenipotentiaries, agreed that the Shantung Promontory shall be held in terms of the Convention of Peking, as follows, viz.:—

"'1st. That the ports of Chefoo shall be held by a French force, naval or military, as convenient.

"'2nd. That the Mia-Tau Islands shall be held by an English force, navel or military, as convenient.

"'3rd. That such occupation shall cease when the indemnities due by the Chinese Government are paid, or sooner, if the French and English Governments shall so determine.'

"It was also agreed that the French flag alone shall fly at Chefoo, and the English flag alone at the Mia-Tau Islands.

"It is General de Montauban's present intention to proceed about the 20th inst. to Shanghai, leaving about two thousand men and two batteries of artillery here. The rest of his force is embarking as fast as possible for Shanghai, where he intends it shall winter, and await further orders from the Minister at War.—I have, &c.,

"ST. GEORGE FOLEY, Colol,
"Commissioner at French Head-Quarters.

"The Right Hon. Lord John Russell, &c."

NEW TREATY BETWEEN RUSSIA AND CHINA.

The *St. Petersburg Gazette* publishes the text of a treaty concluded at Peking on the 14th of November last between Russia and China. It was ratified at St. Petersburg on the 1st of January, 1861, by the Emperor.

"Art. 1.—Henceforth the eastern frontier between the two Empire, shall commence from the junction of the Rivers Chilka and Argouns will follow the course of the River Amour to the junction of the River Ousourie with the latter. The land on the left bank [to the north] of the River Amour belongs to the Empire of Russia, and the territory on the right bank [to the south] to the junction of the River Ousouri to the Empire of China. Further on, the frontier-line between the two Empires, from the point of issue of the River Sou'gatcha, divides the lake Hinkai and takes the direction of the River Belen-ho (Tour); from the mouth of that river it follows the mountain range to the mouth of the River Houpitou [Houptou], and from that point the mountains situated between the River Khountchoun and the sea, as far as the River Thou-men-kiang. Along this line, equally, the territory on the east side belongs to the Empire of Russia, and that on the west to the Empire of China. The frontier line rests on the river Thou-men-kiang at 20 Chinese verstes [*li*] above its mouth into the sea.

"Art. 2.—The frontier line on the west side, hitherto unfixed, will henceforth follow the mountain range, the course of the great rivers, and the actually existing lines of Chinese outposts. Starting from the last lighthouse, called Chabin-dabaga, established in 1728, after the Treaty of Kiaktha, it will run in a south-easterly direction, as far as the lake Dsai-sang, and thence to the mountains situated south of the lake Issyk-koul, and called Ten-gri-chan, or Alatau of the Khirgises, otherwise called Thian-chan-Nanlou (southern ranges of the Celestial Mountains) and along those mountains to the possessions of Kokand.

"Art. 3.—Henceforth all frontier questions which may arise shall be settled according to the stipulations of Articles 1 and 2 of the present treaty, and for placing the boundary marks to the east, from the Lake Hinkai to the river Thou-men-kiang; and to the west, from the Chabin-dabaga lighthouse to the possessions of Kokand, the Russian and Chinese Governments shall appoint Commissioners. For the inspection of the eastern frontiers the Commissioners will meet at the junction of the river Ousouri in the month of April next. For the inspection of the western frontier the Commissioners will meet at Tarbagatai at a period not yet fixed. Duplicates of maps with the frontier line marked, and duly certified by the respective Commissioners, &c., will be exchanged.

"Art. 4.—On the whole frontier line established by Art. 1 and 2 of the present Treaty, trade free of all duty or restrictions is established between the subjects of the two States. The local authorities are bound to give special protection to such trade, and to those who exercise it. At the same time the enactments relative to trade established by the second article of the Treaty of Aigoun are confirmed.

"Art. 5.—In addition to the trade existing at Kiakhta, the Russian merchants will enjoy their former privilege of going from Kiakhta to Peking on commercial business. On their way, they are also allowed to trade at Ourga and at Kalgan, without, however, being obliged to maintain large commercial establishments there. The Russian Government will have the right of keeping a consul at Ourga with suite, and of erecting a building there for that purpose. For the requisite ground an arrangement will be made with the local authorities of Ourga. The Chinese merchants are equally authorised to enter Russia to trade, if so inclined. Russian merchants have the right to travel in China at all times on commercial business; but they must not congregate together in a greater number than 200 in the same locality. Moreover, they must be provided with a Russian certificate on the frontier, denoting the head of the firm, the number of his clerks, and his destination. During their journey these merchants are at liberty to buy or sell as they may choose. They must pay all their expenses.

"Art. 6.—As an experiment, trade is opened at Kachgar, on the same basis as at Ili and Tarbagatai. At Kachgar the Chinese Government grants sufficient land for the erection of a factory, with all the necessary outhouses, including storehouses, a church, &c., also a burial-ground, and pasturage, as at Ili and at Tarbagatai. Orders will be immediately issued to the governor of the district of Kachgar for the concession of the said land. The Chinese Government is not to be held responsible for the pillage of Russian merchants at Kachgar, should such pillage have been done by individuals from beyond the Chinese outposts.

"Art. 7.—In the localities thrown open to commerce, the Russians in China and the Chinese in Russia may enter into all commercial transactions without any hindrance from the local authorities; they may frequent the markets and shops in perfect liberty, as also the merchants' houses; they may buy and sell wholesale or retail as best suits their convenience, on credit or otherwise, according to the confidence they place in each other. The length of stay of merchants in these localities is entirely dependent upon themselves.

"Art. 8.—Russian merchants in China and Chinese merchants in Russia are placed under the special protection of the two Governments. To keep a watch over the merchants and prevent misunderstanding which might arise between them and the inhabitants, the Russian Government is permitted to establish at once Consuls at Kachgar and at Ourga on the basis of the regulations adopted at Ili and Tarbagatai. The Chinese Government may, likewise, if it wishes it, appoint Consuls in the capital and in other cities of the Russian empire. The Consuls of either State will be lodged in mansions at the cost of their own Government. Nevertheless, if it suits them, they may rent houses from the inhabitants. In their relations with the local authorities the Consuls of the two Powers are placed on a footing of perfect equality, in virtue of the second article of the Treaty of Tien-tsin. Offences and defalcations will be judged as settled by the 7th article of the Treaty of Tien-tsin, according to the laws of the empire of which the delinquent is a subject. Commercial disputes will be settled by the merchants themselves before a Court of Arbitration, the members of which will be selected by the parties concerned; the Consuls and local authorities will limit their co-operation to procure an amicable settlement, if possible, without any responsibility as regards the claims. In case of written engagements, it will be the duty of the Consul to take measures to enforce the fulfilment of the same. Disputes which do not come under the head of 'Commercial Transactions,' as law-suits, complaints, &c., will be settled by mutual consent of the Consul and chief local authority, and the delinquents punished according to the law of their own country. In case of a Russian subject seeking flight in the interior of China, the local authorities, as soon as they are officially informed of the fact by the Russian Consul, are bound to take measures to capture the fugitive and hand him over to the Russian authorities. The same is applicable to a Chinese seeking refuge in Russia. In the case of great crimes, as murder, brigandage, manslaughter, premeditated incendiarism, &c., if the culprit is a Russian he is to be sent to Russia to stand his trial according to Russian law; if a Chinese he is placed at the disposal of the Chinese authorities. In criminal cases, no matter how serious, neither the Consul nor the Chinese authorities have any right to incarcerate or pass sentence upon an individual not a subject of their own Government.

"Art. 9.—This article enacts, that in consequence of the present Treaty on the new frontier line, the enactments of the treaties concluded at Nertchinsk and Kiakhta are superseded.

"Art. 10.—This article refers simply to the restoration of cattle that may have strayed beyond the new frontier line, and to the extradition of fugitives, as given above.

"Art. 11.—This article simply regulates the transmission of written despatches on a reciprocal amicable footing between the authorities of the respective empires.

"Art. 12.—This article settles the postal arrangements between the two empires. Letters and parcels from Kiakhta to Peking and *vice versa* are to leave as follows:—Letters once a month from either point; parcels once every two months from Kiakhta for Peking, and once every three months from Peking to Kiakhta. Twenty days are allowed for the transmission of letters; forty days at the outside for parcels. Should the merchants deem it advisable to establish a postal communication of their own, they are at liberty to do so at their own cost and risk, by notifying their intention to the respective authorities.

"Art. 13.—The ordinary correspondence of the Minister of Foreign Affairs of Russia for the supreme council (kiun-kitchou) of the empire Te-Sing, and those of the Governor-General of Eastern Siberia

Digitized by Google

for the same council, or for the Court of Foreign Relations (li-fan-youen), will be sent by the ordinary post, but without being restricted to the fixed periods of its departure. In case of important business these despatches will be sent by a special Russian courier. During the sojourn of the Russian envoys at Peking, despatches of special importance may also be forwarded by a Russian functionary expressly appointed for such service. Russian couriers may not be stopped or delayed by any one whomsoever. A courier intrusted with such despatches must be a Russian subject. The departure of a Russian courier must be announced twenty-four hours beforehand at Kiakhta by the Commissioner to the Dzargoutchei (pou-youen), and at Peking by the Russian Mission to the Military Court (ping-pou).

"Art. 14.—This article empowers the Russian Governor of Eastern Siberia to conclude any additional arrangements with the frontier authorities of a nature to facilitate intercourse. At the same time it confirms the 12th Article of the Treaty of Tien-tsin.

"Art. 15.—This article simply states that after the exchange of ratifications the Treaty will be in full force.

"Signed and sealed at Peking on the 14th of November, 1860.

THE REBELS *VERSUS* THE IMPERIALISTS.

THE REBEL LETTER TRANSLATED BY MR. ROBERTS.

After infinite pains we have at last obtained access to the *creme de la creme* of Chinese society. It is very creditable to our perseverance, and it is the result of many importunate advances. For years we were kept outside the house altogether; then we were tolerated only by the odd men and hangers-on; then we got to know the tradesmen of the "Hong" class; afterwards we forced our way into the servants' hall, and remained there, because no one liked to take upon himself the dangerous duty of kicking us out; but it seems doubtful whether in all this time the real people upstairs ever heard of us, except as having been the occasion of some noises they heard below, and as having been the agents in the abstraction of a certain portion of the household plate. Now, however, since the late trip to the capital, the case is entirely altered. We are *aux petits soins* with the heads of the family. They are confiding to us the family difficulties, and the intended arrangements for the future. We are looked upon as many people who have intruded themselves rather impudently grow at last to be looked upon, as very necessary accessions to the society of the Imperial House of Hien Fung. Even the sacred Princes I and Kung have thought us eligible companions, and we are never again to be vexed by the insolence of the Chinese menials of the princely house. It is very well for the supercilious Briton, whose family has not worn a pigtail for two generations, to laugh at the idea of the dignity of a Prince I or a Prince Kung because these Imperial Princes wear prone descending caudal appendages, and because they include the Sun and the Moon among the members of their family. But these men only look so little in our eyes because they are so far off. If we had an Emperor of All Europe, we should render to his brother or his cousin scarcely less reverence than these Princes demand. It is a real substantive advantage that we have brought ourselves at last into direct correspondence, not with the poor trembling slaves of Mandarins, who dared not grant concessions, but with the real depositaries of power, who divide with the Emperor, or perhaps direct for the Emperor, the Imperial authority. As people ascend in the social scale their buoyancy increases and their size is magnified. No sooner has the Tartar family taken to patronise us than the rival House at Nanking makes overtures for our friendship. What Prince Kung is to Hien Fung, or perhaps even more than Prince Kung is to Hien Fung, King Chung Wang is to the Emperor Teen Wang, who, if he be a living entity, as has sometimes been doubted, lives in Imperial seclusion in Nanking. Indeed, for all practical purposes, King Chung Wang may be taken as the palpable head of the power which resides on the Great River, and which, as it has lasted for ten years, is come to be looked upon as the Empire of the Taepings. At any rate, King Chung Wang is the commander-in-chief of those marauding armies which are just now, to us, great embarrassments. This crafty gentleman, under the promptings, we fear we must confess, of an American missionary, has even been so condescending as to make special mention of ourselves, and to make us the object of the first Royal command addressed from the banks of the Yang-tse and the Southern capital of China. We accordingly give publicity to his letter, which, amid a great deal of vapouring nonsense, contains some very important matter. If the Imperial Tartar House of Peking is a very imposing and magnificent cloud of Empire the writer of this letter is a rough, hard fact. If Hien Fung is the nominal Emperor of one-third of the earth, Lee, the Faithful King, is the destroyer of one-third of the Chinese cities. We are afraid the Faithful King is a hypocrite and a robber, that he has very little higher instinct than that of the locust, and that, unless we had been absolutely forced to bring him and his followers to Peking to sweep away the Tartars, he is not an ally from whom we could get either credit or profit. He has too much of the Attila character about him. He destroys, but he never creates. Grass never seems to grow where his horse has trod. Even the missionaries who went forth to welcome a convert have come back describing a horrible burlesque of sacred things. But still he is one of the few great realities in China. He, or his mysterious Emperor, is seated in the heart of the empire, and has been there for ten years. He has been besieged all that time by an Imperial army with which he is upon the best possible terms, and which is very useful to him and to his capital as foragers, obtaining supplies upon easier terms than he could obtain them by the voluntary offices of the cultivators of the country. When he pleases he goes to some great city and sets himself up in funds, keeping possession until he has had time to dispose of his plunder leisurely and to fair advantage, and not doing things in a hurried and unthrifty way, as we did at Yuen-ming-Yuen. The valley of the Yang-tse is in his hands, and we can no more go up that river without making terms with him, unless we take ships of war with us, than our Queen's pleasure yacht could go up the Rhine without being searched for smuggled goods by a Prussian Custom-house officer. In comparison with the high Chinese society we have just got into, this potentate is, no doubt, very low; but he offers to treat with us. He seems to have a very shrewd notion of what our habits are, and to be quite anxious to oblige us. His proposals are to propagate Christianity and to admit our goods at low duties. There are strong grounds of objection to the first proposition, on account of the quality of the "Christianity" which would be spread under such auspices, but we ought to pause before we utterly reject the latter portion of the overture. "The Faithful King" complains that he has received no answer to a former communication to the same effect, and grievously deplores that we should have been so misguided as to prevent him from converting Shanghai to Christianity and good brotherhood. We were, no doubt, too proud of our new Imperial friends to acknowledge such low acquaintances, and we not only refused to return his bow, but actually kicked him out of the way of our princely companions. Still, something must be done with this Faithful King. He stands in the way of our enjoyment of our new Treaty. It is the first difficulty after the ratification. Mr. Bruce seized it at once, and has already very laudably attacked it. In the recently arrived despatches from China the passage which has commended itself to every one as containing special matter of very sound sense is upon this subject. Mr. Bruce, in relating his interview with Prince Kung, recites how he drew the attention of the Priuce to the condition of the more southern provinces, and to the fact that the presence of the allied troops alone saved Shanghai from falling into the hands of the rebels. He also impressed upon the Prince that we cannot go on holding Imperial cities against the rebels in the South, and also holding Imperial cities against the Imperial Government in the North. Prince Kung is described as listening to these representations with great attention, and it would appear that he heard of some of the exploits of the Taepings for the first time from the lips of the British Minister. This is very much as if Lord Palmerston or the Duke of Cambridge, after Birmingham and Manchester and Edinburgh had been taken and sacked, were to express surprise upon learning the fact from the Minister of a distant Power who had just made his way with an army into London. But everything is possible in China, and perhaps even this may be possible. The question, however, is what will be the consequence of this new knowledge acquired by the Imperial family? Will that same Tartar force which behaved so well against us be sent to extirpate this empire of brigands? We fear not. Those Tartars are gone back to their wilds. They owe only a sort of feudal service to the Emperor, and, like those feudal levies, can be brought together only for a short service. They never yet could be induced to move far South. As to the regular Chinese soldiery, they are rather worse than useless. That we should break up the power of these Taepings and keep them dispersed is out of the question; we might as well undertake to police Europe. The French have a special quarrel with them, because they have a want of ecclesiastical knowledge which induces them to confound the Roman Catholic religion with the Buddhist, and to call both idolatry; and, what is still worse, to burn with a sacrilegious impartiality the churches and temples of both, and murder their priests. But we are afraid that even the French will recoil from the task of eradicating the Taeping Power. What, then, are we to do? If our noble friends at Peking will not annihilate our plebeian acquaintances at Nanking and Shanghai, and Soochow, and Hangchow, and Nanking,—who happen to hold at present the tea and silk districts where we want to trade,—there is nothing left to us but to submit to lose caste with our *pur sang* friends at Peking, and to associate with and even conciliate the Brummagem nobility of Nanking. We hope that Mr. Bruce, who we are very sorry to see has not taken up his residence at once at Peking, to cultivate there the excellent present disposition of our new Princely friends, will look to this matter, for it is by far the most important which now remains for settlement in China.—*Times.*

THE NEW RUSSIAN TREATY WITH CHINA.

In our impression of yesterday (17th) we translated from the *Journal de St. Petersbourg* the last treaty which Russia has concluded with China. The policy of the Court of St. Petersburg recently has entirely changed with respect to its transactions in that part of the world. Let us premise that we think it far better for all parties that Russia should pursue the frank and open course she now adopts. There is no special reason why we should be jealous of her development in the Eastern Ocean. It cannot be expected that so vast an empire will submit in perpetuity to be cut off from the sea. She is ice-bound in the Baltic, she is treaty-bound in the Black Sea. It would be hard to prevent her from bursting forth into the Pacific. Under proper treaties and with a proper understanding she must be a better Government to trade with even than the Government of our new Tartar friends. Her outposts on the north and west of China have for a long time been engaged in the sort of work that sailors witness in remote seas when a thrasher fixes itself upon a whale. The impotent and unwieldy monster has made a few unavailing efforts, but they were quite vain; Russia, having access to the sensitive part, has long since thrashed China into submission. The Sinologues who watched the *Peking Gazette* frequently met with Imperial groans over the ill success of the war with the Russians, and the embezzlements of ammunition which had been intended for that purpose. We knew that something was going on up there in the North. This was a private victimisation; but now, when France and England are upon the spot, it is necessary for Russia, if she intends to pursue her policy, to come forth boldly, and to hunt her prey under the eyes of Europe. This new treaty is certainly a bold step in this direction. If the frontier line which it settles be traced upon a very good map, we shall find, after reconciling the difference in names, and identifying the rivers and lakes it mentions, that it takes a very thick peel off the west and north-east of China. To us China is the oyster which by our sword we open; to the Russians China seems to present itself under the image of an onion, which peel by peel they propose by themselves to devour. They now by this treaty push forward their frontier line considerably within the provinces lying at the foot of the mountains of Central Asia—provincee which were always included within the empire of China, and they advance

Digitized by Google

very close even to the densley peopled portion of the country. But their great advance is upon the north-east, where they have actually come twelve degrees south of their old boundary at the mouth of the Amoor, have taken in the whole of the shores of the Gulf of Tartary, bringing out their frontier line into the Sea of Japan. Of course the great desire of Russia is to creep south to get seaports which would give her three outlets to the world, and which are not for half the year blocked up with ice. Now, at the mouth of the river Thou-mien, by enlarging the already existing town of Hwan-chun, they will have a port directly opposite to Hakodadi, and commanding the islands of Japan. A very slight knowledge of the map of China is sufficient to convince any one who hears that the Russian frontier line is brought down south to the river Thou-mien that Russia, with a naval station at that point, must be practically master of Japan. Thus we three European Powers have attained in China our different purposes. We confident British, relying on our skill, say,—"Let us in to trade with you." France, not very hopeful of much gain from commerce in those parts, but desirous of a cheap dotation for a crew of importunate and unwelcome priests, says,—"Take these priests and feed them." Russia, confiding in nothing but in force and arms, says,—"Give me territory where I may nestle warships and whereon I may build arsenals." When Russia carries out her principles into detail she is wont, as formerly, to be more longsighted for the attainment of her objects than we are. We have been content to stipulate that our goods shall be introduced under certain moderate fixed rates, which, moderate as they are, are calculated to yield to the Imperial Treasury more than two millions sterling. The Russians, however, by the fourth article of their treaty, obtain that "on the whole frontier line established by the present treaty, trade, free of all duty or restrictions, is established between the subjects of the two States; and the local authorities are bound to give special protection to such trade and to those who exercise it." Unless, therefore, we take advantage of the "most favoured nation clause" in the Treaty of Tien-tsin, the advantages which Russian cloths possess in China as against our woollen manufactures will be retained. In providing for the carrying out this treaty the Russians have also been very careful not to embarrass themselves with the necessity of providing passports from Chinese Mandarins. The new treaty provides that Russian merchants, even in companies to the number of two hundred, may travel in China on commercial business with no further passport than a Russian certificate. Wherever they go these Russian merchants are to carry the Russian law about them, and the Chinese local authorities are bound to respect the rights and to enforce the obligations of a Russian subject. Such is the treaty which Russia has obtained in reward for her mediation and civility; and by means, perhaps, of a little tact in insinuating her request at a favourable moment Russia has got more than we have, and without paying 12 millions for the prize. We do not want permanently to keep a large fleet in the China Seas, and therefore we do not much grudge to Russia the acquisition of the shores of the Gulf of Tartary. Indeed, if we had had any such object in view, we would rather have kept Chusan than have all these hundreds of leagues of coast line. But Russia has got absolute free trade over the land frontier, while we have to pay duties; and Russia grants her own certificates to companies of her travelling merchants, while we exercise our treaty privilege under the *visa* of a local Chinese mandarin. Upon the whole, he Russians have the best of it.—*Times.*

Naval and Military.

Lieut.-General Sir James Hope Grant, G.C.B., will succeed to the post of Commander-in-Chief at Madras, in the room of Lieut.-General Sir Patrick Grant, K.C.B., whose period of service will shortly expire.

Official notice has been posted that the Canton prize-money shortly to be distributed—particulars of which have been given in our previous numbers—will include the following ships :—

Acorn, Actæon, Algerine, Assistance, Banterer, Bustard; Calcutta, and tenders Coromandel and Bittern; Clown, Cruiser, Drake, Elk, Esk, Firm, Forester, Furious, Haughty, Hesper, Highflyer, Hornet, Inflexible, Janus, Kestrel, Lee, Leven, Nankin, Niger, Nimrod, Opossum, Plover, Racehorse, Sampson, Sanspareil, Slaney, Starling, Staunch, Surprise; Sybille, and Garrison of Macao Fort; Volcano, Watchful, Woodcock.

A notice has been issued from the Admiralty that the officers and men of her Majesty's late ship *Raleigh*, who were not draughted into other ships on the China station, but were sent to England or otherwise disposed of, and who appear to have been three months on that station to the eastward of Singapore, will be allowed to participate in the grant now in course of distribution.

Official notice has also been posted that no doubt can now exist that H.M.S. *Camilla* was lost in a hurricane in the Japan Sea.

The promotions and distinctions to be conferred on the officers filling prominent positions in the China expedition will, in all probability, be officially gazetted next week. Sir Hope Grant gets the Madras command; Sir Robert Napier has been named the military member of council at Calcutta; and Sir John Michel, we believe, returns to his divisional command in the Bombay Presidency. Lieut.-Colonels Stephenson and Mackenzie are likely to be made full colonels, and various officers will obtain the Bath, or a step of army rank.

It is reported at Chatham garrison that a considerable reduction in the army will be made by the Government at the end of the financial year, and that the army estimates to be presented to Parliament are being prepared in accordance with that intention.

The commissioners appointed to inquire into the organisation and working of the Army Hospital Corps, with Colonel J. C. Kennedy, C.B., the president, arrived at Chatham garrison for the purpose of prosecuting their investigations at the head-quarters of the corps. The inquiry extended over several days. The members of the commission are Colonel J. C. Kennedy, C.B., commandant of the Military Train; Deputy-Inspector-General H. Mapleton, M.D.; Dr. Sutherland, one of the Army Sanitary Commissioners; Surgeon W. J. Fyffe, M.D., 5th Dragoon Guards; and Purveyor-in-Chief J. Scott Robertson.

Experiments are being made with a new mortar cannon, of which it is said the effect will be much greater than anything yet accomplished by the Armstrong or Whitworth guns. This instrument of destruction can serve either as a cannon or a mortar. In the first case the mortar forms the breech of the gun by means of a double hinge, which may be attached or removed with the greatest facility.

The *Princess Royal*, 91, screw, in the first-class steam reserve at Portsmouth, will be commissioned at that port for the flag of Rear-Admiral of the White Robert Smart, K.H., as Commander-in-Chief of the Channel fleet. The date of Rear-Admiral Smart's seniority is the 9th of July, 1857. Rear-Admiral John E. Erskine, the second in command of the Channel fleet, dates on the 4th of November of the same year.

Her Majesty's steam surveying vessel *Firefly*, Commander A. L. Mansell, was at Alexandria by last accounts; her surveying officers had proceeded across the Isthmus to the Red Sea, for the purpose of selecting the best sites for the lighthouses about to be erected at the expense of the Viceroy in the neighbourhood of Suez.

Major-Gen. Eyre, commanding the forces in the Chatham district, has issued a memorandum to the troops under his command, inviting them to contribute towards relieving the great amount of distress which now exists throughout the country.

The new mess-room which has been some time in progress at Fort Pitt, Chatham, for the use of the officers and students attached to the Army Medical School recently formed at that establishment, having been completed by Mr. Stump, the Government contractor, has been handed over to Col. Twiss, the commanding royal engineer of the district. The new mess-room is an exceedingly commodious building, 80 feet in length, and will afford dining accommodation for considerably more than the number of officers usually attached to the medical staff at head-quarters.

Her Majesty's iron paddle-wheel steamer *Triton*, Lieut. and Commander H. Burton, from the West Coast of Africa, has been paid off at Woolwich. The successful services of the *Triton* in capturing six valuable prizes freighted with human traffic will put the officers and crew in possession of various sums of money, independently of their ordinary pay, in the following ratio—namely, about £1,500 commander's share; from £300 to £400 to each of the commissioned officers, and a proportionate bounty to each of the warrant officers, men, and boys belonging to the ship.

The severity of the frost, aided by a strong northerly wind, for a time cut off the usual means of communication with the ships lying in ordinary at Woolwich from the shore.

His Imperial Russian Majesty's gunboat *Hydamak*, 5, Capt. Pestchowroff, from the Thames, arrived in Plymouth Sound, and having coaled, left for Rio Janeiro and China.

Another Blakely gun was tried on Thursday last on the shore at Hightown by the manufacturers, Messrs. Fawcett, Preston, and Co. Although only a 12-pounder, and weighing only 9 cwt., it threw its shell a distance of 1,670 yards with only four degrees of elevation and with marvellous accuracy.

The Lords of the Admiralty have announced to Sir Baldwin Walker that his retiring pension as Controller of the Navy is to be within a fraction of £700 per annum (£698. 6s. 8d.). Their lordships accompanied the notification with a letter expressing their great satisfaction at the manner in which Sir Baldwin had discharged the onerous duties confided to him.

The Admiralty have decided upon increasing without further delay the number of our iron-cased steam men-of-war, and letters were sent out on Saturday from Whitehall, calling upon Messrs. Napier, Laird, Scott Russell, Mare, Samuda, Palmer, Westwood, and Co., and the Thames Yard Ship Building Company (Limited), to send in tenders by the 24th inst. for building two ships of about 4,000 tons each. The vessels are to be very similar in construction to the *Resistance* and *Defence*, now nearly complete. They are to be 280 feet long, 56 feet broad, and plated with iron slabs fore and aft. The angular principle will not be adopted in this instance, notwithstanding all that has been done and said upon this subject. We, however, infer from inquiries which we have made that the question is still a moot one with the officers of the Controller's Department, and that consequently the instalment made to our iron navy is at present only a small one. The report made by Captain Hewlett, of the *Excellent*, last August, was, we are informed, decidedly favourable to Mr. Josiah Jones's invention; and he is supported in his statement by the openly-expressed opinion of the principal officers in the Royal navy.

The Colonelcy of the 4th (the Queen's Own Light) Dragoons has become vacant by the death of General Sir George Scovell, G.C.B., who died on the 17th inst. at Henley-park, near Guildford, in his 87th year, having been born in London in 1774. The venerable General had only retired from the active duties of Governor of the Royal College, Sandhurst, within the last four years, after being connected with that institution from 1829.

The old dockyard police at Portsmouth have been treated in the most shabby manner by the present Board of Admiralty. Old inspectors, sergeants, and others have now the choice of entering as labourers by giving up their pensions.

Owing to a leakage, either connected with the casson or the sluices belonging to the fitting basin at Portsmouth Dockyard, the *Duke of Wellington*, 131 guns, grounded upon the bottom of the basin to the extent of three feet. Most fortunately, the foundation is of a soft soil, or a magnificent ship, worth at the least £200,000, might have broken her back.

The appointment of Major-Gen. George Macdonald to the colonelcy of the 96th Regiment will, according to the rules of the service, place at the disposal of his Royal Highness the Duke of Cambridge a good service pension, of which Major-Gen. Macdonald has been in receipt a great number of years, but which he will cease to enjoy on being promoted to be colonel of a regiment.

A rumour is afloat in naval circles that, in consequence of the continued stagnation of promotion among the Captains and Commanders, it is the intention of the Admiralty to promote at once the twelve senior captains on the list to the higher grade of Rear-Admiral.

Correspondence.

MR. PARKES AND THE MANDARINS AT PEKING.

(To the Editor of *The London and China Telegraph.*)

SIR,—In a letter of mine which you inserted in your journal las October, I endeavoured to show that one of the causes of our misunderstandings with China was their knowing only one side of the English character, and I advocated the plan of doing all in our power to enlighten them on European affairs by means of well-qualified and courageous interpreters. Upon reading the very interesting narrative of Mr. Consul Parkes' imprisonment and examination by torture, I cannot but be gratified with the entire accordance with my views, which he exhibited, when before the Mandarins, in persisting in his statements respecting the power of the British, and the comparative nearness of the resources from whence that power might be drawn. At the same time he did not disguise the truth in any way, but stated simply the primary desire of the foreigner for peace, and also the means he had of enforcing a proper regard for good principles and good faith.

We cannot sufficiently admire the courage and decision displayed in Mr. Parkes thus contending with the wily officials of Peking. The political shrewdness which they manifested was fruitless when they found the honest statements of Mr. Parkes, followed the more forcible argument of the cannon ringing in their ears, which he had foretold would be the case.

I cannot help thinking that this plain dealing of Consul Parkes, when his life was in the hands of the Mandarins, who declared him to be the cause of all their troubles, will have a better effect than the physical force of the expedition. I should advocate more teaching and less flogging for the juvenile Mandarins in China. They have now been whipped well, no doubt they will learn their lesson better in future. Only let us have more able, hard-working, and courageous interpreters, like Mr. Harry Parkes, and the Chinese Government will need no more such chastisement as this.—I am, sir, your obedient servant, LINGUIST.

London, Jan. 10, 1861.

MR. SCARTH ON THE REBELS.

(To the Editor of *The London and China Telegraph.*)

SIR,—In your last issue you quote Mr. Macdonald's letter to the *Daily News*, in which he states: "When the expedition took Chusan in April last, the Chinese army, besieging Nanking, appears to have become completely demoralised, and its officers in despair to have concluded that the deluge had indeed overtaken them." This is meant to lead us to infer that Nanking was relieved of its beseiging army because the Imperial officers and soldiers feared an attack from the Allies. Now, what are the facts? A month before Chusan was occupied by the Allies, the insurgents had threatened Hang-chow, and to relieve that city a considerable portion of the Imperial army before Nanking was detached. The Chinese part of the city was taken before the troops from Nanking arrived, and it was not till the end of May, or a month after Chusan was occupied, that the insurgents made their sortie, and in the meantime their force at Hangchow had retired, their object being gained by the withdrawal of part of the beseiging army at Nanking, on account of which the sortie was successful. Our occupation of Chusan had nothing to do with it.

It was the Imperial army that first reached Soochow and plundered the place, instead of defending it; and, far from being afraid of foreigners, many of the soldiers made off to Shanghai, where foreigners were, and the Taoutai there received orders from his superiors to seize the soldiers with their booty, and keep the loot, but return the men, as they were wanted to make up the army. The Imperial authorities actually applied to the British and French Ministers for assistance, and it was granted. Proclamations were even issued by these foreign officers that they would defend Shanghai, the French proclamation going so far as to say that the French would put down insurrection in the interior, and ships of war were stationed at some distance from Shanghai to keep the insurgents in check. Ho-kwei-tsing the governor-general of the two provinces, fled from his army, across the Yang-tsze-kiang to Jungchow, and was brought from that place in a steamer commanded and manned by foreigners in the Imperialist employ, to Shanghai, so that that city, owing to foreign intervention, became the head-quarters of the Imperial Government in that part of China.

Mr. Bruce himself has acknowledged to Prince Kung that Shanghai would have been taken had it not been for the aid the Allies gave to the Imperialists; and taken by men, too, whom he states were willing to be our friends. He even says that we protected it for a Power which was "hostile and defiant."

In your leading article in the same number of the *Telegraph* you quote Mr. Wade and Lord Elgin's opinions against the insurgents, but as Lord Elgin was not acquainteded with Chinese, his opinions were probably derived from his interpreters, Messrs. Wade and Lay, who, having both been in Imperial employ, must be considered as partisans. In fact, in a previous part of the letter which you quote from, Lord Elgin says:—"The knowledge of the Chinese language possessed by Messrs Wade and Lay enabled me to enter, without difficulty, into communication with the inhabitants of the towns and rural districts which we visited." As for the value of the information so derived through these two interpreters, you may judge of it from what Lord Elgin says of his informants: "It is always their chief endeavour to say what they suppose their questioner will be most pleased to hear." If, therefore, Lord Elgin's interpreters, in speaking to the natives, called a Taeping soldier a rebel, which in the Chinese word is equivalent to a murdering thief, they would have their cue, and abuse the insurgents accordingly. In the very sentence previous to the one you quote, Lord Elgin says: "It is, no doubt, true that the general attitude of the population does not argue much enthusiasm on either side of the dynastic controversy; and it is also certain that we saw more of the districts in Imperialist than of those in rebel occuparion." If we are to be guided by individual instances, I might say that in the only case where any actual sympathy of the people on one side or the other was seen in active operation during all Lord Elgin's trip up the Yang-tsze-kiang, it was when the people were seen running from the Imperialists into an insurgent city for protection. Mr. Oliphant describes this occurrence taking place at the capital city of the province of Nganwhui. He also relates that "a marked disinclination was always evinced to allude to the 'long-haired men,' as the rebels were invariably called. Whenever they were mentioned, the cautious Chinaman was always on his guard against saying anything which might hereafter be brought up against him as an evidence of hostility to the revolutionary cause." This shows two important points—first, the *people* did not call the insurgents "*ts'ih*," or murdering thieves, as the Imperialists do; and second, the people seem to have had but little faith in the stability of the reigning power, if they had any expectation that the insurgents would return. In fact, they appear to have expected them back, because the houses re-built at Hankow were built on the insurgent plan, without places for idols or shrines. With regard to the remarks made about their religion, we have given the Chinese the Bible. If they make errors in the use of it, it is our fault if we do not try to set them right, and this we have never done. But even when you quote from their writings you take up only the bad points, and make them worse by wrong punctuation, and would lead people to infer that they wished to exterminate Europeans; and you erroneously make the Chinese take the place of Tartars when the "imps" are alluded to; in fact, make quite a Kilkenny cat affair of it.

By next mail we shall probably hear that Chapoo is taken and its Tartar garrison driven out. Ching-kiang-foo will not long stand if the surrounding country is under Taiping sway. A civil war in a country is never a very pleasant time, and it is probably worse in China than elsewhere; for our experience at Canton, Shanghai, and Amoy of Imperialist butchery, head-cutting, bowel-ripping, and putrid corpses floating before our eyes, may give us an idea of what goes on elsewhere. We know that the Imperialists at Amoy hired pirates to help in the slaughtering at so much per head, and that the British officers were actually applied to by the Chinese authorities to defend them from their own paid assassins. All these things are not pleasant episodes, but they serve to show what sort of an affair the Imperialists make of war. Even with our civilised troops, it becomes a very horrid curse to the country; witness the hundreds of suicides, and wells full of bodies, in the old war, at Ningpo, Chinghai, and Ching-kiang-foo, or even the scenes at Pehtang and Hose-woo in the late war, though efforts were made to prevent loss of life.

Mr. Meadows, Dr. Taylor, the Rev. J. W. Edkins, and others, have written in favour of the insurgents from what they saw; and any one who resided in China during the last ten years knows enough against the Imperialists from actual observation, not to say anything of the way in which they treated the prisoners secured by their treachery; and though telegrams may flash forward the news almost with an expression of surprise that some of the points in the new Treaty and Convention are really put into force by the Tartars, we must always bear in mind that it is the Chinese people with whom we trade, and who are friendly to us, and that the chief opposition, both to Christianity and commerce in China, met with by foreigners, has been from the Tartar Government, whether the officials serving under it were Tartars or Chinese. I could give many instances to prove that the insurgents have been greatly maligned, and many more to show how badly the Imperial soldiers and officers treat the people; but as it is settled that we are to be friends with the Tartar Government for the future, we may just let events take their course; and if we only do some good in China instead of harm, we will soon find which side we can do most good with, and that is the side we should uphold. One thing is clear already; the Tartars do not appear to have done much good in China.—Your obedient servant,

17th January, 1861. JOHN SCARTH.

*** Mr. Scarth assumes that in writing down the Taepings we uphold the Tartar Government. The following passage in our number of the Nov. 26, will show our opinion of their respective merits:—"We wish most cordially it were otherwise, and that the rebels were actuated by Christian and patriotic motives, for China is sadly in want of a more humane Government."

DEATH OF JOSEPH JARDINE, ESQ.—Another melancholy proof that commerce, like science and literature, requires its victims is given in the death of Joseph Jardine, Esq., senior of the house of Messrs. Jardine, Matheson, and Co., of China, which event took place on the 11th inst, at his native place, in Dumfries-shire. Mr. Jardine arrived from Hong Kong in this country last August, in company with his brother, Mr. Robert Jardine. Our readers will remember that his elder brother, Mr. David Jardine, died a few years since, a short time after his arrival in England from China. Mr. Joseph Jardine went to China in 1843, where he has resided with but little intermission ever since. His laborious assiduity to maintain the *prestige* of one of the greatest houses in the world undermined his constitution so completely, that those who knew him will scarcely be surprised to hear of his decease, amid wealth and homage. We sincerely hope that his successors, and all others in similar positions, will be warned by this sad event. *In medio vitæ morte sumus.*

THE VISIT TO JAPAN.—We should have (says the *Star*) a clear explanation of the nature of the moral demonstration which Admiral Jones and his squadron—aided, as we are informed, by a French squadron under Admiral Page—purposes making in Japan. Bitter experience has made us distrustful of admirals and diplomatists when they find themselves under the influence of an Eastern climate, and the grim phantom of a Japanese war seems to be already looming on the horizon. Let the people be watchful ere it is too late to avert the threatened peril. Above all, let our rulers receive clear intimation of the stern and unchangeable resolve of the nation that not a shilling of English money shall be spent, not a drop of English blood shall be spilt, in the wicked attempt to repress disorders which have been caused by the misconduct of our countrymen, or to shelter ruffians from the native vengeance evoked by their gross transgressions.

A MOST sweeping charge has been made at a lecture given at the Society of Arts, by a Mr. Wray, who states he has been a resident in the Straits of Malacca. His assertions extend to the alarming point that seven-eighths of the tea consumed is adulterated, and that some year since the foreign houses in China did so. We shall notice the matter more fully in our next.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter. Passengers arriving by either Overland route or sailing vessels, in England or on the Continent, will oblige by forwarding their address for the information of inquiring friends.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., *via* Marseilles, to the Editor, Box No. 70, General Post-office, London, E.C., which has been opened specially for the same.

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

The London & China Telegraph.

LONDON, SATURDAY, JAN., 26, 1861.

THE NEW TREATY.

WHILE we agree with the policy advocated by *The Times* in a leader which we gave in our last number, viz., that we should vigorously push at once for all the new privileges gained by the Treaty of Tien-tsin and its Convention—which has caused so much human suffering and expenditure both to the Chinese and ourselves—we do not advocate the immediate operation of the ninth article of the Treaty, which stipulates for free ingress and egress into the interior. The giving effect to this clause is the most important part of the Treaty, and until the new ports are properly opened and the Chinese and their authorities see something of us, it would be unwise to grant passports *ad libitum*. The first thing to be done promptly, is, to get British men-of-war with competent men from our consulates to visit and settle the preliminaries of opening all the ports to our merchants. While on this point we may mention, in reference to the remarks of *The Times*, that according to our reading of this article, it appears to us that by the "counter signature of the local "authorities" of the passport to be granted by British Consuls, it is meant that of the Chinese authorities at the port at which the passport is granted *only*, and, consequently, no difficulty can be expected on that score *per se*, as *The Times* suggests. It is manifest that if they should refuse to do so, it would be unsafe for any European in that case to proceed into the interior without it, as it would be a sure indication of grounds of quarrel existing at Peking; as, of course, the local authorities will now receive their instructions from the Imperial Government direct. It is a matter, however, for argument, whether it would not have been better to have omitted this performance; and what strengthens it is, the omission of any such stipulation in the Russian Treaty, which we publish in another part. We feel pretty sure, that be it good or bad, or containing as *The Times* says, "War Seeds," it was inserted by Lord Elgin or his advisers as an additional security for the holder, and we are of opinion that it would be found so in practice; indeed, any passports granted only by British Consuls would have, most certainly, contained "War Seeds" at the first onset, until the Chinese became familiarised to them. Indeed, we could not expect that the authorities in the interior who have never seen foreigners would respect such a pass, as in spite of the new Treaty we shall for some years be denominated by the Mandarins as "barbarians."

We must confess our disappointment that the restrictions contained in the tenth article, as to trading up the Yang-tze-kiang, were not removed by the Convention. This was an important error on the part of Lord Elgin. It cannot be believed that any difficulty existed in doing so; for quite sure are we that when Prince Kung sent to say he agreed "to all our demands," that he would not have stuck at this gnat while he swallowed the camels in the shape of "double indemnity" and the residence of our Ambassador at Peking. Notwithstanding all the discussions in Parliament and petitions to Government, no reference has, it appears, been made as to the import of salt from England, and according to article forty-seven, opium vessels in Chin Chew and other ports not open to trade will be liable to seisure and confiscation. Any one who reads the Treaty cannot but be struck with the numerous clauses relating to port and customs regulations. We do not object to the Foreign inspectors having full powers to enforce their rights but such clauses as the thirty-seventh, which fines a captain 500 taels for an error in his manifest, looks as if one of the interesteds must have been by the side of Lord Elgin when the Treaty was drawn, in fact, have presented their "little items" for insertion. With the present movement to stimulate the growth of cotton in all parts of the world, the emigration clause in the Convention is likely to be of great service. Among the many places named as likely to use Chinese labour are Natal and Algeria.

THE RED SEA CABLE.

ON the compromise of the differences effected between Messrs. Newall and Co. and the Red Sea Telegraph Company—which we announced in our last—there exists considerable disappointment among those who have opposed this route. It was hoped that a legal investigation in court would have elicited some important flaws in the calculations made by the company's engineers and the contractors. Now, according to our knowledge of the matter, obtained by a constant attention to the subject, as evidenced by our earliest announcement of all the movements, from the laying of the first section from Kurrachee up to the last feature, viz., the settlement of the company's disputes with Messrs. Newall and Co., we do not see what flaws have in reality existed on the part of any one. The Government, who have been roundly abused for granting a guarantee to the company, would certainly have been more vehemently abused had they not done so, and by none more vigorously than those who now abuse them. Until the decision was arrived at to lay a cable in the Red Sea, to connect our Indian possessions, it was the *vexata quæstio* of the day. As to the rival routes proposed, they are like all other schemes; every one has a hobby-horse. From our experience we think the best route is by the Red Sea.

If our readers will turn to our number of the 10th July, 1859, they will find abundant evidence of the great success which attended the plans of the engineers, Messrs. Gisborne and Ford; and the contractors, Messrs. Newall and Co., in the equipment of the vessels *Imperador* and *Imperatriz*, for the purpose of laying this cable. It was considered at the time to be the *ne plus ultra* of electric cable experience, and no doubt it was so. After the cable had worked satisfactorily for a month—just sufficient time to clear the contractors of their liability—it was discovered that insulation had ceased on certain portions of the line, which we must remind our readers is over 700 miles long in some parts from Suez to Kurrachee. The difficulty was where to find the faulty part of the cable: was it a fracture caused by the rough and rugged bottom, or was it in the manufacture? After a series of trials by the very efficient steamers, the *Imperador* and *Imperatriz*, it was fortunately discovered to be a defect in the cable. While these operations were in progress, the question arose as to the compensation to be awarded to Messrs. Newall and Co. for the services of their vessels, and hence the difficulty, the settlement of which has just been arrived at by a compromise. There can be no doubt that the company were in error in attempting to fasten on Messrs. Newall and Co. the great expense of the experimental operations, the period of their liability having clearly ceased; and it is only fair to Messrs. Newall and Co. to say that they have throughout acted in a cordial and liberal spirit. We understand that this firm are not to be entrusted with the repair of the cable, which will now be arranged for as soon as the weather permits.

COMMUNICATION WITH SOUTH-WESTERN CHINA THROUGH PEGU AND BURMAH.

CAPTAIN R. SPRYE and his son lately laid their views before the official and scientific world at a meeting of the Royal Geographical Society. Want of space prevented us noticing this matter in our last.

The authors opened by stating that unless the provinces of Western China possessed in their climates, products, populations, and transport facilities, commercial capabilities, it was useless to discuss the proposed line of approach to them. They adverted to the several erroneous "notions" and misrepresentations which had been circulated respecting this subject. Dividing China proper into equal moieties by the 111th degree of East longitude, a detailed account was given from the best

Digitized by Google

authors,—including Du Halde, Le Compte, The Chinese Repository, Murray and Crawfurd, Davis, Williams, Huc, Osborn, Oliphant, &c.—of the two western provinces nearest to Eastern Pegu: viz., Yunnan and Se-chuen. A more succinct account followed, on the same points, of the other four western provinces, viz., Shen-se, Han-su, Quang-si, and Quie-chu; and the four more populous and cultivated central provinces of Ho-nan, Hoo-peh, Hu-nan, and Shansi, a portion of each of which lies west of the assumed longitudinal dividing line, were more briefly described. The result of this review of the western half of China Proper, with which England has no commerce, showed that it comprised an area of 600,000 square miles—of which at least 25,000,000 of acres were cultivated—100,000,000 of people, exclusive of the independent Hill tribes, 70 cities of the first, and 400 cities of the second and third orders, with numerous forts and garrisons; and that enjoying the advantage of every variety of climate, this western half of the empire yielded, in commercial abundance, gold, silver, quicksilver, cinnabar, vermillion, copper, iron, coal, millet, rice, wheat, rhubarb, and other valuable drugs, musk and odoriferous flowers and woods, indigo, and other brilliant dyes, wax, honey, cinnamon, lemons, oranges, pineapples, pomegranates, and other fruits, precious stones and variegated marbles, horses and mules, tea, silk, the grass-cloth, and other textile fibres, wool, goats' hair, sables and other furs, with skins, hides, &c., &c., &c.

The paper next described the Chinese of those provinces as being equally desirous of acquiring riches by commerce and trade, as anxious to become possessed of things useful or agreeable though foreign, and as skilled in traffic as their fellow countrymen of the seaports; and also as being far more independent (from distance) of the Imperial Court of Peking, from the usual triennial attendance at which the western functionaries had relieved themselves. According to that most able Governor of Singapore, Sir Stamford Raffles, "India cannot manufacture sufficiently cheap or abundantly for the Chinese—*England can.* But it is idle to talk of the extent and cheapness of our manufactures, unless we bring them into fair competition. There is no reason why ALL China, the cold north as well as the warm south, should not be, in a great degree, *clothed from England.* No people study cheapness so much as the Chinese. And if we can supply them [as we can] at a less cost than they can make for themselves, *we have only to find ways for the introduction of our goods,* and to place them within their reach."

The paper then described the geographical position of Esmok (written "Semao" in the Jesuits' map, and Sz'-mau in other maps) as the frontier town of Pu'r'h, the most south-western department of Yunan, the capital of which department, Pu'r'h-fu, stands in 23·02 N. lat., 101·10 E. long., and distant from Peking 6805 li. Esmok thus appears to be on the north or left bank of the Ta'vai'ho, a tributary of the Mei-Kong (Cambogia) river, which it enters south of Kiang-Hung, and the Burman Shan town of Muang-ha, one of the twelve petty Tswobweraships under the Tsenwifua of Kiang-Hung, to occupy the opposite side of the same stream, which is at that point the boundary between China Proper and the Shan States of Kiang-Hung. "Esmok itself is an enclosed town, the wall of which is about three fathoms high, and of the same breadth at the top, on which horsemen patrol at night. It has no gateway on its south face towards Muang-ha, and only one on each of its other sides. Its ordinary garrison is 300 men, sometimes augmented to 1,000. The governor is a mandarin of rank equal to a Burman Myo-Woon. Many Chinese merchants, with caravans of ponies, mules, and donkeys, pass to and fro through Esmok, trading between China, the Laos States, and the Siamese and Burman Shan States of Zimmui, Meni, &c." The existence of this caravan trade the authors of the paper considered to be proof that the road and water communication within the province of Yunan, for the carriage of merchandise to and from Esmok, must be good; and the carriage there, by beasts of burden, coolies, and boats, be capable, as in every other part of the over-populous empire, of being at any time augmented to meet any increase of demand. The paper finally stated that Esmok was within about 250 miles of our north-east Pegu frontier, at the point of the Salwein river; and that the intermediate Burman Shan Princes were not only consenting to, but desirous of the establishment of such a commercial route between British territory and China, across their states.

We have here the facts stated that about one-fourth of the entire population of China might be reached by this route, and an opening afforded for the introduction of many of our manufactures, especially articles of clothing. Of many of the countries through which this trade would have to pass we at present know little; and even in a geographical and ethnological point of view the exploration would be valuable. Laos and the Burman Shan and Singhoe States are comparatively unknown. That there must be many valuable articles of trade to be obtained from these and the southern and western provinces of China there can be little doubt. Minerals and metals, wool and goats' hair, fibres and skins, with several useful drugs, are certainly to be obtained from them. In a future communication to the Geographical Society Captain Sprye and his son intend describing very fully the country between Rangoon and Esmok.

At a time like the present, when the thoughts of the British public are more than ordinarily directed to that vast and interesting country, an especially fitting opportunity seems to have arisen for the consideration of this most important question, and it is satisfactory to find that it is at last beginning to command the attention it so well merits. With the concentrated attention of several well informed and intelligent men now directed specially to it, we are likely to have brought before us all that it is important to know concerning the new route and the prospects of trade thereby, while the public are sure to canvas and weigh fairly the objections which can be urged as to its success. As to the fitness of Rangoon to become the outlet and inlet of the enormous traffic that would result from the establishment of such a line of conveyance we need not enlarge. As a river port it is easy and safe to enter and leave, and the changes in Pegu that have already resulted from British rule and occupation are astonishing.

To carry on an extensive and beneficial exchange trade with China we must avail ourselves of all the openings that present themselves. It will not suffice to confine ourselves to the seaports. We must tap the country by the rivers, canals, and land routes leading to the nearest port for shipment. With an Ambassanor at Peking we should now be able to push our intercourse. If Esmok be made a free and open city, then all we shall have to do will be to enter into a treaty with the King of Burmah. The rulers of the Shan States through which the route would pass—the Tsobwera of Kiang-Tung, and Tsenwifua of Kiang-Hung—have, we understand, long expressed anxious desires for commercial intercourse with us, and that we should trade with China through their territories.

INDIA AND CHINA OVERLAND COMMUNICATION.

DR. M'COSH, late of the Bengal Medical Staff, read a paper at the last meeting of the Geographical Society, "On the various lines of Overland Communication between India and China." He proposed the appointment of a scientific mission to survey and report upon these routes with a view to the selection of the best. Of the five different routes he gives the preference to the one by Munnipúr. There is good steam communication from Calcutta by Dacca and Sythet to Banskundu, on the Barack; thence a good road to Munnipúr, an inferior one to Mong-fong, on the great Ning-tse; and a road might easily be constructed to Bamo on the Irrawadi, where the great line of communication between China begins, and leads up the valley of the Pinlang into Yunan. In this province the main channels of the great rivers of Martaban, of Cambodia, and of Nanking, are in close proximity. Thus if an expedition leaving Calcutta on the 1st of November could be at Munnipúr on the 1st of December, on the Ning-tse on the 15th, at Bamo on the 1st of January, across the Chinese frontier on the 1st of February, and safe in summer quarters in the mountains of Northern China and Thibet before the hot season, early in October it might cross over into Assam by the line of the Dihong, after having settled the still doubtful course of the Tsan-poo, and be again in Calcutta on the 1st of January. At Bamo an annual trade, estimated thirty years ago at £700,000, is carried on between Burmah and China, which, if thrown open to England, might be more than doubled. Before any expedition could be allowed to cross the Burmese or Chinese frontier, Dr. M'Cosh mentions that passports from both these courts would be essential. Such a commercial line, if ratified by a tripartite treaty between England, Burmah, and China, could not fail to add another link to the world's chain of communication, second in importance scarcely to that of the Isthmus of Suez or of Panama. The more discussion is promoted upon this important topic the more likely are we to arrive at a clearer estimate of the feasibility of the route, and the prospect of its proving commercially useful as a means of communication with the western provinces of China.

Digitized by Google

If there be any truth in the report that a telegraphic line has already been or is being established from the frontiers of China through the Burman Empire and Siam to Calcutta, this will further promote trade in that quarter. According to statements in French journals, a privilege for telegraphs of seventy years' duration has been conceded to M. Vinard de St. Anne by the Emperor of Burmah. Through the influence and intercession of Colonel d'Orgoni, who has obtained great credit at the Court of Ava, French subjects are invited thither, to establish commerce and manufactures, under the highest protection and advantage.

THE BRITISH POLICY IN CHINA.

THERE is a pleasant diversity in the shifting scenes of the Chinese drama. Our mercurial neighbours across the water worked up into theatrical form the incidents of the Crimean campaign and the storm of Canton, but for novelty of material and variety of scenery and costume the advance on Peking will leave these far behind. We may imagine what some of the Cabinet Councils of the Sun of Heaven may have been like before the danger was imminent, and how loudly and learnedly his Ministers of the war party pronounced the doom of the Outer Barbarians; but how crest-fallen must these brilliant heroes in silken robes and coloured buttons have looked when summoned to the Audience Chamber after his Majesty's return from his ignominious flight into the desert. Prince Kung of the surly brow, has, we may be sure, made the best of the calamity that has befallen his country, for the Chinese are all fatalists, and has more than once consoled the Emperor with some wise saw of antiquity, instanced it by present circumstances, and resigned himself to his fortune, or rather misfortune, meditating on the idea of *Tempora mutantur*, &c.

The glitter of the Imperial court is gone, and the tawdry remnants and dingy appurtenances of fast splendour are all that remain. The shock to the Mandarins' feelings must have been tremendous, to see the palace of Yuen-ming-yuen after its sacking by the Allies. We have not a doubt about the opinion which the Chinese Court now holds respecting the Western Ocean men. We were in earnest, they will say, and have proved ourselves more than their equals in war. They will respect us evermore, if we only follow the same decided course, and thrash them without ceremony whenever they venture to insult us again. How we ever came to allow them to call us "barbarians" in their official papers, and to designate our despatches "petitions," seems marvellous! We had a certain supercilious contempt for their opinion, and so we permitted them to demoralize their own feelings with respect to us. It was without doubt a mistake ever to permit such expressions to be used about us. We trust more appropriate terms will be employed in future, and that his Excellency, Mr. Bruce, will not remove one hair's breadth from the line of policy which proclaims the Queen of England the Emperor of China's equal, and her Ambassador to be her representative. But we are far from desponding, nay, we are hopeful, for the future of China; and if our Ambassador can in any way inspire the Imperial Government with vigorous energy, the rebel hordes of the South will have to give way, and our trade will flourish, while dollars will flow abundantly through the Customs into the Imperial treasury. The letter of King Chung, or the Faithful King, which he recently sent to Lord Elgin, can scarcely be deemed worthy of a reply; for to treat with a rebel while at peace with his sovereign cannot be regarded as legal or right in any sense, but contrary to international law and amicable relations between nations. If we must make our terms to, or receive our terms from, the rebels, it should have been before our Treaty and Convention were signed and ratified; it is too late now to talk of "associating with and conciliating the Brummagem nobility of Nanking," at the risk of "losing caste with our *pur sang* friends in Peking." This would not, indeed, be losing caste, but losing principle; and if our newly-formed allies in Peking know anything of fair dealing, such a proceeding would bring us into justly-merited contempt. If the forces of the rebels stand so much in our way of trade, and they declare a blockade of some of the Chinese ports, and also attempt to stop the inland traffic, there is no necessity for making terms with them, — we shall have *carte blanche* from the Emperor to take our ships of war to support our traders, and the rebels are too knowing in Western tactics not to keep clear of contention with us. The opportunity thus afforded us of exploring the great rivers and of visiting the inland cities of China, and at the same time of aiding indirectly the Emperor in tranquillising his realm, should not be lost sight of, because the prosperity which would follow, even to the exchequer, though incorrect reports had been transmitted to the Court in the first instance, would prove to the Ministers of Government the value of being on good terms with so powerful a nation as the English. We, therefore, hope that there will be no double dealing in this fresh start that we are making with China; a firm and consistent policy is all that is required to win the respect and friendship of the Chinese. This we have always advocated, and ever shall advocate, because it is that policy which will bring most honour to British interests and most prosperity to the Chinese.

The changes which our successes in the work will introduce into the internal and external affairs of China are such as will call for our fostering care, and we ought vigorously to exercise our new functions in order to prevent any wavering indecision on the part of the Chinese Government from interfering with or stultifying us in our recent arrangements. Now that we are to have a Minister at Peking it will be a curious question how his Excellency will proceed to treat the various matters that will come before him; the first difficulty to be overcome will be the credence given him by his compeer, the Chinese Minister for Foreign Affairs. This personage, noble and literary though he be, will be innocent of all those multifarious items of knowledge which he ought to have, and indeed we cannot see how it will be otherwise until a Chinese Ambassador and suite are accredited to the Court of Queen Victoria. At present the advantage is all on our side; we know everything about China, China knows almost nothing about us. The advice, therefore, and the first subject to which, we trust, Mr. Bruce will address himself, is the obvious necessity of sending a Chinese ambassador to England. There he may learn, and learnedly write about, the advantages likely to accrue to China from a further intercourse with, and a closer imitation of, British method in doing things. As a sequence to all this, we shall see the rail and the steamboat, the telegraph-wire and the printing-press, and the great organ of opinion, the newspaper-press, flourishing in that vast empire.

CHINESE EMIGRATION TO CUBA.

In the Circular of Messrs. Joseph Travers and Sons, the well-known sugar and produce house of this City, the following paragraph appeared:—

"The Coolie trade from China presents features of a character more deplorable than the African trade, in proportion as the victims are more intelligent and capable of appreciating their wrongs. During the first nine months of the present year, 133 vessels have arrived with cargoes of what are termed 'Asiatic free colonists.' These 'colonists' are, it is asserted, nearly all poor creatures that have been kidnapped. The total number embarked in China has been 58,763, of whom 8,981 have died on their passage. American officers of ships that have brought these Chinese to the island have admitted that the trade in many of its features is worse than that from Africa. Out of the 50,000 imported, only 52 were females. Happily the Chinese are less submissive than the Africans, and as their capacity for labour is likewise less, many of the planters are beginning to decline purchasing them. They stand by each other, and if one of their oppressors is turned upon and killed, it is difficult to detect the perpetrator, their invariable reply being, 'We all did it.' The consequence is, that as it would be too great a money loss to garrotte the whole, such acts are often left unpunished."

The managers of the *Compania Asiatica*, in Havana, Messrs. Forices Puento and Co., have addressed the following letter on the subject to Messrs. Travers, dated 17th Dec. last:—

"Gentlemen,—We are in possession of your Weekly Circular, Nov. 10th, sent to us under cover, and whilst perusing its contents, had our attention drawn to an article headed 'Sugar and the Slave Trade,' and on this subject take the liberty to address you. We believe that your reports, to which a wide circulation is given, are intended to represent facts of interest to the commercial world, and that as such it cannot be indifferent to you to be advised of any important error which, through being wrongly informed, may appear therein. We do not allude, in the present case, to your mention of slaves being imported into this island, as this does not in the least affect us, but as managers of the *Compania Asiatica*, of this city, being the largest receivers of Chinese labourers, we permit ourselves to observe that your statement, as to these, is very far from being correct. The reports in reference to this line of emigration, from the part of its opponents, are so various, so grossly exaggerated, and so near bordering on the ridiculous, that those acquainted with its true condition have long since suffered them to pass unnoticed; the more so as it is well known that, where prejudice rules the mind, conviction is very slow to enter. In the present instance, the error is so glaring as to be noticed by even those not well acquainted with this island. We annex a list of arrivals in this port and island during the entire year, showing the number of those embarked to have been 6,112, out of which 437 died on the passage. Against these facts appear your figures of 58,763, and 8,981 deaths. As to which source your statistics may be derived from, we have not the remotest idea.

Digitized by Google

"As to your other remarks on the subject, there is not one which we can acknowledge as being true; but at the same time consider it unnecessary to explain nor defend a system the objections against which rest on prejudice only, and not as the result of any serious examination or inquiry at the proper quarters. You are only correct in saying the emigrants are poor; they come, for the greater part, to the Barracoons in China, almost naked, starving, and with diseases; they are clothed, fed, and cured, and brought, of their own free will, to a country where they may become civilised beings, and are better off than the majority of free labourers in your part of the world. If the Spanish Government declines to heed the unfounded prejudices of others, and to prohibit such emigration, it is because it does not wish to check the progress of its colonies, in which respect they show wisely to have benefited by the experience of other nations. We do not know whether you will consider it expedient to correct your report; to us it is a matter of indifference, but doubt not that you will accept these observations as they are made, with a desire to prevent publicity from being given to any further statements from such sources as the one now alluded to must have been derived from.—We are, &c.,

Literature.

Life of Mrs. Emily C. Judson, wife of Dr. Judson, Missionary to Burmah. Nelson and Son, Paternoster-row.

Idolatrous Burmah, as Dr. Judson found it and as Dr. Judson left it, is idolatrous Burmah still, and we suspect that even Dr. Cumming will hesitate in fixing the exact date for the Burmese to become Christian converts. Dr. Judson, the celebrated Baptist missionary, lacked none of the requisites of his office. He united to no ordinary talents, energy, perseverance, undaunted courage, and that faculty for winning the regard of those brought into contact with him so rare but so necessary to missionary success. Of his truthfulness and his piety none who are acquainted with his career can entertain a doubt. It would not be easy to point out a man better fitted than Dr. Judson for the noble work he undertook, but we are constrained to say that his success in Burmah was very small indeed. In another respect, however, he was more fortunate. Missionaries and critics, as well as more ordinary mortals, must envy him his conjugal felicity. He had three good wives (successively of course), each one being just a little better than her predecessor. In the interesting work by Mr. Gouger, which we commended in our last issue to the notice of our readers, we made the acquaintance of Dr. Judson's first wife, a sweet spirit, shedding her light of consolation in that dark imprisonment. The second wife is still better known to us from the memoir writeu by her successor, and it speaks much for "the Sainted Sarah" and more still for her biographer that she appears therein as an estimable and attractive woman. But the worthy missionary's triumphs were not yet complete. In due course "the Sainted Sarah" was gathered to her fathers, and the Doctor, at the ripe age of fifty-seven, but still, as his third wife *naively* tells a correspondent, with hair "black as the raven's wing," was once again (not to speak it irreverently) "in the market." *Rara avis in terris*—his next wife was a good one, and a poetess in the bargain. It is to her that the volume before us relates. We shall make no attempt to give an outline of her career, or to pourtray her many virtues and accomplishments. It is enough for us to say that when after an absence of nearly thirty-four years Dr. Judson returned to his native land, Miss Emily Chubbuck was a beautiful and accomplished woman, in the first flush of successful authorship, and (as we may add for the special information of our fairer readers) *under thirty years of age*. Cæsar's three celebrated words of self-glorification would fitly characterize Dr. Judson's wooing. He had won the devoted love (we write the word advisedly) of a woman of whose virtues it would be difficult to speak too highly. As a writer, judged by her best, (such as the poems entitled "My Bird," "Angel Charlie," and "My Angel Guide,") she may take high rank among American authoresses.

We must not pause on the account, interesting though it be, of the subsequent residence of Dr. Judson and the subject of this memoir at Maulmain and Rangoon. We refer our readers to the book itself, and we tell them that in our estimation it reflects the highest credit on all concerned in the publication.

THE QUARTERLY REVIEWS.

The quarterly reviews have reached us too late for notice in our present issue, but we may just direct attention to two papers in the number of the *Edinburgh Review* just issued, of special interest to our readers. The one is entitled "Japan and the Japanese," wherein the reviewer states his belief, in which we coincide, that our recent successes in China will *not* militate against our interests in Japan. The other paper to which we refer is on "Ocean Telegraphy," and contains a history of the wonderful Red Sea Cable.

Mr. Thornbury, who has just been visiting the northern and southern States of America, is about to commence a narrative of his travels in *All the Year Round*, which will give much new information on the slavery question. Mr. Reuter, so well known in connection with foreign telegraph reports, has offered to supply to the morning papers the Parliamentary reports at a cost of about one-third of the present outlay entailed, and the proposal, it is thought, will be accepted by most. The Conservative party intend to start forthwith a new penny weekly paper, as large as any of the existing weeklies. Mr. Cobden is about publishing an account of his recent trip to, and impressions of, France. Mr. Froude is to be the new editor of *Fraser's Magazine*. The numerous intrusions of shilling monthlies has induced the old half-crown publications to contemplate seriously the necessity of reducing their price. The *Leader*, weekly journal, which lately strove to imitate the style of the *Saturday Review*, has terminated its existence, having merged in Dr. Mackay's *London Review*. The *Review* is enlarged and increased to 4d. Messrs. W. H. Allen and Sons, the East India booksellers, are about removing their establishment westward, following in the wake of the East India House. Mr. Henry Bohn, a son of Mr. H. G. Bohn, has joined the firm of Messrs. Richard Griffin and Co., as a partner. Mr. Stiff, late of the *Weekly Times*, it is reported, will start a new penny daily paper, to be edited by Mr. Russell, of the *Scotsman*. Mr. William Fairburn, of Manchester, has a new work in the press on Iron. Messrs. A. and C. Black are preparing for publication an unpublished work of the late Hugh Miller. Mr. Hans Busk has become the editor of the *Volunteer Service Gazette*, which is to appear twice a week.

Mr. Murray announces the publication of several important works this month, including "Iceland," by Commander Forbes, R.N.; a "Life of Dr. Wilson," late Bishop of Calcutta, by the Rev. J. Bateman; a "Life of Pitt," by Earl Stanhope; a "History of the Invasion of the Crimea," by Mr. A. W. Kinglake, M.P.; and "The Great Sahara; Wanderings South of the Atlas Mountains," by H. B. Tristram, M.A. Capt. Forbes' "Personal Narrative of the Campaign of Garibaldi in the Two Sicilies" (W. Blackwood and Sons) is to be out this month; and a "Narrative of the Measures by which the Punjaub was saved and Delhi recovered during the Indian Mutiny," by the Rev. J. Cowen Browne, Chaplain of the Punjaub moveable column, is announced by the same firm. The works, large and small, new, and re-issued, during the year 1860, exceeded 5,000, being an advance of about 400 upon those of the previous year.

The life of Dr. Scoresby adds another interesting volume to our already extensive Library of Adventure in the Polar Regions.

Several works on descriptive geography have been published or are announced, but we must not pass without due notice one of the best, and a model of its kind, a "Pictorial Handbook of Modern Geography," by Mr. Henry G. Bohn. This is a most opportune book, in view of the numerous Continental and American territorial changes, for the work has been brought down by great labour and research to the present time in all that relates to area, division, population, and commerce of every State, and the latest Arctic and Antarctic discoveries are duly recorded. The tables, giving departmental divisions, chief towns, population, &c., are admirably compiled, and for accuracy, wherever we have tested them, are unequalled. The book contains an excellent and full index of places and subjects, and is illustrated by 150 engravings on wood, and 51 steel maps. We should like to have seen in such an excellent book more recent and creditable woodcuts; the maps, however, have been corrected down to the present time.

We have received the current number of Cassell's "Popular Natural History," "Illustrated History of England," and "Ladies' Treasury." The former treats of the ovine, caprine, and antelope tribes. There are some good illustrations of the ruffled mouful, angora, alpaca, &c. The "History of England," Part XII., is still confined to the reign of George III., and deals chiefly with the French Revolution. The "Ladies' Treasury" is, as usual, the best and cheapest of the monthlies intended for the female sex. The *New Monthly* for January (Chapman and Hall) contains an excellent article on the new colony of Central British America. The sixth yearly part of "The British Workman, and Friend of the Sons of Toil," a monthly periodical devoted to the interests of the industrial classes, is a creditable publication, both as regards text and illustrations.

Legal.

COURT OF DIVORCE.

SIRR v. SIRR (late of Hong Kong.)—Dr. Phillimore, Q.C., with whom was Mr. Field, conducted the petitioner's case. Mrs. Penelope Mary Goddard Sirr charged her husband, Henry Charles Sirr, with adultery, cruelty, and desertion, and prayed for a dissolution of marriage. The respondent, in his answer, denied all these charges, and charged the petitioner with treating him in a violent and insulting manner, and further stated that he was without the means of proceeding with his defence. The petitioner in her replication admitted that she had on some occasions behaved with violence, but alleged that it was when she was labouring under excitement caused by her husband's ill-usage. The respondent wa

Digitized by Google

not represented by counsel. Mrs. Sirr stated that in 1844 her husband was appointed Consul at Shanghai, and she went out with him to China. They lived at Hong Kong for about seven months. They then went to Ceylon, where Mr. Sirr was appointed Deputy Queen's-Advocate. They stayed there about 18 months, and returned to England in 1849. They lived in various parts of London until 1851, and then went to the Continent. Sometimes her husband was kind, but at other times he was very unkind and violent.* In November, 1857, they were living in the Rue de la Comedie at Ostend. On the 4th of that month he left the house, and she found the following letter under the street door, which he had locked when he went out:—"Mary, I have not seen the landlord. It is impossible for me longer to submit to the conduct you have chosen to adopt towards me. I have therefore left, and it is an irrevocable matter." He had never lived with her since that time. In 1858 she came to England, and had since lived with various friends. She was now staying at the house of a clergyman of the Church of England, at Kilburn. She had not received any letters nor any money from her husband, and had only spoken to him once. In answer to his Lordship the witness said that in April, 1858, she met her husband accidentally at the house of her nephew. She saw him, and entreated him not to force her into this court. He positively refused to alter his course of conduct. Before his departure from Ostend she had complained very much of their prolonged and enforced residence on the Continent, and of their removal from any place where they were staying as soon as they made any acquaintances there. He replied by accusing her of being fanciful and fastidious. There was no violence on either side. She had about £300 a-year, which was settled to her separate use at the time of the marriage. A number of short notes were read, bearing different dates in 1854, 1855, and 1856, signed by the respondent and addressed to the petitioner. In them he asked forgiveness for various acts of violence of which he admitted that he had been guilty, and promised to try and control his temper for the future. Mr. Ellis, a tailor in the Marylebone-road, proved that in December, 1858, Mr. Sirr went to lodge at his house, and that in the following June a young woman took up her residence with him, and they lived together until they left in September, 1859. Mrs. Dent proved that the respondent and the same woman had occupied lodgings in her house, near Euston-square, since September, 1859. His Lordship thought there was sufficient evidence of desertion to justify him, coupling it with the evidence of adultery, in granting a decree.—Decree *nisi*, with costs.—[* Had evidence been taken on this point from residents in Hong Kong, during the stay there of Mr. and Mrs. Sirr, it would have no doubt altered the decision of the Judge as to who was blessed with the most violent temper.—ED.]

CHANGES AND PROMOTIONS IN HER MAJESTY'S ARMY AND NAVY.

WAR-OFFICE, JAN. 15.

23rd Regiment of Foot—Lieut.-Gen. Sir William J. Codrington, K.C.B., from the 54th Regiment, to be col., vice Lieut.-Gen. Henry Rainey, C.B., deceased.

54th Regiment of Foot—Lieut.-Gen. Mildmay Fane, from the 96th Regiment, to be col., vice Lieut.-Gen. Sir W. J. Codrington, K.C.B., removed to the 23rd Regiment.

96th Regiment of Foot—Major-Gen. George Macdonald, to be col., vice Lieut.-Gen. Fane, removed to the 54th Regiment.

1st Regiment of Dragoons—George Allen Butlin, gent., to be cornet, by purchase, vice Twentyman, promoted.

6th Dragoons—Ensign St. Aubyn Henry Player, from the 23rd Foot, to be cornet, in succession to Lieut. the Hon. Edward Roden Bourke, promoted.

9th Light Dragoons—Lieut. Edward Barrett Hodges Curteis, from the 96th Foot, to be lieut., vice William Naper Carleton, who exchanges.

Grenadier Guards—Lieut. and Capt. Henry William Verschoyle, to be capt. and lieut.-col., by purchase, vice Henry Edward Montressor, who retires; Ensign and Lieut. Alfred Molyneux Byng, to be lieut. and capt., by purchase, vice Verschoyle; Alexander Louis Ricardo, gent., to be ensign and lieut., by purchase, vice Byng.

1st Regiment of Foot—Gentleman Cadet Frederick de Lamare Morison, from the Royal Military College, to be ensign, without purchase, in succession to Lieut. Richard John Palliser, deceased.

3rd Foot—Gentleman Cadet Edward Charlton Dickson, from the Royal Military College, to be ensign, without purchase, vice Hearn, promoted.

4th Foot—Capt. Augustus Nicholas Wilson, from the 86th Foot, to be capt., vice William Fagan, who exchanges.

6th Foot—Gentleman Cadet Horace Richard Le Marchant Carey, from the Royal Military College, to be ensign, without purchase, vice Saunders, promoted.

8th Foot—Lieut. Reginald Whitting, to be capt., by purchase, vice Newall, who retires; Ensign Richard Chute, to be lieut., by purchase, vice Whitting.

10th Foot—Lieut. John Ball to be capt., by purchase, vice Douglas Ernest Manners, who retires; Ensign Abraham Richard Montfort to be Lieut., by purchase, vice Ball.

11th Foot—Ensign William Joseph Tibbs to be lieut., without purchase, vice William Norman, superseded for being absent without leave; Gentleman Cadet James John Peter, from the Royal Military College, to be ensign, without purchase, vice Tibbs.

17th Foot—Major and Brevet Lieut.-Col. William Gordon to be lieut.-col., by purchase, vice Brevet-Col. Arthur Lowry Cole, who retires upon half-pay; Major Honeyman Mackay, from half-pay Unattached, to be major, repaying the difference, vice Gordon; Capt. and Brevet-Major George Tito Brice to be major, by purchase, vice Mackay, who retires; Lieut. William Henry Parker to be capt., by purchase, vice Brice; Ensign Herbert Kerr to be lieut., by purchase, vice Parker; Ensign Harvey Lambart Manning Ravenhill, from the 70th Foot, to be ensign, vice Kerr.

19th Foot—Capt. William M'Gregor Archer, from the 78th Foot, to be capt., vice George Forbes, who exchanges.

23rd Foot—Gentleman Cadet George William Adolphus Fitz George, from the Royal Military College, to be ensign, by purchase, vice Player, appointed to the 6th Dragoons.

32nd Foot—Lieut. Francis Arthur Thomas, from half-pay 85th Foot, to be lieut., vice Henry Mant Gilby, who retires upon half-pay; Lieut. Randle Jackson, from the 77th Foot, to be Lieut., vice Arthur Bishop, who exchanges.

40th Foot—Andrew Ducrow, gent., to be ensign, by purchase, vice Henry Swanson, appointed to the 14th Foot.

53rd Foot—Capt. Gustavus Lambert Basset, from the 72nd Foot, to be capt., vice John Maxwell Macneill, who exchanges.

54th Foot—Staff Assist. Surg. Thomas Wood, M.D., to be assist.-surg., vice Youell, appointed to the Staff.

60th Foot—Lieut. Burnet Bell Forsyth to be capt., by purchase, vice Richard Harcourt Robinson, promoted, by purchase, to an unattached majority; Ensign Charles Gosling to be lieut., by purchase, vice Forsyth.

72nd Foot—Capt. John Maxwell Macneill, from the 53rd Foot, to be capt., vice Gustavus Lambert Basset, who exchanges.

77th Foot—Lieut. Arthur Bishop, from the 32nd Foot, to be lieut., vice Randle Jackson, who exchanges.

78th Foot—Capt. George Forbes, from the 19th Foot, to be capt., vice William M'Gregor Archer, who exchanges.

86th Foot—Capt. William Fagan, from the 4th Foot, to be capt., vice Augustus Nicholas Wilson, who exchanges.

89th Foot—Duncan Campbell, gent., to be ensign, by purchase, vice Urquhart, appointed to the 72nd Foot.

94th Foot—Ensign William Edward Montague, from the 2nd Foot, to be ensign, vice James Brown, promoted.

96th Foot—Lieut. William Naper Carleton, from the 9th Light Dragoons, to be lieut., vice Edward Barrett Hodges Curteis, who exchanges.

Rifle Brigade—The surname of the gentleman appointed to an ensigncy, by purchase, on the 28th of December, 1860, is Tufnell, and not "Tuffnell," as stated in the *Gazette* of that date.

2nd West India Regiment—Lieut. Francis Adam Knapp to be capt., by purchase, vice Davidson, who retires; Ensign Andrew Truelove Edge to be lieut., by purchase, vice Knapp.

UNATTACHED.—Capt. Richard Harcourt Robinson, from the 69th Foot, to be major, by purchase.

COMMISSARIAT DEPARTMENT.—Acting Deputy-Assist.-Commissary General Foster Shortt, having completed the prescribed period of service on the Coast of Africa, to be confirmed in the rank of Deputy-Assist.-Commissary-General.

BREVET.—Major Honeyman Mackay, 17th Foot, to be lieut.-col. in the army. Brevet-Lieut.-Col. Honeyman Mackay, 17th Foot, to be col. in the army. Quartermaster-Sergeant Francis Burke, late of the 15th Hussars, to have the local rank of Quartermaster, while acting as Firemaster at Aldershott.

The following promotions and alteration of date to take place in her Majesty's Indian Military Forces, consequent on the deaths of Major-Gen. Alexander Woodburn, C.B., Bombay Infantry, on the 28th of Sept., 1860; Major-Gen. Thomas David Carpenter, Madras Infantry, on the 17th of October, 1860; Major-Gen. Edward Pettingal, Bengal Infantry, on the 7th of Nov., 1860; and Lieut.-Gen. John Henry, Madras Infantry, on the 17th of December, 1860:—Major-Gen. Robert Blackall, Bengal Infantry, to be lieut.-gen. Major-Gen. Clement Clemons, Madras Infantry, to date the 29th of Sept., 1860, instead of the 7th of October. Col. Charles Haldane, Bengal Infantry, to be major-gen. Col. Alexander Henry Edmonstone Boileau, Bengal Engineers, to be major-gen. Col. Frederick Brooke Corfield, Bengal Infantry, to be major-gen. Col. Edward Green, C.B., Bombay Infantry, to be major-gen.

MEMORANDUM.—Brevet Lieut.-Col. G. B. T. Colman, upon half-pay, as major, unattached, has been permitted to retire from the service, by the sale of his commission, he being about to become a settler in Canada.

WAR OFFICE, JAN. 18.

6th Regiment of Dragoons—William Thomas Skinner Snell, gent., to be cornet, by purchase, vice Davies, promoted.

11th Light Dragoons—Lieut.-Col. and Brevet-Col. Charles Augustus Arney, from half-pay unattached, to be lieut.-col., vice Broadley Harrison, who retires upon half-pay; Major Charles Crawford Fraser to be lieut.-col., by purchase, vice Brevet-Col. Arney, who retires; Captain Arthur Lyttleton Annesley to be major, by purchase, vice Fraser; Lieut. George Coke Robinson to be capt., by purchase, vice Annesley; Cornet James Gideon Pott to be Lieut., by purchase, vice Robinson; Cornet Charles Francis Arnold Howard, from the 16th Light Dragoons, to be cornet, vice Pott.

Grenadier Guards—Lieut. and Capt. Frederick Thomas Arthur Hervey Bathurst to be capt. and lieut.-col., by purchase, vice James Frederick Dudley Crichton Stuart, who retires; Ensign and Lieut. William Robert Gamul Farmer to be lieut. and capt., by purchase, vice Bathurst; Charles Edward Henry Stanley, gent., to be ensign and lieut., by purchase, vice Farmer.

2nd Regiment of Foot—Charles Fairbanks Lawson, gent., to be ensign, by purchase, vice Kelly, promoted.

5th Foot—Ensign William Douglas Legge, to be lieut., by purchase, vice Edward Studley Lewis, who retires.

12th Foot—Capt. William Cooke O'Shaughnessy, from the 2nd West India Regiment, to be capt., vice Arnold More Knight, who retires upon half-pay.

16th Foot—Gentleman Cadet Henry John Cholmeley, from the Royal Military College, to be ensign, without purchase, in succession to Lieut. Carter, promoted.

18th Foot—Gentleman Cadet Bernard Gilpin Haines, from the Royal Military College, to be ensign, without purchase, vice Minnit, promoted.

22nd Foot—Ensign Frederick William Best Parry, to be lieut., by purchase, vice Alfred George Drake Pocock, who retires.

25th Foot—Ensign Horace William Scriven, to be lieut., by purchase, vice Samuel Roden Handy, who retires.

38th Foot—Gentleman Cadet Lionel William Lee, from the Royal Military College, to be ensign without purchase.

49th Foot—Lieut. Ernest C. Wilford, from the Royal Canadian Rifle Regiment, to be lieut., vice John Thomas Lyon Cobham, who exchanges.

Digitized by Google

53rd Foot—Staff-Surg. George Pain to be surgeon, vice James S. Grant, M.D., deceased.

55th Foot—Lieut. Osborne Samuel Delano-Osborne to be adjutant, vice Lieut. Thomas Dunn, who resigns that appointment; Lieut. Thomas Dunn to be instructor of Musketry, vice Lieut. George Hyde Harrison, who resigns that appointment.

70th Foot—Gentleman Cadet Charles Ryland Tylden, from the Royal Military College, to be ensign without purchase, vice Prior, promoted.

Rifle Brigade—Ensign the Hon. Frederick Noel Somerville to be lieut.s by purchase, vice John William Russell, who retires; Arthur Hill Sandy, Montgomery, gent., to be ensign, by purchase, vice the Hon. Frederick Noel Somerville.

2nd West India Regiment—Lieut. Edgar Gardner, from 2nd Royal Cheshire Militia, to be ensign, by purchase, vice Edge, promoted.

3rd West India Regiment—Ensign William Worsley Worswick, from the 23rd Foot, to be lieut., by purchase, vice Alfred Augustus Richardson, who retires.

Royal Canadian Rifle Rigiment—Lieut. John Thomas Lyon Cobham, from the 49th Foot, to be lieut., vice Ernest C. Wilford, who exchanges,

Royal Malta Fencible Regiment—Lieut. Filippo Eynaud to be capt. (with local and temporary rank), vice Giuseppe Gouder, deceased; Ensign Michael Portelli to be lieut. (with local and temporary rank), vice Eynaud; Walter Sciortino, gent., to be ensign (with local and temporary rank), vice Portelli.

BREVET.—Lieut.-Col. Arthur James Herbert, Unattached Deputy-Quartermaster-General, Ionian Islands, having on the 16th of Jan., 1861, completed the qualifying service for the rank of colonel, under the 8th and 10th clauses of the Royal Warrant of the 14th of Oct., 1858, to be colonel in the Army. Paymaster Henry Ingram, 63rd Foot, to have the honorary rank of captain, under the Royal Warrant of the 27th of Jan., 1860.

WAR-OFFICE, JAN. 22.

Royal Regiment of Artillery.—Second Captain T. H. Pitt, from the supernumerary list, to be second captain, vice Brabazon, deceased; Lieutenant C. D. Gilmour to be second captain, vice Noble, who resigns. The undermentioned gentlemen cadets, from the Royal Indian Military College at Addiscombe, to be lieutenants:—A. E. Turner, J. F. Brough, C. W. Long, E. Stedman, H. F. Gairnes, H. H. Hardinge, A. N. Pearse, C. H. Spragge, W. J. R. Harrison, W. H. Hallett.

Corps of Royal Engineers.—The undermentioned gentlemen cadets, from the Royal Indian Military College at Addiscombe, to be lieutenants with temporary rank, viz.:—K. C. Pye, R. R. E. Brockman, A. A. Jopp, R. J. M'Clure, W. A. J. Wallace, and B. Bloo l.

NAVY.

APPOINTMENTS.

LIEUTENANTS,—Herbert C. A. Brand to the Edinburgh; R. G. S. Pasley (additional) to the Narcissus; E. H. B. Hartwell to the Trident.

PAYMASTERS.—Arthur Price is advanced to the second-class; Charles Saunders is advanced to the third-class; John B. Swann (additional) to the Colossus; Edmund B. Walker (additional) to the Indus.

MASTERS.—Roger M. Curry to the Trident; John H. Tully to the Cumberland, for the Chameleon.

SECRETARY.—Paymaster Edward Foster to be Secretary to Rear-Admiral Talbot, vice Cleeve, appointed Steward of Greenwich Hospital.

SURGEONS.—William J. Baird (additional) to the Victory; Josh. Sloss to the Intrepid.

ASSISTANT-SURGEONS.—William G. Hill to the Excellent; James Hunter to the Illustrious.

MASTER'S ASSISTANT.—Francis Darbishire to the Geyser; H. Stoate to the Immortalite.

ASSISTANT-PAYMASTERS.—John A. Starling to the Aboukir; Henry H. P. Shanks to the Impregnable as supernumerary.

CHIEF-ENGINEERS.—Alexander William Buist to the Trident; George K. Keeton to the Cumberland, for service in the Goliath; Thomas Anderson to the Indus, for charge of the Royal Albert; John M. Ellis to the Indus, for charge of the machinery of the Satellite.

ASSISTANT-ENGINEER SECOND-CLASS.—Robert Hodge to the Cornwallis, for service in the Sandfly; Henry Thornton to the Trident; George Blundel to the Excellent, for service in the Stork; James G. Hill to the Russell, for service in the Hind; Richard E. Denison to the Indus, for charge of the machinery of the Porpoise; Edwin Pearce to the Asia, for the Snapper. Third Class: James A. France to the Trident; A. Purvis to the Bulldog; E. L. Williams to the Indus, as supernumerary for hospital treatment; J. W. Bishton to the Spiteful.

ACTING ASSISTANT-ENGINEERS.—Third Class: Thomas Hatton and A. N. Miller to the Trident; Robert Goodwin to the Asia, as supernumerary; Thomes Hunter to the Indus, for service in the Avon; William Moore to the Cumberland, for service in the Adder. A. Redward to the Asia, for service in the Fire Queen.

THE ROYAL MILITARY COLLEGE, SANDHURST.

The following is the official list of successful candidates for admission to the Royal Military College, Sandhurst, December, 1860:—

James, Alfred; Brownrig, Henry Studholme; Fowler, William Merrick; Moore, Henry Bennett; Teed, John Charles; Adams, Henry Edward; Cochran, Francis; Sartorius, Euston Henry; Parker, Charles E.; Gunter, Howell; Hyde, John Edward; Bailie, Thomas Maubourg; Chalmer, Reginald; Rosser, Richard Henry; Penton, Charles Thomas Wren; Jardine, Manfred Leslie Palmes; Peyton, Thomas Lowless; Braddon, Edward; Humfrey, Thomas Blake; Croft, Henry Jenkins; D'Acosta, Frederick Augustus Samuel; Humfrey, Benjamin George; Orred, George Stanley; Pelly, Henry Carstairs; De Vismes, Henry J. H.; Claremont, George William Frederick Stopford; Church, Henry; Beattie, William Lowther; Bailey, Thomas James; Oliver, Groome; Forbes, Gordon Willoughby; Saunders, Harlovèn Morley; Parkinson, Frederick Fenton; Bridge, Walter; Lofthouse, Thomas Robinson; Cockburn, George Charles; Rynd, William Wolfe; Jackson, John Charles; Seagram, John Henry Stawell; Lowry, George P.; Daubeny, Albert John Heskett; Gordon, Henry.

THE NEW VICE-CONSUL AT WHAMPOA.—After a long and most useful career in the Consulate at Shanghai, as evidenced in the reports of the respective consuls at that settlement, Mr. W. H. Fittock, who proceeds by this mail, has been made Vice-Consul at Whampoa, vice Hale, resigned. The duties of this office—which were for many years discharged by the far-famed Alexander Bird, now deceased—consist mainly in the adjudication of the disputes which arise between masters of merchant vessels and their crews, and although we doubt not that the new incumbent will efficiently discharge those duties, we do think that it would have been more in unison with his past services, and more to the public good, to have appointed him to one of the Northern consulates. We may add, also, that it would have been a more fitting acknowledgment of the efficient manner in which he has discharged his duties hitherto. We find his services thus recorded:—Assistant in the Audit and Council offices at Hong Kong in 1844; Clerk to the Marine Magistrate, from 1845 to 1847; Acting Assistant in the Diplomatic Department in 1848; appointed 4th Assistant in the Superintendency, June 4, 1849; Acting 2nd Assistant in the Consulate at Shanghai, January, 1850; 2nd Assistant in 1851; Acting 1st Assistant and Packet Agent, June, 1853, and 1st Assistant, September 8, 1854, the duties of which post he discharged until his late visit to this country on sick certificate. Considering the slight comparative claims which Mr. G. W. Caine, the Consul at Swatow, could boast of, it is no wonder that old servants get disgusted with the service with such flagrant evidences of kissing going by favours. Mr. Caine is the son of Colonel Caine, late Lieutenant-Governor of Hong Kong, and the service *he* has rendered to his country in that capacity is evidently better appreciated at the Foreign Office than in Hong Kong. Mr. W. H. Fittock is the son of Captain Fittock, R.N., who has been much engaged in all our operations in China, from the first war, when he commanded the troop ship *Sapphire*, up to the Canton war of 1856-58, for which he was specially selected by the Admiralty as Superintendent of the transport service, and right sure are we that "not even the semblance of a job" was ever attributed to him. The services of Mr. G. W. Caine are as follows:—Acting Clerk in the Treasury at Hong Kong, 1850; 3rd Clerk in the Colonial Secretary's Office, 1851; 3rd Assistant in the Superintendency of Trade, 1852; 2nd Assistant in the Consulate at Shanghai, 1854; acted for some time as 1st and 2nd Assistant in the Superintendency of Trade, and as Secretary to Sir J. Bowring in 1854, and accompanied him to the Peiho; proceeded to Siam with Sir J. Bowring in 1855; was Acting Secretary to the Superintendency in 1855, 1856, 1857, 1858; was promoted to be 1st Assistant at Amoy, 1856; was appointed 1st Assistant and Keeper of Records and Acting Secretary and Registrar in the Superintendency, 1858; and Consul at Swatow, 1858.

VIEWS OF JAPAN.—Some time since we noticed the photographic views of Canton, Hong Kong, and its vicinity, produced by the artist of Messrs. Negretti and Zambra, of Hatton Garden. We have now the pleasure to notice a set of views just produced by this firm on Japan. It is, perhaps, rather ungracious of us to find fault as a start-off, but it being the first thing which attracted our attention on perusing them, we must give it priority; that is, that Yedo is spelt Jeda. This somewhat mars the beauty of the pictures, which are in other respects well executed, and the public have little idea of the great expense and anxiety attending the safe and correct production of these scenes in the Far East. When the artist, after infinite labour, has bestowed all the care possible on the packing of this delicate parcel, the careless hand of some custom-house officer, or a thousand and one other chances in its transit overland, will destroy all the virtue of his productions. The public are much indebted to this enterprising firm for prosecuting this most useful invention of the day, and in undertaking such great risks in despatching artists to such far-off scenes. Their powers of endurance and persevering qualities must be great to contend against all the difficulties. It would be an interesting narrative were they to publish the letters of their artists, detailing their difficulties and obstacles presented by climate, accidents to apparatus while travelling, &c. Their efforts to operate without some portions of their apparatus so injured, most truly suggests the old-fashioned adage, that "necessity is the mother of invention." The views under notice, which present at once the costume, manners, customs, and buildings of the last Oriental nation opened to our trade and enterprise, consist of the following: Panorama of Yedo, Groups of Japanese officers, Cemetery of the Nobles and Princes at Yedo, The Emperor's Temple, Small Temple, Great Bell, Gardens of Patoan, Japanese Workmen, General View of Kanagawa, Port of Kanagawa, View of Town and Bay, View in the Vicinity, &c. &c.

POSTAGE TO THE EAST INDIES AND CHINA.—This *Gazette* contains a Treasury warrant, to come into operation on the 1st of February, which directs that if any letter shall be posted in the United Kingdom addressed to the East Indies, or shall be posted in the East Indies addressed to the United Kingdom, without any postage having been paid thereon, or having thereon or affixed thereto a postage stamp or stamps, the value of which shall be less in amount than the rate of postage to which such letter would be liable under the regulations in force relating thereto, every such letter shall be forwarded charged with the amount of the postage to which it would have been liable if the postage had been paid when posted, together with the further and additional rate of postage of sixpence. The term "East Indies" used in this warrant shall be construed to mean every port or place in her Majesty's dominions, in Asia, (China, Hong Kong, Ceylon, the Mauritius, Java, Borneo, and Australia excepted), and the several other terms and expressions used in this warrant shall be construed to have the like meaning in all respects as they would have had if inserted in the Act passed in the fourth year of the reign of her present Majesty.

THE Board of Trade have issued a notice that they have received specimens of Japan products and manufactures from the British consul at Kanagawa, which are open for the inspection of those interested. We have, however, made one or two fruitless efforts to see them, but trust we shall be more successful before the next mail leaves.

The transfer of the Straits settlements is still in *statu quo*. It is expected that some movement will be made in the matter before Parliament opens.

Prince Alfred embarked on the 16th inst., on board the *St. George*, which left at 4 P.M., under sail and steam for the North American station.

The following shows the intended departures of mails, by the P. and O. Co.'s steamer, &c. From Shanghai, Foo-chow-foo, Amoy, and Manila, the mails are despatched from four to seven days before the date of departure from Hong Kong. The mails from Java, Siam, and Borneo are despatched *via* Singapore, and the mails from the latter place leave from six to eight days later than Hong Kong. The departures from Hong for the ensuing year will be :—

Feb. 15 and 27 ..	June 5 and 22 ..	Oct. 13 and 29
March 15 and 30 ..	July 5 and 22 ..	Nov. 15 and 28
April 13 and 23 ..	Aug. 10 and 24 ..	Dec. 15 and 30
May 5 and 22 ..	Sept. 12 and 28	

Arriving in London, *via* Marseilles on the 12th to 15th, and 26th to 29th of each month, and *via* Southampton five days later.

In addition to the above there are ten steam transport vessels mostly belonging to the Indian navy, and 130 chartered sailing vessels for transport purposes. The Feroze, which has been placed at the disposal of Lord Elgin and suite, also belongs to the Indian navy. The P. and O. str. Granada is under the orders of Sir Hope Grant.

MERCHANT STEAMERS IN CHINA WATERS.—Engaged in the Canton, Hong Kong, and Macao traffic.—British: Fei Ma, Sir J. Jeejeebhoy, Iron Prince, Mee Lee, Zingari. American: Pak Wan, Willamette, Cumfa, Spark. Portuguese: Inveigado, Shamrock.

ENGAGED IN THE COAST TRAFFIC BETWEEN SWATOW, AMOY FOO CHOW, AND SHANGHAI.—British: P. & O.'s steamers, Chusan, Formosa, and Rajah; Messrs. Jardine, Matheson, & Co., Hellespont; Messrs. Dent and Co., Yangtzse; Mr. Lapraik's Undine.

RUSSIAN CONVENTION WITH CHINA.—The *Nord* publishes the following telegram:—St. Petersburg, January 9. General Ignatieff and Prince Kung signed and ratified at Peking, on the 14th of November, an additional convention of the Treaty of Tien-tsin. This convention confirms the demarcation agreed upon as regards the right of traffic along the Amoor and the Oussouri. Trade is free across the new frontier. Russian traders may go to Peking. Russian consuls and factories will be established at Kashgar and Ourga. There will be a monthly mail between Kiahkta and Peking. This convention will be found in another column, and besides the boundaries laid down there is nothing of consequence not previously obtained in their Treaty at Tien-tsin, which we published last August.

The court-martial on board the *Victory*, at Portsmouth, to try Captain Richard Moorman, of her Majesty's ship *Cossack*, brought its investigation to a close. The *Cossack* was ordered home from the West Indies on account of certain occurrences during the visit of the Prince of Wales to Canada. Three distinct charges were brought against the prisoner by Isaac Smith, musician of the ship, amounting to cruelty and unofficerlike behaviour. Capt. Moorman was honourably acquitted.

ON the 23rd, a most satisfactory trial trip took place on the Thames of a very peculiarly constructed steamer, intended for the conveyance of troops upon the Lower Indus.

Monetary and Commercial.

The annual meetings of the principal joint-stock banks have been held since our last, and they all show a very prosperous course of business. The old-established ones, especially, continue to pay large dividends to their shareholders, a proof of the successful operations of banking business during the past year. At the London Joint-Stock Bank meeting a dividend was declared at the rate of 12½ per cent. per annum, free of Income-tax. The report stated that the profits had also been more than enough to write off the large sum of £60,000 incurred by the losses by Streatfeild and Co., and other firms in the leather trade.

At the meeting of the London and Westminster Bank a dividend and bonus were declared at the rate of 10 per cent. for the half-year, free of Income-tax, making a total division of 20 per cent. for 1860, against 18 per cent. in 1859. It was stated that the deposits show an increase of about £1,300,000 over the previous year, and of about half a million over the first six months of 1860. The high rates of interest have thus been attended by an augmented accumulation of capital which the bank have been enabled to employ safely and profitably. The amount reserved to meet the deficiency by the failures in the leather trade, £10,000, had been found more than ample, the total loss by this gross and reckless abuse of credit being little more than £5,000. The loss had not arisen by directly discounting for Streatfeild's, but through some of the bank's customers in the borough.

The Union Bank of London has declared a dividend of 12s. on its £12 shares, clear of Income-tax, for the half-year, carrying over a balance of undivided profit of £30,471.

The Bank of London has paid a dividend at the rate of 5 per cent. per annum, free of Income-tax, and writing off in all £12,674 for the losses by the failures in the leather trade, £4,000 had been added to the reserve fund, making it £31,000.

The Commercial Bank of London has declared a dividend at the rate of 8 per cent. per annum, and a balance of £517 carried forward. The City Bank declares a dividend at the rate of 6 per cent., carrying forward £625. The Union Bank of Australia, 6 per cent. The English, Scottish, and Australian Chartered Bank also 6 per cent.

The subject of deck-laden vessels has been freely discussed of late, in consequence of another loss having occurred. The fine steamer *Prince Alfred*, running between London and Scotland, was lost on the 17th inst., owing mainly to having a deck load. It is supposed that the underwriters at Lloyd's will establish a custom against paying losses so incurred. As vessels in the China and Straits trade carry deck loads, we warn shipowners in time.

The dollars brought by the last Mexican steamer have been sold at 60¼d. per oz., being a decline of 1½d. from the price realised for the previous arrival. This heavy fall is owing to the high rate of money here, and the low exchange in China.

The specie shipment, per steamer *Ceylon*, on 20th instant, were as follows:—For Shanghai, in silver, £6,530; for Hong Kong, £23,814; for Singapore, £57,575, and £3,000 in gold; for Penang, £384; for Calcutta, £72,460; for Madras, £8,021, and £18,232 in gold; for Mauritius, £25,000 in gold on Government account; for Alexandria, £300.

THE SUPPLY OF COTTON AND BORNEO.

The prospects of a civil war in America have caused a rise in the price of all descriptions of cotton; and, what is more important, the future supply is now a matter anxiously discussed by our Lancashire spinners. Lord John Russell has proposed to the Manchester Chamber of Commerce to place the services of H.M.'s consuls in all parts of the world at the disposal of any associations taking steps to promote the growth of this staple. In his letter he states that the course is an unusual one, but he considers the importance of the case demands it at his hands. Instructions by this mail will be sent to India to increase the growth there. Now is the time for those interested in Borneo to show what can be done there, and it may lead to a protectorate being granted by the British Government to Sarawak. It would be well if the Government instructed Lord Elgin, or if he took it on himself, to call there and at Labuan, to ascertain the causes which led to the interference of Governor Edwards in the affairs of Sarawak, and in other respects gain information for our Government of that settlement, and Borneo in general.

THE MALTA AND ALEXANDRIA CABLE.

The portion of this cable—which was originally intended to be laid between Rangoon and Singapore—wrecked on board the steamer *Queen Victoria*, has all been landed at the Dockyards in Plymouth, and the vessel, it is expected, will be afloat to-morrow. Nothing is definitely settled at present as to the time of despatching this cable, but the earliest period will be May. A court of inquiry has been held on the grounding of the *Queen Victoria*, but the decision has not yet been announced.

ARTICLES OF IMPORT.

TEA.—There has been an improved demand in our market during the past fortnight chiefly owing to the usual return of business at the opening of the year. The trade, being light in stock, have been anxious to select from the large quantity offering both privately and at public auction. Prices for most kinds show but little change from those quoted in our last circular, though the sales made have been at rather irregular prices for Kaisows and moning kinds, whilst fancy teas and scented teas have been difficult of sale in the absence of demand. Low Congous have sold to some extent at from 9d. to 10d. per lb.; latterly they have ruled rather higher, but some considerable quantities are to be sold without reserve at to-day's auction. Fair to good common have been in a very limited request, and prices remain nominally 1s. 1d. at 1s. 1½d. per lb. Fair to good flavory kinds have sold freely at from 1s. 2d. to 1s. 6d. per lb., whilst good and fine Kaisows have also been taken eagerly, prices, with occasional exceptions, ruling about the decline last quoted. Black leaf Congous have sold to a moderate extent, from 1s. 3½d. to 1s. 6d. per lb. for old seasons. In the New Moning, Wopak, and Honam kinds sales have been made at a further reduction, especially for the Tany kinds, without quality. Finest quoted, 1s. 10d. to 1s. 11d., at which one or two chops have been sold. Tayshans remain very difficult of sale. In Oolongs, Souchongs, and flowery Pekoes, business has been very trifling. Scented teas from Canton, with the exception of good and fine capers, for which there has been a moderate inquiry, have been difficult of sale. Foo-chow make have also been less saleable than before. Business in green teas continues moderate; the small quantity afloat makes holders firm, and prices show but little alteration. There has been rather a better demand for good and fine Hysons. The new Ping Sueys continue to find buyers in small quantities, at about the opening rates. Some Canton gunpowders have sold up to 1s. 5d. per lb. for good quality. There have been two public sales, on the 9th and 16th inst., comprising 67,500 packages, of which 3,000 packages were Assam, and 2,000 packages Japan teas. Of these the whole of the Assams sold at full prices, and some fine Japan, Pekoe Oolongs and scented teas at 1s. 9d. to 2s. per lb. Of China teas, 17,200 packages sold, 8,200 packages being offered without reserve. 28,260 packages are to be offered for sale to-day, 7,000 being without reserve.

SILK.—The transactions have been very trifling since last mail, and rates may be quoted at 2s. 6d. less.

SUGAR.—Extensive public sales have furnished a plentiful supply during the present week, but as the home trade have been more free buyers, the bulk has been cleared off without material change from the reduced rates quoted in our last. There are no sales of Manila or Siam to notice.

COFFEE.—An improved demand has been experienced for Colonial sorts, and the moderate quantity offered has been taken off at prices 6d. to 1s. per cwt. higher. In auction, 516 casks, 621 barrels and bags Plantation Ceylon went off readily at the above-noted improvement, fine ordinary to low middling 64s. 6d. to 68s. 6d., middling 69s. to 70s., good middling 76s. to 76s. 6d. Native also has found more ready buyers, and in the absence of public sales, about 100 casks and 1,000 bags have been sold by private contract at a corresponding advance, viz. small 61s. 6d., good ordinary to superior 62s. 6d. to 63s. 6d.

RICE.—Floating cargoes have been in request, and several have been sold at stiff prices to a slight advance, comprising together about 4,500 tons Nakrenzie Arracan, spring shipment at 11s. 6d., and December and January sailing at 11s. 7½d. to 11s. 9d., fully insured, but without any guarantee of quality; also 650 tons Ballam and Moonghy, for arrival, at 11s. ex ship; on the spot, however, the market has remained very quiet, and only small parcels have changed hands, at about previous rates.

PEPPER.—The business done has been confined to moderate quantities by private contract, at rather irregular prices; Singapore 3 13-16ths d. to 3 15-16ths d., and Penang at 3⅞d. to 3¼d.

SAGO.—900 boxes good fair pearl sold at auction at 18s. 6d. to 19s.; flour, 1,200 bags, at 17s. to 17s. 3d.

SPICES.—Cinnamon: quotations remain, first sort, 1s. 6d. to 2s. 2d.; second, 1s. 2d. to 1s. 8d. Sales are announced for the 28th inst. Cassia Lignea: sales at an advance of 2s. per cwt. Cassia Buds: sales at £9 to £9. 5s., market supplied. Cloves: 10 cases of Penang sold at 9d. to 1s. 4d. Mace: sales of Singapore and Batavia, at 1s. 10d.; for good pale; 9d. to 11d. for ordinary. Nutmegs: rates are fallen another 1d.; sales of Singapore, Penang, and Batavia, at 1s. 1d. to 1s. 9d. for middling to good medium.

HEMP.—Of 1,701 bales, at auction, about half sold at £22 to £26, for common to good roping.

COTTON.—The demand has been brisk, and above 10,000 bales have been sold at prices ⅛d. to ¼d. per lb. higher, viz. greater part Surat; ordinary Oomrawatta to good fair Broach, 4¾d. to 5⅛d., and Madras, middling to good fair Tinnivelli, 4⅛d. to 6d.

JAPAN WAX.—No sales, and quotations nominal.

TOBACCO.—No stock or sales of Manila to report.

TIN.—Transactions small. Quotations, Banca, 127s. to 128s.; Straits, 123s. to 134s.; Antimony ore, £16. 2s. 6d.

GAMBIER.—500 bales at auction sold at 16s. 3d. to 16s. 9d., and 1,700 small bags at 17s. 6d. to 18s. for fine. CUTCH. Of 9,000 bags at auction, about ½ sold at 23s. to 24s.

MISCELLANEOUS.—India rubber: Transactions have been on a moderate scale, at 1s. 5d. to 1s. 6d. Camphor: Market firm, and small sales at 175s. Sapanwood: No sales. Soy: Sales at 3s. to 3s. 3d. Rhubarb: No sales, 160 boxes at auction all retired. Mother-o'-pearl shells: Sales of Singapore, at 147s. 6d. to 150s. Star anniseed: No auctions. Sticklac: Market firm; 100 cases of Siam retired at 105s. Gum Benjamin: Of 77 cases at auction nearly all sold at £5. 5s. to £6. 17s. 6d. for ordinary middling. Gambouge: Of 21 cases at auction, one case sold at 48s. Damar: Of 272 boxes at auction, one-fourth sold at 37s. to 38s. 6d. Rattans: Of 60,000 bundles of Singapore and Penang, about two-thirds sold at 2s. 7d. to 5s. per 100. Elephant's teeth: Quotations nominal; no sales. Vermillion: Of 100 boxes at auction, half sold at 2s. 9d. Galangal root: Quotations, 26s. to 30s., with upward tendency. Cubebs: Importations have caused a decline; of 400 bags at auction, a few only sold, at £7. 10s. to £8. 10s. Dragon's blood: Market dull: 12 cases at auction all retired. Japan galls: a decline of 3s. to 4s.; of 1,500 packages at auction, nearly all sold at 31s. to 41s. for middling, and 45s. to 46s. for fine bold sifted. Rum: No sales.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s. to £6. 15s.; nail rods, £7. 5s. to £8; hoops, £9 to £9. 10s.; sheets, single, £9. 10s. to £10; Staffordshire bars, £8 to £8. 10s.; rails, £5. 10s. to £7.

STEEL.—Swedish keg, £17. 10s. to £18.

COPPER.—Sheet and sheathing, 11½d.; yellow metal, 9¼d.

TIN.—132s. for block; 133s. for bar. Tin plates, best charcoal, I.C., 30s. to 31s. per box.

LEAD.—English pig, £21. 5s. to £22. 10s.; shot, patent, £24. 10s.; sheet, £22. 2s. 6d. to £22. 5s.; spelter, £18. 15s. to £19; zinc, English sheet, £24; quicksilver, £7 per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from England during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£74,363
Foo-Chow-Foo	—	—

MANCHESTER MARKETS.

In yarns we have had a steady market, but nothing doing for any quarter. Prices are partly kept up by the continued increase of cost for cotton, and partly by the contracts still running in the hands of spinners. We have a much quieter market for cloth, and where there is any change in prices it is in favour of the buyer—say to the extent, in some cases, of 1¼d. per piece. This remark applies to all goods suitable for India, and printing-cloths, T-cloths, and long-cloths; in fact, to the bulk of production. Letters are to hand from India to the 15th of December, and a telegram from Calcutta to the 26th bringing worse accounts than the letters. Altogether, it is the gloomiest market we have had for some times. Messrs. John Slagg and Co. report:—"The market to-day is very inanimate. The difference between buyers and sellers is, if anything, wider than last week. The former, owing to the state of the money-market, and the discouraging accounts from many important markets, are less disposed to operate; while the hardening tendency of cotton and yarns causes producers to hold firmly for the late advance. The business of the day is consequently insignificant in amount." The report of Mr. Sammendel says:—"To-day we have a very dull market, both yarns and goods; but, in face of he high value of cotton, prices remain nominally without lteration."

THE TRADE OF CANTON.

WE noticed recently in detail the foreign commerce of the port of Shanghai, and we now proceed to give a *resume* of that of Canton. This investigation is interesting because of the many disturbances which have affected the trade there, and it shows that notwithstanding all these, the commerce of the port is rapidly extending. The Foreign Inspectorate of Chinese Customs is of great service in enabling us to arrive at authentic data respecting the trade and its character, while it furnishes revenue to the State there without fraud or misappropriation. We are indebted to the *Friend of China* for an abstract of the trade returns as published by the foreign inspectors. It is curious to compare this return with that of the trade for 1855, the year immediately preceding the lorcha war just ended. The total amount of tonnage arrived at Canton in 1855 was 180,328 tons, and 895 vessels. In the first half of 1860 the tonnage entered was only 48,526 tons. In 1855 the tonnage dues paid on British vessels for the year was 12,043 taels, and the import and export duties 250,497 taels, against 11,295 and 277,408 taels for the half-year of 1860, a proportionate increase of fully 100 per cent. The number of British vessels, however, frequenting this port has decreased. In 1855, 181 entered, of 71,690 tons, exclusive of steamers and small craft. In the half-year of 1860, not including river steamers and lorchas, 42 entered with imports, and 32 cleared, of about 24,000 total tonnage.

In British imports into Canton we find that in 1855, of the great staple cotton, there were imported 103,128 piculs, while in the half of 1860 there were 155,733. Of cotton yarn in 1855 there were 1,276 piculs; in the half of 1860, 327 piculs. Of iron in 1855 there were 1,200 piculs imported; in the half of 1860, 4,560 piculs. In lead the dealings appear to have been smaller, viz., 585 piculs only for the half year, against 6,392 piculs in 1855. Of rice in 1855, 431,688 piculs were imported: during the first half of 1860 the import but was 82,275 piculs.

In the exports from this port, the only items deserving of prominent notice are tea and silk; and it is remarkable that, while in 1855 the quantity of tea shipped in 181 British vessels which paid duty, as registered at the British consulate, was 82,138 piculs; in the first half of 1860, (and that, be it remembered, not the tea season period,) the quantity shipped in 32 British vessels was 56,382 piculs, a difference which, if continued to the close of the year, would show an increase of 25 per cent. over the shipments of 1855. The largest proportion of tea for export is, however, now drawn to Shanghai. As respects silk, there were but 358 piculs shipped from Canton in 1855, while, for the half of 1860, more than 1,500 piculs were exported in British vessels; and the duty paid on silk in Canton by vessels of all nations in the half-year of 1860 exceeded one million and a-half of dollars.

Looking at the exports from this side of plain cottons and yarns to the East, we find that while there has been a large decrease to Bombay and Calcutta, there has been a considerable increase to Hong Kong and Shanghai. The trade of Hong Kong must be considered in connection with that of Canton, with which it is closely allied. In 1859, the declared value of British produce and manufactures shipped to Hong Kong was nearly £2,000,000, or about three times the amount of the exports of 1857; while in the exports to China, the increase in the same period was about three-quarters of a million. The average value of the imports from China may be taken at £9,000,000 per annum; and latterly there have been introduced a few new articles, which augur well for extended trade. China will grow anything that will flourish in the tropics or the warmer countries of the temperate zone. The people are industrious and skilful to a degree with which even Bengalees cannot compare. They could grow seeds and hemp, indigo and oil plants, just as well as the planters of Bengal. Some five or six years ago the import and export trade of Canton and Shanghai represented a total of 12 millions sterling a-year, of which Shanghai carried on two-thirds. Now the port of Shanghai alone carries on trade to double this amount, while Canton has also largely increased, although we have not the aggregate value of its external trade given. But our trade with them is scarcely yet developed, and will be largely increased when the people of the interior provinces become more familiarised with us and have confidence in us as peaceful traders. English steamers on all the rivers would bring down produce of which we scarcely hear. English skill would teach Chinese acuteness and industry to double the export of manufactured produce of silk, lac, sugar, and indigo. English mints would relieve the trader of his worst enemy, an uncertain currency, and English habits would soon secure a national debt, and with it the means of investment, which is the greatest want of the Chinese, the greatest incentive to accumulation.

In 1842, at the close of the war, the value of our exports to China was £969,381, and of the imports of Chinese produce £3,956,200. In 1859 the value of our exports was £4,457,573, and of the imports of Chinese produce £9,014,310. These figures show the remarkable advance in our trade with the Chinese empire since the additional ports were thrown open to us in 1842. With the additional facilities offered to trade under the new Treaty we can look with confidence to a further extension.

VESSELS LOADING.

At LONDON.—For Hong Kong: Northfleet. For Hong Kong and Canton: Napoleon III., Southern Cross, Prince Alfred, Hero. For Shanghai: Peterborough, Gauntlett, Wellington, Challenger, Assyrian. FREIGHTS AND CHARTERS.

Rates of freight current for vessels on berth to Shanghai, 50s. to 60s. per ton, weight and measurement. To Hong Kong, 50s., weight and measurement. To Singapore, 35s., and Penang, 45s., weight or measurement (nominal). To Manila, 35s. and 40s. To Japan, £5 weight, 90s. measurement. To Batavia, 50s. weight, 40s. measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 50s. China and Manila, 50s. to 60s.

CASUALTIES.

The whole of the cargo of the Ardvill, Capt. Barclay, from Macao to London, which went on shore on the French coast near Boulogne, has been landed, and will be forwarded to London; about one eighth part is damaged; the silk is in good condition. The vessel was towed into Dover January 13, by a steam-tug, and proceeded immediately in tow for London, where she has since arrived. Capt. Barclay died on the night of the 12th instant.

Partnership—China.

THE ADVERTISER, lately returned from China, and well acquainted with its Trade, desires a PARTNER with about £5,000, to add to his Capital, and to commence as a Firm in the above Trade. The Advertiser has facilities for doing a large business, having formed an influential connection at the various Chinese ports and at home; and as he is an active man of business, of sound commercial experience and steady habits, it will not be essential for the Partner to have a knowledge of the Trade. All replies must give proper name, age, and references as to steadiness of character and gentlemanly habits.

Address A. B., Mr. Weymouth, Solicitor, 19, Essex-street, Strand.

CHINESE LANGUAGE.

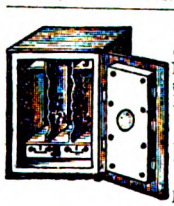
A NATIVE of CHINA, Son of a Mandarin, and one of the liberati, has for the past year been residing in this country for the purpose of learning English. He is now desirous of giving instruction in his own language, either by private lesson or in class. To parties intending to proceed to China this would afford a valuable opportunity for the acquirement of the Mandarin Dialect, the universal medium for making oneself understood throughout China as distinguished from the numerous dialects which have only a local application.

A class is now forming limited to twelve pupils, to assemble twice a week; each lesson of two hours. Terms Five Guineas per Quarter. For further information apply by letter to Tang Chi-yu, care of Trubner and Co., 60, Paternoster-row.

N.B.—Private Lessons Half-a-Guinea each.

FACILITIES in BOOK-KEEPING DRAPER'S PATENT SEMI-DETACHED DOUBLE REFERENCE INDEX effects great saving of time, and expedites posting. All descriptions of Account Books fitted with Patent Index. Account Books, Copying Machines, and Stationery supplied, of the best quality Wholesale and for Exportation, 5, Tower-street, London. Sample of Patent Index can be seen at Mr. GEORGE HOLMES', Hong Kong. Sample Book of Papers, with prices, forwarded on application.

NO KALOS GEUSIS SAUCE is Genuine unless it has my Trade Mark upon each label and capsule, also my name and address upon each bottle. Price 1s. per Bottle. CALEB SOUL (the only successor to the late H. Trinder), 85, Queen-street, Cheapside, London. Can be ordered through any of the India Agency Houses; also of Messrs. CROSS and BLACKWELL, London.



JOHN TANN'S PATENT RELIANCE LOCKS and FIREPROOF SAFES are the best and cheapest safe-guard against Fire and Robbery.

Orders transmitted direct, or through Mr. GEORGE HOLMES, Hong Kong.

WAREHOUSE, 30, WALBROOK, CITY, LONDON.

List of sizes and prices forwarded on application.

47 & 48, HALF MOON STREET, BISHOPSGATE, E.C

JEAN MARIA FARINA Cologne; London, 2, Salters'-hall-court, and 16, St. Swithin's-lane, E.C., begs to recommend his Stock of EAU DE COLOGNE and LAVENDER WATER in Bond—Double, at 9s.; Single, at 5s. 6d per dozen. Duty paid—Double, at 21s. Sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

HOLLOWAY'S OINTMENT AND PILLS STILL UNRIVALLED.—John Winterton, of Earpingham, Rutland, takes a pleasure in informing Professor Holloway of the happy effects he has experienced by the aid of these inestimable remedies. He was a sufferer for four years with an ulcerated leg, and repeatedly underwent medical treatment for the same without obtaining the slightest alleviation of pain. Having heard of Holloway's Ointment and Pills, he determined to test their virtues. After using them for a time, to his astonishment and delight his restoration to health was complete. It would be difficult, indeed, to over-estimate the utility of medicines so marvellously efficacious as these in some of the worst diseases that can afflict human nature.

GALVANIZED IRON.

FREDERICK BRABY AND CO.

MANUFACTURE GALVANIZED IRON of the best quality, Plain and Corrugated; also Sheet and Perforated Zinc, Wholesale and for Exportation.

FIRE. — DESTRUCTION OF THE PLANT, STOCK, and PROPERTY of the Largest Ropery and Ship Chandlery in the Country, Messrs. Frost, Brothers, of Shadwell, London. PRESERVATION of Books, Papers, and Cash, in MILNER'S SAFE, standing by the side of two other safes, (not Milner's) the contents of which were consumed.—See "Times," Sept. 7, 1860.

TO MESSRS. THOMAS MILNER AND SON,

Liverpool, and 47A, Moorgate-street, City, London.

Gentlemen,—We have very great pleasure in bearing testimony to the efficiency of your "Patent" Fire-resisting Safe. In the destructive fire which destroyed the whole of our premises on Sunday morning last, our books, papers, and cash, which were in the safe we purchased from you in March last, were all preserved; and this is the more remarkable because the contents of two other safes, not of our manufacture, standing in the same office within two feet of your safe, were consumed. Our most sanguine hopes have been realised in this severe test, and we leave you at liberty to make use of this letter in any way you may wish.—We are, Gentlemen, yours, &c.

FROST, BROTHERS.

Shadwell, London, Sept. 8, 1860.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

JOSEPH ROBERTS,

ENGINEER, CONTRACTOR, AND MACHINERY AGENT,

7, OLD JEWRY, LONDON, E.C.

Soap Maker, Boot and Shoe Maker, Planing, Slotting, Drilling, Sawing, Grinding, and every description of Engineers' Tools and Machinery for working in Wood, Stone, &c

PORTABLE AND STATIONARY ENGINES, PUMPS &c.,

FOR SALE OR EXPORTATION.

Calculations, Estimates, Specifications, Working and Finished Drawings made for every description of the above. Also for bridges, buildings, canals, railroads, wharfs, &c. Their construction superintended or contracted for.

PREPARATORY EDUCATION, BRIGHTON.

A LADY residing in a healthy locality of Brighton, receives a limited number of BOYS for EDUCATION, and offers superior advantages on moderate terms. Parents who reside abroad would find this a desirable home for their children from 3 to 11 years of age. Satisfactory references given. Address to "Alpha," at the office of this Paper, 7, George-yard, Lombard-street, E.C.

FOR FAMILY ARMS.—Send Name and County to the Royal Heraldic Studio and Library; in a few days you will receive a Correct Copy of your Armorial Bearings. Plain Sketch, 3s.; in Heraldic Colours with written description, 6s.; Large Size, 12s. Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, fee Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Heralds' College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanics' Institute, 25, Cranbourn-street, corner of St. Martin's lane, London, W.C. The Heraldic Colours for Servants' Liveries, 5s.

STAMP YOUR OWN PAPER—with Arms, Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSING PRESS, 15s. Best Make 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS—For Lady & Gentleman—5s. each. 50 Embossed Envelopes, with Maiden Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Cards, printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Emblazoned for Painting on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

ARMS, CRESTS, &c., Engraved in the Best Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letters 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall Marked), Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P. O. order the size will be sent to select from.—T. CULLETON, Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

Per Whirlwind, from London: Mr. and Mrs. Buchan, and two native passengers.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

Dates are to the 4th December. Disturbances of an alarming nature have occurred at Yokuhama. While Messrs. Bush and Tatham (resident merchants of Yokuhama), and Mr. Cooper Turner (the Crown solicitor of Hong Kong, who is on a visit at that port) were riding through Kavasaki, Mr. Bush, being slightly in advance, noticed a foreigner, tightly pinioned and thrust into a native chair, being carried along under charge of some native officers. Mr. Bush jumped from his horse, fired his revolver in the air, by way of causing consternation, and ere the Japanese officers could muster their courage, the prisoner was released. The cowards then menaced Mr. Bush, but Messrs. Tatham and Turner coming to the rescue, the Japanese "hauled off," and the prisoner's liberation was complete. He turned out to be Mr. B. Telge, of the firm of Messrs. W. Pustau and Co., whose offence turned out to have been killing a wild goose.

The day following a number of Japanese soldiers went to Messrs. Pustau's house, and taking Mr. Moss, also belonging to that firm, for Mr. Telge, they attempted to capture him. Mr. Moss armed himself with a fowling-piece, and in the midst of a violent scuffle, shot one of his assailants. He was then made prisoner. On this news spreading abroad, the British consul, all the foreign community, and one hundred men from the Prussian man-of-war, made a determined and successful attempt to liberate Mr. Moss. An investigation was being held. The Japanese witnesses were giving most absurdly false evidence, and such was the excitement, that Mr. Moss's friends have advised him to leave for fear of assassination.

Another account says:—

Mr. Telge, a German, of this place, with a party of friends, rode to Kani-sa-ki, ten miles distant towards Yedo, taking his gun with him. While at that place he went out a short distance into the paddy fields, and shot a goose, and with it started back. A few officers saw the whole affair, came towards him and complimented him on the fine shot he had made; he no doubt, feeling flattered by the remarks, made friends with them, and all walked on together. He had not proceeded but a few steps when he was violently seized from behind and thrown on his face, his arms triced up behind his back, and his situation made as uncomfortable as the in-

Digitized by Google

genuity of the officers could invent. He refused to walk, but told them he would go with hem quietly if they would release him, and complained of the tightness of the cords. This seemed to delight them, and the coolies that held him received orders to tighten them, which was done. They then carried him towards the So-ci-do (the high road), threw him into a kind of chair used in this country, and which is about as uncomfortable an affair when a person's limbs are free, as can be imagined, and took him towards Kanagawa. His friends, from his long absence, thinking that he might have gone towards home started that way. After riding a short distance one of them accidentally caught sight of a man's legs protruding from a chair, with several officers escorting it. This excited their curiosity, and on close inspection they discovered who it was, and on seeing his situation it was but the work of a moment to dismount, show their "revolvers" (which, by the way, are constantly used by us at all times, and in all places, at night in our hands, ready cocked) and cast him loose. The officers at first made some resistance, but, at the sight of a few pistols pointed at their heads, and which they were quite certain would go off if they attempted to draw their swords, they reluctantly allowed him to go, and soon had the pleasure of a stern view of him as he disappeared over the next hill. He has not been popular with them, being a "German subject," yet, under English protection, which they cannot understand, and have long since insisted that all persons other than those of "Treaty Powers" should leave the country.

The day after this occurrence Mr. Moss was returning from a shooting excursion; he had nearly reached the jetty, and was passing a small "guard-house," when several officers rushed out, and not knowing what were their intentions, whether peaceful or not, as all persons here would have done, he backed up to a house and stood on the defensive, cocked both barrels of his gun, pointed it for the leader, and asked what they intended. They told him that it was very wrong to point his gun at an officer; but recognising among them one whom he had seen often at the "Custom-house," he grounded the gun and walked up to them in the middle of the street, at which moment he was struck a violent blow on the back of the head which felled him to the ground on his face, the gun was wrenched from his hands, and immediately after it exploded and shot nearly off the left arm of one of the inferior officers; the bone was smashed into small pieces; so close must it have been that the flesh was blackened by the powder, and the wads must have passed through the arm.

Mr. Moss was immediately hurried off to a small house near the water, the crowd driven out of the street, the blood washed up, and all traces removed; and it was by the merest accident that Captain Vyse, her Majesty's Consul, heard of it. One of the coolies belonging to the Consulate happened to hear of it, and rushing in said that a foreigner had shot a Jak-a-nin in the street. Captain Vyse was at the time taking down the depositions of the persons engaged in the affair of the day previous, and all present at once started for the scene of the accident. Going up to the guard-house he asked the officers what was the matter. They told him nothing. He asked them if they had not heard of the affair. They said no. One of the party suggested that they look inside; and on Captain Vyse attempting to go, he was rudely pushed back. He persisted, and on going into the back room, saw the officer lying on a mat. He at once sent for Drs. Hepburn and Simon, who at once said nothing but amputation of the arm would save the man's life.

At last an interpreter turned up, who told what the doctors had said. The officers refused to have it done, saying that the permission of the mayor and governor of Kanagawa would first have to be obtained. Captain Vyse, disgusted with their lying and prevaricating, told them that "he had done all in his power for the man; had brought surgeons competent to judge; they said if the arm was not taken off he must die; and as they refused to have it done, if the man died they must be answerable for his life, not the man that fired the shot." All the information he could obtain from them was that a foreigner had done it, but would not say who it was, or what had been done with him. Captain Vyse asked for a guard, as he wished to call on the "Governor." This was refused, and he went without one. The Governor declared that he knew nothing about it, and thus the matter stood until after dark. Captain Vyse had good reason to believe that Mr. Moss was confined either in the Governor's house or in the prison close by, and he pledged himself to the foreigners (who were now collected) to regain him that night by force, if necessary.

The "Prussian Commodore" (who is deserving of all praise) offered him the assistance of an armed force, which was accepted. At 11 P.M., Captain Vyse, accompanied by Mr. Bellecom the French "Charge de Affairs," and the abbe "Girard" as interpreter, (one having been refused by the officers), started for the "Governor's" to demand the man, and bring him back by fair means or by force. A Prussian officer went with them having with him a rocket, the signal for the force to land, and during the interview remained outside with a lighted match in his hand, the landing party being in their boats close by awaiting the signal; a large body of foreigners were not far off, eager to join in the attack.

At first the Governor said that he had just heard of the affair, but did not know what had been done with the man. After an almost endless amount of lying, he admitted that he was in prison, and at the last moment when the patience of the Europeans was almost exhausted, he consented to give him up provided Captain Vyse gave his word of honour that he would see justice done. He delivered him up just in time—had he held out much longer he would have seen a scene of bloodshed which he would long have cause to remember. Mr. Moss received some injuries while in their hands, was beaten, kicked, and jumped on, besides receiving two severe blows over the face with some iron weapon. Mr. Moss has commenced a suit against the Japanese Government, and claims damages $30,000.

The wounded officer is still alive; his depositions was taken and handed into the Consul's hands - it finishes with the pleasant information that if he lived he should kill Mr. Moss; as it is, he leaves three brothers who will revenge his death, as the Japanese law is blood for blood. Mr. Moss, for his own safety, will have to leave the country, and it is most likely that some other foreigner will fall, as a set off against the death of this officer —a most unpleasant mode of balancing accounts to us here.

I understand that Mr. Alcock thinks that it was an unpardonable and outrageous attack. How the affair will end it is difficult to say.

NAGASAKI.

Letters from Nagasaki state that on the night of the 1st Dec. a fire broke out in a house near the coal-shed adjacent to the Dutch factory, in which shed, it is supposed, about 20,000 tons of coals are deposited. The fire communicated itself to the shed and the coals, a considerable portion of which were destroyed.

In consequence of the improved rates in China, Cotton goods had advanced, and grey shirtings were quoted at $3; white, $3 20c. In exports tea and silk had advanced, owing to the increased demand. Isinglass quoted $22 to $28; tobacco, $5 50c.; rapeseed, $1 60c. to $1 80c.; gall nuts, $6 to $6 50c. No vessels loading home.

CHINA.

PEKING.

The news from Peking is not later than already received. From Tien-tsin, however, advices have been received to the 2nd December, which makes no mention of the murder reported last mail at Hong Kong of Mr. Adkins, so we must assume the story to be a *canard*. The troops are very comfortably gathered, but the thermometer had been down to 20 below zero. The men, however, were finding means to pass time, and it is hoped they will only have to do that, and not be molested by the Chinese. The gun-boats had been unable to run through the ice, and the last officers who left Tien-tsin had to go down to the Taku Forts overland; carts accomplishing the journey in two days. There had been very little snow; and the frosty air was so dry and clear that stars could be sometimes seen during the daytime. Everyone up at Tien-tsin is now dressed in furs. The quantity of game in the market was very large, and was sold for a mere song. Liquids could only be kept from freezing by being kept near a stove.

The 31st Regiment were located inside the South gate, the 60th inside the East, and the Artillery and Military Train in different yamuns all along the street, which runs from the East to the West gates. The 67th were stationed on the south bank of the grand canal, just outside the north-east part of the city wall; and Fane's horse were in the south-east suburb. The French and British embassies were in two of the best places in Tien-tsin, on the west side of the river, and but a short distance from the city wall. The French troops had taken up their quarters on the east side of the Peiho and the north of the grand canal.

The Chinese shopkeepers are said to be quite pleased at the prospect of foreigners coming to settle and trade at Tien-tsin, and are inquiring for opium, iron, tin, and cotton goods, &c.

The instalment of the indemnity, half a million of taels, had been duly received by both the English and French.

Admiral Hope has gone to Japan, and will proceed from thence to Shanghai, and up the river Yang-tse-Kiang.

SHANGHAI.

The latest date from London is October 26th, received on the 17th Dec., per Messrs. Dent and Co.'s steamer *Ly-ee-moon*. The rebels in this vicinity appear to be quiet. Lord Elgin is still here, waiting, it is presumed, to see the result of the opening of the river Yangtsze; upon which the policy of the British Government, in regard to the rebel question, materially depends, so far as the interests of trade are concerned. It is expected that Admiral Hope will be down here from the North very soon, when he will organise the expedition which it may be deemed expedient to employ for the protection of trade in that river.

The first fruits of the tariff and trade regulations of the Treaty of Tien-tsin have appeared in a bold attempt of the Chinese local authorities to establish in this settlement an opium monopoly, under Rule 5, which excludes that article from the benefit of the transit duty clause applicable to all other goods. A commission which was established, issued official notifications calling upon the Chinese Shroffs in the employ of each foreign house, dealing in opium, to send in a detailed monthly report of all the transactions of their masters in this article, for which they were to receive a fee; and inquiries were instituted respecting the families of the said Shroffs with a view to making them suffer for any failure on the part of their relatives to send in a disclosure of the business transactions of their employers.

This attempt to revive the old Canton system of espionage has been vigorously met by her Majesty's Consul, who has addressed the Superintendent of Customs, requiring the with-

Digitized by Google

drawal of the obnoxious notifications and the removal of the Commission from the foreign settlement.

The following notification has been issued by the British Consul, Mr. T. T. Meadows :—

He Britannic Majesty's Consul having heard that a commission established some time back in the foreign settlement to levy inland duties on opium—and which he had had official grounds for believing to be removed elsewhere—was still in full operation, went personally this morning to the locality in question. He there not only found the commission in apparently full operation, under the authority of two notifications of the Superintendent of Customs, dated two days ago and suspended at the gates of the establishment, but also noted in its constitution, as prescribed by these notifications, features of a nature so objectionable as to render immediate public action on his part an unavoidable duty.

The Superintendent of Customs there lays down that the Chinese chief accountant (compradore or shroff) in the employ of each foreign house dealing in opium shall send in to the above Opium-duty Commission a detailed monthly report of all the opium which his employers have, during the month, imported, paid the maritime import duty on, and sold to Chinese, together with a statement of the balance of opium left in their (his employers') possession, which balance is to head the account of the next following month. The Superintendent further lays down that the same description of surveillance shall be maintained over transactions in receiving ships, through the Chinese accountants of the firms to which they severally belong.

Since returning from the above visit of inspection, the undersigned has received from various British merchants, who have appeared to protest against the system, or to whom he has applied for additional information, sets of certain regulations, blank books, forms, &c., &c., by which the details of the system are explained and prescribed. From these it appears that to the Chinese chief accountant of each of twenty-five opium-dealing foreign houses at this port, a similar set of documents has been issued, one of these being an official order from the Superintendent of Customs addressed to the chief accountant by name, requiring from him personally the performance of the abovementioned services, and assigning to him as a reward a sum of five mace per chest, but also making him responsible for any discrepancy between the number of chests imported and of those reported as sold by his employer. The undersigned has, further, been informed, by one of the British merchants who have appealed to him, that the commission has been instituting inquiries into the whereabouts of the parents, wife, and children of his accountant, with a view to making these innocent persons suffer for any failure on their relatives' part to send in a monthly disclosure of the business transactions of the foreign firm that employs him.

The undersigned, seeing in this system of espionage, supported by a cruel terrorism, a revival of one of those worst features of the old Canton hong monopoly, which led to the first British war in this country, feels that he cannot too promptly oppose to it whatever checks Treaty-rights and British consular influence place at his command.

The undersigned accordingly hereby calls upon all British firms to whose accountants any orders or other documents of the above indicated kind have been issued to transmit the same to this Consulate without delay. And he further requests all such firms to note, and to explain to their Chinese clerks and servants, the following Treaty-right and the action which he, pending instructions from H.M.'s Envoy and Chief Superintendent of Trade, is resolved to take upon it.

The 31st article of the first French Treaty with China and the identical 32nd article of the French Treaty of Tien-tsin stipulate that Chinese, who, being accused of crimes, take refuge in French houses or ships must be applied for through the Consuls, who will take steps to effect their extradition "on proof of their culpability." The undersigned will not, unless otherwise instructed, attempt to make use of this stipulation in the case of Chinese not in British employ; he being well satisfied that neither British commercial interests nor the credit of the British name will profit by allowing Chinese generally to hope for protection from the regular judicial procedures of their own country. In the case of such persons, therefore, he will continue to content himself, as he has heretofore done, by requiring the presentation of a duly sealed warrant issued by competent native authority. But as regards Chinese in British employ or their nearer relatives, the undersigned has resolved to exercise to the fullest extent the right secured by the above prudent and salutary provision. In their case, he will require convincing proofs of the commission of a crime or of some recognised offence against society before proceeding to any act of extradition. And until he is satisfied that all intention is given up of making them, by a system of rewards and punishments, act as Customs' supervisors over the business transactions of their own masters, he will feel it his duty to view with peculiar suspicion every charge of a criminal nature that may be brought against them.

The new Treaty, Convention, and Tariff, have been published in the *North China Herald.*

H.M.'s steamer *Cowper* (late *Fei-seen*, bought at Hong Kong.) has been advertised for sale.

The owners of the *Tu-Yung* towing steamer had been ordered to pay by the Consular Court the sum of $550 for damages in running down a Chinese boat.

The community are agitating for the construction of new roads into the interior while our troops hold the Chinese city. A meeting has been held, of which the following is a notice from the report of the *North China Herald* :—

Mr. Hamilton, being requested, took the chair, and said that he appeared before the meeting for the purpose of bringing under their notice an offer that had been made by Sir J. Michel for the construction of country roads, and in doing so he desired to make an explanation to those gentlemen who considered this matter as one belonging to the Municipal Council. The difficulty that presented itself in this matter was the want of proper supervision—without which contractors did their work extravagantly and inefficiently. This, under the direction of an engineer officer, Sir J. Michel was prepared to furnish. Added to which, Sir J. Michel would be in communication with the Taotai, who would settle as regards the land required. Mr. Lay, also, who had access to the Taotai, had expressed his desire to do anything in his power to forward the object in view. Mr. Reid, seconded by Mr. Jarvie, then proposed that the following gentlemen be appointed to form a committee with power to add to their number, viz. :—Messrs. Hamilton, Coutts, Ashton, Whittall, Cushny, Reid, and C. Thorne.—Carried unanimously.

At the second sale of Arabs belonging to her Majesty's Government, the total sum realised for the twenty were Tls. 4,405, making an average of Tls. 220. The highest price was Tls. 450, the lowest Tls. 60. Two were sold at Tls. 400 each, one at Tls. 430, and three under Tls. 100 each.

At a meeting of the Royal Asiatic Society a paper by Dr. Bridgman was read on the "Language of the Miaoutsz." Four distinct catalogues of words were exhibited in the essay submitted by the Rev. Dr. Bridgman.

The report by last mail of the departure of Lord Elgin and Admiral Hope for Japan turns out to be incorrect. Sir Hope Grant proceeded in the *Granada* to Kanagawa, and it is believed that Admiral Hope left the Peiho for Kanagawa on Dec. 30.

Mr. Clifton, the Superintendent of Police, has been dismissed, notwithstanding his acquittal of the charges brought against him.

NINGPO.

A correspondent, dating Dec. 12, writes us :—Owing to the disturbed state of the country, and the distracted state of the Government at Peking, occasioned by the approach of the "barbarian" army, no Peking Gazettes have for a long time arrived.

The insurgents have again entered this province, taken a few places, made another attempt to take Hangchow, and, by last accounts, are retiring. Since their defeat at Shanghai they seem to have lost heart somewhat. Were they to go forward with the energy that they displayed a few months since, when they took Soochow and Hangchow, and destroyed the imperial army, they might soon conquer the whole country. But, it is, I apprehend, a more difficult matter to retain and rule the places taken than to take them.

The Rev. S. J. Roberts, an American Baptist missionary, with whom the insurgent chief studied Christianity a few months, previous to his entering upon his revolutionary career, has, at the earnest request of the latter, remained at Nanking. It is to be hoped that he will correct some of the gross errors of the chief and his followers.

It is said that the steamer *Zingari* has been purchased by the authorities at Ningpo for service against the rebels in the Tseen-kang-kiang, should they attempt to cross over that river to the Ningpo side.

CHUSAN.

All the British troops but fifteen men and two officers of the 99th have left Chusan. H.M.S. *Snake* remains there until the French troops leave.

A correspondent writes :—The natives are very free to express their regret at the departure of the English forces. English policemen render the people much more secure from robberies and thefts than their own. The Frenchmen they do not like so well. Nearly all of the English left on the 5th inst., in the *Australia*, for Hong Kong. The India troops left on the 7th inst. in the *Thunder*; only some fifteen English officers and men are now remaining there. They are looking after and disposing of the remaining stores, chiefly cattle and wood intended for the North. An auction was held on the 10th inst., at which some 3,000,000 lbs. of wood, about 400 head of cattle, a number of sheep, a quantity of barley, rice, brand, sugar, tea, &c., &c., were sold, probably at great sacrifice.

The French will remain for the present, but it is understood that they are also to leave as soon as convenient. The Roman Catholic Missionaries have taken advantage of the presence of French troops to secure a good location in the city of Tinghai, and are building a large church.

FOO-CHOW-FOO.

Intelligence has been received of the seizure, at Wanchew, of two Englishmen from a schooner, who were very badly treated, and sent to Ningpo as smugglers.

AMOY.

There is no intelligence from this port beyond the usual market reports.

SWATOW.

The late disturbances have apparently all subsided, but British subjects have to be indemnified, in which Mr. Consul Carie, it is to be hoped, will show better judgment than in the first outbreak of the affair.

HONG KONG.

The French Government have purchased the steamer *Undine*, built at Hong Kong, for $4,600, which may be assumed to leave a good profit to her owners, Messrs. Douglas, Harper, and others.

A long review of Mr. Scarth's pamphlet, "Is our War with the Tartars or Chinese?" not very complimentary to the author, appears in the *Daily Press*.

In spite of the cession of Kowloon to the British, landed property at Hong Kong still maintains its value, the last sold having realised $33,000 (£8,000) premium on the fixed rentals. The want of storage room, however, will not be so urgent when the new hongs are built at Canton.

Mr. Wilson, on his retirement from the editorial chair of the *China Mail*, says:—"During the three years in which we have conducted this paper, many events of very great importance have occurred in China; and though we lay down the editorial pen to-day (27th Dec.), yet our connection with the *China Mail* does not cease, and we hope soon to converse with our readers about home matters."

On Christmas-day, in St. John's Cathedral, the new organ from England was played for the first time. All the details not being quite perfected, the full musical effect was not shown; but from the sample given the organ is pronounced a very fine one.

The *Ly-ee-moon*, on her passage to Shanghai, had two nights of heavy blowing weather. Notwithstanding, she made the run in 3 days 15 hours. She had fine weather on her passage down, which occupied 2 days 20½ hours; from Ningpo to this port, 2 days 10 hours, being the fastest time known.

The very extraordinary charges against a consular official in Japan are now understood to have been greatly exaggerated, but in the excitement prevailing at Kanagawa it has almost died out—not so, it is presumed, with the accused, who, of course, must be reported to the Home Government.

A Government notification announces that six months' leave of absence has been granted to William Chapman, Esq., Postmaster-General, from the 20th Nov., and that F. W. Mitchell, Esq., has been appointed Acting Postmaster-General. Five months' leave of absence has also been granted to Dr. J. I. Murray, Colonial Surgeon, his place being filled by Dr. Ainslie, as Acting Colonial Surgeon; Dr. Wong-Fun is appointed as superintendent of the Civil Hospital.

The *Hong Kong Register* has the following on the Great Abuse Commission. We think it was perfectly right the inquiry should have been held, and that whatever the judgment may be, it should end the matter:—"The Civil Service Abuses Commission still 'drags its slow length along.' Its nineteenth sitting has been held, and the point arrived at is, the opening of Mr. Caldwell's defence. Every one here is sick and tired of the matter, as, doubtless, are the commissioners; and their verdict, whether in favour of or against Mr. Caldwell, will be hailed as a veritable relief by the public of the colony."

The *Sebastopol* arrived off Hong Kong harbour from Whampoa, on 22nd Dec., with coolies on board bound to Demerara. Dr. Preston is gone in her in medical charge.

PHILIPPINES.

MANILA.

Dates from this place are to the 22nd of December, via Hong Kong, and the 3rd of January, via Singapore, but there is nothing further than the usual trade prices current. London dates of October 26 reached on December 17. The *Sales* has not yet arrived from Liverpool; and the *Maria Rosario*, that arrived on the 16th inst. from Singapore, does not bring many English manufactures. There has been a pretty fair demand for goods. The stocks in first hands must now be very greatly reduced, and many sales not reported have been made to arrive of both plain and coloured goods.

MALACCA STRAITS.

PENANG.

On the 27th December a Siamese chief, brother of the King of Siam's Minister, arrived here in his yacht, on a tour of inspection of the tributary places under Siam. This is the same individual who, some three years ago, our readers may remember, went to England as Siamese Ambassador. The Rajah of Quedah also arrived simultaneously with the Siamese chief, and on landing a salute was fired from the fort.

SINGAPORE.

The *Hooghly* returned on 31st Dec., after a completely successful cruise after the pirates who have long infested this neighbourhood, and who were known to have murdered eight Chinese in a tongkong, a year or two ago. The *Hooghly* found the pirates off Pulu Tioman, in the China sea. They were taken entirely by surprise, and were captured without difficulty. There were three of them, all Malays, and desperate-looking fellows. They were brought in heavily ironed, and will probably pay the penalty of their crimes with their lives, as the proof against them is undoubted.

The captain and crew of the *Herculean* from Shanghai, lost in Gaspar Straits, have arrived from Batavia.

A huge alligator was brought into town from Sirangoon; the Government rewarded its captors.

We (*Straits Times*) are very sorry indeed to learn that the state of health of our worthy Commissioner of Police is such as to necessitate his immediate departure for Europe, and we are informed that he will probably leave Singapore next month. It will be extremely difficult to supply the place which Mr. Dunman has filled so worthily, and we have no idea who will be appointed to act during his absence. We have heard the name of the present police magistrate mentioned in connection with the post.

The following advertisement appears in the Singapore papers:—

"The proprietor of the Commercial Press and General Printing Office, together with the *Singapore Standard* and *Daily Press* newspapers, being desirous of proceeding to England in a few months, is open to an offer to purchase the establishment."

CANTON—NEWS EXTRA.

The new Tariff was put into operation on the 19th of December.

An interesting narrative of a visit to the Tartar-general's yamun appears in the *Friend of China*, and those interested in the Coolie trade will find in that journal the instructions sent by Messrs. Torices, Ferran, and Co, of Havana, to their agents in China for conducting this traffic.

The artists of Messrs. Negretti and Zambra, and the *Illustrated London News*, have arrived at Hong Kong from the seat of war.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Boyle—On the 11th inst, at 4, Queen-street, Mayfair, the wife of Lieut. Colonel Boyle, 89th Regiment, of a son.

Browne—At Shanghai, on the 18th December, the wife of H. Browne, Commander, P. & O. Steam Company's service, of a son, stillborn.

Campbell—On the 24th ult., at Lethen House, Nairnshire, N.B., the wife of Archibald Campbell, Esq., late of China, prematurely, of a daughter, still born.

Erskine—On the 9th inst, at 10, Durham-terrace, Westbourne-park, the wife of Colonel Erskine, of a daughter.

Gibbs—On the 31st Jan., at Southampton Villa, Highgate-rise, the wife of Richard Gibbs, Esq., of a daughter.

Gifford—At Hong Kong, on the 30th December, Mrs. George Gifford, of a son.

Kloekers—At Shanghai, on the 23rd November, the wife of Rev. H. H. Z. Kloekers, of a daughter.

Low—At Hong Kong, on the 24th December, the wife of Mr. R. A. Low of a son.

Markham—On the 9th inst., at Becca Hall, Yorkshire, Mrs Markham, of a daughter.

Matheson—On the 6th inst., in South-street, the wife of Alexander Matheson, Esq., M.P., of a son.

Plumridge—On the 10th inst. at Hopton Hall, near Lowestoffe, Lady Plumridge, of twin daughters.

Rangel—On the 11th inst., at 4, The Square, Upper Hyde Park-gardens, the wife of R. Rangel, Esq., of a daughter

Sandelands—At Penang, on the 22nd December, Mrs. G. M. Sandelands, of a son.

MARRIAGES.

Blundell—Farmar—On the 29th ult., at Christ Church, Craven-hill, by the Rev. W. H. Le Marchant, Edmund Augustus Blundell, Esq., late Governor of Singapore and Malacca, to Meliora Mynors, eldest daughter of the late H. H. Farmar, Esq., of Dunsenane county Wexford.

Donner—Koebel—On the 5th inst., at the German Church, Camberwell, by the Rev. C. Meyer, Julius Donner, Esq., Grove-park, Camberwell, to Augusta, eldest daughter of H. C. Koebel, Esq., of the Grove.

Edwards—Rees—On the 21st ult., at the Church of St. John the Evangelist, Clifton, by the Rev. G. H. Walsh, J. Cox Edwards, B.A., of Emmanuel College, Cambridge, to Maria Hedger, younger daughter of the late T. Rees, Esq., of Macao, China.

FINCHAM—ADAMS—At the Cathedral, Hong Kong, on the 20th December, by the Rev. J. J. Irwin, M.A, Colonial Chaplain, assisted by the Rev. J. H. Gray, M.A., British Consular Chaplain, of Canton, Alfred Fincham, Esq., of Canton, to Anne Maria, eldest daughter of the Hon. W. H. Adams, Chief Justice of Hong Kong.

PAGET—HENEAGE—On the 6th inst., at Trinity Church, Chelsea, by the Rev. R. Burgess, Brigadier-General Lord George Paget, C.B., to Louisa, youngest daughter of Charles Heneage, Esq., and the Hon. Mrs. Heneage.

RODGETT—DUGDALE—On the 30th Jan., at St. Mark's Church, Witton, by the Rev. J. C. Kershaw, Richard Bashall, youngest son of Miles Rodgett, Esq., of Darwen Bank, near Preston, to Elizabeth, third daughter of Thomas Dugdale, Esq., of Griffin Lodge, near Blackburn.

TEMPLE—CHITTY—On the 2nd inst., at St. George's, Hanover-square, T. R. S. Temple, Esq., of Lincoln's-inn, barrister-at-law, to Henrietta, eldest daughter of the late Joseph Chitty, Esq., junior, of the Middle Temple.

DEATHS.

CAMPBELL—On the 25th ult., at Lether House, Barbara Anne, the wife of Archibald Campbell, Esq., late of Messrs. Dent and Co., at China, aged 30.

FERREIRA—On the 4th inst., at the residence of his son, G. A. Ferreira, Esq., Rock House, Chudleigh, Devon, Francisco Ferreira, a dos Guimarães, Oporto, Esq., aged 79.

GIBSON—At Foo-chow-Foo, on the 14th of December, Henry Bennett Gibson, M.D.

GUNTHORPE—At the Peiho, in November, on board the *Waterwitch*, Mr. Henry Gunthorpe, late of the Harbour-master's office, at Hong Kong.

KLOEKERS—At Shanghai, on the 16th December, Mrs. Emily Page Kloekers, wife of Rev. H. Z. Kloekers, and eldest daughter of L. Winterbotham, Esq., banker, Stroud, Gloucestershire.

LEGGE—On the — January, the Rev. George Legge, D.D., brother of the Rev. James Legge, of Hong Kong.

MUNDY—On the 9th inst., in Grosvenor-street West, Eaton-square, Admiral Sir George Mundy, K.C.B., aged 83.

OLIPHANT—On the 24th ult., at No. 2, Atholl-crescent, Edinburgh, Mrs. Jane Oliphant, widow of John Hope Oliphant, Esq., H.E.I.C.S., late of Penang, Prince of Wales' Island, in her 88th year.

PETRE—On the 10th inst., at 3, Mansfield-street, the Lady Emma Petre, R.I.P.

WALLACE—At Hong Kong, on 13th December, Alexander Wallace, aged 36.

COMMERCIAL REPORT.

CHINA—EXPORTS.

TEA.—Shipments have been large to Great Britain. and for the present season already amount to 55 million pounds, being in excess of any previous season. To the United States the export has not been so large. At Foo-chow-Foo the settlements of the fortnight have been very large. The teamen were anxious sellers, and not onty shipped on their own account under advances, but entered into large barter transactions with some Indian firms (doubtless against inferior Malwa opium). A good demand springing up for Australia, and the British and American firms being tempted to enter the market by the improved advices from London, by the reduced demands of the Teamen, by the low rates of exchange, and from the fact of the Taiping rebels having taken the mart of Hohow, and occupied the Pass leading to the adjoining Province of Kiangsi. Congou: 50,000 chests and 23,000 half-chests at 9 to 12½ taels for trashy to common; 13 to 15 taels for common to ordinary; 16 to 18 taels for middling; 19 to 22 taels for second crop Kaisows; 15 to 18 taels for inferior Hohow, and 20 to 21 taels for middling Ningchow. Oolongs: 7,000 half-chests, at 13 taels for common Foochow packed. 17½ to 20 taels for common and fair cargo, and 22 to 25 taels for good and fine ditto. Scented Teas: 3,000 boxes at 22 taels for middling. In addition to which about 15,000 chests Congou have been arranged for shipment under advances on Chinese account. Supplies are sensibly falling off, and there seems at length a prospect of a limit being placed upon the season's yield. The desire of the Teamen to meet the market is attributed to the national propensity of winding up accounts and of returning home to spend their new year festivities, during the pressure for money consequent on the approach of that season; they will doubtless make arrangements for the coming season's tea. At Canton settlements have been: Congou: 45 chops, at 22 taels for but mid. to 27 taels for second class Oopacks; 3,500 half-chests Tyshan, at 18 to 24 taels. Scented teas: 9,000 ten catty boxes Caper, at 14 to 23½ taels, and 4,500 do. order. Pekoe, at 19½ to 30 taels. Powchong, Canton packed, 1,500 half-chests, at 15 to 16 taels. Canton Greens: Gunpowder and Imperial, 8,000 ten-catty boxes, at 17 to 19 taels; young Hyson, 1,700 half chests, at 17 to 18 taels. Leaving the unsold stock of country teas at 70 to 80 chops Congou, and 10 to 12 chops Souchong. As for coming supplies, the Teamen say that 30 chops more of Oonams and Oopacks will come to hand, and will complete the season's yield. At Shanghai there has been rather an improved market to notice for the past fortnight, but the still small supplies that come forward necessarily curtail operations in comparison with former seasons. This state of things, however, will probably not continue long, as the increased facility of transit at Ningpo is calculated to cause supplies to come forward. Settlements on the market are of Hohow, 268 chests, at 22 taels; of Ningchow, 1,825 chests, at 23½ taels to 27½; of common kinds 500 chests, at 16 taels; of Kaisow 140 chests, at 24 taels; and of flowery Pekoe, 272 chests, at 35½ taels, making in all 3,208 chests.

SILK.—The settlements have continued on the same large scale, 4,000 bales having been taken at prices much the same as last quoted. The arrivals from the country still continue heavy, and we have a stock on the market of 7,000 bales still unsold. The news from England of 26th October mail gave general disappointment, and will, in all probability, cause some hesitation on the part of the buyers, which it is to be hoped will bring about a reduced scale of prices.

DRUGS, &c.—Cassia Lignea: Canton.—No settlements reported; stock 1,500 piculs, the nominal quotation is reduced to $17 50c. 300 piculs lately arrived at Macao fetched $16 75c. Cassia oil: There have been heavy exports to the United States. The Canton quotation is $280; the Macao $265. Settlements of 50 piculs are reported at the latter. Cassia buds: No supplies, and much wanted. Star Aniseed: This article appears to be now exclusively directed to Macao, where the stock is reported at 300 piculs, and the quotation $14 75c. to $16; no settlements. Aniseed Oil: At Canton there is no stock. At Macao there there have been large shipments at $165. Fire Crackers at Canton are quoted at 85c. per box of 40 packs, best quality. Matting: There have been large shipments both to New York and London. The Canton quotations for Lintan cargo are, white per yard 4 quarter 9 cents, and check 10½ cents. Vermillion: Canton quotation for Sunshing chop, $38 per box. Rhubarb: The Shanghai market is bare of good quality; the new root is beginning to arrive at Canton. Galangal: 300 piculs offered at Canton at $4 and 500 piculs at Macao at $3 25c. to $3 50c. China root is quoted $4 at Canton. Galls there are 100 piculs at Canton, for which $14 50c. is demanded. Musk is scarce and wanted. Wool, at Shanghai, is being offered in small lots at 8 to 8½ taels per picul. Camphor: Settlements are reported of 200 piculs at $30 packed. The stock is 600 piculs, all in one hand.

CHINA—IMPORTS.

The markets at all ports have improved for European imports, and it is expected that the heavy stocks will soon be cleared off after China New Year (February). Most of the holders are asking higher rates.

EXPORTS OF TEA AND SILK TO GREAT BRITAIN SEASON 1860-61.

	From Shanghai.	From Foo-chow.	From Canton, Macao, and Hong Kong.	Total lbs.	SILK. Total Bales.

The exchange on India at Shanghai was at 296 to 297 rupees per 100 taels, and at Hong Kong 222 per $100. Bar silver at Shanghai 17 to 17½ dwts. B.; 11.5 taels, and at Hong Kong 8 per cent. The current quotation at Shanghai for Mexican dollars was 74·5 cents., and the rate of exchange on Hong Kong was 25 per cent. discount.

EXPORTS FROM CHINA.

Per Pursuit, from Shanghai, Dec. 16, to New York. Tea, 527,273 lbs.; sarsnets, 175 pieces; raw silk, 124; wool, 150 piculs.

Per Merse, from Foo-chow-Foo, Dec. 17, to London. Tea, 846,600 lbs.

Per Nabob, from Foo-chow-Foo, Dec. 19, to New York. Tea, 1,245,100 lbs.

Per Overmann, from Foo-chow-Foo, Dec. 12, to Melbourne. Tea, 497,450 lbs.; silk piece goods, 10 piculs; straw braid, 40

Digitized by Google

Per Patna, from Canton, Dec. 12, to London. Tea, 408.560 lbs.

Per Gabalva, from Canton. Dec. 14, to London. Tea, 512.840 lbs.; soy, 90 packages; canes, 10 mils.

Per Waverley, from Canton, Dec. 18, to London. Tea, 313.000 lbs.; soy, 50 packages; sundries, 85; matting, 1,360 rolls; canes, 140 mils.

Per Harkaway, from Canton, Dec. 21, to London. Tea, 777,500 lbs.; sweetmeats, 8 boxes; matting, 470 rolls; sundries, 83 packages.

Per Standard, from Canton, Dec. 27, to London. Tea, 305,000 lbs.; soy, 50 packages.

Per Queensberry, from Canton, Dec. 28, to London. Tea, 767,000 lbs.; sundries, 528 packages.

Per Swallow, from Canton, Dec. 22, to New York. Tea, 154,334 lbs.; pongees, 3,130 pieces; sarsnets, 250; levantines, 250; crape shawls and scarfs, 13,385; raw silk, 70; raw silk, 2 piculs; cassia, 75; matting, 9,377 rolls; sweetmeats, 2,062 boxes; fire crackers, 25.034; fans, 213.

Per Haze, from Canton, Dec. 22, to New York. Tea, 246,521 lbs.; pongees, 4,575 pieces; sarsnets, 68; crape shawls and scarfs, 8,260; raw silk, 73; cassia, 807 piculs; matting, 3,600 rolls; sweetmeats, 1,148 boxes; vermillion, 20; chinaware, 6; fire crackers, 1,677; cassia oil, 80; anniseed oil, 49; star anniseed, 10.

Per Pekin (mail steamer), from Hong Kong, Dec. 15, to London. Silk, 1,989 bales. To the Continent, 525.

Per Jacob Bell, from Hong Kong, Dec. 26, to San Francisco. Tea, 2,817 packages; sugar, 1,820 piculs; rice, 6,500; oil, 600; opium, 4,000 taels; fire crackers, 1,000 boxes; China goods, 2,047 packages; mats, 300; pepper, 400 bags; silk, 57 boxes.

EXPORTS FROM MANILA.

Per Graham, Dec. 10, to Liverpool. Hemp, 4,160 piculs; sugar, 7,840; M. O. P. shells, 230. Treasure, $42,000.

Per Albuera, Dec. 15, to London. Hemp, 5,060 piculs; sugar, 8,010; sapanwood, 150; coffee, 70; cigars, 1,770 mils.; tortoise shell, 1,500 catties.

Per Alavesa, Dec. 20, to Liverpool. Hemp, 5,500 piculs; sugar, 5,300; sapanwood, 150; M. O. P. shells, 217; cigars, 30 mils.

Per G. B Carr, Dec. 20, to Liverpool. Hemp, 2,800 piculs; sugar, 9,750; sapanwood, 250.

Per John Land, Dec. 15, to Boston. Hemp, 7,860 piculs; sugar, 8,150; sapanwood, 400.

Per Masuelita, Dec. 20, to Sydney. Sugar, 5,030 piculs; coffee, 300; cordage, 250; cigars, 1,000 mils.

EXPORTS FROM SINGAPORE.

Per Syren, Dec. 23, to Glasgow.—Sago flour, 7,153 piculs; rattans, 63; sapanwood, 142; whiskey, 50 cases; timber, 3 logs; sundries, 18 packages.

Per D'Artagnan, Dec. 29, to Bordeaux.—Black pepper, 1,637 piculs; gambier, 1,688; ebony, 195; sapanwood. 349; gum benjamin, 5; cow-hides, 23; India rubber, 5, tortoise-shell, 2; bamboos, 40,000; Malacca canes, 9,000; shells, 18 packages; merchandise, 9; matting, 13; gum gutta, 3.

Per Xephias, Dec. 29, to London.—Gambier, 5,639 piculs; tin, 487; black pepper, 1,436; coffee, 1,765; sago flour, 688; white pepper, 130; pearl sago, 109; gum dammar, 140; sticklac, 54; cutch, 206; sugar, 342; sapanwood, 317; rattans, 256; gutta percha, 1,375; India rubber, 301; buffalo horns, 73; cow horns, 3; deer horns, 11; nutmegs, 7 cases; mace, 2; benjamin, 2; canes, 39,000; merchandise, 23 packages.

Per Humboldt to Boston, Dec. 26.—Gambier, 1,811 piculs; camphor, 180; cubebs, 22; India rubber, 348; gum dammar, 98; rattans 2,558; tin, 368.

Per Aristides to Falmouth for orders.—Sapanwood, 201 piculs.

Per San Francisco to Falmouth for orders.—Black pepper, 3,000 piculs.

Per Negotiator to Cork or Falmouth for orders.—Sapanwood, 246 piculs.

Per Hydaspes to Channel, for orders via Akyab.—Rattans, 227 piculs; buffalo horns, 96

Per Suzanne to Nantes via Samarang.—Tin, 399 piculs; gambier, 110; pearl sago, 195; sago flour, 11; white pepper, 200; black pepper, 60; coffee, 917; tapioca, 11; gutta percha, 102; gum dammar, 110; vegetable fallow, 4; rattans, 86; buffalo horns, 73.

EXPORTS FROM PENANG.

Per Ceylon, Dec. 25.—To New York: Tin, 3,132 piculs; sugar, 388; black pepper, 2,008; India rubber, 709; cutch, 660; tapioca, 1,272; buffalo hides, 124; nutmegs, 494; mace, 108; rattans, 100; tortoise-shell, 66; rattan chairs, 13.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: Dec. 19, Kent. From Liverpool: 15, Greyhound. From Cardiff: 19, Gharra; 21, Theodore Dill. From Toulon: 19, Souvenir. From Gibraltar: 18, Argo.

At HONG KONG, MACOA, and CANTON.—From London: Dec. 24, Mystery; 25, Whirlwind; 30, Bahia. From Liverpool: 24, Banian; 27, Mencius. From Cardiff: 13, Vier Gezusters; 15, Catherine; 17, Nicoline; 27, Hollandia, Lady Herbert, Neptune. From Shields: 27, Kosmos. From Sunderland: 15, Agamemnon. From Newcastle: 16, Saldanha; 25, Constantine; 29, Melancthon. From Hamburg: 17, Vesta.

At SINGAPORE.—From Liverpool: Jan. 3, Isabella, Parnett. From Swansea: Dec. 22, St. Augustin. From Cardiff: 22, Nederlanden, Orange. From Hamburg: Jan. 1, Wilhelmine. From Sunderland: 3, Renown.

SAILED.

From SHANGHAI.—For London: Dec. 22, Aerolite. For New York: 11, Pursuit.

From FOO-CHOW-FOO.—For London: Dec. 17, Merse. For New York: 17, Nabob.

From HONG KONG, CANTON, and MACAO.—For London: Dec. 25, Melbourne (str.); 12, Patna; 14, Gabalva; 18, Waveley, Harkaway; 27, Standard; 28, Queensberry. For New York: 22, Swallow. For England: 14, Indomitable, Athlatæ; 19, Alfred; 20, Miles Barton; 21, York. For Genoa: 22, Ricardo Smith. To Demerara, Dec. 22: Sebastopol,

From MANILA.—For London: Dec. 15, Albuera. For Liverpool: 10, Graham: 20, Alavesa, G. B. Carr. For Boston: 15, John Land.

From SINGAPORE.—For London: Dec. 29, Xephias. For Glasgow: 23, Syren. For Bordeaux: 29, Dartagnan. For Boston: 26, Humboldt.

From PENANG.—For New York: Dec. 26, Ceylon.

LOADING.

At SHANGAI.—For London: Bacchante, Camula, Ta Yung, Tung Yu. For Liverpool, Sir Isaac Newton. For New York: Sportsman, Star King.

At FOO-CHOW FOO.—For London: Bride of the Seas, Kinnaird, Patrician, Southern Cross. For New York: Florence, Sanetio Pauza. For Melbourne: Odin, Palmer.

At HONG KONG, MACAO, and CANTON.—For London: Herves of Alma, Oithona, Pruth. For Liverpool: Scawfell. For Havre: Maria Eliza. For England: Euxine, Mars, Minden, Congo. For New York: Flying Scud, Sam Russell, Cornet. For Havanna: J. C. Humphreys, Francis I., F. P. Sage, W. G. Susanna, May Queen, A. Thomdyke, Leonidas, R. del Oceano. For Melbourne: Aurifera, Pons Ælu. For San Francisco: Lotus, M. Whitridge, Rapid, Torrent. For Demerara Red Riding Hood.

At MANILA.—For London: Edwin Fox. For New York: Horizon, Wizard. For Cork: Mercia. For Cadiz: America.

At SINGAPORE.—For London: Knight, Lansdowne, Robert Small. For Liverpool: Mary Spencer, Ralstow. For Falmouth: John Hermann, Virginie. For Hamburg: Caroline. For Boston: R. B. Forbes. For New York: Mary Goodell.

At PENANG.—For London: Clara, Zenobia. For Boston: Edward.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: Tea: £2. 10s. Silk: £4. 10s. To New York. Tea: $12. Silk: $20. A fair business has been done in coast charters at previous quotations; but there is no demand for large vessels owing to the low prices at Amoy and Hong Kong. The St. Louis (American steamer) was sold by auction on the 11th Dec., for Mex. $8,700. The charters reported are—Congo to Glasgow at £3. 17s. 6d.; Magnolia to Swatow, 30 lay days, $3,000. Earl of Chester, Swatow and back, 50 lay days, $4.600.

At FOO-CHOW-FOO.—To London: £3. 10s. To New York: $12. A good business has been done and likely to continue. The Spartan has been chartered to London at £3. 10s.

At AMOY.—There is still a scarcity of small craft, which is very much wanted for coast work.

At HONG KONG, MACAO, and CANTON.—To London: £2. 10s. to £3. To New York: $9. A good business has been done since our last for Great Britain, United States, and San Francisco. For the coast suitable sized vessels are much required, large vessels being eschewed for that service. As rice and pulse are permitted to be exported from one part of the Empire to another an increased demand for handy foreign craft is expected. The charters reported are:—Oithona, Pruth, Jas Paton, all to London, at £2. 10s. to £3. The Flying Scud, to New York, at $9. The Rapid, to San Francisco, at $13,000, and several to Bankok, at 55c. to 60c. per picul.

At MANILA.—To London, £2. 10s. to £3. 15s. To New York, $8. There are no charters to report, there being no vessels available for Europe. The Houzon and Wizard are loading for New York at the above rates.

At SINGAPORE.—To London, £2. 15s. to £3. 5s. A brisk business has been done in the rice trade, nearly all the disengaged tonnage having been taken up. The charters are Mary Spencer, for Liverpool, and Knight, at above rates. The I. W. A. Lorenzen, for Akyab to Hamburg, at £3. 15s. The Ardencrag and Vortigern, at £3. 10s. to London, or £3. 12s. 6d. to Liverpool. The Irene, from Dalhousie to London, at £3. 10s.

PASSED STRAITS OF SUNDA.

From Japan to London: Dec. 12, Matanzas. From China to England and Continent: 6, Rhein; 11, Solent; 13, Lauderdale; 16, Valdivia. To New York: 15, Kashay; 19, Swordfish. To Port Adelaide: 7, Mtaris. To Melbourne: 6, Rosette; 14, Dennis Hill. To Havana: 11, Greyhound. From Batavia to Rotterdam: 7, Hebe; 22, Voornit, Hendrika. To Cocas: Harriet. From Singapore to England and Continent: 5, J. N. Cushing; 8, Asia; 12, Maria Louisa; 13, Beatrix, Aden; 22, Elizabeth. To Bordeaux: 19, Bougainville. To Bremen: 11, Clio. From the Continent to Singapore: 12, Renown; 18, Ferdinand Louis. From Bordeaux to Batavia: 10, Chateau dagol.

CASUALTIES, REPORTS, &c.

HONG KONG.

The British transport Carribean got on shore on a reef at the entrance of Hope Bay, but was soon got off with the assistance of two of H.M.'s gunboats. She was much strained, and will be obliged to dock. Two days after the Banian left Liverpool for Hong Kong, James McGill, A.B., jumped overboard whilst in a state of *delirium tremens*. A boat was immediately launched, but failed in rescuing him. The Hoangho was to be sold at Foochow on the 22nd Jan.

The hull of the French ship Deux Jemeaux, which stranded on the Kowloon shore, was sold by auction to Captain Tucker for $2.100.

The American barque Sea Nymph, from Puget Sound to Hong Kong, encountered very heavy weather on the 22nd and 23rd Nov., in which she lost main topsail, fore and topgallant masts. On the 25th, got struck by a heavy sea, which knocked the passengers' house to pieces, and nearly filled the deck with water. She afterwards had favourable weather until she arrived at Hong Kong.

Continental Intelligence.

FRANCE.

The *Moniteur* contains a decree instituting a medal commemorative of the expedition to China in 1860. It is to be of silver, bearing on one side the effigy of the Emperor, with the words "Napoleon III., Emperor," and on the other "Expedition to China, 1860," in legend, and in inscription the words "Takou, Chang-Kia-wan, Palikiao, Peking." It will be worn attached to a yellow riband, on which will be woven in blue, and in Chinese characters, the name of the city of Peking.

THE *Ariege*, which was to have sailed on Monday last for Cochin-China, has received counter orders, and 200 marines, which had been embarked in the morning, were disembarked in the evening. A grand expedition in Cochin-China is still spoken of, as also a march on the capital, which is supposed to be richer than Peking.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, Feb. 3.

Advices from Kiakhta, in the St. Petersburg journals, announce that the Russian merchants are taking all the necessary steps for turning to account the recent treaty with China. General Ignatieff, who left Peking on the 10th Nov., arrived at Kiakhta in fifteen days, the shortest time hitherto taken. On his arrival the church bells rang a peal, and a *Te Deum* was celebrated in the principal church.

For the third time within one week the thermometer at Moscow has sunk to below 30 degs. Reaumur (43 degs. below zero of Fahrenheit), and the quicksilver is frozen. In this city the cold is not so intense, but still it maintains its true Russian character, never being less than 20 degs. Reaumur, and at night sinking generally to 25 degs. To all outward appearance the severity of the winter indicates no change in the social condition of this metropolis. The usual morning fashionable promenades are held on the English quay and the Vasily Ostrow. The Neva presents an animated and gay scene with its thousands of sledges and skaters; the ice-mountains are in great vogue, and the Samoyedes who brought hither their reindeer for the carnival, drive a brilliant trade from their singular speculation. But the poorer classes have to suffer a good deal from the severity of the season. The rise in the price of provisions is unavoidably felt, and firewood is scarcely to be obtained at any price. Add to all this the great prevalence of several contagious diseases, such as scarlet-fever, croup, small-pox, and cholera. The charitable institutions do all in their power to relieve the distress of the afflicted, in which they are generously supported by the open-handed bounty of the rich aristocracy and the families of the wealthy merchants.

A long letter from Kiachta gives a full account of the public rejoicings manifested in that frontier town on the publication of the new Russian treaty with China, and the enthusiastic ovations paid to General Ignatieff on his arrival there from Peking on his journey to St. Petersburg. When he made his entry the bells of the churches struck up a merry peal, the clergy and a deputation of the merchants received him at the frontiers with every demonstration of respect and joy, and accompanied him to the Cathedral, where a *Te Deum* was sung in his honour, and a grand banquet given him in the evening by the grateful municipality, at which his health and long life were drunk and responded to with enthusiastic cheering and unbounded applause. The General performed the journey from Peking to Kiachta in the short space of fifteen days, and after recruiting his health and strength by a little repose there, continued his long and wearysome route over the snow-clad steppes of Siberia, and through the mountain passes of the Ural to Moscow, and thence by railroad to this city, where I need hardly observe, he is quite "the lion of the day."

From the further contents of the above-mentioned letter the merchants of Kiachta seem quite in earnest to profit to the utmost in their power by the favourable stipulations of the Chinese Treaty. Several emissaries have already been sent to Peking to select fit localities and to purchase the ground for the erection of stores and warehouses, as also to make the other needful arrangements for establishing themselves permanently in the Chinese capital. The merchants of Kiachta have further petitioned the Government for permission to found a special fellowship at the University of this city, to be given to the best proficient in the Chinese language, and to be called "the Ignatieff Endowment."

The account given by the writer, of the late events at Peking, contains chiefly what we had already learned from other sources. He animadverts with severity on the barbarous treatment of the prisoners at the hands of the Chinese, but at the same time he blames the Allies for the destruction and loot of the Emperor's Summer Palace. The winter had set in with great rigour in China, as may be gathered from the fact that on the 21st of November the snow was more than a foot deep in the streets of Peking. The Emperor was still living at his retreat at Dscheche, to which he fled on the approach of the Allies; the Empress exhibited greater courage, and remained at Peking during the whole of the late events, having signified her intention rather to perish in the city where she was born than to abandon it when in danger. The writer expresses his astonishment that the English, when dictating the terms of peace at Peking, should not have made a stipulation to be allowed to have their own burying-ground, a circumstance that appears to have been overlooked by Lord Elgin, for it might easily have been asked for, and would as easily have been granted. As it is, British subjects in future dying at Peking, will have to be buried in the Russian Cemetery in that city. It is true they will repose in consecrated ground, and receive a Christian burial; but as there is a difference between the religions of Russia and England, it would perhaps be more in accordance with the feelings of the survivors if the deceased British subjects were interred in a cemetery of their own Church.

In my last letter I mentioned that General Ignatieff had received the insignia of the Stanislaus Order. I have now to report that this officer and diplomatist has been decorated with another order, viz., the Second Class Grand Cross of the Imperial Order of St. Vladimir, accompanied by a most flattering autograph letter from the Czar, expressing his grateful appreciation of the General's negotiation and successful conclusion of the treaty with China.

Prince Orloff, another military diplomatist (who, it will be remembered, represented Russia and signed the Treaty of Peace in 1856 at Paris, for which he was raised to the dignity of Prince), has been permitted, on account of his age and infirmities, to retire from the many offices of trust he hitherto held, retaining only that of Aide-de-Camp General of the Emperor. He was President of the Council of the Empire, of the Cabinet of Ministers, of the Caucasian and Siberian Departments, and, finally, of the Central Committee for the Abolition of the Serfs. He was also full General of Cavalry. He is succeeded as President of the Council of the Empire by Count Bludoff.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Feb. 6.

Reports have been flying about in all directions this last week concerning Ministerial changes, a split in the Cabinet, resignations, &c. I have reason to believe that there is certainly some foundation for these rumours, though, perhaps, they may be exaggerated. If any Ministerial resignation takes place shortly it will in all probability be that of General de Casembroot, the Minister of War, whose opinion on various important questions is known to be at variance with those of his colleagues. It is even stated in well-informed circles that, in order to enable the General to resign his present office with greater facility, negotiations have been entered into for the purpose of offering him the important post of Governor-General of Netherlands India, by which the Portfolio for the War Department would necessarily become vacant. Should, however, such a change take place, it would be personally very disagreeable to the King, with whom the General is a great favourite of long standing.

Though the thaw set in here about the same time as in England, it has not tended much to mitigate the great distress occasioned by the giving way of the dykes. On the contrary, in many districts it has had the effect of giving free entrance to a larger body of water, as during the frost the ice in many cases formed a sort of natural dam, which is itself now converted into a fluid. Now that the ice in the Rhine is set in motion, the Waal and the Maas are greatly swollen, and have risen much above their standard depth of water. Government engineers are actively engaged everywhere in repairing the dykes and taking prompt measures for draining the inundated tracts, which, however, is a work of time, from the flatness of the surface peculiar to this country. There are still at least twenty thousand hectares of land now under water; several

Digitized by Google

towns and twenty-one villages are abandoned and uninhabitable; and twenty-two thousand families ruined. On the other hand, it is the pleasant duty of your correspondent to record that the charitable contributions of the richer classes amount to large sums, and still continue to flow in freely, not only in this kingdom, but from other countries where subscriptions have been received and committees organised by the respective Dutch ambassadors and consuls with great success.

By Royal decree, No. 69, the King has ordered the paddle-wheel steam sloop *Amsterdam*, lying at Willemsoord, to be put in commission for active service on the East India Station, and given the command to Captain-Lieutenant J. P. G. Muller, with Lieutenant H. E. Bunnik, R.N., as First Lieutenant.

In the new budget for the Colonial Department the pension of Mr. G. L. Band, late director of cultures in Java, has been raised from 6,000 to 7,500 florins, and that of Mr. P. Meyer, member of the Council of Netherlands India, to 10,000 florins.

The Government draft of a new Stamp Act has been printed for distribution to the members of the States-general. The clauses affecting mercantile operations impose a stamp of value —varying from five to twenty-five cents, according to the amount they represent—on bills of exchange, promissory notes, orders for payment of moneys, letters of credit, bank bills and other papers representing capital, as well the originals as the duplicates or copies of the same.

In my last letter I mentioned that a circular had been sent to the corporals of home regiments, inviting them to volunteer for service in the East Indies under very favourable conditions. I have now to report that a similar appeal is made to the sergeants and sergeants-major to exchange into colonial regiments for six years' service, with a bounty of 150 florins. In addition to this, a certain number of sergeants-major, who have served for at least two years in that capacity, and who volunteer for service in India, are to be promoted to the rank of sub-lieutenant, if able to pass the required examination for officers. Up to the present time sixteen such have already made application, creditably passed, and are consequently promoted. The number of soldiers to be sent out to India this year, to fill up the vacancies by death, disease, and enemies, has been fixed by Royal Decree at 1,500 men.

The King has conferred the insignia of Knight of the Order of the Netherlands Lion on the following gentlemen connected with India :—Baron N. Gasneb Tengnagel, Capt. R.N.; C. C. Mandt, health officer of the second class and head of the establishment at Plantoengang (Samarang); F. J. Beyer, overseer of the Government Factory at Sourabaya; C. F. W. Wiggers van Berchem, merchant at Batavia; J. M. Kuyp, Capt. R.N. and head of the Naval Arsenal at Sourabaya; and J. C. Steinmetz, Lieutenant-Colonel of Engineers, Indian army.

His Majesty has granted his royal permission and license to the Dutch subjects, Mr. P. J. Kervel, Belgian Consul at Sourabaya, and Mr. G. L. Dorrepaal, Belgian Consul at Samarang, to accept and wear the decoration of the Order of Leopold, conferred on them respectively by H.M. the King of the Belgians.

From official accounts received here from Java the crops in that island last year appear on the whole to be satisfactory. Thus, up to the end of September, the produce of coffee was 1,060,040 piculs, against 847,781 at the same period of the previous year; of tea, 1,919,469 lbs., against 1,844,068 lbs.; pepper, 113,620 lbs., against 44,870 lbs.; cochineal, 57,750 lbs., against 48,048 lbs.; and tobacco, 5,561,750 lbs., against 4,334,134 lbs. On the other hand, there was a slight falling off in sugar (1,204,185 piculs in 1860, against 1,288, 722 piculs in 1859), cinnamon (222,283 lbs. in 1860, against 253,992 lbs.), and indigo (901,207 lbs., against 1,038,396 lbs.).

The following table shows the comparative stocks of unsold Java coffee in the hands of the Netherlands Trading Company on the 31st of January of the undermentioned years :—

31 Jan.,	1856	485,756 bags.
„	1857	560,906 „
„	1858	642,575 „
„	1859	404.600 „
„	1860	327,239 „
„	1861	354,917 „

PASSENGERS ARRIVED FROM INDIA.

Per *Julie Claire*, Capt. van Oosteroom, at Amsterdam, from Batavia: Mrs. J. vander Schroof.

Per *Hollandia*, Capt. Wap, at Amsterdam, from Batavia: Messrs. S. and G. Serle.

Per *Noach*, Capt. Wierix, at Brouwershaven, from Java: Major and Mrs. Heesterkramp and family, First Lieutenants L. Honore and Wilshut.

Per *Helvoetsluys*, Capt. Voss, at Brouwershaven, from Java: Messrs. C. Knaap, G. van Luyk, and C. F. Baumgarten.

Per *Azia*, Capt. Molenaar, at Amsterdam, from Batavia: Mr. A. J. Nahuys.

Per *Baron van Hardenbrook*, Capt. Henny, at Amsterdam, from Batavia: First Lieutenant P. L. Fors, and Mr. F. Henny.

WEST INDIES.

DEMERARA.—Immigrant ships were coming from Calcutta in rapid succession. 1,318 immigrants had already arrived since Dec. 16, 1860. Several vessels were daily expected from India, and others from China. In respect to the proposed appropriation of £4,000 for the promotion of further immigration into this island, bills are in preparation in which a scheme will be submitted to the House for securing, by means of that appropriation, and also by a charge of one or two pounds, in respect of each immigrant allotted, in lieu of the present charges on employers, a specific guarantee and fund for payment of the principal and interest of loans, to be raised as now authorised by law, of £50,000 in each year, for the introduction of Indian or Chinese coolies, or both, to be indentured as agricultural labourers, on the terms now sanctioned by the existing Acts, except as to the repayment of the cost of introduction, which will be met, if the scheme be adopted, as above proposed. The annual deduction, now by law provided on account of each immigrant, of one pound from the general revenue, will be continued, and will be taken for the future, as it is at present, to represent the contribution from the general revenue of one-third of the expenses of immigration. All such deductions, on account of Indian coolies, will be carried to the return passage fund, as not by law provided, to secure the due fulfilment of that condition of that description of immigration. The Act of the 23rd Vict., chap. 30, providing for the introduction of Chinese women and children, will be continued in operation, with a view to realise the particular benefits contemplated by that measure from the introduction of that particular class of immigrants.

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

NEW YORK, January 22, 1861.

MONETARY AND COMMERCIAL.

Since our last report the markets for China and East goods generally have assumed more firmness, but without material activity. The demand for tea continues steady, and previous prices have been fully maintained. Coffee has become firmer, with more disposition to operate. Indigo, gunny goods, saltpetre, raw silks, &c., have undergone but little change, while holders have assumed greater firmness.

There is a better demand for vessels for Hong Kong and China with the freight offering. The peace with the Chinese has caused our markets to be swept of heavy cotton and drillings, and orders have been given to manufacturers up to the 1st and 15th of March next. Heavy brown shirtings have also been heavily engaged at 8¼c. per yard. Linsey is scarce and wanted, at full prices.

Mr. Gallagher intends despatching a small vessel to Japan, in a week or two. He has already received applications for freight and passages, and she is likely to go out filled with both.

TEA.—The last public sale of the season occurred on the 2nd inst., which went off with good spirit, the company being good, the biddings tolerably active, and the prices obtained were satisfactory. Since then the demand, though not active, has been steady, and under the influence of light stock prices have ruled firm. A sale of 1,200 chests and ½-chests of black were made on Saturday on private terms.

TIN has been held with more firmness, with small sales. Banca at 27c. cash, and 28c. time; and of Straits at 26½c. to 27c. cash, closing without sellers, under 28c. for the former, and 27c. for the latter.

HEMP.—The market is quiet, and we have no sales to report. Imports from January 1st to Dec. 31st, 1860—From foreign ports, 328 tons, 104,634 bales; coastwise, 14 tons, 10,689 bales; total, 342 tons, 115,323 bales; same time 1859, 2,259 tons, 99,795 bales.

GUNNY CLOTH.—There is no demand for large parcels. Standard sells in small lots at 9c. cash, and 10c. 6 months. Gunny Bags were dull; 150 bales have been sold in Boston at 11¼c. six months.

SPICES have been steady, but not active. 800 bags Pepper have been sold at 7c., and 125 ditto at 7½c.; about 2,000 mats Cassin at 17c. cash; and 10,000 lb. cloves on private terms; and 5,000 ditto, African ginger, at 7½c.

SUGARS last week were firmer, with an active market. Yesterday they were rather easier, though without change in prices. We have no sales of Manila to report. Sales of some 2,000 bags China were made last week, and a moderate cargo. Calcutta ditto, for refining, on private terms. The stock embraces about 34,500 hhds., 14,300 boxes, and 135,220 bags.

DRUGS.—Sales of 30 casks of East India castor oil have been made on terms equal to $1 per gallon; 100 cases ditto, and 16 ditto, manna, on private terms; and 40 cases East India castor oil, ditto, at 95c. cash, and 105c. 6 months. Opium has advanced, and is in good demand. Sales of 20 cases have been made at $5, closing at $5 25c., now held at higher rates.

COFFEE.—There has been movement in the market, and among the sales since our last we note sales of 2,200 mats of Java on private terms; 150 ditto at 16¼c. at 4 months; 105 ditto, Government ditto, at 16c. At Boston 100 mats Singapore at 14c. 6 months.

SEEDS.—Calcutta Linseed was held with more firmness, but sales have been limited. A sale of 800 bags was made at Boston at 150c. cash, from store; 2,700 ditto, and 500 pockets per *Ocean Rover*, to arrive at Boston, at $1 50c. cash. Parcels to arrive are in the best demand at present.

INDIGO.—The market is quiet, and without sales of moment.

Of the exports engaged for, China were about $79,000 in cotton piece goods.

Sales of 200 cases nutmegs sold to-day on terms equal to 34½ cash. Cassia closes at 17c. cash, and 19c. on time. Stocks, which were all active and firm in the forenoon, were heavy in the afternoon. We have no change in Stirling Bills or in money matters. Commercial Bills go at 104 to 105.

ARRIVALS.—Borneo, Edwards, at New York, Jan. 1, from Penang; Annie Bowen, Cheselrough, at Baltimore, Dec. 31, from Manila; Alfred Hill, Nagel, at Boston, Jan. 2, from Hong Kong; Arab, Eldridge, at Boston, Jan. 3, from Manila; Industry, Waters, at New York, Jan. 8, from Manila; Kremlin, Johnson, at Boston, Jan. 8, from Manila; N. B. Palmer, Low, at New York, Jan. 15, from Amoy; Fearless, Debens, at New York, Jan. 15, from Manila; Jan. 17, Reveley, from Padang; 17, Ann, from Amoy; Mandarin, from Foo-chow-Foo; 25, Kossack, from Foochow.

DEPARTURES.—Bark Benefactor, Corning, from New York, Jan. 2, for Hong Kong.

LOADING, JAN. 15.—At NEW YORK.—For Hong Kong: Daylight, Sarger; Barks Houyua, Cartwright; Penguin, Brereton. For Shanghai: Daylight, Sauger; Rainbow, Bassett.

At BOSTON.—For Hong Kong: Arab, Eldridge; Energy, Doare; Bark Kremlin, Johnson.

Parliamentary Intelligence.

HOUSE OF LORDS.

THE ADDRESS.—(Feb. 5.) With reference to China Lord Derby said there had been but one course open, to enforce compliance with our terms, and to show the world at the same time, by the moderation of those terms, that we were not, despite our great military power, disposed to take any undue or improper stand. He congratulated her Majesty's Government on the manner in which both the naval and military services had performed their duties and the great activity and ability with which they effected arrangements of a most difficult kind.

THE CHINA EXPEDITION.—(8.)—Lord HERBERT gave notice that on Thursday next he should propose the thanks of the House to her Majesty's forces engaged in the late war in China.

HOUSE OF COMMONS.

THE ADDRESS.—(Feb. 5.) The Address having been put from the chair, Mr. JAMES WHITE (late of China, and member for Brighton) rose for the purpose of commenting upon the omission of several important subjects from the Speech from the Throne. With respect to the paragraph in her Majesty's Speech about China, Mr. White observed he would content himself with remarking that any peace which was not purchased at the price of national humiliation would always be grateful to him, but an intimate knowledge of the Chinese character, from a residence of many years in that country, had taught him that the ratification of the Treaty of Tien-tsin and the Convention of Peking would not be regarded in any other light than that of a truce, and that it was a gross delusion to believe that stipulations so extorted would be faithfully carried out when the military pressure was removed. (Hear.) In his opinion the ignorance of our diplomatists had upon this, as upon previous occasions, only sown the seed of future Chinese wars, unless the Government, acting more wisely than it had ever yet done, sternly forbade the renewal of contests so disgraceful in everything except the conduct of our land and sea forces.—(6.) Admiral WALCOTT expressed the gratifying feeling with which he had listened to the flattering terms in which her Majesty had been pleased to express her commendation of both the navy and the army in the conduct of the campaign in China. He regretted that a greater opportunity had not been afforded to the navy of retrieving the most heroic efforts made on former occasions for the destruction of the Forts at the mouth of the Peiho.

RED SEA TELEGRAPH.—The CHANCELLOR of the EXCHEQUER gave notice that, in committee of the whole House, he would, on the 8th inst., move a resolution for the purpose of bringing in a Bill to amend the Act of 1858 relative to the Red Sea Telegraph.

RED SEA TELEGRAPH.—(8)—The House having gone into committee, the CHANCELLOR of the EXCHEQUER, referring to the agreement made between Lord Derby's Government and the Company, expressed his opinion that the guarantee of the Government must be understood to have been unconditional, and that the bargain was not affected by the failure of great part of this unfortunate line after the cable had been submerged. Legal difficulties had, however, arisen, and a Bill had been prepared for re-establishing the original understanding as a matter of good faith. In order to forward this Bill, he moved a preliminary resolution for the amendment of the Red Sea and India Telegraph Act. After some discussion, the motion was agreed to for the payment of the dividends at 4½ per cent. per annum, as originally agreed by Government.

THE CHINA EXPEDITION.—(8.)—Mr. SCULLY gave the following notice:—That upon the motion by the First Lord of the Treasury for thanks to the army and navy engaged in the recent operations in China, he would call attention to the statements of *The Times'* correspondent, that the Emperor of China's Summer Palace and its contents were "ruthlessly looted and destroyed" by the English and French forces, and would ask whether that palace was burned down by order of the French as well as of the English commanders?

THE THIRD CHINA WAR.

A Blue-book of 280 pages, has been issued. These documents have been published from time to time in our paper. The following despatch of Lord John Russell to the Earl of Elgin, dated the 16th ult., is, however, new:—

"Foreign-office, Jan. 16, 1861.

"My Lord,—I have received and laid before the Queen your Excellency's despatches to that of the 17th of November inclusive, reporting your proceedings at Peking subsequently to the restoration of peace; and I am to acquaint you that her Majesty entirely approves your conduct as explained in those despatches.

"Her Majesty's Government trust that the personal intercourse which you have had with the Prince Kung will have a salutary effect on the future relations between this country and China; and they greatly commend the measures which you took, on introducing Mr. Bruce to the Prince, to impress the Prince with a due sense of the important functions which that gentleman will henceforth have to discharge in China.

"Her Majesty's Government further consider that you rightly advised Mr. Bruce to defer fixing his residence at Peking until the spring; but there is no reason why a British Ambassador should not reside in the Chinese capital as free from molestation, and in the enjoyment of the same honour, privileges, and facilities, as an Ambassador of the Emperor of Russia; and while her Majesty's Government do not anticipate that any inconvenience will result from the temporary delay in the establishment of the British Mission within the walls of Peking, neither do they apprehend that when the season arrives for Mr. Bruce's residence in the capital he will be subject to any hinderance on the part of the Chinese authorities.

"I am glad to take this opportunity to instruct your Excellency to convey to Mr. Wade, to Mr. Parkes, and to all the gentlemen, whether belonging to your own immediate establishment or to those under the supervision of Mr. Bruce, whose talents and exertions have been called into action during the late events in China, her Majesty's Government's entire approval of their conduct in the several capacities in which your Excellency has seen occasion to employ them, and their hearty acknowledgment of the zealous and able manner in which they appear uniformly to have executed your Excellency's instructions, regardless of any danger to which, in doing so, they might be exposed.—I am, &c., "J. RUSSELL."

SPECIAL ORDER IN COUNCIL FOR JAPAN.

The following regulations have been announced in the *London Gazette* in connection with the order of January 23rd, 1860:—

I. The seventh and eighth Articles of the said Order of the twenty-third day of January, A.D., one thousand eight hundred and sixty, shall be, and the same are hereby revoked and cancelled, save and except as to all acts, matters, and things done under the seventh and eighth Articles of the said Order, or either of them, or which may hereafter be done under the same, or either of them, by her Majesty's Consul-General, or by any consul, vice-consul or consular agent in Japan, or by any person duly authorised to act as such, previously to the day next succeeding the day on which this Order shall be received by the Consul-General in Japan.

II. And it is further ordered that any charge against a British subject for a breach of any rules and regulations other than those relating to the observance of treaties be heard and determined by the Consul; and in all cases in which the penalty shall not exceed two hundred dollars or one month's imprisonment, the Consul shall hear and determine the charge summarily, without the aid of assessors; but when the penalty attached to a breach of any rules and regulations other than those relating to the observance of treaties shall amount to more than two hundred dollars or to imprisonment for more than one month, it shall be obligatory upon the Consul, before he shall proceed to hear the charge, to summon two British subjects of good repute, residing within his district, to sit with him as assessors, which assessors shall, however, have no authority to decide on the innocence or guilt of the party accused, and on the amount of fine or imprisonment to be awarded to him; provided always, that in no case shall the penalty be attached to a breach of rules and regulations other than those for the observance of treaties, exceed five hundred dollars, or three months' imprisonment; and provided further, that in the event of the said assessors, or either of them, dissenting from the conviction of the party accused, or from the penalty of fine or imprisonment awarded to him by the Consul, the Consul shall take a note of such dissent, with the grounds thereof, and shall require good and sufficient security for the appearance of the party convicted at a future time, in order to undergo his sentence or receive his discharge; and the Consul shall, within twenty days report his decision, with all the particulars of the case, together with the dissent of the assessors, or either of them, and the grounds thereof, to her Majesty's Envoy Extraordinary and Minister Plenipotentiary and Consul-general in Japan, who shall have authority to confirm or vary, or reverse the decision of the Consul as to the said Envoy Extraordinary and Minister Plenipotentiary and Consul-General may seem fit. Provided always, that if an appeal shall be entered against the decision of the Consul, no such report shall be made to her Majesty's Envoy-Extraordinary and Minister Plenipotentiary and Consul-General on the ground of the dissent of the assessors, or either of them, but the appeal shall be prosecuted in the manner hereinafter ordered.

III. And it is further ordered that in any question relating to the observance of treaties or of rules and regulations other than those for the observance of treaties, a report of any and every decision made by a subordinate Consular officer, with or without the aid of assessors, shall be sent in by such subordinate Consular officer to the Superior Consular officer of the district, and that on the receipt of such report the Superior Consular officer of such district shall proceed without assessors to revise such decision as to him may seem fit, and such revision shall be for the purpose of the same recited Order, and of this Order the same effect as if the case had been originally heard and determined by such Superior Consular officer with or without the aid of assessors, provided always that in any case in which the assessors, or either of them, shall dissent from a decision of a subordinate Consular officer, such decision shall not be subject to revision by the superior Consular officer, but in the event of no appeal being entered, as aforesaid, shall be submitted to her Majesty's said Envoy Extraordinary and Minister Plenipotentiary and Consular General for revision in the same manner as if such decision had been originally made by the superior Consular officer.

IV. Provided always, and it is hereby further ordered, that her Majesty's said Envoy Extraordinary and Minister Plenipotentiary and Consular General, shall at once at least in every year report to her Majesty's Principal Secretary of State for Foreign Affairs his decisions on all cases heard, and heard by him under and by virtue of this order, together with the particulars thereof.

V. And it is further ordered that this Order shall be read and construed with and as a part of the said recited Order of the 23rd day of January in the year of our Lord, 1860, which, save as by this Order, is otherwise provided, is to remain and continue in full operation and effect in all particulars. And the Right Honourable Lord John Russell, one of her Majesty's Principal Secretaries of State, is to give the necessary directions herein accordingly.

Rear-Admiral of the Blue Robert Spencer Robinson has been appointed by the Admiralty as successor to Rear-Admiral Sir Baldwin W. Walker, K.C.B., in his office as Controller of the Navy.

Naval and Military.

PROMOTIONS FOR CHINA.

The following promotions of officers employed during the campaign have been awarded by the Admiralty; the commissions dating the 30th of January, 1861:—

To be CAPTAINS.—Commanders Frances Marten and William A. J. Heath.

To be COMMANDERS.—Lieutenants Webb Elphinstone Stone, George Doherty Broad, Arthur John Innes, George Dacres Bevan, and John Crawford Wilson.

To be PAYMASTERS.—Assistant-Paymasters Frederick Penfold, Richard Francis Wily, and John St. John Wagstaffe.

The three undernamed engineers have also been promoted to be first-class assistants:—Mr. William H. Elliott, Mr. James A. Wilson, and Mr. Edward Ingledew; and several engineers of different classes will receive a step in rank on their passing the required examination.

An Admiralty circular has been issued directing that the practice now observed of paying batta and house-rent allowance to officers of the royal navy serving on the East India and China station under the regulations of March 10, 1852, shall cease with respect to all officers hereafter appointed to or employed on that station.

We are gratified to be able to announce that the call for subscriptions to the memorial to the late gallant Captain Nicolas Vansittart, C.B., who commanded the *Magicienne* at the attack of the Peiho Forts last year, and who subsequently died from the wounds he received during the operations, has been fairly responded to.

It having been in contemplation for some time past by the Lords of the Admiralty to supersede, in a great measure, the employment of horses in her Majesty's dockyards by the use of Bray's steam-traction engines, some important improvements have been suggested in their manufacture, which are now being carried out in the construction of an engine on the improved system, to replace the one delivered by the company for the service of the dockyard at Woolwich.

Lieutenants Yeatman, Harrison, and Bainbridge, who received their commissions in the Royal Artillery on the 1st of January last, are ordered to embark during the present week to be attached to Major Desborough's and Captain Govan's batteries of the 1st brigade now stationed in China.

Rear-Admiral Sir Baldwin W. Walker, K.C.B., was officially appointed on the 6th to be Commander-in-Chief at the Cape of Good Hope and West Coast of Africa stations, vice Rear-Admiral the Hon. Sir Henry Keppel, K.C.B.

Rear-Admiral the Hon. Sir Henry Keppel, K.C.B., was on the same day appointed Commander-in-Chief on the South-East Coast of America station, vice Rear-Admiral Sir Stephen Lushington, K.C.B., whose period of command has expired.

In addition to the above Vice-Admiral Sir James Hope has been instructed to name the most eligible officers in the undernamed ranks for advancement:—Three second masters to be promoted to master, three assistant-surgeons to be promoted to surgeon, three warrant officers of second-class to be promoted to first-class, three warrant officers of third-class to be promoted to second-class, and three carpenters' mates and six petty officers to be recommended for warrants.

An Admiralty order was yesterday received at Woolwich, directing her Majesty's paddlewheel steam vessel *Medusa*, formerly employed as a packet vessel in the Mediterranean, to be converted into a tug-vessel for the service of Government. The boilers and machinery having been overhauled, are found to be in tolerable condition, as well as the state of the ship generally; the necessary repairs and alterations, according to the surveyors' estimate, will consequently not exceed £2,000.

We (*Army and Navy Gazette*) have had several questions put to us respecting the new Indian arrangements, consequent upon the reconstruction of the European local army. We believe that the old regiments to be changed into regiments of the line will only alter their number, retaining all their distinctions and peculiarities. The 1st Bengal Fusiliers will thus be the 101st of the line; but they will, we understand, retain the designation of Fusiliers and the honourable inscriptions, from Plassey downwards, which attest over one hundred years' of gallant service. The local Engineers will form part of the Royal Engineers, just in the same manner as the local Artillery will be united with the Royal Artillery; but as regards the existing officers, two separate lists, for purposes of promotion, will be kept up, and promotions will take place in each list as vacancies arise in that particular list only. No officer of Royal or Indian Artillery will have his promotion retarded or accelerated by the change, except in the first instance; when, owing to the increased number of field officers to be borne on the establishment of the Royal Ordnance Corps, some steps upward will take place in the Indian branch of the service. Several officers appear to be naturally anxious respecting the qualifications for the new Staff Corps. As regards the educational qualifications, they are not, we believe, yet settled; but the qualification in the service is, that the candidate shall belong to a regiment in India, shall have spent three years in the army, of which two must have been in India. We understand that the warrants settling these changes will shortly be made public in an official shape.

A detachment of the 2nd battalion 1st (the Royal) Regiment left Chatham for Cork, to join the depot companies at Birr. Detachments of the 1st Battalion 5th Fusiliers, 1st Battalion 6th, 37th, and 54th Regiments, also left Chatham to join the depot battalion at Colchester, and a detachment of the 1st Battalion 2nd Queen's proceeded to join the 6th depot battalion at Walmer.

The three vacant good service pensions placed at the disposal of the Duke of Cambridge have been conferred by his Royal Highness on Colonel the Hon. Augustus Frederick Foley, late of the Grenadier Guards; Colonel Rodolph de Salis, 8th (the King's Royal Irish) Light Dragoons; and Colonel Archibald Inglis Lockhart, C.B., 92nd Highlanders.

LONDON, WEDNESDAY, FEB. 13, 1861.

RETURN OF THE JAPANESE AMBASSADORS TO YEDO.

THE Japanese Ambassadors have made their tour of the world and returned safe to their fatherland. Travelling is universally acknowledged to have an effect in purging the mind of its narrowness and foolish prejudices, and we are much mistaken, if this circumnavigation of the civilised world by the Japanese Envoys has not had some such effect on their minds. Our American brethren have had them all to themselves, and therefore we must expect, whenever the facts come to light, that their peculiar institutions have had an undue influence on the Eastern mind. But we cannot agree with a correspondent of the *Hong Kong Daily Press*, that "nothing more will be heard "of the men and their mission." We very much mistake the practical character of the Japanese, if, in spite of their usual exclusiveness, they do not make a good deal out of this expedition to the Far West. The Japanese are endowed with a very large proportion of common sense and practical wisdom; they know how to adapt Chinese art and science to their own purposes; and when they see the superiority of European art they will not fail to assimilate whatever they can, and appreciate the rest. Had the Ambassadors visited Europe they would have had a longer story to tell, and they would have seen the parent of all that Western civilisation, and what is most important, they would have had their wits engaged by the labour of comparing the various phases of foreign life and manners, by which process alone they can arrive at perfectly correct ideas. When we hear of diaries kept, and notes taken in their general intercourse with foreigners, we cannot suppose that their jottings of the American world will go for nothing. We must remember that neither the Chinese nor the Japanese publish gazettes of the receptions given to returned statesmen, although, without a doubt, as they went away by Imperial command, they were received with Imperial favour on their return. We shall expect a good deal to result from this Japanese embassy to America, and if we properly urge the subject on the attention of the authorities at Yedo, we shall soon see an Ambassador in England.

The visit of the Siamese Ambassador has done much to enlighten Siam in European government and manners, and it is only reasonable to expect that a like visit by the shrewd Japanese will convince them of the importance of keeping on good terms with us. It is true that the Japanese mind is very like the Chinese in that they have a reverence for antiquity and a dislike to innovation. Since the time of old Kæmpfer, the faithful chronicler of Japan, few apparent changes have been made, and his book often describes accurately the state of things which exists there now, as it did more than two centuries ago. The Japanese know, too, from their long intercourse with the Dutch, what the condition of Europe is in respect of science and government; they are an inquiring people, and are fond of learning the true state of the case. They are rising fast to their proper position; the Western Ocean men are too strong for them, and they intend to rise with the times. It was one of the wise maxims of Confucius, to adapt onesself to the circumstances of one's position; he followed that rule, and was wise in his generation. The Chinese admirers of the sage seemed to have overlooked this, and having once fixed the course they were to pursue, they ran on, unheeding the dangerous effect which a collision might produce. The same text-book is in use in Japan, the same earnest words are studied by the young *literati* there, but, as it seems, with widely different result; and one of the causes of this is, that the practical islanders drink in the meaning, while their neighbours on the Continent rest satisfied with the form and the words alone of their great philosopher. There is more mental activity and intellectual life in Japan than in China; and when the hour comes the men will not be wanting to adopt any European improvement, or to adapt Western art to the wants of their countrymen.

The correspondent of the *New York Herald* gives the followt ing account of the arrival at Yedo. It will be observed tha- no allusion is made to the coolness of the reception which is mentioned in the Hong Kong papers:—

"I send by the first opportunity the announcement of the safe arrival of the Japanese Embassy at this port, one hundred and thirty-three days from New York. The entire party have enjoyed the most perfect health, and have returned in a most presentable condition. For almost the only time since their departure from our shores, when they came in sight of Fusi-jamma, the 'Blessed Mountain,' their countenances displayed something analogous to wonder and satisfaction; and, indeed, it was a joyous sight, even to the mariner whose ties of kindred and affection were in other and distant lands. The immense bay was studded with myriads of sails, whose white canvas glittered in the sunbeams, and whose graceful forms skimmed the waters as if instinct with life. Modern marine architecture can boast no greater triumph than these beautiful boats. For miles under slow steam we proceeded up the bay, the shore developing new and picturesque scenes as we advanced, until suddenly we opened the immense and wonderful city, which he that has not seen has not seen a wonder at least equal to the renowned and fair city of Seville. Our anchorage is seven miles distant from the shore, a very material objection either to safe or frequent visits, as the weather is very cold and the winds are very fresh.

"On the 10th the Ambassadors and the whole septuagint—kamis, no-kamis, cooks and porters—were landed in their own boats, the yards were manned, the howitzers were fired, and the band playing in the best style of Herr Rimbach, the leader, our own American air, 'Home, Sweet Home,' and thus ended the last act in this eventful drama. In the evening many presents were sent aboard, consisting of *cosa de comen y beber*, among which predominated the favourite tipple of the facetious and jovial Falstaff, and here called sakee. Those who have visited the shore to-day all agree in the vastness of the city, and describe it as built on lofty hills, ascended by many steps and traversed by noble rivers, spanned by elegant bridges. The style of architecture is not imposing; the palatial residences are surrounded by high walls, enclosing vast areas of highly cultivated gardens, fish ponds and ornamental trees.

"The residence of our able and excellent Minister, Mr. Harris, is one of the ancient temples, which he has made quite comfortable by the addition of many American notions. For the officers of this ship a temple has been prepared. Horses, norimons and guides have also been placed at their disposal, and thus far there has been evinced a disposition to reciprocate the civilities extended to the Japanese Ambassadors while on their visit to the United States.

"A Prussian fleet is now at anchor in the Bay of Jeddo, having aboard a Minister charged with the negotiation of a treaty of amity and commerce. Thus far but little progress has been made, the Japanese caring but little to extend the circle of their commercial acquaintances. It is presumed, however, that they will again become the victims of necessity."

ROMAN CATHOLIC APPROPRIATION IN CANTON DEFENDED BY THE BRITISH ARMY CHAPLAIN.

How charming it is to see a little pure philanthropy! How delightful in this age of iron to see an active display of love for a neighbour who dwells at the other end of the world; and how much more laudable is it when exhibited, not by an individual, but by a great nation. Such instances are so rare that the world is scarce likely to credit the fact that France is now exerting itself to spread religion and piety by treaty. Let none be so misguided after this as to suppose that the French are not a religious people. True, they do not in their own persons exhibit many of the "fruits of piety;" perhaps they think that it need not, like charity, "begin at home"—at any rate, they are carrying it abroad. England and America may after this blush at their puny efforts to evangelise China. *They* do it by means of associations, or the work is left to individuals; while France—that eminently pious nation—stipulates in her treaties for places of worship according to her own creed. Besides, she does this so modestly, with such grace, with such purity of motives, that we find even our English army chap-

Digitized by Google

lains are enchanted at the spectacle. She only asks for the site of Governor Yeh's Palace, in the new part of Canton, for a few paltry acres on which to build a cathedral; and, in order to ensure the perpetuity of the grant, it is ceded to the French, who have placarded it as "Terrain Français." Of course none but the most illnatured would be the least likely to notice either that the French have, by this means, accidentally appropriated some of the most valuable land in the city, or that somewhat less than half-a-dozen acres would suffice to build a cathedral upon.

Unfortunately, however even the best of motives may be misconstrued: and the French Romanists had certainly in their zeal laid themselves somewhat open to suspicion. With the annexation of Savoy and Nice still fresh in the remembrance of the world, the notion got abroad that "La logique inexorable des faits," which justified the spoliation of Italy, was quite as good a pretext for the appropriation by the French of a most valuable little slice of territory, under the cloak of Propagandism. And now, from a most unexpected quarter, there steps upon the scene a champion, armed for the fray. One of the chaplains of the British forces at Canton—the Rev. Mr. Crowther—writes to the editor of the *Hong Kong Daily Press* to enlighten the public in general upon "the much talked of, "and little understood, subject of the partial compensation "made to the Catholics of Canton for the destruction of the "religious edifices which formerly existed in that city." A little further on he becomes more explicit, and informs us that "there were nine churches in Canton, built, for the most part, "by Louis XIV. All these, together with twenty-six other "churches in the neighbourhood, were destroyed in the cruel "persecution which raged in 1732."

We pause for a moment to congratulate the reverend gentlemen, and the French Roman Catholics generally, on the ingenuity of this plea. Because some Romanists were persecuted in 1732, the French are to receive a piece of valuable land in 1860. We fail to perceive the logic of the answer. We imagine as strong a claim might be made by the French to any part of England. We know that at the time of the Reformation, when the Church of Rome lost the great bulk of the people of England, it lost its endowments with them. Why should not France claim compensation for this, and gently request us to give up St. James or Hyde Park; which might be enclosed and marked out by notice-boards as "Terrain Français" by way of "partial compensation" to the Roman Catholics? Such a defence as this renders us suspicious. An act that needs so poor a piece of sophistry to excuse it cannot be one of pure philanthropy. It is, in truth, as impudent a piece of aggression as even France has of late perpetrated. The mode, too, in which it has been effected renders it all the more discreditable. Spoliation and oppression are never so detestable as when carried on under a pharisaical pretence of care for the interests of religion. On reading a little more of the letter already quoted, we find it unblushingly asserted that "this "ground has not been granted to the French or for French pur-"poses. The present Bishop of Canton happens to be a "Frenchman, but the next may belong to another nation, &c." We hope his holiness or the French Emperor will perceive the hint contained in these last words. The Bishop of Canton is not of necessity a Frenchman. Why may not the next one be a British subject? and then, who so fitting as the champion of the Franco-Papal aggressions in Canton? But while we admire the dexterity with which the rev. chaplain throws in a word or two for himself, we cannot accept his argument. In our last paragraph we were so unfortunate as to be compelled to quarrel with his logic. This time we demur to his assertions. He can hardly expect to persuade us that the French have nothing to do with the land which they have placarded as their own. He forgets that it is not marked "Terrain Ecclesiastical," and he takes it for granted that others will forget it too. We advise Mr. Crowther to ascertain the truth of the next assertion he may hazard, or if he have any very great partiality for incorrectness —we do not say falsehood,—to make sure that the reputation is not quite so obvious.

The rest of the letter consists of a somewhat uncalled for laudation of the Jesuit missionaries in China; and winds up, *apropos* of nothing in particular, with a quotation from Horace's Ars Poetica. This, perhaps, is thrown in by way of showing that the rev. chaplain is well qualified to succeed to the See of Canton, as far as learning may be a requisite in a Roman Catholic Bishop. We are very sorry not to be able to leave *all* the discredit of this piece of spoliation to rest upon Mr. Crowther and his co-religionists. If we could do so we would willingly gratify his taste though we think it somewhat peculiar. But the facts are not to be put aside. It is clear that the act is due to French aggression, and that religion is but the decent pretext which fails to cover a foul proceeding. Had it been a question merely of a gift from the Chinese to a particular sect, we should have thought it hardly worth while to notice the affair, whatever our opinion on the subject might be. As it is, the case wears a very different aspect; and while it presents us with the spectacle of a British Army Chaplain so deluded by the spirit of religious bigotry as to come forward to defend oppression and wrong, it appears to us to call for an energetic expression of indignation both from the press and the public in general.

PROGRESS OF THE REBELLION IN CHINA.

THE rebels in China are still progressing. By the last mail we have a very fair and well-written account of a visit to them by the Rev. Griffith John. Some of the evidence which he adduces certainly tells in their favour, but if we could judge the whole movement by a few of the individuals, we should be under the necessity of either claiming too much for them, or too little. We might either hold them up as Christian patriots —or, when we judge them by their lowest adherents—denounce them as murderers and thieves. This cannot, however, be the proper course to take. We must look at the insurgent doings as a whole; we must judge of their various practices as they stand patent to our view. We have nothing to do with their intentions, but only with their plainly spoken words—that is, their published edicts, and their positive and official acts. These tell a tale which none can gainsay. Still we shall rejoice if the rebel character can be cleared, and if they can be made to understand and hold the Bible, for then we may hope for a beneficial change in their policy; but at present it looks very like a war of extermination, and not of peaceable intentions.

Under the head of "Correspondence" we published in our last issue a letter from Mr. Scarth, which partakes of the nature of a critique upon an article which appeared in this journal on the 12th January. The subject upon which we appear to be at issue with him is the character of the rebels in China. We have brought our charges against them, and he complains that we have neglected to give proper weight to the good points of their character. Without quarrelling with Mr. Scarth on minor points, we would ask him what possible advantage he or the rebels can gain by telling us all the amiable qualities they possess, or all the Christian doctrines they profess, after we have learnt all the abominable practices they sanction, and the blasphemous creed they promulgate. The facts of their history address themselves to two classes of individuals —to the politician, and to the theologian or the Christian. The one looks for good government as the end of a good revolution, and the other looks for a pure creed in place of a corrupt one. Do we find these things among the rebels? Have they established a beneficial *regime?* Have they not sacked the places into which they came, and appropriated the goods of the inhabitants, and killed the owners without mercy? And when their treasure was spent, have they not advanced on new expeditions with the same end in view? So much for the general phase of their plans and projects, to which we have added the opinion of an eminent diplomatist—Lord Elgin—who, although he received statements from his interpreters, did not necessarily form his judgment even after the model of theirs. We have not the slightest intention of entering into the private virtues of the rebels, or of asking what they intend to do ultimately, or at some future time, in the way of Government, properly so called. Possibly the King of Naples is a respectable and worthy person in his private relations, and intended some day or other to shut up his prisons and lay aside his thumb-screws, but we fear that general opinion and common sense say he had better retire.

If the rebels *are* thieves and murderers, they are rightly called *tsih* (which means banditti), and after having sufficient evidence, which we believe we have, of their answering to this description, there must be an end to further argument on the minor points of their morals or intentions. In fact, it would be farcical to enter upon the subject. When we come to the theological side of the question, we have to consider, not whether they say and believe many truths found in our sacred Scriptures, but whether they hold the fundamental truth of Scripture in its entirety and purity. We think not; for when they divide the honours due unto Jesus Christ only with Him and their deceased leaders, and speak of commissions

Digitized by Google

from Heaven to exterminate, we imagine they are preaching contrary to the Scripture, which saith, "My honour will I not give to "another;" and another which saith, "I came not to destroy men's "lives, but to save them." And to strengthen our position we have the dictum of St. Paul, "Though we, or an angel from Heaven "(witness Hung-sin-tsinen, the rebel chief) preach any other "gospel unto you than that which we have preached unto you, "let him be accursed." We are, perhaps, very uncharitable, but we cannot help feeling great want of confidence in a movement which has heretofore wrought so little good and worked so much harm. We cannot be said to have given the Bible to the rebels; a copy somehow fell into their hands, and they have adapted it to their military projects, and we doubt not in the first instance with sincerity; but when attempts have been made to enlighten them on its doctrines, they were either utterly unconcerned or too pre-occupied with their own views to give heed to instruction. Mr. Scarth's prepossessions in favour of the insurgents lead him, we fear, into wrong conclusions. He seems to think that because we find fault with the rebels we mean to praise the Imperialists; this is by no means the case; we consider the Imperialist army not a whit better than the insurgent forces. They are both of the locust species, for they eat up the fruits of the land wherever they appear. The question now is, whether we can in any way aid the enemies of our covenanted friends. As soon, indeed, as they show themselves capable of forming a Government, and of establishing themselves for peaceful pursuits, and present themselves, *de facto*, as a separate Power, whether they be recognised as such by the Imperial Government or not—we can treat with them, and not until then. As long as they are floating about without any established order and rule, and devastating the country like a scourge, we cannot look upon them as deliverers of an oppressed people, and cannot hope to see them resuscitate the old Ming dynasty, which has been two hundred years defunct.

CHINESE EMIGRATION.

THE prospects of a widely extended amount of emigration from China open out a field of enterprise calculated to benefit many countries and classes. Foremost in the scale the Chinese Empire will primarily benefit by thinning out its dense ill-fed and ill-paid population. Secondly, the people themselves who leave China will have opened up to them a better field for industry, with a chance of saving money, while they are at the same time well cared for and fed. Thirdly, the colonies and countries at present deficient in labour, will have opportunities afforded them of developing their industrial resources which have hitherto been retarded by this want of labour. And, lastly, the shipowners will benefit by the freights thus afforded for many a vessel which has hitherto been kept idle or worked at a loss. There are so many countries ready to receive Chinese, and which afford suitable fields for their introduction, that ere long we may expect to see the Celestials much more generally spread over the globe. The isolation in which they had long kept themselves has now been broken down. The coolie trade has been legalised; women are permitted and encouraged to leave with the men, and there is no longer that dread of sea voyages which long prevailed. The wealth acquired by Chinese as miners or traders in Australia and California has led others of their nation to follow their footsteps. The tyrannical crusade attempted against their introduction into Australia has dropped, and even the Americans in California are more tolerant to them. Whether it be in railroad work, mining, as herds and shepherds, in the culture of tropical products, or in a hundred other employments, there is ample room for them in South Africa and Australia, in the West Indies, in Brazil, and other parts of South America, and in British Columbia. In Cuba, Demerara, Jamaica, and Trinidad, they are sure to give satisfaction. We look forward especially to the benefits that may be derived from their employment in cotton cultivation in Queen's Land, Natal, and British Guiana. For this light occupation they are especially adapted, and their labour thus applied would bring in most profitable returns.

THE ALLEGED WHOLESALE ADULTERATION OF TEA.

The question of Adulteration in food, drinks, and drugs, has of late become a great bore. It has been dinned so repeatedly into the ears of the public by a few parties having special and individual objects to serve, that the cry of "wolf" has ceased to be regarded. A few scientific analysts and microscopists, anxious to obtain place and notoriety, have, by all kinds of exaggerated statements in self-constituted "commissions," before Parliamentary committees, and in works on adulterations, quite outstripped Accum's "Death in the Pot,' insomuch that were but one-half of the allegations made true, the wonder would be that the bulk of our population survived the insidious attacks upon their health and longevity. Unfortunately for the correctness of the statements of the adulteration doctors, the returns of the Registrar General completely disprove this shortening of life, by either quick or slow poisoning. On the contrary, there has been a steady improvement in the general health of the public, and the average term of life has been prolonged instead of shortened.

Notwithstanding the various attempts to keep up an agitation on this question of Adulteration, despite the Report of Mr. Scholefield's Parliamentary Committee, the recent Act introduced, and the fitful attempts to astound the public by extraordinary statements of fraud and falsification, the subject had almost died out, when the public has again been startled out of its peaceful contentment by wholesale denunciations of alleged adulterations in TEA, and made, on this occasion, through a channel calculated to do more mischief to trade interests than the usual mediums of publicity.

At the ordinary evening meeting of the Society of Arts on the 23rd ult., Mr. Leonard Wray, a gentleman of literary reputation and great colonial experience, read a very interesting paper on "Tea and its production in various countries," going into the history of its cultivation, manufacture, consumption, &c., and suggesting the policy of extending the culture more generally over India and other parts of the world. This would have gone off very satisfactorily had not Mr. Wray been impolitic enough to start with a wholesale denunciation passed against tea-dealers and Chinese merchants, and that not from any personal knowledge of the matter, but from the isolated opinion given him by Mr. Wm. Green, a gentleman engaged in Mr. George Moffatt's house. As the subject has attracted a large share of attention in the trade and among the general public, we think it right to give the charge and refutation more in detail than we should otherwise have done. Mr. Wray's paper (delivered, be it remembered, before a large meeting of an influential society, and given very extended circulation to in the columns of their weekly Journal) commenced with the following preliminary allegation:—

"When we consider the quantity of tea consumed in the British dominions, and the money value which that quantity represents, we must be struck with the great commercial importance this article has attained. Yet I believe it is universally admitted that of late years, as the supply has gone on increasing, so has the quality continued to fall off, until we can at present put but small faith in the purity of nine-tenths of the tea sold in this country! Our millions demand an ever increasing quantity of cheap tea; and accordingly an article is made up and sold to them, at an apparently low price. But what do the buyers actually obtain for their money? It is the semblance of tea, but not the reality; its shadow, but not its substance. The adulteration of tea is on so monstrous a scale, and the result is so eminently injurious to the health of our people, that it becomes an absolute duty to the public, not only that these fraudulent practices should be thoroughly understood, but that vigorous measures should be instituted with a view to remedy this great and crying evil."

But this was not all, for he subsequently returned to the charge more in detail, in the following words:—

"I should be much pleased if I could say that the tea consumed in this country is pure and unadulterated; unhappily, I am compelled to present to your view a picture the very reverse of this.

"From time immemorial, the Chinese have been in the habit, more or less, of adulterating their teas, but, until a very recent period, those teas were consumed at home, and never sold to Europeans. They, however, observed that the European dealers residing in Chinese ports practised this little 'art and mystery' themselves, upon almost all the teas they bought, previous to shipping them. Now 'John Chinaman,' who is an observing and highly imitable animal, seeing this interesting and lucrative business transacted so extensively under his very nose, and that, too, from month to month, and year to year, began to take counsel with himself, and speedily arrived at the conclusion that he was a great fool for surrendering this very pretty 'pigeon' to such bungling 'foreign devils.'

"We shall be in a position to appreciate the zeal with which our celestial friends set about remedying this poaching upon their own domain, when we find that, in 1859, of the tea purchased by dealers in China, seven-eighths was adulterated. The fact is, 'John Chinaman' had 'improved the occasion,' and entirely taken this little 'pigeon' out of the European trader's hands, by selling him teas largely adulterated it is true, but certainly most artistically got up. It mattered not whether the teas were purchased in Canton or in the northern ports, the beautiful ingenuity of the Chinaman was as apparent in the one as in the other, and our circumvented traders groaned aloud. What was to be done? No one could tell, so they called a 'meeting' to consider the subject, and, on the 18th of April last, they met and compared notes. The immense quantities of 'lie' tea prepared for admixture by the Chinese, were mentioned; the cargoes of unsound leaf brought from

Digitized by Google

Japan, to be 'doctored' and mixed with other tea, were enumerated; and an interesting account was given of three plants, the leaves of which are largely employed in adulterating teas. Those are, *Gynura auriculata*, a drug which is stimulant and slightly acrid, *Ardisia Crispa*, and a common mint. The meeting came to the doleful and indignant conclusion that seven-eighths of the tea they purchased was grievously adulterated, and that 'John Chinaman' was a great rogue.

"But in good truth this is no joke, especially when we consider that these seventy-six millions of lbs. (seven-eights of which is adulterated), has yet to pass through the hands of our own manipulating dealers. What it undergoes during this perilous ordeal we can only guess at, although the reports of the excise officers, and the cases in the several magistrates' courts, give us a faint idea of the nefarious practises resorted to. It was but a week or two ago that upwards of 2,000 lbs. weight of pure English 'lie' tea was seized by the officers, who admiringly pronounced it to be 'splendidly got up, and calculated to deceive the eye of anyone.' When this 'manufactory' was entered by the officers, its enterprising proprietors were doing extensive business in supplying their home-made 'article' to the trade. Now, what with the 'lie' tea of China and the 'lie' tea of England, many begin to regard the tea of our shops as being a huge 'lie' altogether. For myself, I cling to the comforting assurance that the Chinese do sell us one-eighth (of the whole quantity), or 9½ million lbs. unadulterated, and I try to believe that this is not tampered with in any way, but comes to us pure and wholesome. Those who deal with tea merchants of high character will have no difficulty in joining me in this belief. Who is it, then, that suffers from these double frauds? It is the million. And the lower the class, the greater are the impositions we see practised upon them; until we cannot but repeat that exclamation which, in very bitterness of spirit, a good and tender-hearted man gave vent to, 'God help the poor!'"

In the discussion which arose after the reading of the paper, Mr. H. C. White believed the statement, "that seven-eighths of the tea brought into England was adulterated" to be a great exaggeration. Large quantities of tea passed through his hands occasionally, and he could state, as the result of an extensive practical experience, that adulterated tea was the exception, and not the rule. Mr. Wray had commisserated the poor, who, he said, drank the worst descriptions of tea; but the poor were the best judges of tea, and in the poorest neighbourhoods good tea could be obtained if a proper price were paid for it, and with very little, if any, adulteration. There is a great tendency in the present day to exaggerate these matters, and to find out cases of adulteration, to which a high colouring is given. The general experience of the trade proves, however, that spurious tea is the exception, and when met with it is cast aside as being almost worthless.

Mr. W. G. Reynolds, as a practical judge of the qualities of tea, also stated that he was in the habit of having between two hundred and three hundred samples in his hands daily, and he could emphatically assert that the great bulk of the tea imported into this country during the last ten years was unadulterated. Adulteration had been tried; spurious tea had been sent in, so well got up that at a little distance it would look like gunpowder, but when water was put upon it it was found to be "lie" made of dust sweepings with starch. That description of adulteration had, however, long ceased, because there was no market for such an article.

Messrs. Moore, Brothers and Co., of 35, London Bridge, on the next day thus wrote to one of the daily journals:—

"Having yesterday given publicity in your columns to the very serious charge made by the lecturer before the members of the Society of Arts, and certain members of the tea trade then present, by the special invitation of the Society, it is but fair and just to give equal publicity to the fact that our Mr. John Voce Moore, one of the visitors then present, respectfully requested from the lecturer his authority for so astounding, and, to the best-informed merchants in the trade, utterly incredible assertion. Respecting the lecturer's remark reflecting upon the character of the trade in this country, permit me to say that members of our family have been for the long period of more than fifty years engaged as principals in the tea trade, have lived in houses whose sales exceeded one-seventh of the whole amount of tea imported, and we thus publicly assert that we have not only never known any adulteration to be practised, either by those houses or our own; but that we feel quite sure that no tea merchant of good position and fair repute in the City of London is capable, or would be guilty, of the offence. The reflection cast upon both Chinese and English merchants is far too important, proceeding from so respectable a source as the Society of Arts, to be passed over in silence."

At the following meeting a further opportunity was afforded of ventilating this subject, on the occasion of discussing a paper read by Mr. Scott, "On Food and its Adulterations." Mr. Wray, who opened the discussion, was forced to confess that the minutes of the meeting of merchants at Canton, which he had since referred to, did not bear out the allegations which he had made; and he was obliged, therefore, to fall back upon the opinions he had received from Mr. W. Green, whom he brought up to substantiate his statements. That gentleman, too, in a letter to a morning paper on the 28th ult., thus writes:—

"The initiated, as well as the general public, will permit me to say that the adulteration—for convenience—may be described as of two classes, the positively spurious and the sophisticated. The former is known in the trade as Tayshan Congou; it also represents most of the pekoes, capers, and Canton greens. In their manufacture is employed exhausted leaf; also leaves from three other plants. These teas are mostly from Canton and its locality, and their quality for the most part is execrable. Those which I have denominated as 'sophisticated' are from Foo-chow-Foo; and for purity they rank higher than the former. The adulteration has, however, gradually extended and increased for the last five years. The new crop of this class has just arrived. It is nearly all refired and re-manipulated, having had large quantities of old and common leaf incorporated, though imported and sold as new and fine tea, &c., &c."

"Mr. W. J. Bland (who followed next) wished sincerely that the same fairness which characterised this Society was displayed also by the members of the public press, who had chosen to insert the views of one side of the question, but utterly refused to publish the other side of the case. If an opportunity were afforded him, he was prepared entirely to disprove the statements which had gone before the public in the journal of this society. He would take upon himself to say, from the past history of the tea trade, that, so far from seven-eighths of the tea which came over to this country being adulterated, not one eighth of our annual imports of that article was adulterated. As an old member of the society, he had in former years brought forward facts upon this subject in the presence of Mr. Twining, Mr. Gibbs, and other leading members of the tea trade; and now, looking to the statements put forth in this room at the last meeting, he asked that the gentlemen who had made those assertions as to the alleged amount of adulteration of tea should bring forward evidence in support of them. If, as was alleged at the last meeting, seven-eighths of the tea now in our bonded warehouses was adulterated in the manner described, let them bring samples here, and he would undertake to prove that it was not adulterated or sophisticated. He claimed that this should be done, because the last speaker had urged upon the meeting to give an opportunity for candid investigation into the question, and, as he had previously stated, he was ready at any moment to come forward with proofs in support of what he had stated—and he would add that at no time within his own recollection were the public ever so safe upon the subject of tea as they were at the present time, for they now had teas of better character than was the case under the former *regime* of the East India Company. He unhesitatingly made these statements, and would be prepared to substantiate them."

"Mr. Wm. Green stated that he had attended solely for the purpose of confirming the statements he had made in print, as alluded to by Mr. Leonard Wray, upon the subject of the adulteration of tea, which had occupied a large share of his attention during the last five years. His experience in one of the largest houses in the kingdom for twenty years had been, that teas were very largely adulterated; and he was prepared to stake his reputation upon the statement he made, that of the tea which had been imported into this country during the last three years, seven-eighths was adulterated. Startling as that statement was, he might, perhaps, add an explanation, which would, in some measure, qualify it. Mr. Wray had correctly stated, he believed, the extent to which the tea was adulterated in putting it at seven-eighths, and that only one-eighth was absolutely pure. Out of the whole quantity one-eighth might be regarded as a spurious material altogether; that left three-fourths of the stock to be more or less adulterated or sophisticated. That three-fourths might be taken to be adulterated to an extent varying from 1 to 50 per cent.; and if Mr. Bland (who might be looked upon as one of the fathers of the tea trade) could convince him that no adulteration took place, he should be happy to acknowledge himself mistaken. He felt it was impossible, whatever a man's knowledge of tea might be, to detect adulteration in it when carried to a comparatively small extent. He would say that of the entire crop of Foo-chow-Foo tea which had just arrived, he believed there were but few lots that were absolutely pure. He had obtained some lots of that tea, and he found that although it was only three months old, it had already deteriorated in commercial value to the amount of 6d. per lb. Then with regard to the black tea of Congou, the orange pekoe, and other varieties, he believed the assertion that seven-eighths was adulterated was borne out by the facts. He believed the quantity of tea exported from this country amounted to about 10,000,000 lbs. annually, shipped principally to northern ports, and it was some consolation to know that the tea so exported consisted chiefly of the most inferior qualities. He had waited anxiously to hear some suggestion by which this confessedly great evil might be remedied or overcome; and it appeared to him that, as long as they carried on a war with China, as long as they exacted compensation for such a war, and as long as they taxed the produce of that country at home, it was in vain to expect they could get a true and genuine article in tea. He would urge upon those who were anxious to be delivered from this evil, that they should direct their attention to the obtaining of teas direct from the grounds where they were grown."

Other correspondence *pro* and *con* has appeared in different journals, and a writer in our own columns takes up the subject in a bantering vein. We have, however, placed the matter fairly before our readers by a digest of the whole matter. The extraordinary and startling statements made have resolved themselves, after all, into the isolated opinion of one individual. The sifting of this matter thoroughly, and the prompt denial given to the charges by highly respectable merchants and dealers, will, after all, be beneficial in disabusing the public of a false impression, which, on so large an article of consumption, becomes the more necessary. Like the story of the "Three Black Crows," the wholesale adulteration reduces itself, after all to infinitesimal proportions.

Mr. W. J. Bland, in a letter in the *Commercial Daily List*, speaks out boldly and clearly upon this matter.

"I am ready (he says) to inform the inquirer, when, in any quantity, spurious tea was brought (this not from China at all), the largest bulk being 50,000 lbs. weight; further, that this was twice withdrawn from sale through remonstrant opposition, and the continuation of its introduction from that date (1840-1) successfully checked; and, like the first and

Digitized by Google

largest parcel, the few smaller quantities that have occasionally been brought since from Singapore have been invariably rejected by the trade, not a single package even being paid duty on for home consumption; such, too, being the fate of parcels of LIE tea, which are preparations of 'dust and grit,' formed into shape with a glutinous solution of rice, to which the Chinese, in all candour, themselves apply the aforesaid descriptive soubriquet. I can adduce instances both of return to the port of shipment and of abandonment for destruction. I stand forward fully qualified to defend and clear a grossly-calumniated and undeservedly-libelled trade, and I say at once (as I have at opportune times both to the Board of Trade and commissions appointed by the House of Commons) that there is no article of dietary consumption so little tampered with or adulterated as tea, although Messrs. Wray and Co. shudder at the idea of 'the perilous ordeal reserved for it at the hands of our own manipulating dealers.' I am prepared to give instances of the partial and ineffective character of Excise machinery, and to show that the high character to which the purveyors of tea, as a body, may justly lay claim, has been the result of the widely-prevailing undeviating correctness of their business arrangements and practices."

That mixtures of various qualities are often made for sale by dealers at home to suit the taste and pockets of customers is very possible. The great evil in this, as in other articles of supply, is the competition mania, and the general desire for cheap goods on the part of the public. Mr. Wray himself pointed out that good teas are dear even in China and the Straits, in Russia, and elsewhere, when purchasers will have a superior article. The high priced teas are not only immeasurably the best, but actually the cheapest in use, for three teaspoonsful of the higher priced will make a stronger and finer infusion than four teaspoonsful of the lower priced. Very few of the large advertising tea dealers keep 5s. tea; their best is usually 4s. 4d., while they sell as low as 1s. 8d. tea. But the higher priced good tea is still to be had in some of the small, unpretending, old-fashioned shops.

LONDON BANKS CONNECTED WITH CHINA AND THE FAR EAST.

Without money we know nothing can be accomplished, and it has become an axiom in the present day equally cogent that without a bank no place prospers. Even merchants of considerable pretensions cannot now do without them. It requires some general depository to which great and small may go and have their wants supplied, or be relieved of the custody of sums too valuable to be deposited in their own treasuries. Of course the smaller traders benefit most by such institutions, as the "Big houses" have them in their power completely where no bank exists. "Big houses" in India and China laughed at the idea some twenty years since of the establishment of Banks. Who is to support them they argued. We and two or three more houses do three-fourths of the trade of the port, and of course we don't want their help. Where are they to get their business from? One or two efforts were made by the "Big houses" in China to swamp the Oriental Bank—then the Bank of Western India—by buying to a large amount bills drawn on their Indian branches, and on one occasion they had to procure help from the Bank of Bombay. The far-famed "Merchant Princes of the East" have, however, lived to see in our day the fallacy of their arguments, and are now glad to participate in the magnificent profits of these Banks by becoming shareholders and office bearers in them. A very practicable and sensible way of enduring what could not be cured, and some recompense probably for the withdrawal of the lion's share of the trade of the various ports in India and China, which is now more evenly distributed over the various mercantile communities. We remember the time when it was considered almost ruinous for a small merchant to speak his mind against some oppression of the first-rates, but like the railroad and electric telegraph, the young and vigorous have overcome all these obstacles, and now enjoy a fair share of the trade of the once monopolized trade of India and China. We would impress on the directors, managers, and others administering the business of these institutions, to bear in mind that they owe their success to the enterprize of the smaller houses, and the continuance of such, mainly depends on them. They should be studious, therefore, to afford every facility to this class, rather than blindly trust the bills of the larger houses, where all the heavy losses are made. In fact, the mainspring of success is to be courteous in all cases, from the Chief manager down to the clerks, affording the required facilities to promote legitimate operations. The Oriental, being the leading establishment, should be particularly cautious in this, lest it fall in public estimation; and from what we have heard, there is room for some improvement on this score.

THE ORIENTAL BANK CORPORATION.

We now procced to notice this institution, as the first which transferred its head office from India to London. The other banks having branches in China and other parts of the Far East we shall notice in succeeding numbers.

The Oriental Bank was first established at Bombay, under the title of The Bank of Western India, in the year 1842. In 1843 a branch was opened at Calcutta. In 1845 branches were opened at Colombo, Kandy, and Galle, in Ceylon, and in the same year at Hong Kong, and subsequently at Canton, Shanghai, and Singapore. In 1848 it was decided to alter the name from the Bank of Western India to that of the Oriental Bank Corporation, and to apply for a charter. After a tedious delay in consequence of the opposition of certain parties, principally, we believe, promoted by the East India Company, which did not like any interference with the existing semi-official banks of Madras and Bengal, the charter was obtained in 1851, and the word "Corporation" then added to the new title of the establishment.

In consequence of the great increase of business, especially in connection with exchange operations between India, China, and Australia, the directors were compelled to open an Australian agency at Melbourne in 1852, and possessing the necessary authority, agencies have since been opened at Sydney and in New Zealand. The capital was increased for that purpose by the issue of 3,600 shares, bearing a premium of 20 per cent., the £25 share representing £30. The share capital at that period was £931,325.

In 1858 the bank obtained a supplemental charter from the Government, modifying some of the rules relative to annual meetings, declaration of dividend, &c., and among other provisions, permitting shares to be held in two or more names.

The Oriental Bank has now fourteen branches or sub-agencies, viz., at the chief towns of the three Presidencies, Bombay, Madras, and Calcutta; at Colombo, Kandy, and Galle, in Ceylon; at Mauritius, Singapore, Hong Kong, and Shanghai; in Australia, at Melbourne and Sydney; and at Auckland and Wellington, in New Zealand.

Even as early as the middle of 1852, its £25 paid shares were selling at £14 premium, and in the following year went as high as £46, whereas, in subsequent years, they have seldom been sold below £40, and are now worth £48 to £49. There was only one exception that we remember to the estimation in which its shares were held. During a panic in 1849–50, caused by dissensions between the English and Indian directors and shareholders, the shares of this institution were sold in China at par, and the parties who bought them at that price were considered very speculative. This epitome of its operations and branches shows at a glance the colossal proportions of the institution, and its great power to encircle the exchanges of the Eastern world and Australian settlements. This is at once the clue to its great prosperity and large profits.

The directors, eight in number, formerly received £2,400 remuneration for their services, but this sum was increased in 1859, at the general meeting, to £4,000. Mr. William Walter Cargill, who had been the chief manager of the bank from its origin in Bombay as the Bank of Western India, and to whose great ability and untiring zeal the Bank owes its present high standing, resigned in 1858, and was elected to a seat at the board of directors. In April, 1859, Mr. Cargill was succeeded in his duties of chief manager by Mr. Charles James Fife Stuart, who had served in all the India and China banks, and possessed a very accurate knowledge of all the affairs of the institution. There are now about 950 or 1,000 shareholders in this bank, the number of shares being 50,400. The offices of the corporation are at the South Sea House, Threadneedle-street, and it carries on its banking operations in London with the Bank of England and the Union Bank of London; in Scotland, through the National and Commercial Banks; and in Ireland through the Provincial and National Banks.

The following statement shows the progress that the banks has made in the course of seven years, and if it progresses at the same rate, it bids fair to be of Leviathan proportions:—

Digitized by Google

LIABILITIES.	Dec. 1852.	Dec. 1859.
Promissory notes in circulation	£63,359	£729,957
Bills of Exchange in circulation	963,560	4,446,417
Balances due to other Banks	587,316	12,166
Cash deposits	91,658	1,066,015
Cash bearing interest	896,569	3,553,167
Capital paid up	818,965	1,260,000
Reserved surplus fund	169,365	252,000
Insurance fund	—	50,000
Dividends unpaid	689	7,444
Balance of profit and loss	59,776	163,008
To branch balances	247,407	—
	£3,898,663	£11,540,174

ASSETS.	1852.	1859.
Coin and bullion	£1,115,867	£1,889,900
Balances due from the other banks	375,540	521,141
Promissory notes or bills, ditto	41,850	126,276
Government securities	257,113	940,130
Landed or other property	47,147	179,398
Debts secured by ditto	2,512	30,821
Notes and bills discounted, exclusive of bad debts	2,058,634	7,852,508
Total	£3,898,663	£11,540,174

PROFIT AND LOSS ACCOUNT.		
Dividend for half-year	£31,281	£63,000
Carried to reserve fund	8,000	—
Balance of profit	59,774	163,008
	£99,056	£226,008

In the year 1852 there was a net profit made, after defraying all charges, of £99,056; a dividend of 10 per cent. and a bonus of 5 per cent. was therefore paid to the shareholders, and £8,000 carried to the reserve fund, making the same £169,365, equal to 20 per cent. on the paid-up capital. The Corporation subsequently paid dividends mostly at the rate of about 12 per cent. per annum, but in 1859 at the rate of 17 per cent., and in 1860 an interim dividend for the first half-year at the rate of 14 per cent., and the reserve fund has also been increased to £262,000, while the present paid-up capital is £1,260,000.

ADULTERATION OF TEA.

(COMMUNICATED.)

The art of "puffing" has lately been carried to an extraordinary degree of perfection, but it is becoming a nuisance. We cannot go to a pantomime without being bored by patent bedsteads just as we are getting drowsy, or perhaps we are tantalised by an allusion to "somebody's toilet vinegar" just when the smell of decayed orange peel oozes out of the pit. Our horses are frightened in the streets by some huge "gossamer hat" going gauntly past with the mystic numbers of 4s. 9d. on it in large figures. Our children are frightened by wild looking men moving along in exaggerated straight-jackets, on the four sides of which we are invited to go and see the "Thirsty Minstrels," the "Flying Fox," or "The Seven Ages of Woman." We are asked all sort of impertinent questions by advertisements in the newspapers, "Where shall we dine on Sunday?" when we make it a rule never to dine out on that day; and our attention is always being attracted by some startling announcement, the whole ending in some "puff." We have heard of Sir John Bowring being made Governor of Hong Kong, Governor of the Isle of Man, or Commissioner to the Sandwich Islands, and wonder what next; we see his name at the head of a newspaper paragraph and at once turn away for the fiftieth time upon finding that we are again told that he "never saw Chinamen stir their tea with a pitchfork," or some equally absurd nonsense, all ending in "try our pure tea at one-and-ninepence-three farthings."

We thought that these advertising puffs had reached their climax when they began to make use of private names as public property, but an immense step in advance has been made by a person who has had wit or impudence enough to get the Society of Arts to stand as the block for his advertisements. At any rate, such is one view which may be taken of a lecture delivered before that Society on the 23rd January upon tea. We cannot exactly discover whether Mr. Leonard Wray, the lecturer, acted for "our pure tea at one-and-ninepence-three farthings," or for some one who was interested in tea plantations in India or Assam, and was anxious to sell out at a good price. The drift of the lecture was to throw dirt into the Chinaman's tea-pot and blacken the faces of the British merchants in China, apparently for no other reason than to show where the "*pure* tea" was procurable. We should have taken no notice of this palpable puff had it not been that the lecturer ventured to make some slanderous remarks upon those who export tea from China. The report of the lecture makes him state that seven-eighths of the tea exported from China was adulterated, and that it was the English who first practised this "art and mystery upon almost all the teas they bought previous to shipping them."

As it is well known that fully seven-eighths of the tea sent from China is not even taken out of the packages in which they are brought from the tea districts or the native merchants' hong, such an assertion is simply absurd, and the slightest attempt at inquiry or examination of the teas in the London warehouses would prove it to be false. The Society of Arts has now a duty to perform; it must call upon Mr. Wray to prove his statements and give his authority, or else make him confess that his lecture was merely meant as a very clever attempt to drag that learned Society before the public as a convenient post on which to hang the "puff indirect."

CHINESE SCHOLARSHIPS AT KING'S COLLEGE.

AMONG our advertisements will be found one which we think well deserves the notice of the friends of China. We mean an appeal for funds to endow several Chinese scholarships at King's College, London. We understand that the scheme has he approval of Sir John Francis Davis among others, and that he looks upon it as calculated to prove useful. The benefit of scholarship has been proved in every department of learning, and, we believe they will act very beneficially as a stimulus to exertion on the part of young students, who are destined for China, and who attend Professor Summers' class in King's College. We therefore hail this symptom of life in this particular study as the first token of better things for the cultivation of Chinese in England, and we heartily wish it success.

Literature.

The Medical Missionary in China, Narrative of Ttwenty Years' Experience, by Mr. Lockhart, F.R.C.S., F.R.G.S., Hurst and Blackett, London.

The author, in his preface, goes on to apologies and arguments in favour of medical missions, which he considers, in China, at least, have fully answered the object intended. Mr. Lockhart seems to have been chiefly resident at Shanghai, and his information respecting the work is, therefore, of interest. The information he furnishes as to the state of medical science in China is curious, and the incidental notices of diseases will be found useful. On the Opium question, Mr. Lockhart quotes largely from a statistical report which he drew up in conjunction with late Rev. Dr. Medhurst, and which has already been published in the Parliamentary Report on the Opium Trade,—but he furnishes no new facts. The chapters on trade products and manufactures are very interesting. We extract the following, with respect to the rude mode of making sheet lead for tinning tea-chests :—

"The plumber has a furnace on the floor, with an iron pot on the fire with melted lead and a small iron or brass ladle. He also has two flooring tiles, rather more than a foot square, which are covered with paper pasted smooth and firm over one surface. One of these tiles is placed on the floor, but raised about three or four inches, with the papered surface upwards. The other tile is laid upon this, with its papered surface down. The man gets on the tiles, and, sitting on his heels, takes a ladleful of lead; putting the toes of one foot to the ground, he dexterously lifts with his left hand the front edge of the upper tile, and pours the lead with a sweep between them; then raising his foot from the ground, the upper tile yields freely to his weight, and the melted lead is pressed between the papered surfaces, the surplus escaping at the edges. He immediately raises the tile, removes the sheet of lead, and proceeds to make another. His fellow workmen examine the sheets as they are thrown off. If, as happens at times, they are irregular, they are returned to the melting-pot. If they find them in good order, they rapidly cut them square by the aid of a rule, and solder the small sheets together to serve as large ones. Paper is then pasted down on them, and they are ready to be used as lining for the chests. Sometimes the thin leaden chest is covered with paper after being made up; at other times the separate sheets are covered, and any imperfections attended to afterwards. The paper being inside, the lead chest does not affect the tea, which it would do were the lead and the tea placed in contact."

A treatise on the valuable medicinal properties of Dagong oil, for consumption and various diseases, by Dr. J. McGrigor Croft, printed privately, has come to hand, and contains information of value to those afflicted with pulmonary complaints.

Digitized by Google

Messrs. Cassell, Petter, and Galpin send us a batch of the curren numbers of their useful illustrated serials, including the "Family Bible," "Family Paper," "History of England," and "Natural History." The character of all these is well sustained. "Chambers' Encyclopædia" has reached its second volume, and the current part contains the article on the Chinese Empire, which appears to have been carefully compiled. The commercial and statistical information is quoted from the columns of the *London and China Telegraph*.

Messrs. Trübner and Co., Paternoster-row, will shortly publish a work on the Amoor, which will contain the history of the Russian settlements there in the 17th century up to the Treaty lately made with China. The geographical part will contain:—1. Description of the River Amoor. 2. Description of the country to the North of the Amoor. 3. Description of the country to the south of the Amoor. 4. Description of the island of Sakhalm. 5. Productions, plan's, animals and minerals, chiefly with a view to those useful to man. 6. The natives of the Amoor. 7. Future prospects and commercial importance. 8. A concise view of the present state of the Russian settlements on the Amoor and in Manchuria. Such a work was much needed after the erroneous impressions conveyed in Atkinson's "Amoor," lately published, and which was actually the most successful imposition at £2. 2s. ever known in the literary world. We trust the author of the forthcoming book can really show us the true condition, products, settlers, and use of the Amoor to the Russians, and not simply amuse us with frivolous bear stories.

COMMERCIAL POSTSCRIPT.

CITY, WEDNESDAY AFTERNOON.

TEA.—To-day at the sale, 14,776 packages passed, 4,589; sold, 1,368 boxes; 2,049 without reserve: prices as quoted.

ARRIVALS NOT INCLUDED IN TABLE.—Feb. 8: at Clyde, from Singapore, Zambesi; off Plymouth, from Batavia, Electra. 9: at Portsmouth, from China and the Cape of Good Hope, Imperatriz (s.s.) 7: at Brouwashaven, from Batavia, Otto; at Antwerp, from Akyab, John Wood. 6: at Cuxhaven, from Singapore, Johannes Kepler; at Helvoet, from Batavia, Ida. 9: at Bremen, from Akyab, Propontis; from Rangoon, Infanta. 8: at Texel, from Batavia, Elizabeth and Jacoba; at Helvoet, from Batavia, Nova Zembla, Alblasserwaard, Pantaloon, Resident van Son; from Tjilatjap, Whampoa; from Akyab, Golden Horn. Jan. 26: at New York, from Amoy, North Wind; from Singapore, Quick Step. 28: from Hong Kong, Annie Bucknam; from Foo-chow-Foo, Magnet.

DEPARTURES.—Feb. 8, from Liverpool for Hong Kong, Niphon. 9, from Newport for Hong Kong, Lucretia. 8, from Sunderland for Hong Kong, Kelso. 10, from Liverpool for Batavia, Cadovius. 12, from London for Shanghai, Wellington. 11, from Falmouth for Sourabaya, Celebes. 9, from Liverpool for Hong Kong, Maiden Queen.

SPOKEN.—Ceylon, Foo-chow-Foo to London, Jan. 18, 13 N., 28 W.; Livingstone, Shanghai to London, Dec. 9, 26 S., 54 E.; Barnnm (?), of and from Bordeaux, for Batavia, Jan. 29, 41 N., 15 W.

CASUALTIES.—The *Kelso*, bound for China, got on the Longscar Rock at Hartlepool, and sank. The crew were in the rigging all night, and one was drowned.

Monetary and Commercial.

The shares of the Labuan Coal Company have been dealt in at 2¼ to 2¾ prem. The new Indian Cotton Company is also in much public favour, and the application list for shares has just closed, and the allotment will be proceeded with forthwith.

The new Indian loan of £3,000,000 now setted at 98¼ to 99 is required solely for railway purposes. The reduction of the Indian military expenditure in the year ending 30th April, 1861, will be about £3,300,000; and unless there is any falling off in the revenue, or unlooked-for contingencies, the Indian revenue and expenditure for the ensuing year will balance.

The cotton supply question still occupies a large share of public attention, both here and elsewhere, and the demand for Chinese labour for its cultivation in various localities in the East and elsewhere promises to be extensive.

A meeting of the Mediterranean Extension Telegraph Company has been held, at which the directors stated what we have from time to time informed our readers in reference to telegraphic communication with Malta. The line from Otranto to Corfu, to form a duplicate with Malta, noticed in our issue of the 10th ult., is now laid; but until the affairs of Sicily become more settled, no improvement can be expected in the communication with Malta. The accounts show a balance against the Company of £2,874, including £900 expended on the Corfu cable, and consequently no dividend was declared.

At the meeting of the Consolidated Copper Mining Company of Cobre, a dividend was declared of £2 per shares It was stated that the produce of ore in the five month. since the last report had gradually increased, the augmentation over the same period of last year having been 838 tons. In November, however, the yield had been equal only to the earlier months of the year, owing to accidents to a portion of the machinery. The average of the ore has improved from 16 to 16¼, but the prices realised have been rather less than in 1859. The expenditure has been larger than usual, owing to the purchase of new machinery and the engagement of a number of Chinese labourers.

THE NEW FRENCH BANKING COMPANY IN CHINA.

The *Comptoir d'Escompte de Paris*, which caused some little excitement in our money market a short time since in connection with the withdrawal of gold from the Bank of England—alleged to be in payment for silver for remittance from the Continent to China—has issued a notification at Shanghai by which it must be assumed that "business has commenced." What that business is to consist of we must be patient to see. Considering, however, that the direct French trade with all ports in China for the year 1860 consisted of vessels from France, of an aggregate tonnage of about 3,000 tons, and the despatch of about the same quantity, with the clearance of about 7,000 bales of silk by the overland route, we cannot see how this can give sufficient employment for the large sums "said" to be transmitted to China for banking and exchange operations. No doubt every facility will be given to parties wishing to ship to France under advance, and it is probable that the German houses may be able to effect their exchange operations through Paris, instead of as at present through London. We wish the undertaking every success; but we think, in these matters, we cannot pass the usual compliment of "they do these things better in France," but suggest that "we do these things better in England." The following is a copy of their announcement in Shanghai, which bears neither managers' nor directors' appointments. Now we in England consider this rather an important part of the announcement of a new company, and a banking and exchange business especially requires publicity, and due authority to some one to grant bills of exchange, &c., &c.

"By a decree of the Imperial Government, the 'Comptoir d'Escompte de Paris' has been authorised to establish an Agency at Shanghai. This Agency is now ready to transact Banking business, and will buy and sell Exchange. The Agency Office is temporarily in the building of the Agra and United Service Bank."

THE RED SEA CABLE.

In reference to the paragraph which appeared in the *Bombay Times* as to a supply of cable having been sent out, and that the Company's marine superintendent would be engaged in replacing the fractured parts between Aden and Kurrachee in the P. and O. Company's steamer *Union*, chartered for the purpose, we find, on the first authority, that Mr. Brunton, the Company's superintendent, proceeded from Suez on the 28th October last and examined the Red Sea line, both at Kossier and Sonakin, and found that the two first sections were interrupted owing to the cables having been broken, most probably by ships' anchors, within a few miles of shore. The broken ends were examined, one five miles from Kossier, on the Suez-Kossier section, the other two and a-half miles from Sonakin, on the Kossier-Souakin section. Not having any cable on board the *Union*, Mr. Brunton could not repair these breaks. The *Union* returned at once to Suez to receive some Board of Trade officials connected with the establishment of lighthouses in the Red Sea.

The Red Sea Telegraph Company despatched, lately, a small steamer called the *Telegraph*, from Aden, and expect to hear of her arrival very shortly. This vessel is intended to at once make good the defects between Aden and Kurrachee, which, according to the best information the Company have, are but trifling. Should this supposition prove correct, we may now at any moment have intelligence of the restoration of electric communication between Aden and Kurrachee.

A complete revolution was caused on the 1st inst., by the announcement that Government declined to pay the guaranteed interest due at Dec. 31, and shares fell to £14. 10s., but recovered on the 9th to £18 to £19, in consequence of a Bill having passed the House for paying the interest.

MALTA AND ALEXANDRIA CABLE.

This cable, which, we will again remind our readers, is that originally intended for Rangoon and Singapore, is to be coiled on board the *Rangoon* and *Malacca*, now in the river Thames, when those vessels have completed their fittings to convey it in water-tanks. It is estimated that they will carry 350 miles, and will be despatched all in May next. They will return for the remaining portion of the cable to complete the line, which, allowing for slack, will give a total length of 1,300 miles of cable to be forwarded. The precise direction for laying this cable will not be decided until the soundings have been accurately taken, and the localities visited by the Government engineers, Messrs. Gisborne and Forde.

Digitized by Google

The bullion by last mail is, for Shanghai, in silver, £17,111; Hong Kong, £1,531; Foo-Chow, £753; Singapore, £2,532; for Madras, £17,116 in gold, and £19,705 in silver; for Calcutta, in silver, £55,988; for Ceylon, £1,000 in gold, and £100 in silver.

ARTICLES OF IMPORT.

TEA.—Our market has been more active lately, the usual demand at the commencement of the year having been experienced, which has led to a fair amount of business in most descriptions of tea for actual consumption, the trade having been previously very light in stock. Importers have met the market freely, both at public sale and by private contract, the quantity offered at public auction since the 9th ultimo, and including the sales now in progress, being over 140,000 packages. The sales made have been at rather irregular prices, but the result has been to establish an advance in good and fine Kaisows, whilst low and common Congous and scented teas have sold at a decline of fully 1d. per lb. Other descriptions averaging about previous prices. Low Congous have been much depressed and sales have ranged from 7d. to 10d. per lb., whilst fair to good common have ranged from 11d. to 1s. 1d. per lb.; this latter quotation being only for superior grades. Fair to good Sinchune Kais and Kaisow kinds have sold freely: early in the month prices were rather depressed, but they have latterly commanded advanced rates. Ho-How and Ning-Chow Congous have sold from 1s. 3½d. to 1s. 5½d. per lb., being about former prices. Second class Honams, Monings, and Wopaks have been in full supply, and the Tarry kinds have ruled easier. Good and fine qualities have met with more inquiry from 1s. 8d. to 2s. per lb., but the supply has been equal to the demand. Good and fine Kaisows have been in steady request, and latterly the sales made have been at 1d. per lb. advance. In Tayshans the lower qualities have been difficult of sale, whilst fair qualities have only realised 1s. 1d. to 1s. 2d. per lb. In Souchongs there is but little alteration to notice, business being limited. Common to fair Oolongs remain difficult of sale; good and fine remain much as before. Flowery Pekoes are still neglected in the absence of shipping orders, and quotations somewhat nominal. Scented capers have sold irregularly; the low qualities have been much depressed, and have sold from 7d. to 10d. per lb., whilst the fair descriptions have ruled at from 11d. to 1s. 1d. per lb; good and fine, both from Canton and Foochow, have commanded a better sale, but only for moderate quantities. Scented Orange Pekoes have been difficult of sale; some without reserve at public sale realised full prices, but sales have since been made at a decline of 1d. per lb. Fine Foo-chow make have been sold in small parcels at extreme rates. Business in green teas has been to a fair extent at about previous prices. Common to good Hysons have been readily saleable under 2s. per lb.; for the finer qualities there has also been rather more demand. Young Hysons remain much as before, the supply being moderate. Taiping and Moyune Gunpowders show but little alteration, the trade buying as they want them from the old supplies. In the New Ping Sueys there has been a fair amount of business, but prices show a reduction of about 1d per lb. from the opening rates. Sales to some extent have been made in Canton Gunpowders at full prices for fair descriptions. There have been four public sales during the month, comprising 140,000 packages, of which nearly 30.0 0 packages were printed without reserve. Of these 45,200 were sold. On the 16th ult. 3,000 packages of Assam tea realised full prices, also some Japan Pekoe, Oolongs, and Scented teas. The stock on the 1st of February on all descriptions of black was in London 47.360,698 lbs., and 5 630,213 lbs of green. The total delivery is 5,796,295 lbs. of black, and 961,335 lbs. of green. The stock at Liverpool was 2,417.071 lbs. of black, and 80,956 lbs. of green. The total delivery was 634 799 lbs. of black and 42,706 lbs. of green. The imports in London to 1st of February have been 6,340,142 lbs. of black, and 444.147 lbs. of green; and at Liverpool 930,830 lbs. of black, and 94,709 lbs. of green.

SILK.—We have had a more or less heavy market for silk since the commencement of the year. For the first fortnight almost literally without a transaction, but not without arrivals. This induced anxiety on the part of importers, and an attempt was made by a smart reduction in prices to induce business. At first this was only partially successful, but for the last fortnight fair business has been doing daily—buyers gradually coming forward, tempted, perhaps, by the new range of prices, but still more pressed by the requirements of their mills and looms, their stock having been in many cases absolutely exhausted. The total reduction upon the prices of September is little less than 4s. per lb., except in some few instances of the best silk, which, from its extreme scarcity, maintains a higher range of price. Japan silk seems to have lost favour; it may be that foreigners, hitherto the largest consumers, have been doing less in all classes, and partly, perhaps, that the stock has till lately been very ill assorted. Chinese thrown silk has been entirely neglected.

SUGAR.—The market is still in a very depressed state. Sales, however, have been made to a fair extent at a reduction. 1,229 baskets of Java were bought in at 37s. 6d. to 39s. 6d. Of 490 bags of Siam, half sold at 42s. to 42s. 6d. for middling white; 1,170 bags of China were retired; 3.000 bags of clayed Manila sold at 35s.

COFFEE. Previous rates are well maintained. 1,130 bags of Java sold at auction at 64s. to 66s.; 120 bags of black Singapore at 32s. Of Ceylon sorts the sales have been small: fine ordinary plantation 66s. to 73s.; native has fetched 63s. 6d. to 64s. 6d. for second quality.

RICE.—Continued dullness has been experienced since our last, and transactions have been on a narrow scale at easy prices, viz. about 16,000 bags, chiefly Nakrenzie (of old import), at 10s. 9d. to 10s. 10½d.; Bassein at 10s. 7½d. to 11s.; and white Bengal at 11s. 6d. to 11s. 9d.

PEPPER meets a fair demand: of 2,070 bags Eastern, at public sale two-thirds were sold: fair to good Singapore, 3⅞d., a few lots, 4d., and brown Sumatra at 3¾d., the remainder was bought in above the value 135 bags good fair Singapore white went at 5¼d. to 5⅜d., being about th previous value.

SAGO: a portion of 537 bags sold at 15s. 6d. to 16s., for dingy medium FLOUR: sales of 200 bags at 17s. TAPIOCA: a sale of 510 bags wa made at 5½d. to 5⅝d. for fine white Penang.

SPICES: Cinnamon; the quarterly sales have gone off flatly, only a few lots of fine bringing full prices; ordinary and middling going from previous value to 1d. per lb. decline. About two-thirds of the following placed:—220 bales 1st, 1s. 5d. to 2s. 1d., with a few bales extra fine 2s. 6d. to 3s. 3d.; 1,000 bales 2nd, 1s. 2d. to 1s. 8d.; 633 3rd, 11d. to 1s. 3d.; and 65 4th, 7d. to 10d. Cassia Lignea: of 1,014 chests, about three-fourths sold, at 88s. to 93s. Cassia buds: small sales at 175s. to 185s. Cloves: sales of 6 cases of Penang at 1s. 4d. Mace: Of 57 cases Penang, and 27 Singapore, nearly all sold at 1s. 5d. to 1s. 11d. for fair to good pale, and 8d. to 1s. 3d. for inferior to good red. Nutmegs: Of 115 cases Penang, and 58 cases Singapore at auction, three-fourths sold at 3s. 7d. to 3s. 11d. per lb. for fine bold, and 1s. to 1s. 11d. for ordinary small to very good medium.

HEMP.—Market quiet. Of 2,200 bales of Manila, at auction, were all etired; quotation at £22 to £26.

COTTON.—At the opening this week, a good demand prevailed, and business was done in some cases at rather stiffer prices; but there has since been less disposition to buy, and quotations are nominally the same as on the 1st ult. 1,850 bales have been sold, chiefly Surat, very middling Oomrawatee to fully fair Dhollera, 4¾d. to 5¾d., and middling to fair Tinnivelli Madras at 5¼d. to 5¾d.

JAPAN WAX.—No sales since our last. Quotations nominal, as before.

TOBACCO.—About 20 bales of Manila have arrived, and will be placed on the market. Stock on Feb. 1, of all East Indian sorts, 10,200 bales.

TIN.—Good straits has been sold at 120s., but may now be quoted at 122s.; Banca, 127s.

GAMBIER. Of 2,048 bales, at auction, part sold at 16s. 6d. to 17s., and privately sales have been made at 17s. to 17s. 6d.—CUTCH: Of 2,300 bags, at auction, about half sold at 23s. 6d. to 24s. 6d, on speculation.

MISCELLANEOUS.—Indian-rubber: Of 600 packages at auction a few sold at 1s. 4d. to 1s. 5d. for good. Camphor: Market firm, at 160s. to 165s., for China and Japan. Sapanwood: 40 tons of Siam sold at £5. 15s. to £7. 7s. 6d. for good and damaged sorts. Soy: Of 50 casks at auction only one lot sold at 3s. per gallon. Rhubarb: Market inactive, 97 boxes at auction all retired. Mother-o'-pearl shells: No sales. Star anniseed: No transactions. Sticlac: 219 cases of Siam at auction all retired. Gum benjamin: Of 100 cases at auction, a few sold at £6. 15s. to £7. 5s. for mid. to good quality. Damar: of 192 boxes at auction, half sold at 33s. to 41s. Gamboge: very dull; £7 to £8 for picked. Rattans: no sales. Elephants' teeth: no sales. Vermillion: 65 cases at auction all retired; quotation, 2s. 9d. to 3s. Galangal root: of 200 bags at auction all were retired. Cubebs: 42 bags at auction sold at £7. 2s. 6d. to £7. 7s. 6d. Dragon's blood: no sales. Galls: China and Japan, saleable at 100s. to 110s. for fine blue. Rum: sales of East India, at 1s. 8d.

EXPORT OF BULLION TO CHINA. &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£91,474
Foo-Chow-Foo	—	753
Hong Kong	—	30,089
Manila	—	—
Singapore	4,000	60,107
Penang	—	384

FROM MARSEILLES.

	Gold.	Silver.
Shanghai	—	7,976
Hong Kong	—	4.992

EXCHANGES.

	Bank Bills, 60 days' sight.		House Bills, 60 days' sight.
On Singapore (dols.) Bank Bills	4s. 9d.	Buy at	4s. 3d.
On Hong Kong, ditto	4s. 9d.	Do.	4s. 3d.

GOLD AND SILVER.

Bar Gold (per ounce)	£3 17 9
Spanish Doubloons	3 17 3
United States Gold Coin	3 16 3
Silver in Bars	0 5 1¼
Mexican Dollars	0 5 0
Carolus Dollars	0 6 6

MANCHESTER MARKETS.

Prices remain quite as low as last week, but there was rather more inclination to do business, and the sales in 7 lb. and 8¼ lb. shirtings for India and China have been large. Domestics were also rather more in request, as are T-cloths, but the demand is not brisk. In yarns there is the same moderate symptom of improvement, and buyers for Germany and other parts of the Continent are in the market, willing to do business at the rates now current, but holding back at any disposition to exact higher rates. There is rather more doing for manufacturers, owing to the orders taken for Eastern cloth.

From Mr. Sam Mendel's Trade Circular we learn that the shipments of cotton goods to China and the Far East, in the past twelve months, as compared with the previous year, have been as follow:—

PLAIN COTTONS.—To Hong Kong and Canton: twist, 73,206,529 yards in 1860, against 59,211,110 in 1859. To Shanghai, 105,565,812 yards, against 127,469,004 yards. To Singapore, 64.301,044 yards, against 42,278,620. To Batavia, 35,268,407, against 30,571,520. To Manila, 16,657,389, against 20,364,610.

COLORED COTTONS.—To Hong Kong and Canton, 5.910,572, against 6,101,696. To Shanghai, 18,951,162, against 14,460,205. To Singapore. 10,561,426, against 9.554,356. To Batavia, 21.397,357, against 13,134,925. To Manila, 13,897,475, against 10,043,265 yds.

PRINTED COTTONS.—To Hong Kong and Canton: 1.084.544 yards, against 2,630,076. To Shanghai, 2,215,117 against 3.883.335. To Singapore, 3 513,428, against 3.276,021. To Batavia, 13,669,939, against 9,185,368. To Manila, 254,819, against 376,981.

TWIST.—To Hong Kong and Canton, 7,294,350 lbs., against 10.404,831. To Shanghai, 181,000, against 55,100. To Singapore, 3.234,927, against 3,870,081. To Batavia, 1,336,705, against 1,199,085 lbs. To Manila, 142,297, against 340,740.

RUZTER (Dutch barque), Amsterdam to Batavia, Nov. 24, 40 S., 28 E.
HAARLEMMER MEER, Texel to Batavia, 36 N., 15 W.

FREIGHTS AND CHARTERS.

The large quantity of coals which are now under contract to go forward to the East Indies and China, as well as railway materials, give a superabundance of dead weight, keeping freights firm also from the outports. A contract of 20,000 tons coals to Aden is to be 12,500 tons from the north of England, and 7,500 tons from Liverpool—5,000 tons monthly. It is reported the *Howden* and *Amoor* have been fixed at about £43 per keel, and a ship from Wales for patent fuel. £48 per keel has been given for Calcutta, £43 Cape of Good Hope, £61 for Shanghai, and £60 Hong Kong; 42s. 6d. Hong Kong, 47s. 6d. Shanghai, from Wales, for an American obliged to go that way. The quotations from Bombay, Madras, and Singapore do not bring offers readily forward.

Exports to the United States, as may be supposed, have been materially checked by the crisis through which that country is passing. The outward freights are consequently scarce and depressed. Of late there has been large arrivals of American vessels, which has led many of the merchants engaged in our trade with the East Indies to suppose that the captains of these vessels will seek long voyages in preference to going back to the United States; and a few of those ships adapted for Calcutta and China cargoes have been engaged to and from India, and on the round to Australia and from the Chincha Islands; but considering the large quantity of grain, flour, and cotton which has still to come forward from the American ports, their own trade, with quick returns, offers greater inducements than the rates now quoted for distant voyages.

Rates of freight current for vessels on berth to Shanghai, 50s. to 60s. per ton, weight and measurement. To Hong Kong, 50s., weight and measurement. To Singapore, 35s., and Penang, 45s., weight or measurement (nominal). To Manila, 35s. and 40s. To Batavia, 40s. weight, 40s. measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 45s. China and Manila, 50s.

CASUALTIES.

The Celebes, for Sourabaya, put back to Falmouth 24th Jan., with rudder broken.

The Queen Victoria (s.s.), which had the Rangoon and Singapore telegraph cable on board, and went on shore on the rocks in Barn Pool, near Plymouth, 2nd Jan., was floated off on the afternoon of the 28th, and placed on the beach, where she lay fore and aft. On the 5th Feb. she was lifted from port to starboard side, so that all her worst leaks (which are on the port side) can be got at. The engines, which are nearly dry, appear not to have sustained any damage.

The Yssel, Maarschalk, from Batavia to Amsterdam, got on shore near Huisduinen, on 23rd Jan, She got off and arrived in the Nieuwe Deep the same day, with damage.

The Nancy, Frahm, from Newcastle for Singapore, was assisted into Ramsgate 6th Feb., with loss of anchor and chain. She has since been in collision with the Sirene, and cut through covering board, bulwarks, &c., amid ships.

Rio Janeiro, 7th Jan., The Felix (barque), of Bremen, from Cardiff to Hong Kong, which vessel had experienced considerable damage during a gale on the 2nd Dec., when one man and the boats were washed overboard, was spoken 24th Dec., in lat. 2 N., long. 26 W., by the Nautilus, Steffens, arrived here.

The Resident van Son, v. d. Hoff, from Batavia to Amsterdam which put into Brouwershaven 3rd Feb., is very leaky, and discharging cargo.

At ST. HELENA.—Dec. 17, Three Bells, Simpson, from Penang, and sailed for London. 21, Crystal Palace, Davie, for Hong Kong, and sailed 23 for London. 22, Maida, Black, from Foo-chow-Foo, and sailed for London. 23, Johanna Maria Christina, Gorter, from Passaroeang, and sailed 24 for Amsterdam. 25, Mary Ann Wilson, Carr, from Foo-chow-Foo, and sailed 26 for London; Jacob Roggeveen, van Marker, from Batavia, and sailed 26 for Amsterdam; Germania, Tiedeman, from Penang, and sailed 28 for London. 26, Ulidia, Logan, from Passaroeang, and sailed 28 for Queenstown; Zwee Gezusters, Keuze Kamp, from Batavia, and sailed 27, for Rotterdam. 27, Live Yankee, Thondike, from Macao, and sailed 28 for Havana. 30, Maria Charlotta, Schmidt, from Batavia; Arab, Bruhn, from Amoy, and sailed 31 for New York.

At TABLE BAY.—Dec. 2, Noach, Wierich, from Batavia, and sailed 4 for Rotterdam; Marion, Richmond, from London, and sailed 13 for Hong Kong; William Darley, Cooper, from Cardiff, and sailed 4 for Shanghai. 7, Lammermuir, Brown, from Hong Kong. 9, Otto Rotgans, from Batavia, and sailed 11 for Rotterdam. 18, Caroline Chisholm, Bell, from Whampoa, and sailed 20 for Liverpool. Dec. 1, Catherine, Olsen, sailed for Batavia; Maarten v Rossem, Byker, for Batavia. 9, Monberey, Smith, for Sumatra. 11, Pioneer, Scott, for Hong Kong. 12, Anna Maria, Hurst, for Shanghai. 13, Marion, Richmond, for Hong Kong. 19, Cleopatra, Daunberg, for Batavia.

ALGOA BAY.—Dec. 6, Hebe, Falkenburgh, sailed for Batavia.

KING'S COLLEGE, LONDON.
STAUNTON CHINESE SCHOLARSHIPS.

THE recent events which have taken place in China were the inauguration of a new era in the intercourse between Great Britain and that country. But the victories obtained must be followed by a course of conduct appropriate to our newly-acquired position there, and every means should be used to prevent future misunderstandings. Our commercial status in China is every year increasing in importance, and her Majesty's Government is yearly sending forth diplomatic agents, while the religious world is fully alive to the opportunity for Missionary efforts, which is ever increasing in that quarter of the globe. It remains for the friends of China, and for philanthropists generally, to consider by what means the Chinese may be made to profit most by our intercourse, and how we may treat with them so as to avoid wars in future, and establish our influence among them.

Every one who has read the account of Mr. Harry Parkes' examination, as a prisoner before the Mandarins in Peking, will be satisfied that the flood of light which he shed upon their minds through his knowledge of their language, and the respect which he undoubtedly commanded from them, notwithstanding their ill-treatment of him, were calculated to have a very beneficial influence, and to be productive of very good results. It was his acquaintance with their native tongue that enabled him to communicate facts, and probably advice, which must have had a powerful effect upon their minds, although it was doubtless the sterner voice of war at their gates which effected his release.

But now that the contest is over, we may very properly address ourselves to the consideration of the effect which the milder force of persuasion and full enlightenment may be expected to produce on the Chinese mind, in bringing about that cordiality and good feeling, without which we shall be exposed to frequent recurrence of similar disagreements; and this enlightenment can only be produced by a more general study of the Chinese language among those who intend to proceed to China, either in the employment of her Majesty's Government, or with the view of extending our commerce or our religion, among the native population.

In 1847 a Professorship of Chinese was established in King's College, London, mainly through the exertions of the late Sir George Thomas Staunton, Bart., M.P., who succeeded with difficulty in providing for the endowment of a Chair. It was intended at the same time, to procure an Endowment, if possible, for Scholarships, so as to encourage the study of this difficult language; but the funds at the disposal of the promoters of this scheme were insufficient, and they rested satisfied with securing a salary of about eighty guineas for the Professor. Since 1854, a small class has been assembled each term for the cultivation of Chinese, and her Majesty's Secretary of State for Foreign Affairs has so far encouraged it as to allow the Principal of King's College to recommend for the appointment of Student Interpreters as many as twenty-one gentlemen who were members of this class.* But although these appointments have from time to time been conferred, there has always been a degree of uncertainty about the continuation of these favours; and, in consequence of this doubt, the efforts of the students have flagged, and much less has been accomplished than might have been, had a clearly defined prospect been held out.

To supply a motive for greater exertion, and to induce a closer application, it seems desirable to carry out the original intention of Sir G. T. Staunton, who was the chief promoter of the study of Chinese in England, by procuring funds for the Endowment of two or three Scholarships, to be called, in memory of his oriental acquirements and liberality, the "Staunton Chinese Scholarships."

The holders of these Scholarships should be considered eligible for recommendation to her Majesty's Government, or to mercantile firms, upon application being made to the principal.

The competition, to which these prizes would give rise, would assuredly exert a beneficial influence on the competitors, and thus they would be the better fitted for their arduous posts as interpreters in China.

Now that the whole empire is open to Europeans, both diplomatic and commercial agents will, under the passport system, be admitted to the interior, especially along the great arteries of commerce: and in order to perform their functions efficiently, they must have a good knowledge of the language, the rudiments of which they may acquire in this country; and as the Japanese language is very intimately connected with the Chinese, the latter serves as a valuable introduction to the study of the former.

To the friends of King's College, London, where alone in Great Britain Chinese is taught, the success which it is hoped will attend the study of this leading language of the extreme East will afford pleasure, and this project will doubtless meet with their sympathy and support.

Subscriptions for the above object will be received by Messrs. Coutts and Co., Bankers, Strand; by J. W. Cunningham, Esq., the Secretary of King's College, London; or by Professor Summers, Northaw, Barnet, N.

* It is gratifying to learn that two of these gentlemen have distinguished themselves during the late war, and have been honourably mentioned in the despatches to her Majesty's Government. The one was Mr. Forrest, who volunteered to proceed with despatches to the rebel camp near Shanghai; the other was Mr. Adkins, who also volunteered to remain behind in Peking, in order to prepare for the residence of her Britannic Majesty's Ambassador at that Court.

AN OXFORD MAN, who holds an appointment in King's College, is desirous of meeting with ONE or TWO GENTLEMEN who wish for assistance in their studies for the University or the Civil Service Examinations. He will not object to pupils whose education has been neglected. Terms moderate.
Address, S. H. N., Post-office, Northaw, by Barnet (N)

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

DR. J. McGRIGOR CROFT, M.R.C., Physician, London, Fell. F.S.; Fell. O.S.; late Staff-Surgeon and Medical Officer of H.M. Ceylon Rifles in China, and Ceylon (retired), may be consulted by his China and Eastern friends returning home suffering from tropical disease. Address, Mandarin Villa, 8, Abbey Road, St. John's Wood, London.

FIRE. — DESTRUCTION OF THE PLANT, STOCK, and PROPERTY of the Largest Ropery and Ship Chandlery in the Country, Messrs. Frost, Brothers, of Shadwell, London. PRESERVATION of Books, Papers, and Cash, in MILNER'S SAFE, standing by the side of two other safes, (not Milner's) the contents of which were consumed.—See "Times," Sept. 7, 1860.

TO MESSRS. THOMAS MILNER AND SON,

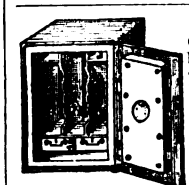
Liverpool, and 47A, Moorgate-street, City, London.

Gentlemen,—We have very great pleasure in bearing testimony to the efficiency of your "Patent" Fire-resisting Safe. In the destructive fire which destroyed the whole of our premises on Sunday morning last, our books, papers, and cash, which were in the safe we purchased from you in March last, were all preserved; and this is the more remarkable because the contents of two other safes, not of your manufacture, standing in the same office within two feet of your safe, were consumed. Our most sanguine hopes have been realised in this severe test, and we leave you at liberty to make use of this letter in any way you may wish.—We are, Gentlemen, yours, &c.

FROST, BROTHERS.

Shadwell, London, Sept. 8, 1860.

FACILITIES in BOOK-KEEPING DRAPER'S PATENT SEMI-DETACHED DOUBLE REFERENCE INDEX effects great saving of time, and expedites posting. All descriptions of Account Books fitted with Patent Index. Account Books, Copying Machines, and Stationery supplied, of the best quality Wholesale and for Exportation, 5, Tower-street, London. Sample of Patent Index can be seen at Mr. GEORGE HOLMES', Hong Kong. Sample Book of Papers, with prices, forwarded on application.



JOHN TANN'S PATENT RELIANCE LOCKS and FIREPROOF SAFES are the best and cheapest safe-guard against Fire and Robbery.

Orders transmitted direct, or through Mr. GEORGE HOLMES, Hong Kong.

WAREHOUSE, 30, WALBROOK, CITY, LONDON.

List of sizes and prices forwarded on application.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d; Crest Plate, 5s., with the necessary directions for use. Post free Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT.

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

For Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampto on the 20th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall-street, London, E.C.; or Oriental-place, Southampton.

TRIESTE ROUTE to INDIA.—The Steamers of the AUSTRIAN LLOYD'S STEAM NAVIGATION COMPANY leave TRIESTE for ALEXANDRIA on the 11th and 27th of every month, at 10 A.M., in correspondence with the P. and O. Company's Steamers leaving Southampton on the 4th and 20th, and Suez on the 21st and 6th of each month. Passengers' baggage may be shipped at Southampton for Alexandria.

For further information apply at 137, Leadenhall-street, London; or Oriental-place, Southampton.—HICKIE, BORMAN, and Co., Agents.

REGULAR LINE OF PACKETS.

FOR BATAVIA, the fine fast-sailing barque WILLIAM SIMPSON, A 1, 13 years, 396 tons per register. Coppered and copper fastened throughout. JOHN SPLATT, Commander; lying in the St. Katharine Dock. Has superior accommodation for passengers.

For freight or passage, apply to the owners, Messrs. Thornton and Wests, Old Swan Wharf; or to Rangel Woollett and Co., 1, Lime-street-square.

WITH IMMEDIATE DESPATCH.

FOR BATAVIA & SOURABAYA, and will discharge cargo at Samarang, after leaving Batavia, should sufficient inducement offer, the splendid new clipper barque ENERGIE, 3 3rds—A 1. 316 tons register. Coppered J. H. MEYER, Commander; loading in St. Katharine's Dock.

For terms of freight apply to Cloid and Routledge, 124, Bishopsgate-street Within, E.C.; or to E. and W. Arnold, 3, Clement's-lane, Lombard-street, E.C.

A REGULAR TRADER—WITH QUICK DESPATCH.

FOR SHANGHAI DIRECT. The celebrated Thames-built Clipper WYNAUD, A 1 13 Years, 546 tons Register, DAVID REID, Commander; loading in the London Docks. This beautiful vessel offers a first-rate opportunity to shippers, being well known alike for her rapid sailing qualities, and the good order in which she invariably delivers her cargoes.

W. O. Young, Newman's-court, 74, Cornhill, E.C.

WITH IMMEDIATE DESPATCH.

Having the greater part of her Cargo engaged.

FOR BATAVIA & SOURABAYA, with liberty to discharge cargo at an intermediate port on the coast, after leaving Batavia, the fine Clipper Ship CECROPS, 5-6ths A 1, 350 tons Register, Coppered. JACOB DAVIDSEN, Commander; loading in St. Katharine's Dock.

For terms of freight apply to Cloid and Routledge, 124 Bishopsgate-street Within, E.C.; or to E. and W. Arnold, 3, Clement's-lane, Lombard-street, E.C.

NOTICE TO SHIPPERS TO CHINA.—The following splendid Clipper Ships, lying in the East India Docks, will be despatched as under:—

Ship.	Tns.	Captain	Ports.
Prince Alfred...	931	G. Harper...	Hong Kong and Whampoa.
Peterborough...	560	B. Orchard...	Shanghai.
Assyrian	555	W. Shepherd	do.

For Freight or Passage apply to Phillips, Shaw, and Lowther, 2, Royal Exchange Buildings, E.C.

ELLIS, SON, and FICKLING will despatch the following high-class British-built Clipper Vessels:—

Ships.	Tons.	Class.	Docks.
CALCUTTA.			
Caldera	731	A 1 13 years	East India.
SHANGHAI.			
Raleigh	587	A 1 13 years	London.
CAPE OF GOOD HOPE.			
Juanita	447	A 1 11 years	St. Katharine.
ALGOA BAY.			
Hugh Ballment ...	241	A 1	St. Katharine.

133, Leadenhall-street, E.C.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks.	To Sail.
Shanghai	Wagoola ...	W. In.	With des.
Hong Kg. and Whampoa	Hero ...	W. In.	Feb. 20.
Penang...	Mary Ann ...	W. In.	Feb. 28.
Calcutta...	Philosopher	E. In	With des.

From Marseilles, 28th March, to Hong Kong: Dr. and Mrs. Murray. To Singapore: Mr. and Mrs. F. P. Voermans.

PASSENGERS ARRIVED OUTWARD.

Per Notos, from Singapore.—Mr. and Mrs. Jurgens and family, Mr. and Mrs. Miller, Miss Royal, Mr. Clowson, one Chinese. Per Fiery Cross, from Calcutta: Messrs. Reid, Reis, Rodrigues, and N. J. Pepson. Per China, from England, &c., for Hong Kong: Messrs. Lind, Major, Pedder, Headsick, Small, Capt. Worthington, Don Joas Pereria Pinto, and Ensigns Seacock, and Walcott. For Shanghai: Capt. Kopynoff, Mr. Therfolide, and Mr. Moncrieff.

THE EXPORT SUPPLEMENT.

The Export Supplement contains statements of Exports to China, Japan, and all parts East of India, is published at a separate charge of 9d.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

The following notification has been issued by Capt. Vyse, her Majesty's Consul at this place, in reference to the outrage reported in our last. The final decision of which is not reported by the present mail.

BRITISH CONSULATE, KANAGAWA, Dec. 9th, 1860.

The late deplorable collision in which an officer of the *Tycoon* has been dangerously wounded and is likely to lose his life, renders it imperative on the undersigned H.B.M.'s Acting Consul to take measures to prevent the repetition of such untoward occurrences.

British subjects have already been informed by public notification that the pursuit of game by fire-arms is prohibited by Japanese laws within the limits of the port; but it now seems necessary to advise them, that residence in a foreign country carries with it by the common polity of nations the obligation to obey its laws; this obligation holds good in Japan no less than in other countries, in all cases, where exemption has not been especially stipulated by Treaty in the form of specific rights and privileges. The right to disregard any Japanese laws—not especially suspended, is not a privilege conceded by the Treaty of Great Britain with Japan; certain treaty rights exist by express stipulations, and all that legitimately follows as necessary to the full enjoyment of them is secured, but nothing beyond:—the manifest law of Japan is in all other respects as binding upon foreigners, as on Japanese.

It behoves British subjects to understand distinctly, therefore, that they are not only responsible for the infraction of Japanese laws, where these have not been suspended in their favour by treaty stipulation, but, according to the law of Great Britain, for all the consequences that may ensue from the commission of an unlawful act. So far does this law go, that if one intending to commit a felony, undesignedly kill a man, it is murder; if even where a person does an act lawful in itself, but in an unlawful manner, and without due caution and circumspection, and a life is lost, it must be either manslaughter or murder according to the circumstances.

A person, therefore, going out shooting, more especially after the warning given in Notification No. 15 of 1859, does deliberately violate a Japanese law, and acting at the same time in defiance of an understood prohibition emanating from the British authority, whose jurisdiction he must acknowledge, commits a misdemeanour, and if he resists a Japanese officer, who in the performance of his duty seeks to arrest him for this or any other offence against Japanese laws, he is equally guilty of a serious and aggravated offence, becoming further responsible for any evil consequence that may attend his resistance; nor will it avail anyone to plead that he did not know the persons arresting him to be in the lawful execution of their office, as a ground of exemption from the penalty attaching to such offence. The undersigned, therefore, calls upon British subjects within his jurisdiction, carefully to abstain from all wilful violations of the Japanese laws, and at the present moment more especially reference is made to shooting, and the pursuit of game.

Digitized by Google

There are certain restrictions and prohibitions to this sport in most countries—in many, very stringent ones; in none can a foreigner, or any one, indeed, shoot over another man's land, if he does not choose it or without his leave; the hardship of the case is therefore by no means so great nor so singular as has been alleged, even had residents in Japan no more serious and legitimate objects to pursue; but were it ten times more so, while such is the law they must abide by it.

The undersigned is further called upon to remark upon the common practice of carrying firearms during the day, and in the most ostentatious manner; there is no apparent danger to justify this practice, while, on the other hand, it is itself a source of danger, by provoking hostile feeling and distrust among the natives, and placing within reach of many, whose non-command of temper under provocations, or whose discretion under other circumstances cannot be trusted, such dangerous and deadly arms as revolvers. There is something essentially provocative and irritating in such ostentatious display of firearms by men supposed to be following the avocations of merchants, which are, or ought to be, altogether peaceable; nor is the danger one which affects only the person carrying the weapon, or any one assailed, but it may at any moment involve a whole community in peril. Considering these circumstances, therefore, and regarding such carrying of fire-arms between sunrise and sunset as a provocation in a breach of the peace, and a common source of danger to the community, British subjects are hereby prohibited from so offending, under penalties of fine and imprisonment. It has further come to the knowledge of the Japanese Government, that furious riding in the streets of Yokuhama and other crowded thoroughfares is a common practice among foreigners, and not only with these, but their Chinese servants, by which the lives of Japanese subjects are daily endangered—and one was only recently sacrificed.

The undersigned is deeply concerned to find himself under the necessity of pointing out for reprobation acts prohibited and declared punishable by law in every civilised country; he can only trust that no British subject will ever be brought before him on such a charge, and that every one will take earnest and effectual steps to prevent servants thus bringing their foreign masters into odium and disrespect. The very circumstance of these servants riding at all is a violation of the customs of the country, and one which no doubt outrages the feelings and the customs of the people.

The undersigned can see no adequate justification for this, and is certain it would be much better avoided in the interests of their employers and those of the whole community of foreigners, residing at this port.

(Signed) F. HOWARD VYSE,
H.B.M.'s Acting Consul at Kanagawa.

REPLY OF THE MERCHANTS.

YOKUHAMA, 10th Dec., 1860.

SIR,—We, the undersigned British residents at Yokuhama, have received from you a notification, dated 9th instant, which we have perused with feelings of the deepest anxiety and regret.

For months we have felt that our position in this country was daily becoming more critical; a position not only prejudicial to our commercial prospects from the double-faced and sordid views of the Japanese Government—which we have so long submitted to in silence from our confidence that our Minister was doing his utmost to obtain our rights in the full spirit of the Treaty—but one most nearly affecting the actual safety of our persons.

With reluctance we feel compelled to say, that your circular of the 5th inst. adds greatly to our difficulties. No greater misfortune can befall any community, resident in a foreign country, than to find that confidence in, and obedience to, the representatives of their Governments, are incompatible with the security of their prospects, the fair conduct of their commercial dealings, and even the protection of their lives and the legitimate freedom of their persons. Such we sincerely trust we may never find to be our position.

We therefore earnestly and respectfully beg that you will reconsider some of the points touched upon in your notification, which we cannot but feel convinced is calculated to do material harm both to ourselves and all future residents in this country. We much regret to find it both our duty and our right to comment on the tone and temper of your whole notification, which we consider couched in a strain that we should not have anticipated from one whom we all personally respect, and from whom we have ever experienced ready assistance and friendly courtesy. We cannot but see in it reflections disparaging to the whole community, which we consider uncalled for, while the assertion that many of us have been deliberately violating the laws of the country, is unfounded and unjust. We all greatly deplore the late unfortunate occurrence by which an officer of the Tycoon was dangerously wounded, but we do not forget that a fellow-countryman was illegally and unprovokedly assaulted and grossly ill-treated by the Japanese.

We cannot for a moment conceive that you are serious in stating that "The manifest law of Japan is, where exemption has not been especially stipulated by treaty in the form of specified rights and privileges, as binding upon foreigners as Japanese." Were this the case they could prevent us not only from shooting, but from riding, and could even enforce all their statuary laws as to dress and many other points, and even insist on our going on our knees to an official of the Tycoon.

Her Majesty's Order in Council of 23rd January, 1860, published by H.M.'s Envoy Extraordinary on 5th May, 1860, is very explicit on these points. We beg to refer you to No. 30 of that order, very clearly laying down the axiom that beyond the absolute stipulations of the treaty, no act done by a British subject in the dominions of the Tycoon of Japan shall be taken to be a crime, misdemeanor, or offence which, if done in England, would not be punishable by law. That the infraction, therefore, by us of a law which prohibits Japanese subjects from shooting, has been hitherto a misdemeanour on our part we must distinctly deny. At the same time we are aware that it is in the power of the Japanese to put a stop to shooting game by means perfectly in accordance with the laws of Great Britain, and that it is even in the power of the British authorities in this country to prevent such shooting, and, therefore, although this has not yet been attempted, we feel that it would be strongly advisable to desist for the present. At the same time we must most strongly protest against any order being made to bear a retrospective application, and against any person's hitherto shooting being termed "a deliberate violation of the law," and we beg your attention to No. 5 of the before-named order in Council, which expressly details the circumstances under which alone any order of the Consul can become binding and effective.

This leads us to remark upon a more serious point in your notification, and one which if left upon record will, we conceive, lead to infinite mischief. It is the passage in your circular which runs as follows:—"If he resist a Japanese officer who in the performance of his duty seeks to arrest him for this or any other offence against Japanese laws, he is equally guilty of a serious and aggravated offence. Nor will it avail any one to plead that he did not know the persons arresting him to be in the lawful execution of their office as a ground of exemption from the penalty attaching to such an offence." This we consider to be tantamount to placing in the hands of Japanese officers the power to arrest British subjects, not only for this, but for other infractions of the Japanese laws which we are all in the habit of every day committing—such as riding on horseback, wearing a forbidden dress, or standing up while a high functionary passes. We must respectfully but strongly insist on the fact that no Japanese official has any authority in any way to interfere with a British subject, certainly not to arrest him without a warrant from the Consul for such purpose. Even in Great Britain, or any other European country, no Government official can arrest a man without a special warrant, except in the actual commission of a crime; and from the evidence we have had of the manner in which Japanese officers treat a foreigner, when taken, we feel most strongly that, if the slightest encouragement be given to them in their illegal seizure of foreigners, not one of us can consider that his life is for one hour safe.

We therefore sincerely trust that so far from its being placed in the power of irresponsible and untrustworthy agents to arrest for pretended crimes the persons of British subjects it may be most strongly impressed upon the Japanese Government that the British Consul alone has the power to order the arrest of any British subject, and that for any such disgraceful and premeditated assaults as we have recently seen, they will be held deeply responsible and heavily liable by the British Government. With no less regret do we observe the manner in which you have referred to the carrying of fire-arms by foreigners, and can only sincerely trust that your words have conveyed to us a wrong impression of your meaning. Can it be said "that there is no apparent danger to justify this proceeding?" Look back upon the past eighteen months spent here. In September, 1857, there was, indeed, no apparent danger. All was quiet, all seemed peaceable, yet were we startled from our false security by the base assassination of two defenceless, inoffensive men by these treacherous and bloodthirsty people. Was it, then, provocation and irritation which led to this murder? In February we received an almost still more dreadful warning; and within a few weeks we have had these recalled to our minds by an impressive and significant ceremony. We cannot forget all this, and we feel that the very fact of the Japanese, whether officials or followers of the Princes, or whoever may be these assassins, being now well aware that all foreigners go about armed, has greatly contributed to the comparatively long interval of security we have experienced. Nor must it be forgotten that every Japanese official, of whom so large a portion of the Natives around us consists, and even servants and some of the lower classes are at all times armed. How is it possible to discriminate between the lawful officers of justice from the secret assassins, if to the former is granted the power of arresting and illtreating British subjects for alleged fictitious misdemeanours? And why should our Consul and representative designate the necessary precaution of a whole community for the safety of their lives as an intimidating provocative, and ostentatious display? It is a patent fact that the Government officials we come in contact with have repeatedly given us warning to be most careful during the visits of any of the princes and their followers to this place, and have positively declared their inability to protect us against these retainers, whose hostility to foreigners is but too well known.

No instance has yet occurred of the misuse by a British subject of the arms he thinks necessary to carry, and we do not imagine that the jealous, slanderous misrepresentations of these treacherous officials should be sufficient to invalidate all faith and confidence in the discretion and calmness of an Englishman, at least till some more decided evidence be adduced of want of judgment on our part or of good faith on theirs. With regard to the expression in your circular, that it has come to the knowledge of the Japanese Government "that furious riding in the streets of Yokuhama and other crowded thoroughfares is a common practice amongst foreigners." We regret that such a remark should be in any way called for, and we certainly cannot allow that it is actually a common practice. At the same time careless riding in crowded thoroughfares may have taken place, and we feel assured that your notification will be sufficient to prevent its recurrence.

Digitized by Google

We concur with your observations with regard to our Chinese servants riding, and have expressed a very strong opinion on the subject, and shall take every precaution against a repetition of this. We have commented now upon all the points mentioned in your circular, and we trust respectfully, though we have felt it necessary to protest strongly against portions of it. We beg you to believe that it has been in no spirit of hostility or opposition to yourself; on the contrary, we are most willing to do everything in our power to lighten the onerous duties of what we feel is a most difficult position, and we are all most willing to testify to the prompt and energetic assistance we have always received when requisite. At the same time we have felt that there were two most important points in your circular against which we were bound to protest, or at least if we have misinterpreted your meaning to request an explanation, namely, the liability of us to be arrested by Japanese officials at any time and for any offence against Japanese laws, and your prohibition of wearing revolvers in the day time, which we consider absolutely necessary.—We have the honour to be, sir, your most obedieht servants. To Captain F. Howard Vyse H.B.M.'s Acting Consul, Kanagawa.

NAGASAKI.

General Sir Hope Grant, staff, and family, arrived here on the 4th Jan. in the S. S. *Granada, via* the Inland Sea, and would shortly return to Shanghai.

Admiral Sir James Hope arrived also on the 3rd, accompanied by the *Vulcan*.

CHINA.

PEKING.

We have no later dates from Peking or Tient-sin, but a report had got abroad, which is thus given in the *Hong Kong Register:*—"Rumours are current at Shanghai that a severe engagement had taken place between our troops and the Tartars under San-ko-lin-sin; that Mr. Bruce had been murdered; and that Mr. Adkins had been severely maltreated."

Dates from the fleet in the Peiho River are to the 23rd Dec., and report all well.

SHANGHAI.

Messrs. Dent and Co.'s steamer, the *Ly ee-moon*, brought the London mail of the 10th of November on the 2nd Jan.

After a sojourn here of a month, Lord Elgin has taken his departure for Hong Kong, and left the question of the opening of the river Yang-tsze to foreign trade in the same unsatisfactory state as when he arrived. It was expected that he would have remained to witness the working of this, the most essential article of the Treaty of Tien-tsin, for which the foreign merchants have waited with much endurance since the Treaty was signed two years and a half ago. This desirable event is now, it is believed, to be accomplished by the Admiral, Sir James Hope, who is expected daily from Japan. Much anxiety prevails for the result of an expedition which will have so much influence on the future trade of this port—the success of which, we have no doubt, if prompt and determined measures be taken, will stimulate business considerably, and those obstructions to which trade has been so long subject will, probably, terminate.

The Commander-in-Chief has gone to Nagasaki in the *Chesapeake*. Admiral Jones has also gone to Kanagawa, in the *Imperieuse*, accompanied by three other vessels. This, it is assumed, is in consequence of the late affray at that place. A good deal of sharp feeling has been eliminated, and a notification by Captain F. Howard Vyse, acting-consul at Kanagawa, has been remonstrated against by many of the English residents there. This notification will be found under our Japan heading.

In reference to the notification which appeared in our last, the following has been issued:—

BRITISH CONSULATE, SHANGHAI, 29th Dec., 1860.

The undersigned, H.B.M.'s Consul, referring to his notification of the 18th inst., hereby makes known to British subjects at this port, that, having addressed a letter on the subject with which that notification dealt. to the Superintendent of Customs, he received a reply dated the 22nd inst., in which the superintendent stated that he had given orders that the accountants of foreign firms should not be called on to report the transactions in opium of those firms; that his notification prescribing that service should be returned to him; and that the establishment of the opium-duty commission should be removed from the foreign settlement.

These orders having been issued by the Chinese officer, who unites to the functions of Superintendent of Customs those of Civil and Military Intendant of the Circuit, no persons whatever have now any pretence of a right to effect seizures, whether of persons or goods, in this Settlement, except those who, by treaty and by local regulation, have hitherto been in the recognised and undisturbed exercise of that right. These are: the foreign Consuls, as regards the subjects and citizens of the States which they represent; the Municipal Police, as regards any persons openly committing offences or crimes; the Maritime Customs officers, as regards goods being landed or shipped; and Chinese policemen furnished with special warrants duly countersigned by a Treaty Power consul. Any other persons making a seizure are necessarily engaged in an unlawful and criminally punishable act; and the undersigned expresses his hope that British subjects generally will endeavour to further the common interests, by lending their watchful and prompt aid to the municipal police force in the work of arresting and delivering to the undersigned any persons engaged in such criminal acts, with a view to their prosecution and their punishment by competent authority.

THOS. TAYLOR MEADOWS,
H. B. M.'s Consul.

Her Majesty's Consul at Shanghai has advertised all parties interested that he is ready to issue passports to those British subjects desiring to visit the interior, exception being made to ports now unoccupied by the rebels.

NINGPO.

By the last mail I forwarded some account of the irruption of the rebels into this province. They have retired again, and gone into winter quarters. Indeed, their object may have been chiefly to get stores for winter. They have retired, also, from Hang-chow. Here the officers have been taking stringent measures to get rid of the horde of Canton pirates that have for some months been quartered here. They have enrolled a considerable number of braves for this special object. The Cantonese, who were particularly obnoxious, have been driven from the city, and many of them have left, probably to engage in piracy at sea. The city is strictly guarded night and day, to prevent their return. The houses in the city that were occupied by them have been completely destroyed, by order of the officers.

There seems to be entire acquiescence on the part of the officers and people in the treaties and conventions recently ratified at Peking. The Lieutenant-governor of this province has just issued a proclamation recommending the use of the Mexican dollar, on a par with the Carolus. Hitherto the Mexican dollar has been worth, in Chinese cash, only about three-fourths or two-thirds as much as the Carolus. should the recommendation of the Lieutenant-governor be adopted by the bankers, it would of course greatly facilitate trade. This move on the part of the officers indicates a disposition to give efficiency to the stipulations of the treaty respecting trade.

FOO-CHOW.

The gun-boat *Algerine* had gone in search of a pirate fleet, reported to have been seen surrounding the brig *Aim*, of Singapore.

The following notification issued by H.M.'s Consul on Jan. 5, will be pleasing and satisfactory to our readers:—

"Her Majesty's Consul has much pleasure in announcing, for the information of the British community, that the proclamation by the Prince of Kung, making public the China portion of the Convention of Peking and Treaty of Tien-tsin, was yesterday officially posted by order of the Viceroy in front of the Yamun, in presence of the Consul and senior naval officer, and Chinese officials appointed to perform the duty. The Viceroy has also, at the Consul's request, made arrangements for the posting of eighteen other copies of the proclamation in different quarters of the city by British and Chinese deputed officers in communication together."

Captain Aubaret, of H.I.M.'s war steamer *Pregent*, is now at Fuhchau, specially deputed to look after the due promulgation of the Chinese version of the French Treaty, which will take place during the present month. It appears also that official instructions have reached the Viceroy, overland from Peking, to promulgate extensively and carry out the provisions of the Treaty and Convention.

HONG KONG.

We observe by a notification in the Government *Gazette* that Messrs Perceval and Fletcher have been elected members of the Legislative Council, vice Messrs. Jardine and Lyall resigned.

Lord Elgin with his suite reached this on the 8th of January, and has gone up to visit Canton, prior to his early departure for England. It was hoped that his Lordship would have re-

Digitized by Google

mained to watch the working of the new Treaty and the opening up of the great Yang-tsze River to foreign trade, and some disappointment is felt at the decision he has arrived at. His Lordship, it is said, will visit Manila and Java; and, being in the vicinity, it is to be hoped he will visit Labuan and Sarawak.

The new acquisition on the Kowloong side, says the *China Mail*, is exciting a good deal of silent anxiety at present. The likelihood is, that some considerable time must elapse before it can be determined how the ground is to be disposed of. The most valuable piece of sea-frontage has already been decided upon as the only good spot for no less than three purposes, only one of which it can be applied to. The Governor, naturally enough, wishes it to build upon; the commanding officer recommends it as the only possible site for a barracks, and for that purpose every inch of it would be needed; and the admiral finds in it the very site for docks that has been so long desired and called for. The exact weight of each of those claims cannot be determined in a day; and until they are determined, the rest of the sea-frontage will likely remain unallotted.

In the Civil Service Abuses inquiry Mr. Caldwell goes on examining witnesses for his defence; there is no prospect of a speedy termination to this inquiry.

The weather here has been cold—thermometer at 60 to 65; at Whampoa it has been as low as 45.

H. M.'s troop ship *Adventure*, and the hired ships *Khersonese*, *Powerful*, and *Adelaide*, are under orders for England with troops.

The case of the owners of the barque *Chin Chin* against the Chinese inspectors of customs for an attack on her while in Swatow has been settled in favour of the owners.

The following mercantile announcements have appeared in the China papers:—

The interest and responsibility of Mr. Rowland Hamilton, and Mr. Hubert Marshall Murray Gray, in our firm, ceased on the 31st ultimo. Mr. Andrew Brand, and Mr. Robert Richard Westall, are admitted partners; and Mr. James Charles Helbling is authorised to sign our firm in Shanghai, per procuration.—Smith, Kennedy and Co.

The interest and responsibility of Mr. N. M. Beckwith, Mr. Thomas Walsh, Mr. Charles W. Spooner, and Mr. Charles W. Orne in our firm ceased on the 31st of December, 1860. Mr. Warren Delano, Mr. Edward Cunningham, Mr. William H. Forbes, and Mr. D. O. Clark, are admitted partners in our firm. —Russell and Co.

I have established myself at Canton as merchant and general commission agent, under the firm of Margesson and Co.—H. D. Margesson.

The interest and responsibility in our firm of Mr. George Adam Wiener, and Mr. James Hogg, ceased on the 31st Dec., 1860.

Mr. Alexander Michie is admitted a partner in our firm. Mr. George Adam Wiener, and Mr. Theophilus Gee Linstead, are authorised to sign our firm. The Canton branch of our firm was closed upon the 31st December, 1860.—Lindsay and Co.

The interest and responsibility of Mr. John Scarth in our firm ceased on 31st December, 1859; and that of Mr. Robert Thorburn on 31st Dec., 1860.

Mr. Edward Carey Smith is admitted a partner in our firm. —Turner and Co.

The interest and responsibility of Mr. Franklin Delano Williams in our firm ceased on the 27th day of October last; and our business will henceforth be carried on under the name of Wetmore, Cryder, and Co.—Wetmore, Williams and Co.

Mr. John Kearney Rodgers is authorised to sign our firm in China.—Wetmore, Cryder, and Co.

We have this day established ourselves at Shanghai as merchants and general agents, under the firm of Hogg Brothers.—James Hogg, Edward Jenner Hogg.

Mr. Henry Murray is admitted a partner in our firm, and Mr. Henry Dickinson is authorised to sign our name by procuration. Mr. Robert D. Park's connection with our firm ceases from this date; and the management of our business at this place is for the present assumed by our partner, Mr. Charles A. Dickinson.—Alfred Wilkinson and Co.

CANTON.

The new Russian Treaty with China (which was published by us last month) has been published in the *Friend of China*, and was, of course, an important document, as the first published in China.

There is still no appearance of the Canton merchants' Indemnity Money being paid, although the Americans have got nearly all theirs by this time. The garrison at Canton are are enlivening themselves and friends this week by horse-racing.

SIAM.

BANKOK.

Dates are to the 10th January, and by the *Commercial Reporter* business is proceeding satisfactorily. The *Benledi* is reported as having cleared for Falmouth on 18th Dec., and the *Bankok* was loading for Europe. The yield of sugar is expected to be 25,000 piculs short, in consequence of a disease in the cane.

BORNEO.

LABUAN.

Dates are down to the 29th December, and preparations for commencing work at the coal mines were progressing satisfactorily.

SARAWAK.

There is no particular news from this settlement, but the arrival of Sir James Brooke (who is at Singapore) was anxiously expected in order to settle various matters to the better Government of the natives. No fresh disturbances had taken place, and the intended visit of H.M's steamer *Nimrod* would have a beneficial effect. This vessel will convey from Singapore the Consul-General for Borneo, Mr. St John. After calling at Sarawak, she will proceed to Labuan. The steamer *Rainbow*, despatched from Glasgow, had not arrived at Singapore.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DAWSON—On the 14th inst., at Black Hall, Banchory, the wife of Capt. R. Pudsey Dawson, of a son.

DUNSFORD—On the 17th inst., at Gateshead Fell, Durham, the wife of Lieut.-Col. J. F. Dunsford, C.B., Her Majesty's Bengal Army, of a son.

FENNELL—On the 12th inst., at Freemantle, near Southampton, the wife of Arthur Fennell, Esq., of a daughter.

HORNE—On the 19th inst., at Bilbster-house, Caithnesshire, the wife of Major Horne, of Stirkoke, of a son.

MACLEAN—On the 15th inst., at 130, Westbourne-terrace, the wife of George Maclean, Esq., of a son.

MACLEAN—At Shanghai, on January 4, the wife of John Maclean, Esq., of a daughter.

WILSON—At Shanghai, on December 16, the wife of Mr. Craven Wilson, of a daughter.

MARRIAGES.

DAVIES—CLUNES—On the 11th inst., at the National Scotch Church, Halkin-street, Belgrave-square, by the Rev. Laurence Macbeth, M.A., Mr. William Henry Davies, Peninsular and Oriental Company's Service, Aden, to Janet, daughter of Mr. William Clunes.

MASSON—MORRISON—On the 20th inst., at St. Mary's Church, Cheltenham, by the Rev. Gordon Calthrop, Norman Ramsay Masson, Esq., of Hong Kong, to Hannah Eliza, widow of the late William Morrison, Esq., F.R.C.S., and daughter of John Grey, Esq., of Dilstone, Northumberland.

MURRAY—ALEXANDER—At 3, Park-place, Edinburgh, by the Rev. Dr. Guthrie, Dr. J. Ivor Murray, F.R.C.S.E. and F.R.S.E., Colonial Surgeon, Hong Kong, China, to Margaret Agnes, youngest daughter of James Alexander, Esq., of Wooler, Northumberland.

PEREIRA—DE MIRANDA—At Macao, on January 8, at the Parochial Church of St. Lourenço, by the Rev. Jorge Antonia Lopes da Silva, Antonio Marques Periera, Esq., superintendent of Chinese emigration, son of the commander of H.M.F.M.'s corvette *D. Joao I.* to Miss Bellarnina de Miranda, daughter of A. J. de Miranda, Esq.

DEATHS.

ANSTEY—On the 12th inst., at Torquay, Frances Elizabeth Anstey, aged 78.

BAIN—On the 16th inst., at St. George's-terrace, Canterbury, James W. Bain, Esq., younger son of the late Lieut.-Col. Bain, of Easter Livelands, Stirlingshire.

BURRETT—On the 10th inst., at her residence, 4, Rodney-buildings, New Kent-road, in her 73rd year, Mrs. Catherine Louisa Burrett, formerly of West Carberry, Ireland, a descendant of O'Mahoney the Fair and the Princess Sarah, daughter of Brian Borohme.

DENT—On the 13th inst., at 14, Leinster-terrace, Hyde-park, the residence of his father-in-law, William Hardinge Tyler, Esq., Captain Thomas Wilkinson Dent, late of the 11th Regt., Madras Native Infantry, in the 38th year of his age.

D'OLIVEIRA—At Macao, on January 1, Mr. J. F. D'Oliviera, aged 77 years.

GOUGH—On the 15th inst., in London, aged 34, Mary Vigers, wife of the Rev. F. F. Gough, M.A., of Ningpo, and eldest daughter of E. R. Le Mare, Esq., of Manchester.

GRANT—On the 13th inst., at Hillingdon, Mary Penelope, widow of the late Major-Gen. James Grant, C.B., aged 66.

VAN COEVORDEN—At Hong Kong, on January 3, D. E. I. van Coevorden.

WALLER—Drowned off the Peiho, on the evening of December 20, Charles Waller, aged 29, late in command of the British schooner *Neva*.

The exchange on India at Shanghai was at 298 to 299 rupees per 100 taels, and at Hong Kong 223 per $100. Bar silver at Shanghai 17 to 17¼ dwts. B.; 11¼ taels, and at Hong Kong 8 per cent. The current quotation at Shanghai for Mexican dollars was 75·0 to 75½ cents., and the rate of exchange on Hong Kong was 25 per cent. discount.

COMMERCIAL REPORT.

CHINA—EXPORTS.

TEA.—Prices may for Congous be quoted half a tael lower in Canton. The country Greens recently arrived there, consisting of about 1,000 packages, have all been purchased at high rates, and no more are expected to reach for some time to come. Messrs. Fussell and Co., of Foo-chow, in their circular, say:—A good steady business has been done during the fortnight, the settlement of Congou amounting to 33,700 chests, which have been taken at about the same rates as we last quoted. The Parsees having been still buyers at extreme prices has tended to keep up our rates. Some 5,000 chests Congou (included in the settlements) have been shipped on native account, and we believe some further shipments will be made shortly. In our circular of the 6th December, we reported that some 5,000 to 6,000 packages country Greens were close at hand; these have not yet reached this market, owing, it is said, to some disturbances in the Ho-how districts, through which they have to pass. The supplies to this market since last mail have only been 9,000 chests Congou and 3,600 packages Oolong. At Shanghai business has been exceedingly small and unimportant. Stocks still continue meagre, and such as to send buyers to other ports; it is still expected, however, that a better assortment may be brought forward shortly *via* Ningpo; indeed, one chop of very fair quality Ningchow has already arrived by that route, and has met with a ready sale at 30½ taels. Settlements amount only to 1,766 chests, of which 300 are Ningchow, at 30½ taels; 350 Kaisow kinds, at 27½ taels; common 87, and flowery Pekoes 1,029, at 32 taels to 37½ taels, making settlements for the season to date, 55,529 chests, against 198,396 chests same time last season. Stocks of all kinds are 9,500 chests, against nearly 30,000 chests last year, same period.

SILK.—The price of this article for the better qualities has ruled very steadily in Shanghai, while for interior sorts we may note a decline of about 5 taels. The manufacture of Throwns in the interior has recommenced, and a few small parcels which were offered have found buyers at full rates. The total settlements from 1st July to date are estimated at 63,000 bales, against 44,000 bales, for the corresponding period last year. We quote—Tsatlee, No. 1, taels 435 to 445 per picul; 2, 415 to 425; 3, 390 to 410; Taysaams, No. 1, taels, 350 to 355 per picul; 2, 320 to 335; 3, 290 to 305. At Canton, there is little demand for export, and as the yield is barely enough for native requirements the holders are very firm, The only settlement is 50 piculs rereeled Cumchook at previous rates.

DRUGS.—Cassia Lignea: a settlement is reported at Canton of 500 piculs at 17.25 dols., the stock on the market being computed at 1,000 piculs. Rates have a downward tendency. Cassia Oil: no settlement reported; dull at 270 dols. Cassia Buds: a lot of 25 piculs has reached Canton, for which 42 dols. is asked. In Anniseed and Anise Oil no transactions are reported. Rhubarb: a lot of 200 piculs of the new crop has been placed at Canton at 55 dols., the quality being middling only. China Root: dull at 3.50 to 4 dols. Galangal: ditto at 3.50 to 4 dols. Vermillion: 38 dols. for the best.

CHINA—IMPORTS.

The proximity of the China New Year has very much restricted sales.

CANTON.—Yarn no sales—rates have receded 1 dol. to 2 dols.; grey shirtings, 15,500 pieces, rates 10 cents lower; white shirting, 5,000 pieces, difficult of sale; T. cloths, no sales, dull; American goods, ditto; long ells, 1,500 pieces, saleable; Spanish stripes, 500 pieces, dull; camlets, 70 pieces, ditto; lastings, 100 pieces, ditto; iron, 2,000 plates, nail rod, in excessive stock; iron wire, 700 plates, ditto; lead, 1,800 plates, saleable; tin plates, dull: quicksilver, sales, 780 flasks; rattans, 3,000 parcels.

HONG KONG.—Yarn, 200 bales; grey shirtings, 16,000 pieces; white shirtings, 2,000 pieces; T-cloth, 17,260 pieces; long ells, 640 pieces (scarlet wanted); Spanish stripes, 400 pieces; camlets, 200 pieces; lastings, 100 pieces; iron and tin plates and window glass in heavy stock. Ship chandlery, &c., the market is completely glutted, there being stock sufficient for eighteen months' consumption. Gallego flour is only worth 7 to 9 dols.; no demand, large stocks. Chili, California, &c., about 5 dols.; American ditto offering at 25 per cent. below cost; beef, extra mess, 6 dols.; pork, prime, 11 dols. Coals; abundant for the moment, and, as no storage can be had, sales are made from ship's deck; Sydney, 6 to 6.50 dols.; English steam about 10 dols., anthracite, 8 dols.

JAPAN—EXPORTS.

Rape seed, 2 to 2 dols. 25c. per picul; oil, 7 to 7.50; fish oil, 4 to 4.50; gall nuts, 6.50 to 7; vegetable wax, 14; mother-o'-pearl shells, 1 to 1.50; iron, 3 to 3.30; copper bolts, 17 to 18; copper nails, 21 to 22; copper plates, 20 to 21; copper wire, 21 to 22; tea, 4 to 27; tobacco, 6 to 8; seaweed, cut, 1 to 2.50; mushrooms, 24 to 26; isinglass, 24 to 25; camphor, 25; fokling, 1.80 to 2; shark's fins, 13; sulphur, 2.50 to 3; saltpetre, 8 to 10.

The total export of silk from 1st July to 1st December, 1860, is estimated as follows, but cannot be strictly relied on, owing to the desire of some houses to prevent any publicity. England, 618 bales; Shanghai, 5,460; Hong Kong, 122; total, 6,200 bales.

Quotations.—Hank, 480 dols. to 520 dols. Book, 400 dols. to 500 dollars.

JAPAN—IMPORTS.

The Import Market is dull, the failure of one of the dealers, the increased value of the dollar as compared with the Itzaboo, and the heavy stocks all combining to this end, and, so far as cash transactions are concerned, quotations are purely nominal. There are, however, indications of improvement, unless importations should be large.

Imports.—Grey shirtings, 7lbs., 2 dols. 50c. per piece; ditto, 8lbs., 2 75c. to 2 80c.; T-cloths, 1 70c.; white shirtings, 2 80c.; white spots, 3 to 3 20c.; dyed spots, 4 to 4 5c.; white brocades, 3 to 3 20c.; dyed brocades, 3 90c.; chintzes red, 2 50c.; chintzes, assorted, 2 50c. to 2 75c.; damasks, 7; camlets, 24 to 26; long ells, 5 50c. to 8; velvets, dyed, 7 to 9; velvets, printed, 9 to 10; handkerchiefs, 80c.; lustres, 7; Orleans, plain, 7; Orleans, figured, 9.

SINGAPORE.—The export business would have been larger but for the scanty supplies of most of our produce and the high range of prices. Gambier, as well as Sago, which were in active demand at advancing rates

Digitized by Google

when we last wrote, owing to favourable reports from home, have been rather more neglected of late, and prices are declining. Black Pepper has been much sought after, but supplies are small and the price is higher. India-rubber has ceased to command the usual attention, a lot of about 200 piculs was settled at 38 dols. per picul in the beginning of the month, but since then no further sales have been reported; supplies, however, have only been small. Coffee continues to be inquired for, but little has been offered for sale. Of Camphor we have had some new arrivals, which can be got at rather easier rates. In imports the market generally remains in the same depressed state, although there has been some little demand for export to China and Siam for some particular descriptions of goods, which has, for the moment, broken the unvarying dulness which has prevailed for some time past.

MANILA.—The *Sale* arrived from Liverpool on December 24, and the *Teide* and *Jose Maria* may be expected during January. There is little or no produce now left for sale, so that it is difficult to say what effect the higher quotations just received from Europe may have on the market.

EXPORTS FROM CHINA.

Per Matanzas, from Japan, Nov. 6. Silk, 356 bales.

Per Aerolite, from Shanghai, Dec. 23, to London. Tea, 642,124 lbs.; silk waste, 48 piculs.

Per Ocean Gem, from Japan, Dec. 7. Tea, 400,000 lbs.; silk, 758 bales.

Per Starr King, from Shanghai, Jan. 2, to New York. Tea, 423,065 lbs.; raw silk, 70½ piculs.

Per Southern Cross, from Foo-Chow-Foo, Dec. 30, to London. Tea, 689,600 lbs.

Per Bride of the Seas, from Foo-chow-Foo, Jan. 1. Tea, 570,000 lbs.

Per Patrician, from Foo-chow-Foo, Jan. 1. Tea, 1,380,000 lbs.

Per Sancho Panza, from From Foo-chow-Foo, Dec. 30, to New York. Tea, 715,800 lbs.

Per Palma, from Foo-chow-Foo, Jan. 1, to Melbourne. Tea, 292,800 lbs.

Per Odin, from Foo-chow-Foo, Jan. 5, to Melbourne. Tea, 228,800 lbs.

Per Snow Squall, from Amoy, Jan. 7, to New York. Tea, 574,086 lbs.

Per Ottawa, mail steamer, from Hong Kong, Dec. 31, to London. Silk, 1,667 bales; to the Continent, 561.

Per Cambalu, from Hong Kong, Jan 3, to London. Silk, 1,414 bales.

Per Samuel Russell, from Hong Kong, Jan. 4, to New York. Tea, 774,400 lbs.

Per Torrent, from Hong Kong, Jan. 9, to San Francisco. Sugar, 1,330 piculs; rice, 3,700; oil, 250; tea, 162 packages; china goods, 8,047; opium, 20,200 taels.

Per Standard, from Canton, Dec. 27. Tea, 515,700 lbs.

EXPORTS FROM SINGAPORE.

Per Ralston to Liverpool, Jan. 14. Gambier, 2,021 piculs; pearl sago, 2,160; sago flour, 5,477; gutta percha, 65; sapanwood, 221; buffalo hides, 240; rice, 2,184; India rubber, 50; cutch, 338; white pepper, 123.

Per Caroline to Hamburg, Jan. 14. Sapanwood, 85 piculs; rattans, 80; gambier, 2,173; pearl sago, 302; tapioca, 80; white pepper, 142; black pepper, 1,872.

Per America, to Falmouth, Jan. 18. Rattans, 292 piculs; sapanwood, 153.

Per Virginie, to Falmouth, Jan. 13. Black pepper, 501 piculs; sapanwood, 653; rattans, 267; rice, 12,535 bags, transhipped.

Per Mary Goodell, to New York, Jan. 11. Tin, 384 piculs; cutch, 477; pearl sago, 112; sago flour, 302; gambier, 4,702; cassia, 49; black pepper, 3,100; coffee, 2,258; tapioca, 10; white pepper, 18; cubebs, 26; buffalo hides, 287; sugar, 1,109; rice, 1,108; sapanwood, 804.

EXPORTS FROM PENANG.

Per Clara for London, Jan. 9th:—Tin, 1,269 piculs; sugar, 1,991; cutch, 3,322; black pepper, 2,664; white pepper, 46; Indiarubber, 396; gutta percha, 149; tapioca, 424; buffalo hides, 90; cowhides, 41; buffalo horns, 38; gum benjamin, 245; rattans, 820; coffee, 2; cubebs, 2; nutmegs, 213; mace, 40; cloves, 47; isinglass, 18; nutmeg oil, 33 dozens; rum, 17,338 gallons; sundries, 4 cases; buffalo hides, 392; nutmegs, 50; putchleaf, 1; essential oil, 132 bottles; rattan chairs, 13.

Per Mary Goodell to New York, Jan. 23:—Tin, 516 piculs; Indiarubber, 190; black pepper, 129; buffalo hides, 100: nntmegs, 205; mace, 63,

Per Edward, for Boston, Dec. 31:—Tin, 2,358 piculs; sugar, 2,735; cutch, 1,703; India rubber, 412; cow hides; 483.

EXPORTS FROM MANILA.

Per Edwin Fox. to London, Dec. 22.—Hemp, 5,700 picu's; sugar, 9,100; cigars, 1,200 mil.

Per America, to Cadiz, Dec. 22.—sugar, 6,800 piculs.

Per Miletus, to Melbourne, Jan. 5.—Sugar, 14,325 piculs; coffee, 50; cordage, 725; cigars, 520 mil.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London: Dec. 30, Excelsior. From Liverpool: 24, Resperus; 28, Polynesia. From Toulon: 24, Puget; 28, La Foi.

At HONG KONG, MACAO, and CANTON.—From London: Dec. 31, Garatilda; Jan. 1, Vanguard, Duke of Wellington. From Liverpool: Dec. 31, Humphrey Nelson. From Cardiff: Emma Jane 31,; Jan. 9, China; 13, Pieter. From Newport: 10, Leonidas. From Hartlepool: 11, Albertine. From Sunderland: 12, Nelly. From New York: 2, Canvass Back. From Boston: 5, Curlew; 9, Mermaid.

At MANILA.—From Liverpool: Dec. 24, Sales. From Cardiff: 24, Elveiza.

At SINGAPORE.—From London: Jan. 10, Alliance. From Hamburg: 11, Dido. From Sunderland: 12, Aristides. From Newport: 14, Ferdinand and Louis. From Glasgow: 15, Jacatia. From Cardiff: 16, Maleyer; 19, Sourabaya.

SAILED.

From SHANGHAI.—For London: Dec. 22, Aerolite; Jan. 3, Cambula. For New York: 2, Starr King.

From FOO-CHOW-FOO.—For London: Dec. 30, Southern Cross; Jan. 1, Patrician, Bride of the Seas; 5, Kinnaird. For New York: Dec. 30, Sancho Panza.

From AMOY.—For New York: Jan. 7, Snow Squall.

From HONG KONG, MACAO, and CANTON.—For London: Dec. 23, Gabalva; 27, Standard. For England: 31, Bosphorus; Jan. 2, Sparrowhawk; 5, Adventure; 8, Mauritius. For Glasgow: 8, Congo. For New York: 4, Samuel Russell; Dec. 23, Haze. For Havana: 26, Francois I., May Queen; 31, Reina del Oceano. For Demerara: Jan. 2, Claremont.

From MANILA.—For London: Dec. 22, Edwin Fox. For Cadiz: 22, America.

From SINGAPORE.—For England: Jan. 12, Inflexible, M'Duff; 14, Sampson; 17, Sparrowhawk. For Falmouth: 13, Virginie. For Hamburg: 14, Caroline. For Liverpool: 15, Ralston. For New York: 11, Mary Goodell.

From PENANG.—For New York: Jan. 23, Mary Goodell.

LOADING.

At SHANGHAI.—For London: Bacchante, Morayshire, Tung Yu. For Liverpool: Sir Isaac Newton. For New York: Onward, Sportsman.

At FOO-CHOW-FOO.—For London: Bankside. For New York: Florence. For Australia: Ida, D. Rogus, Witch of the Seas.

At HONG KONG, MACAO, AND CANTON.—For London: Dawstone, James Patton, Oithona, Pruth, Shantung. For Liverpool: Scawfell. For Havre: Maria Eliza. For Glasgow: Chevy Chase. For Hamburg: Mathilde. For New York: Cornet, Flying Scud. For Havana: Forest Eagle, F. P. Sage, A. Thorndyke, Leonidas. For Demerara: Chapman, Saldanha. For Melbourne: Aurifera, Pons Aelu. For San Francisco: Kingfisher, Lotus, M. Whitridge, Rapid.

At MANILA.—For London: Fanny McHenry. For Liverpool: Sales. For Cork: Bonaventure, Eliza Stewart, Glendover. For Boston: Kit-Carson. For New York: Storm King, Wizard. For Sydney: Tropic.

At SINGAPORE.—For London: Knight, Lincelles, Robert Small. For Europe: Duchalya. For Liverpool: Mary Spencer. For Falmouth: John Hermann. For Amsterdam: J. Catherina. For Boston: R. B. Forbes.

At PENANG.—For London: Zenobia. For Boston: Humboldt.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: Tea, £2. 10s.; Silk, £5. To New York: Tea, $12; Silk, $20. Considerable inquiry has been made for vessels adapted for the coast trade; but this description of tonnage being very scarce, few charters have been made. We note the following: St. Theodosius, at $3,000 per month, ship finding coals; Avalanche, to Swatow, 30 lay days, for $3,000.

At AMOY.—There is still a want of small vessels for coast work. The Suan Juan has been chartered to Shanghai and back, 40 days, $3,400. The Salack, $5,000. The Swan, for 3 months, at $800 per month.

At HONG KONG, MACAO, and CANTON.—To London, £3. Most of the vessels now in China are too large for available purposes. A good demand still continues for vessels of small tonnage. The emigration trade is expected to be very large this season. The charters reported are—Dawstone and Shantung to London, from £2. 10s. to £3 per ton. Mashilde to Hamburg at £3. Imperial to San Francisco for $15,000. Kate, by Government, for storeship, at 15s. per ton per month. Forest Eagle and Kate Hooper for Havannah; former at $65, and latter at $60 per head. Banian to Calcutta and back for $3,000 per month, and nine others to Bankok and back at 45 to 60 cents. per picul.

At MANILA.—To London: Sugar, £2. 10s.; hemp, £3. 12s. 6d. To New York: $8. The charters reported are—Fanny McHenry, for London; Bonaventure, for Cork, at the above rates. Sales for Liverpool, at £2. 15s. sugar; and £3. 15s. hemp; and the Revere and Kit Carson, for New York, at above rates.

At SINGAPORE.—To London: £2. 15s. to £3. 10s. An active demand still continues for vessels to charter from the rice ports. The settlements are—Renown, to load at Rangoon or Akyab, for Great Britain, at £3. 12s. 6d., and 5s. extra if at second port; Western Continent, for Liverpool, at £3. 10s.; America, from Akyab to Great Britain, at £3, or to the Continent, £3. 12s. 6d.; Douglas, at £3. 10s.; and Roseau, from here and Macassar to London, for £2,000.

PASSED STRAITS OF SUNDA.

From China to England and Continent: Dec. 31, Minerva, Hougomont, Henry Miller; Jan. 4, Mars, Miles Barton; 8, Aerolite. To New York: Dec. 29, Pursuit; Jan. 2, Isaac Walton; 4, Nabob. To Melbourne: 2, Overmann. To Sydney: 13, Jupiter. From Manila to Boston: Dec. 29: John Laud. To Australia: 13, Barea Mamalita. To Cadiz: 7, America. From Bankok to Falmouth: 3, Benledi. From Singapore to England and Continent: Dec. 31, Syren; Jan. 1, Tasmania; 2, Patriotess, Ocean Gem; 6, Sir William Peel; 7, York, Indomitable; 10, Macduff, Melbourne; 12, San Francisco; 13, Inflexible. To Mauritius: 1, Alma.

Continental Intelligence.

FRANCE.

The *Patrie* and the *Pays* say:—"The latest news from Cochin China announces that fresh persecutions had been commenced against the Christians."

It is announced here that Baron Gros left Manila on the 28th Dec. for Suez, and is expected shortly to arrive in this city.

The articles taken from the Summer Palace at Peking, and offered to the Emperor and Empress by the army in China, are now exhibited in the gallery of the ground-floor of the Pavilion Marsan, in the Tuileries, and great disappointment is expressed at their very ordinary character.

Preparations are being already made to give a splendid reception to 3,000 of the army in China, who are to come to Paris on their return to France. The remainder of the French army which made the campaign of China are to proceed to Cochin China.

A direct transaction has been arranged between the Imperial Bank and the Bank of France for the exchange of 30,000,000f. in gold for the same amount in silver.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, Feb. 18.

The *Moscow Gazette* publishes a letter written in the Russian language by a Chinaman who signs himself Schiene-dzi, and dated from Malaga January 10, in which, after some description of his personal adventures in order to account for his being at such a distance from his native country and his intimate knowledge of Russian, he proceeds to make some remarks on the late war in China which serve to throw some curious light on the character and morals of the Chinese. Amongst other things, he gravely defends the cruelties committed, and even the execution of prisoners of war—because, forsooth, war is in itself a crime according to the Chinese code of ethics, and prisoners taken with arms in their hands are to be considered *à fortiori* as criminals. He then goes on to hint that the stipulations of the Treaty are not binding, because enforced under the influence of threats and coercion. All treaties concluded by China in times of peace are always most scrupulously adhered to, but it is a very different thing when the Government is forced to sign a convention dictated at the cannon's mouth, and accepted by China only to prevent further molestation, and as the readiest way to get rid of the enemy. In such cases they may insert what stipulations they please, as they are not in the least binding, and usually not even read before being signed.

The result of the late trigonometrical surveys serves to show that the area of this gigantic empire is even considerably larger than it was previously known to be. This new increase is not less than 40,000 German geographical square miles or a milion of English square miles, being alone equal to eight times the whole extent of the kingdom of Prussia. Former surveys gave the total area of Russia in Europe, Asia, and America at 353,236 German square miles, whereas it now proves to be 392,073 or very nearly ten millions of British square miles. It must here be remarked that in the above figures the late increase of territory by tke stipulations of the Treaty of Peking, by which China cedes in perpetuity to Russia a large tract of country on the shores of the Pacific Ocean is not included, as there has not yet been time to make the needful surveys.

A letter from the Amoor records two sharp shocks of earthquake distinctly felt at Irkutzk on the 2nd and 3rd of Dec. last, but, fortunately, unaccompanied by any serious consequences. They but rarely occur on the west side of Lake Baikal, though on the other side they are pretty frequent, especially at Selenghisk, where there is a meteorological station under the able direction of Herr Kelberg, a zealous apostle in the cause of science.

The most important intelligence I have to communicate today is the resolution of the Emperor to inaugurate the abolition of serfdom on the 3rd of March, that day being the anniversary of his ascession to the throne. There is still, to be sure, a great deal to be done, but the Imperial Commission being now fully aware of their sovereign's determination, have set to work in earnest and for the last week have held sittings of six and even eight hours a-day—the Emperor himself personally presiding.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Feb. 23.

In a short time a cause of some importance will be tried before the Civil Tribunal at the Hague, which is already much talked of in the higher circles, as it is expected that some very unusual disclosures will be let out; and, at all events, it will throw a peculiar light on the system carried on in Java and the Colonial Department in this country. This trial is the most important one that has taken place in this country for a long time past, both as regards the pecuniary value at stake and the principle involved, as well as with reference to the rank and station of the parties directly or indirectly interested in the litigation. It has reference to the system of making grants of waste lands and mineral treasures in the East, and in this case specially the tin mines in the Island of Billiton. In one of my late letters* I mentioned the fact of the King having given his royal sanction to the formation of a joint-stock (limited) company, for working the tin mines on that island, under the name of the "Billiton Company," the act of concession having only been very lately published in the official *Staats-Courant*. From what I hear on the subject, it now appears that the original concession was granted to a certain Baron van T—— as far back as 1852, quite as a personal favour, and without any pecuniary consideration being paid for it by him. As the fortunate "Concessionaire" was at that time not able to get up a company, he kept his charter quietly in his pocket till last year, when he made an arrangement with a man of business—the plaintiff in the present action—who undertook to bring out a joint-stock company for the purpose of purchasing the original charter and working the valuable tin mines at Billiton, for which service he was to receive the welcome little commission of two hundred thousand florins. Having successfully executed his part of the engagement, he naturally enough demands payment of the stipulated compensation, which the heirs of the baron, who has died in the meanwhile, refuse to comply with, on what grounds will appear at the trial. I have not been able to ascertain the exact sum paid by the company for the transfer of the privileges contained in the original concession, but I have heard it differently stated, and think I am not exaggerating when I put it down at two millions of florins.

The Netherlands Trading Company have been making inquiry for their usual number of spring vessels for India, and twenty-one have been engaged.

The Netherlands Trading Company also advertise for tenders to carry out to Java two detachments of supplementary troops, each of 100 men, with cabin accommodation as first-class passengers for eleven and nine officers respectively, to embark at Rotterdam and Nieuwe Deep.

So many applications have been made by non-commissioned officers to exchange into the East India army in conformity with the very liberal regulations mentioned in my last letter, that orders have been given not to accept any more for the present.

The Colonial Minister has appointed a commission to draw up a bill for the better regulation of the contracts for the cultivation of sugar and other produce in Java.

With reference to the late report of the intention to offer General de Cassembroof, the present Minister of War, the important post of Governor-General of Netherlands India, it was not altogether without foundation; but he declines to accept it on account of the state of his health, and by the advice of his medical adviser.

In addition to the naval reinforcements for India mentioned in my last letters, by commissioning the steamers *Amsterdam*, *De Berkel*, and *De Vecht*, three more are to be brought forward for immediate service on the same station. Their names, and those of the commanding officers, are as follows:—*Djambi*, Captain-Lieutenant M. H. Janson; *Bromo*, Captain-Lieutenant J. Wichers; and *Sindoro*, First-Lieutenant J. M. de Jongh.

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

NEW YORK, February 9, 1861.

MONETARY AND COMMERCIAL.

EAST INDIA AND CHINA GOODS.

Since our previous letter there has been a more active movement in spices. Cassia has been in good demand, including purchasers for shipment. Nutmegs have also been in better request, with sales at firmer

* In *London and China Express*, No. 52.

Digitized by Google

prices. Teas have experienced no important change, while the business and prices have been sustained. Gunny cloth and bags are firmer, and meet with a better demand.

COFFEE.—The market has been dull and prices unchanged. We quote Java in mats at 16 to 16¼. The stock embraces 500 bags, and 41,192 mats.

SUGARS have been dull during the week, and prices without change of importance. Our stock embraces about 140,000 bags, 25,000 hhds. Cuba and New Orleans, and 4,800 ditto Manila.

GUNNY BAGS.—Some sales of light and heavy have been made here and in Boston at 12¾c. to 13c., and 200 bales have sold in Boston at 13¼c. six months.

DRUGS.—Under a demand for China the market continues firm, with sales of eight cases at $5 12½c. per lb.; five cases gum copal were sold.

LINSEED continues tolerably active. At Boston a cargo of 3,000 bags Calcutta has been sold at 152½ to 155. Another cargo of 3,000 ditto sold at 152½ for time, and a lot of 250,000 at 150 cash.

SPICES.—A sale of 2,051 bags of Singapore pepper has been sold at 7½c. in bond, 250 ditto for home use at 7½c. cash and 7¾c. 6 months. Cassia has been very active, and sales have embraced this week about 75,000 mats, part for export. It opened at 16c. to 16¼c., advanced to 17 to 17¼c., and is now held at 18c.; 25,000 lb. No. 1 nutmegs sold at 40c.; 20 cases mace sold at 35c. six months, and a lot of private at 5c. Pepper is firmer, and sales have embraced about 500 bags at 8c. to 8½c.

SALTPETRE is dull and nominal.

RAW SILK is quiet, and no sales of moment reported.

TEAS.—The sales have embraced about 2,500 chests blacks, and 3,000 greens, this week at steady prices.

It will be seen that our shipments for China are becoming more active. This trade is expected to increase as the season advances. To Hong Kong and Shanghai freights range from $10 to $12 per ton.

ARRIVALS.—Phantom, Sargent, at New York, Jan. 29, from Shanghai; Ocean Steed, Smalley, at New York, Feb. 2, from Canton; Hotspur, Johnson, at New York, Feb. 3, from Hong Kong; D. Godfrey, Cobb, at New York, Feb. 5, from Foochow; Versailles, Sherburne, at Boston, Feb. 4, from Singapore; Surprise, Raulett, at New York, Feb. 7, from Foochow; from Amoy, Jan. 26, Northwind; from Hong Kong, Jan. 28, Annie Bucknam; from Singapore, Jan. 26, Quickstep; from Foo-chow, Jan. 28, Magnet.

SAILED.—Houqua, Cartwright, from New York, Feb. 1, for Hong Kong; Argonaut, Norton, from Boston, Feb. 1, for Shanghai; Alfred Hill, Morse, from Boston, Feb. 4, for Hong Kong.

LOADING.—AT NEW YORK.—For Hong Kong, N. B. Palmer, Low; Daylight, Sarger; Hotspur, ——; Penguin, Crereton. For Shanghai, Rainbow, Bassett; Mandarin, Parrott.

AT BOSTON.—For Hong Kong, Arab, Eldridge. For Manila, H. Charlotte (Sive), Rundberg.

AMERICA ON OUR NEW TREATY.

The *Public Ledger*, of Philadelphia, a paper of considerable influence in the United States, although, probably, not familiar to European ears, contains the following comments on Lord Elgin's new Treaty. In reference to Art. III. of the American Treaty quoted, we should point out what the writer of the article should have known, and that is that there was this difference in the similar clause procured by us, viz., that the Chinese did actually perform the covenant and did not with the Americans. It is a pity that the journals in the United States should, on all occasions, so love to have a pull at the Britishers who, in reality, do more and boast less than any country in the world. They will grow wiser in time:—

There is pacification, under the sharpest duress, signalised, at the moment when it was removed, by a questionable act of resentment—the burning of the Imperial palace—which must leave traces of anger as well as fear. There is indemnity, rather meagre in amount, considering the outlay, and totally inadequate, we venture to affirm, to satisfy the cravings of the claimants at Hong Kong and Canton, who have been fretted already beyond control by seeing the American merchants peacefully and contentedly pocketing their indemnities, principal and interest, making large profits out of military contracts, and getting comfortable freights for their idle ships as transports. The point of honour is saved by a very moderate expression of Imperial regret "at the misunderstanding occasioned by the act of the garrison at Taku." Though Lord Elgin burned a palace because half a dozen Englishmen were decoyed and murdered, he let the Chinese off very easily for slaughtering and maiming five hundred English sailors and soldiers at the Peiho forts, destroying the gunboats and disgracing the flag. Admiral Hope, in his desolate anchorage in the Gulf, or his quarters at Tien-tsin, must have felt new bitterness of spirit when this poor apology was accepted. Except the opening of Tien-tsin, which is important, and the cession of Cowloon, which practically, under a lease, was British property already, and is a suburb across the water of Hong Kong, there is nothing of moment—literally nothing—beyond what was gained in 1858, in this instrument, which will have cost, before it is over, hundreds of millions of dollars, and, if Chinese lives are worth counting at all, a hundred thousand lives—men, women, and children. If Mr. Bruce, who is now left to carry all this into effect, and to wipe away, if he can, the bloody stains his own folly occasioned, had only had wit enough to go to Peking a year ago by the route the Chinese agreed to take him, everything now gained would have been cheaply and peacefully won.

The English papers, conscious that, after all, little has been gained of substance, dwell with complacent emphasis on the clause in the new Treaty, which provides for its official promulgation throughout the Empire. By reference to Mr. Reed's Treaty, it will be found that this new and "important" provision is almost literally a copy of one of its articles. The American Treaty says:—

"Art. III.—In order that the people of the two countries may know and obey the provisions of this Treaty, the United States agree immediately on the exchange of ratifications, to proclaim the same, and publish it by proclamation in the gazettes where the laws of the United States are published; and his Majesty, the Emperor of China, on the exchange of ratifications, agrees immediately to direct the publication of the same at the capital and by the Governors of all the Provinces."

So that even this is not new. The opening of Tien-tsin (an excellent market for our heavy cotton fabrics), enures to us, of course, under the most favoured clause.

The only reference to America in these despatches is in an intercepted Imperial decree, found in the plunder of the Summer Palace, in which the Emperor speaks of Mr. Ward's refusal to render homage, which he describes "as an arrogation which is simply ridiculous." This at least concludes the Chinese from saying, as they have continued to do for sixty-five years about Lord Macartney, that Mr. Ward did degrade himself by the Kotoo or anything like it. These papers show further that the suspicions of Russia which darkened Lord Elgin's mind in 1858, have gone to sleep, for General Ignatieff followed in the train of the Allies without reproach, entered Peking with them or soon after them, in strange contrast, accompanied only by a dozen Cossacks, tendered his good offices as mediator, which were accepted, gave consecrated burial ground for the poor victims of Chinese ferocity, and was thanked cordially for what he did. How widely different from what we read of the absurd distrust three years ago. Mr. Ward, fortunately for himself and his country, was beyond thanks or suspicion, quietly attending to the material interests of his fellow-citizens at Shanghai and Canton. There is one other feature of the new Treaty, too important to notice to-day, of great interest, the legalisation o the Coolie trade. Opium in 1858 and Coolies in 1861 show singular progress.

THE AMOOR.

Extract from a letter of Dr. Holtermann, of the Russian Medical Service, to his friend Professor ——, of the University of Dorpat:—

I received your letter just as I was preparing to make a tour of inspection through my district, which accounts for my not writing sooner. Glehn spent several days here, and then proceeded down the Amoor by a Government steamer to Nikolayefsk, and thence to the Island of Sakhalin, which is this year the principal seat of our observations on natural history, Mr. Schmidt, who spent the winter with me, having proceeded thither as far back as last March. Except your letter by Glehn I have received none from Dorpat, which will scarcely astonish you, when you consider the very irregular manner in which our postal service is carried on by the lazy Cossacks. On the 10th of August I shall have been here a whole year, though my appointment is dated 22nd March, 1859, from which day my salary commences, and after ten years' service I am entitled to an annual pension of 1,500 silver roubles.

This part of the country, and indeed the whole of the Amoor territory, is very beautiful; our young town is situated on an extensive plain, without any forest. Timber for building is brought down the stream in floating rafts of large dimensions. The work of building the houses is performed by the soldiers, who receive extra pay for their trouble, and attend to their drill during the winter in their barracks. On the other hand, the farming operations are carried on by Cossacks. Every summer numerous transports of new settlers arrive from the interior, and go on to the districts lower down the river, and form in all directions new settlements. In the course of this summer immigrants are expected from America, and in 1862 German colonists from Saratoff. These latter, who are excellent agriculturists, will teach the raw Cossacks how to do the greatest amount of work with the least application of physical strength.

It would be unfair to blame the authorities if greater success has not crowned their labours. Immense exertions have been made to bring hither capital, corn, and colonists. The latter are supported at the expense of the Government for the first two years, after which they ought to be able to support themselves. But the Cossacks, though accustomed to farming, are lazy by nature, and accustomed, moreover, to do the work in their own primitive manner, so that it is doubly difficult for them to bring new land into cultivation. What we want here are diligent, spirited workmen, accustomed to rise with the sun, work in the fields all day, and return home at dusk, and not the lazy Cossacks, who do not even get up till eight or nine o'clock. Do not suppose I am exaggerating when I tell you that the country produces spontaneously the vine, the walnut, and the cork tree, whilst pheasants and partridges may be had in abundance for the mere shooting, and the finest oranges ripen in the open air, whilst the river supplies our tables with the most delicate of all fish. The grapes, even in their present natural growth, are large, juicy, and sweet, and by a little attention, cultivation, and grafting, might with small labour and expense be made to produce a rich and palatable wine.*

Most of the products of the animal and vegetable kingdom, both of the temperate and even the torrid zone, are to be met with in this favoured district. In the deep recesses of the Khingan (Bureya) forests tigers and leopards† lurk in numerous herds, supporting themselves amply by the

* Dr. H. is certainly exaggerating as regards the vegetable productions of the Amoor. We certainly find the vine growing spontaneously, though only about the mouth of the Usuri and Sunguri, much further south than Blagovesh'chensk, but the grapes, far from being "palatable," are, according, to the testimony of the botanist Maximowicz, not even edible. They are sour and small. Nor is it to be expected that grapes should be at all worth picking in a country the winter temperature of which falls to thirty-two degrees R. (at Blagovesh'chensk, being further north, the winters are colder, and no vine at all is found there), whilst the rivers are covered with ice from November to April or May. We know from experience that the vine requires not only a hot summer, but also a moderately cold winter. Oranges may no doubt be grown in hot-houses, but they are not indigenous to the country. There certainly are extensive and fertile districts along the middle and Southern Amoor, but the country can by no means compare with Central Europe under the same latitudes, much less with Great Britain. Throughout, the winters last from five to six months.

† No leopards are found, but the panther (*Felis Irbis, Mule*). Of course these animals do not prowl about in "numerous herds!" They cross, however, the Amoor from the South, and occasionally advance to fifty-seven deg. N. lat.

Digitized by Google

great abundance of stags, red deer, and many other descriptions of game, whilst the antelopes vie with the chamois in their surprising leaps across unfathomable chasms and abysses. I inhabit very comfortable quarters, consisting of four rooms and a kitchen, which I have fitted up and furnished in a style as much approaching that of Europe as the means at my disposal will admit of. Last winter we suffered much from the piercing cold, the thermometer sinking to 36 deg. Reaumur (58 deg. below zero Faht.), whilst the extreme heat of the summer (30 deg. Reaumur, or 107 deg. Faht.), is equally unpleasant to an European constitution. In my garden I have planted potatoes, cabbages, peas, and other vegetables, which suffice for my table. I have bought a couple of spirited horses, and a four-wheeled droschky, in which I drive to the hospital every day and visit my patients.

You will no doubt be curious to learn where we all obtain our daily supplies of food, and I will therefore say a few words on this subject. The Amoor Trading Company was started with a paid-up capital of three millions of silver roubles, for the express purpose of furnishing our new settlements with all the necessaries and many of the luxuries of life. This was so generally understood that all private enterprise was stopped, no merchants being bold enough to think of entering into competition with such a powerful company, since having to get their goods sent by the expensive land conveyance all the way from St. Petersburg, they could never dream of underselling the prices asked by the company. And what is the real state of the case? Why, that after all, we find it cheapest and most profitable to have our orders executed at St. Petersburg and sent out here by the post, which, though the expense is very heavy—being not less than twenty-five copecks per lb., comes still much cheaper than if we bought them on the spot from the company, so exorbitant are the prices they ask. This may appear to you incredible, exaggerated, and incomprehensible, but I am nevertheless stating nothing but the plain naked truth. The company have fulfiled only a part of their engagement, and their factories are overloaded with goods of all descriptions, but the quality they offer is very indifferent, and by their being in virtual possession of a monopoly, they consider themselves at liberty to screw as much profit out of us as they can, and they are certainly not bashful in their extortionate demands. No wonder that the shares of the company command such a high premium at St. Petersburg, though it is highly probable that the shareholders, if acquainted with the manner in which their high dividends are derived, would many of them prefer a smaller return for their money, with the conviction of having gained it by fair trading, instead of taking advantage of the wants of the settlers and forcing them to become purchasers of very inferior goods at the most startling and hitherto unheard-of prices. Perhaps I may take occasion to recur to this subject in a future letter.

[We do not of course mean to impugn Dr. Holtermann's veracity. Part of the information he gives refers to the Khingan (Bureya) mountains, far below his place of residence. This he derived from oral information, and the Russians are notorious liars. If we study the works of Maximowicz and Schrenck regarding the natural history of this region, and inquire into its climate, we are at once in a position to judge whether it be possible or not for grapes to be luscious and oranges to ripen in the open air.—Editor.]

Parliamentary Intelligence.

HOUSE OF LORDS.

THE LATE CHINA WAR.—VOTE OF THANKS TO THE ARMY AND NAVY.—(Feb. 14.) Lord HERBERT OF LEA (who rose for the first time to address the House of Lords) moved votes of thanks to her Majesty's forces engaged in the late China war. He gave a brief sketch of the organisation of the expedition for avenging the defeat of the Peiho, and alluded to the ability which had been displayed by the officers in command in embarking and landing their troops in the highest state of efficiency. On the 1st of August the troops under General Grant landed in China and occupied the forts of the Peiho. They subsequently, after encountering unexpected hardships, advanced through a difficult country, the obstacles of which were much lessened by the gallantry of the Sikh cavalry. The Taku Forts were next attacked, and, after a short but gallant resistance, carried in the most successful style. Lord Herbert next referred to the action which took place before Tien-tsin, and vindicated Sir Hope Grant from the charge that he had forced hostilities on the Chinese at this period, when they were particularly desirous of peace. Between the military and naval services he was delighted to state that there had been the most cordial co-operation. In terms of indignation he proceeded to detail the horrible barbarities inflicted by the Chinese on the unfortunate gentlemen whom they had captured by a foul act of treachery. This atrocious crime necessitated some sort of punishment, one which should fall upon the instigators of it, and not upon an unoffending people, and the punishment selected had been the destruction of the Summer Palace of the Emperor. From these topics he passed to speak in terms of great approval of the Commissariat and Medical Staff attached to the forces. It was the first time that a medical officer had been sent out solely for sanitary purposes, and the appointment had been productive of great benefits to the army. Already her Majesty had expressed her sense of the services which had been rendered by the troops in China, and it now remained for their lordships to express their approbation by giving their assent to the motion. The noble lord concluded by moving the following resolutions:—"That the thanks of this House be given to Lieut.-General Sir Hope Grant, G.C.B.; Vice-Admiral Sir James Hope, K.C.B.; Major-General Sir John Mitchell, K.C.B.; Major-General Sir Robert Napier, K.C.B.; Rear-Admiral Lewis Tobias Jones, C.B.; for the distinguished skill, zeal, and intrepidity with which they conducted the combined operations in the North of China, which terminated in the capture of Peking, whereby an honourable peace has been obtained on the terms proposed by her Majesty and her ally the Emperor of the French. That the thanks of the House be given to the other officers of the navy, army, and the Royal Marines, including her Majesty's Indian forces, both European and native, for the energy and gallantry with which they executed the services they were called upon to perform. That this House doth acknowledge and highly approve the gallantry, discipline, and uniform good conduct displayed by the petty officers and men of the navy, army, Royal Marines, and her Majesty's Indian forces, European and native, and the cordial good feeling which animated the united force. And that the same be communicated to them by the commanders of the several ships and corps, who are respectively desired to thank them for their gallant and steadfast behaviour."—Lord DERBY said that he felt it incumbent upon him to express his satisfaction at the perfect organisation of the expedition to China, reflecting, as it did, the greatest credit upon the departments concerned with it, and especially upon their chiefs, Lord Herbert and the Duke of Cambridge. Having highly eulogised the various operations, he complained of the meagre information which had been laid before the House by the Government, and insisted that more papers should have been presented to their lordships on the merits of officers whom they were about to thank for their services. No words, however, could be too high to mark their sense of Sir H. Grant's and Admiral Hope's services. He should have been glad to have heard something concerning the reported differences of opinion between Gen. Montauban and Sir Hope Grant, because he thought that the instance reported redounded much to the credit of Sir H. Grant, who, on his own responsibility and in spite of Gen. Montauban's protest, determined to attack the North Fort. As to the forces engaged, whatever they had to do they did it well, gallantly, and successfully. He regretted that the navy had not, by taking a more prominent part at the scene of their former disaster, satisfied their own minds that they had avenged their old defeat. He then commented on the admirable discipline and subordination of the troops—qualities which had been proved by the kindly acts and friendly bearing of the population through which they had passed. He refrained from saying anything in reference to the Treaty, as the motion before the House was one of a purely military character. As to the destruction of the Summer Palace, although he admitted that it was amply justified by the barbarities which had been practised by the Chinese, he thought it was likely to produce a prejudicial impression, and would tend to counteract the good effect produced by the behaviour of our troops, and to injure the friendly feeling which existed. He thought this step taken by Lord Elgin was a mistake in point both of judgment and of policy. He concluded by giving his cordial assent to the motion.—The Duke of CAMBRIDGE bore testimony to the skill and bravery displayed by our forces.—Earl GREY stated that he always disapproved of the war with China; nevertheless he was quite prepared to concur in a vote of thanks to the forces engaged on the occasion.—Lord CLYDE alluded in terms of high praise to the conduct of Sir Hope Grant.—The Duke of SOMERSET expressed his approbation of the services of the navy, and read a letter from Sir Hope Grant, in which that officer spoke in the highest praise of the efficiency of those very gunboats which last year the House had been informed were entirely rotten. He defended the destruction of the Summer Palace, and expressed his conviction of the necessity of that act. He trusted that after this exhibition of power the Treaty would be effectually carried out.—The Marquis of BATH protested against the destruction of the Summer Palace as an "act of Vandalism," and only comparable "to the burning of the Alexandrian library and the sack of Rome by the Constable Bourbon."—The Earl of ELLENBOROUGH said that they were under such deep obligations to Lord Elgin that it was with deep regret that he heard any part of his conduct disapproved of. He thought that the country would do well to consider that that noble earl had to impress the minds of Orientals, and that it was necessary in his opinion to do what he did in order to preserve henceforth the lives of her Majesty's subjects in China. He was of opinion that no public man ever made greater sacrifices for the public than Lord Elgin when he proceeded to China a second time, and he thought that his conduct throughout had been marked by great judgment, firmness, and discretion; and that it was to him that we owed the extrication of our army from a position utterly false on military principles with honour and with credit.—The motion was then agreed to.

OUR POLICY IN CHINA CONDEMNED.—(19.) Lord GREY, in moving that an humble address be presented to her Majesty for copies or extracts of any despatches received by her Majesty's Government, explaining the objects of an expedition reported to have been ordered to proceed up the Yang-tse-Kiang, said that he had given notice of this motion in order to call the attention of the House to the papers relating to China, which had been already laid before the House. He detailed the progress of British trade in China up to the conclusion of the Opium War. The result of that war was a treaty obtained on the most advantageous terms to ourselves, but which, although faithfully observed by the Chinese Government, had been abused by ourselves. Instead of stifling the trade in opium we had done our best to promote it, and, in addition, had introduced a trade more pernicious—the export of coolies—a slave trade in disguise. These abuses, due in a certain extent to the corruptibility of the Chinese officials, had led to acts of which we should have been ashamed if we had been dealing with a more civilised country, and had at last even induced conscientious men, who had embarked in the trade with the most honourable intention, to follow the bad example, until at last the whole trade had become demoralised. His Lordship remarked that our policy in China had injuriously affected our pecuniary interests, arguing that the state of anarchy and rebellion, which checked all internal commerce and communication in China, and the smuggling and piracy on her coasts dated from the Treaty of Nanking and the Opium War. Judging from the past, he said, it was impossible not to perceive that the recent Treaty exacted by Lord Elgin was a further step in the wrong direction, and would produce like results. At the conclusion of the Opium War, when the Chinese resources were unimpared, we had required only £3,000,000, but now, after a long rebellion and a costly war, we asked £5,300,000. The object of the expedition up the Yang-tse was to overawe the rebels, but in doing so the Government would be trying to stop abuses which they themselves had fostered, and he warned them that their efforts would be useless unless they were prepared to maintain a large and permanent military force in China. The Treaty which had been concluded with China by Lord Elgin contained the germs of future difficulties, and he feared of future wars; and he begged their lordships to consider the matter seriously, the more so as the same events were likely to take place

Digitized by Google

in Japan, where similar abuses existed. This country, he asserted, might, had a different policy been pursued, have obtained, without war or violence, the means of carrying on a large and profitable commerce with China. As it was, he had inflicted the horrors of war on the Chinese at an enormous expense to ourselves, and left our trade on even a more precarious footing than it was before. In conclusion he expressed his regret that we had not, before acting in conjunction with the French, ascertained whether the French grievance was a just one.—Lord WODEHOUSE said there would be no objection to lay the papers moved for on the table of the House. Those papers proved that Lord Elgin's intention in going up the Yang-tse was only to promote trade, and was perfectly unconnected with the rebellion. He could not agree with Lord Grey in the exaggerated effects which he attributed to the Treaty of Nanking. It was very easy to impute all the blame of the opium trade to this country, but it was well known that in spite of the Chinese law, opium had been and was introduced into that country, so that if we had enforced the prohibition of opium, we should have been doing that to which Lord Grey so much objected—interfering with the Chinese authorities for the sake of enforcing Chinese laws. Alluding to the subject of the duties, he stated that we had taken steps to assist in collecting duties which the Chinese were unable to collect for themselves, and had as fairly as we could endeavoured to carry out the stipulations of the Treaty. As to the emigration of coolies, he entirely concurred with Lord Grey on the duty of foreign Governments to put an end to traffic, but entirely dissented from his conclusions, in which he saddled the Government of this country with the responsibility of having promoted this traffic. In regard to piracy the Government maintained a large naval force in the Chinese seas for its suppression. He then proceeded to vindicate the good faith of the British Government, and to insist that if the Chinese did not observe the plain and simple words of the Treaty it became necessary to allow no evasion, but to enforce that observance if any intercourse at all were to be carried on. If the Chinese once entertained the idea that we would depart from the words of the Treaty, they would circumvent us by their tricky diplomacy, and oblige us at last to cut the matter with the sword. The conduct of our troops at Shanghai required no vindication. The question was simply whether British merchants were to be plundered, or the rebels to be repelled from the town. However, he informed the House that there was no intention on the part of the Government to meddle with the civil dissensions of China, but only to uphold our rights if menaced. In conclusion, he assured the House that the Government had no other policy in China than to cause the observance of those treaties which had been so often violated, and expressed a hope that the Central Government would, from the information which had been given to Prince Kung, exercise a just control over the acts of the local governments.—The Earl of ELLENBOROUGH considered that England had behaved with great injustice towards the Chinese. Was, he asked, this fourth campaign of Sir J. Bowring's war finished? The few troops we had left at Tien-tsin would, from their paucity, provoke an attack, and, if attacked, of course, there would be another war. In regard to the article of the Treaty on the emigration of coolies, he attacked its injustice and doubted its policy. It had identified us with other foreigners formerly mixed up in this odious traffic, and already we had obtained the title of "man stealers." He looked upon the expedition up the Yang-tse as the best means for restoring strength and stability to the Chinese empire because by exploring that river we should be brought into collision with the rebels, and in consequence should do our best to put them down, and so open up the trade which they were now obstructing.—After some remarks from Lord GREY in reply, the motion was agreed to.

HOUSE OF COMMONS.

THE LATE CHINA WAR.—VOTE OF THANKS TO THE ARMY AND NAVY.—(Feb. 11.) Mr. SCULLY gave notice that on the 14th inst. on the motion for a vote of thanks to the army in China he would call attention to the published statements with regard to the Emperor's Summer Palace, and its being ruthlessly looted and destroyed, and asked whether the noble lord was enabled to state whether it was burnt down by order of the French as well as the English commander.—(14.) Lord PALMERSTON moved the thanks of the House to the army and navy engaged in the recent operations in China, whose brilliant services, he observed, had been performed under circumstances of considerable difficulty, with the greatest possible skill, gallantry, and intrepidity. Not a mistake had been made; there had been no deficiency in providing troops and stores, and in transporting them to the scene of operations, while the most perfect harmony had prevailed between the British and French forces. The noble lord then touched upon the treachery of the Chinese, in violating with such inhuman cruelties the Englishmen who fell into their hands. Barbarous governments, he remarked, were apt to deal treacherously with each other, and possibly the Government of China imagined that they might act in the same manner with civilised nations. But when such atrocities were committed civilised nations must visit them with the severest retribution, so that they might not be perpetrated with impunity. The Allies had, however, forborne from storming the city of Peking and inflicting injuries upon its unoffending people; and, accordingly, the British commander, Sir Hope Grant, acting with the sanction of Lord Elgin, determined upon the destruction of the Summer Palace of the Emperor, who was, therefore, the only person to suffer. In doing this he had received the approval of her Majesty's Government also, although it was undoubtedly true that he had not the acquiescence of the French general. He trusted that the great success of our arms in China, and the punishment which had fallen upon the Emperor, would teach the Government of that country that they must obey those laws of international right which prevailed amongst civilised nations of the world. The noble lord concluded by moving the resolutions in form identical with those proposed in the House of Lords.—Mr. DISRAELI, in seconding the motion, paid an eloquent tribute to the bravery and indomitable perseverance of the forces engaged in these operations. He observed that although the events in China were not of a nature to make it possible to refer to those immortal fields to which posterity will ever look with never-failing wonder and admiration, yet, merely in a mi[illegible]se, and considered only with reference to military consid[illegible]was one view of their importance which could not be [illegible] remote part of the globe, and in a strange climate, we should find the health of the troops admirably preserved. He attributed this to our now perfect organisation—applying all the discoveries of modern science to the equipment and maintenance of our troops, and to that care for their health which was so long desired and sought for.—Mr. SCULLY adverted to the circumstances connected with the destruction of the palace, and argued that no greater provocation had been given by the Chinese to us than to the French, who had not concurred in the act, and if it was not justifiable—if it was an act of barbarism and Vandalism, the nation should separate itself from it.—Mr. JAMES WHITE stated that he had passed ten years of his life in that part of the country which was the scene of the great events which they were called upon to commemorate as so honourable to our army and navy, and therefore he might speak with some authority. He took exception to Lord Palmerston's statement that the war had originated in the refusal of the Chinese to ratify the Treaty of Tien-tsin. He contended that they had not refused to ratify it; that they had ratified the American Treaty, and that the British Government had virtually acknowledged the ratification. He denied that commerce would derive any benefit, and he should blush for his brother merchants, did he not know that those in the East almost unanimously repudiated any concurrence or sympathy in the objects of the late war. He had just received a letter from his agent in Shanghai, dated the 20th of December, wherein he stated—"So far from benefitting by the late Treaty, we are much worse off, seeing that we now have to pay full duties, which, by consent of the local authorities, were before diminished to one half." He had, however, much pleasure in concurring in the vote of thanks to the army and navy.—Sir J. ELPHINSTONE should not have added one word to what had been stated, but for an omission which had only to be mentioned, he thought, to be put right. Part of our forces in the advance to Peking fell into an ambuscade, and were brutally murdered. In a previous year we lost a far larger number of men in a similar ambuscade at the mouth of the Peiho, and he thought compensation ought to be exacted for that outrage as well as for the one which had succeeded it. He did not believe in the efficacy of the Treaty, but as it was probable that an opportunity would be afforded soon of discussing this branch of the question, he would content himself with supporting the vote of thanks.—Lord J. RUSSELL justified the destruction of the palace as a fit atonement for the barbarous treatment of the captives by the Chinese authorities. Here was the most barbarous treatment inflicted by Chinese officials upon English military and civil officers, the latter not being engaged in military operations, but a peace, and arranging the terms of an armistice to lead to a peace. The Chinese officials treacherously broke that armistice, and most barbarously took the lives of four of our countrymen under circumstances of the greatest barbarity, and accompanied by horrors which it was heartrending to describe. It had been said that Lord Elgin might have required as an atonement that a certain number of Chinese should be capitally executed, as some satisfaction to us for these murders. Lord Elgin said most truly that the Chinese would have made no difficulty in complying with this requisition, but that they would have sacrificed for the purpose some miserable subordinates and not those Chinese commanders who were the real parties upon whom retaliation should fall. We might have obtained a large indemnity, but Lord Elgin did not consider it advisable to press more severely on the Chinese and thus delay the conclusion of a treaty of peace. Another course had been hinted at, namely, that some severe punishment might have been inflicted on the capital itself. That course, again, would have involved the punishment of the innocent for the guilty. Lord Elgin, therefore, determined that the punishment should fall upon the Emperor of China himself, by the lose of his palace and the treasures it contained. The question as to the previous ambuscade had been discussed last year. It had never been usual to ask for an indemnity on behalf of the relatives of those who had fallen in war. So far from its being the truth that the Articles of the Treaty were not known in the south of China, a despatch lately received from the consul at Canton stated that the Treaty had been fully published; that the tariff provided for had been established; that trade had commenced upon that tariff, and was proceeding satisfactorily. The resolutions were then put *seriatim* and agreed to.

BANKRUPTCY BILL.—The ATTORNEY-GENERAL, in moving for leave to bring in a Bill to amend the law relating to bankruptcy and insolvency, expressed a hope that he had succeeded in so framing the measure that it would be received with greater favour than its predecessor of last year. He explained the various provisions in the present Bill, and expressed a hope that the measure would have the effect of substituting a simple and an economical system of administration for what had hitherto been a complex and an expensive one.—Mr. Hadfield, Mr. Malins, Mr. Crawford, Mr. Walpole, and other members, expressed their satisfaction with the Bill, which was brought in and read a first time.—(14.) On the order of the second reading, Mr. ROEBUCK objected that in appointing a chief judge the Bill merely created additional expense. It was only an alteration of the law, and alteration was not reform.—Mr. MOFFATT supported the Bill.—Mr. BOVILL objected that the Bill did not attempt to consolidate the bankrupt law, and every one would be embarrassed by the state in which the law would be left.—Mr. J. EWART said a few words in favour of the Bill.—Mr. LYSLEY threw out suggestions for its improvement.—Mr. HADFIELD believed that the commercial community would be grateful for the measure.—The ATTORNEY-GENERAL vindicated the course he had taken in confining his Bill principally to what was new, and in not re-enacting what was already in the statute-book.—After some further discussion the Bill was read a second time.—(18.) The House went into committee on this Bill, when the first fifty clauses, with considerable discussion, and with some slight amendments, were agreed to.—(21.) Numerous objections to various clauses were replied to by the ATTORNEY-GENERAL, and the Bill was proceeded with until it reached the 116th clause.

At the two levees which have been held, among the presentations to her Majesty were the followinggentlemen in connection with China:—

Mr. Henry Brougham Loch, Secretary to the Earl of Elgin, on his return from China, by Lord John Russell.

Hon. Major Anson, on promotion and return from China, by his Royal Highness the Duke of Cambridge.

Major the Hon. J. C. Dormer, on promotion and return from India and China, by General Lord Clyde.

The Medical Missionary in China; a Narrative of Twenty Years' Experience. By WILLIAM LOCKHART, F.R.C.S., F.R.G.S. Hurst and Blackett, Great Marlborough-street, London.

(SECOND NOTICE.)

THE subject of medical missions is so important, and Mr. Lockhart's book is in many respects so meritorious, that we again call the attention of our readers to the narrative of his "Twenty Years' Experience." It will perhaps be as well briefly to indicate the leading features of the fourteen chapters of which it consists. After a few remarks on the Russian acquisitions of Chinese territory and on the late Anglo-French expedition, Mr. Lockhart gives one of the best accounts we have read of the work of education among the Chinese and of their system of literary examinations. Our Civil Service Commissioners will, however, we think, be startled to hear that our competitive examinations are neither more nor less than "an imitation of the system which has been followed in China for ages." The second chapter treats of the Benevolent Institutions at Shanghai, the sanitary arrangements, and the modes of punishment in vogue among the Chinese. In chapters, 3, 4, and 5, Mr. Lockhart has pourtrayed the manners and customs of the people, and his descriptions are both entertaining and correct. After some recent works written without knowledge and without truth (such for instance as "The Englishman in China") purporting to enlighten the world on these matters it is pleasant to turn to the statements of a man whose experience was undoubtedly *real*, and whose narrative is evidently truthful. The sixth and four following chapters treat more immediately of the subject which gives the title to the book "Medical Missions," and they have no warmer or more consistent advocate than Mr. Lockhart. He tells us that "the experiment has been fully tried in China, and the experience of many years has demonstrated that the agency has been successful, that the labour spent has not been in vain, and that the success of the past gives reason to hope for still better things for the future." We are glad to hear so promising an account from one so well qualified to speak on this point, and for our own part we willingly bear testimony to the fact that much good temporal, as we know, and spiritual, as we hope, has been wrought by the medical missionaries in that country. Mr. Lockhart at Shanghai, Dr. Macgowan at Ningpo, Dr. Hirschberg at Amoy, and many others elsewhere have, we are convinced, performed their arduous duties with zeal and assiduity. Of this, indeed, Mr. Lockhart is by no means disposed that we should lose sight, and it is characteristic of the *Evangelical* school that especial care is taken that the light (we mean each individual candle) should *shine before men*. The writer before us is torch-bearer to the whole fraternity; he cannot name a fellow-labourer without a song of triumph at his virtues. Surely such men as these would do well to discard the constant practice of *buttering* (we know no more expressive word) one another.

We have, however, a fault more injurious in its effects with which to charge missionaries generally. We speak of their too frequent habits of political interference. They engender distrust not by healing the sick or preaching the Gospel, but by meddling with secular affairs. They are constantly endeavouring to remodel the institutions of the countries in which they labour; the result is, that their office is degraded, and a *minimum* of good only is effected. The medical missionary has more than enough, we should think, legitimately to employ him. In combining surgical and medical practice with the zealous and faithful teaching of the Gospel there is work sufficient for the most energetic or the most robust. Luke, the Evangelist, is, we believe, regarded as the archetype of medical missionaries, but we have never read that Luke, the Evangelist, was a politician.

Mr. Lockhart describes very clearly in his eleventh chapter the capture and siege of the city of Shanghai in 1853-54, and speaks with equal fairness of the rebels and the Imperialists. In the following chapter we have a long and learned account of the custom of bandaging the feet of the female children—a custom which each successive writer on China seems to consider himself bound to explain to us. The medical mission at Loochoo is next glanced at. Here, in the course of nine years, *one* convert was made, who was loaded with chains and starved to death in consequence. With some sensible remarks on our policy in China, and our present relations with that Empire, followed by a long but not very novel account of the opium question, Mr. Lockhart brings to a close his interesting, and, in many respects, valuable work.

Naval and Military.

A notice was issued in the *London Gazette* of the 12th instant, stating that the commander, officers, and crew of her Majesty's ship *Winchester* are to share in the grant of £33,000 voted by Parliament for the naval forces employed in China between the 1st of October, 1856, and the 26th of June, 1858; as also the crew of her Majesty's ship *Bittern*, who were borne on the books of her Majesty's ship *Winchester* for a passage to England.

Notice is also given in this *Gazette* that the distribution of the sum of £30,543. 15s., awarded by the Lords of the Treasury on the 24th of November, 1860, being the value of prize captured between the 28th and 30th of December, 1857, which has been allotted to the officers and men who were engaged in the operations at Canton within that period, excluding the marines serving with the army, who will share in the amount awarded for the army, will commence on Monday, the 18th of February, 1861, in the prize branch of the department of the Accountant-General of the Navy, Admiralty, Somerset-house.

The following are the shares due to an individual in the several classes:—

Flag share	£1,442	8	2	Third class	£25	5	2
Captains, each	154	10	10	Fourth class	16	4	9
Commanders, each	77	5	6	Fifth class	9	0	4
Lieutenants and Masters Commanding, each	51	10	3	Sixth class	8	2	5
				Seventh class	5	8	3
First class	40	11	11	Eighth class	2	14	1
Second class	31	11	3	Ninth class	1	16	1
				Tenth class	0	18	0

The ships entitled to participate have already been given.

There is to be, we hear, a medal for China for both the wars against that empire; and clasps for Peking and Canton.

Intelligence has been received at the head-quarters of the Royal Engineer establishment, Chatham, that the 23rd company of Royal Engineers, under the command of Lieut.-Col. C. Graham, V.C., is now on its passage home from China, and it may shortly be expected to arrive at Brompton barracks, where quarters are to be prepared for the officers and men.

Brevet-major the hon. J. C. Dormer, of the 13th Light Infantry, whose arrival was announced by the last mail from China, is to receive his unattached majority in consideration of his gallant conduct during the Indian mutiny, and his subsequent valuable services in China.

A scheme for a memorial in honour of Sir James Outram, K.C.B., is about being started, under the auspices of his Grace the Duke of Argyll. In the minds of Englishmen we believe there are few men who hold a higher place than the brave companion of Havelock, and we doubt not the proposal will meet with a hearty response from his admiring countrymen.

The Commander-in-Chief has issued a circular regulating the retirement of officers from half-pay, which will set aside the practice hitherto adopted by half-pay lieut.-colonels, of exchanging into the Line, and then selling.

The whole militia in the United Kingdom will be disembodied by the 23th inst. Conidering the state of efficiency to which many of the Rifle corps have long attained, we are only surprised this measure has not been taken earlier, especially as an embodied regiment of militia costs on an average £20,000 per annum; while the whole sum to be expended on Yeomanry and Volunteers for the ensuing year will be only £132,000, which includes the pay of some 400 or 500 adjutants and instructors in musketry.

The naval estimates include a vote for £200,000 for the building of two new screw steam transports of the *Himalaya* class at Chatham-dockyard. £35,000 additional is to be expended this year in extensive improvements

The Cambridge Barracks at Portsmouth have been commenced, and are to be completed in twelve months for £6,000.

The large permanent expenditure on the camp at Aldershot for building, &c., is, it is reported, to be done away, and the French plan of camping the troops under canvas to be followed.

The armaments of the *Warrior* and *Black Prince* are to consist entirely of Armstrong guns—100-pounders on the main-deck and 70-pounders on the upper-deck. Armstrong guns are also to be supplied to the Channel fleet.

Captain Douglas Curry of the *Aboukir* has been appointed Superintendent of the Victualling-yard and Naval Hospital at Plymouth, in the place of Captain Lyster, who retires from ill-health, receiving the good service pension, vacant by the promotion of Sir Edward Belcher.

By the decease of Admiral Sir George Mundy, K.C.B., Capt. Sir Edward Belcher, Kt. C.B., becomes Rear-Admiral of the Blue, leaving Capt. P. J. Blake (1841) senior on the captain's list.

The following changes will also occur on the flag-list, consequent upon the demise of Sir George Mundy: Admiral John Ayscough becomes Admiral of the Red; Sir James Whitley Deans Dundas, G.C.B., Admiral of the White; Vice-Admiral Sir George Rose Sartorius, Admiral of the Blue; Vice-Admiral Sir James Stirling is moved from the White to the Red Squadron; Vice-Admiral of the Blue, Henry Dundas, to the White; and Rear-Admiral of the Red, Henry Eden, is promoted to be vice of the Blue. Rear-Admiral of the White, the Right Hon. the Lord George Paulet, C.B., is advanced to be Rear of the Red; and Rear-Admiral of the Blue, Sir James Hope, K.C.B. (whose rank as Vice-Admiral is only temporary while in command of the naval forces in China), to be Rear of the White.

Sir Thos. McMahon, C.B., has retired from the Colonelship of the Dragoon Guards, and addressed the regiment on the 18th to take his farewell, after six years' command.

A medal has been granted to the officers, seamen, and marines of H.M.'s ships *Shannon* and *Pearl*, who formed the naval brigade in India under the command of the late Sir W. Peel, K.C.B., in the years 1857 and 1858.

The *Princess Royal*, 91, Capt. Fellowes, the flagship of Rear-Admiral Smart, Commander-in-Chief of the Channel fleet, is nearly ready for sea at Portsmouth.

LONDON, TUESDAY, FEB. 26, 1861.

REVIEW OF THE THIRD CHINA WAR.

CONFIDENCE once rudely shaken is seldom restored, and even the most confiding of mankind can rarely be deceived twice and trust again. It is therefore scarcely a matter of wonder that, on the departure of the first December mail from China, sinister rumours should have prevailed of a disaster having occurred at Peking after the withdrawal of our troops from that capital, though the rumours in question were looked upon as improbable, and were generally discredited in England. We are inclined, and not unjustly, to conceive, that not the least beneficial effects of the late war should be the firm impression left upon the mind of the Tartar Government of the high value which Great Britain sets upon the lives of her sons. The princes that surround the Imperial throne, not to mention the titled Mandarins that wear the badges of Mantchoo royalty, and others of inferior grade, cannot forget the significant fact that all overtures of peace were lately unhesitatingly rejected until the survivors of our betrayed countrymen were restored, and a heavy indemnity had been paid down as some compensation for the blood of the slain. Such an impressive lesson as to the inviolable sanctity with which the life of an Englishman is regarded, and let us hope, the perfect safety with which Mr. Adkins will continue to reside in the metropolis of China throughout the winter, ought to be attended by the most important consequences in respect to the development of our trade in the interior of the country. We may here record our admiration at the very plucky manner in which Mr. Adkins offered to remain in Peking, *solus*, and we trust this act, which cannot fail to have a favourable impression on the Chinese, will be rewarded by a speedy advancement in the Consular service. It is from the high dignitaries of the Government, men prejudiced against Europeans as the forerunners of change, if not of revolution, and not from the people, that danger to peaceful traders in the centre of the country is to be apprehended. It is therefore important that those dignitaries should ask themselves the question. Why they should not become our friends, seeing that, with all the power of the Empire to support them in their enmity, they cannot with any chance of success remain our foes? They have so often been convinced against their will of the absolute inutility of opposing us by force of arms, that the only duty that remains for us now to accomplish is to convince them, by the most persistent frankness and good nature on our parts, that we are as little to be feared in the peaceful pursuits of commerce, as we are ever to be dreaded in the rough fields of war. This can successfully be effected only by means of personal and friendly intercourse with those who wield for Hien Fung the immense power which he still retains—an intercourse such as, we trust, Mr. Adkins has not found it difficult to initiate, and which is hereafter destined to be extended and strengthened by others, until our confidence in the Chinese Government shall have been so far restored, as to permit us, with a perfect hope of security, to take, at no distant day, the fullest advantage of the additional commercial privileges which have been secured for us by the late Treaty and Convention.

But the residence in England of one of the princes of the Imperial family as the representative of the Chinese Government would tend more than aught else to confirm the Tartar Court in the integrity of its dealings. The supercilious pride of the Mantchoos towards the "Barbarians" is the offspring only of their crass ignorance. They have no conception of any greatness superior to their own; and our armaments, and many other evidences of our power, which have at various times been witnessed on their coasts, or in the interior of their country, have, until recently, never been heard of, much less seen, by those in authority at Peking, or else their strength and significance have been altogether misrepresented, and it has been supposed that they had cost us efforts which entirely exhausted the whole of our national resources. The indignant manner in which the Mandarins received the statements of Mr. Parkes relative to the magnitude of our resources in India, as well as of our power at home, can only be regarded as a truthful indication and expression of the ignorance upon which their general views of foreign politics, especially with reference to ourselves, have invariably been based. All these false ideas would speedily be dissipated if one of the Mantchoo princes resided in London as an accredited Ambassador to our Court. No second or third class dignitary with a white or blue button, devoid of all influence within the Imperial circle, would be of any avail; we want a personage who should possess the privilege of communicating all he saw amongst us directly to the Emperor and his chief advisers. A more remarkable instance of the value of such a knowledge as this form of communication would impart to the Chinese can hardly be conceived, than the influence which a visit to this country exercised upon the future conduct of Jung Bahadoor. Although historically and personally acquainted with the growth and magnitude of our power in India, that ambitious chief would unquestionably have cast in his lot with that of the sepoys, had he not been able to reply to those who tempted him, "*I have stood on London Bridge!*" He too well knew upon what immense resources our authority in India really depended, ever to think—although appearances just then were so much against us—that our rule in the East, as was at that time believed by the natives, was coming to a disastrous end. On the contrary, he was as firmly convinced as any Englishman, even in the darkest period of our troubles, that we should soon emerge from the cloud by which we were then obscured, with greater splendour than ever. This is the kind of knowledge which it is of the utmost importance for the interests of the future should be installed into the minds of the Chinese, and it is to be hoped that Mr. Bruce, before the navigation of the Northern Seas is closed next winter, will have the satisfaction of announcing that a Chinese Ambassador, of the highest rank and influence at the Court of Peking, has taken his departure for our shores.

Apart from other complications which may possibly arise in consequence of the presence in China of such large forces, especially of those belonging to France, some apprehension has been expressed lest we should be led by a concurrence of untoward circumstances to depart from that policy of neutrality and non-intervention which has hitherto been adopted with regard to the Chinese rebellion. Our force alone would of course be able to turn the balance in favour of either of the contending factions, and with the example of India a century ago before them, some people imagine, looking at the position which Mr. Bruce took up at Shanghai against the insurgents, that he will, somehow or other, manage to interfere rashly and recklessly in the civil war between the Mantchoos and Taepings. But of this there cannot be the remotest probability. It is true that the delicate state of existing affairs, and the necessity of garrisoning the Mion-tou islands, will render, for some time, the presence of a rather larger force than usual necessary in China; but with this exception, it is more than probable that the whole of the late expeditionary force will leave China in the spring. Not that we would advocate the removal of a single regiment until such can be done with perfect security to our interests, for nothing could be more unwise than to incur the risk of another war by an untimely display of economy, in prematurely withdrawing the force. Almost the only allusion made to Chinese affairs in the debate on the Address had reference to this question, Mr. White, the member for Brighton, having expressed his apprehension, founded upon an experience of many years in China, that "the Treaty of Tien-tsin and the "Convention of Peking, which were extorted by force, could "only be regarded as a truce, and would be set aside as soon "as the military force which extorted them was removed." It may, however, be questioned whether, so far as the Mandarins at Peking are concerned, the whole force may not be considered by them as already withdrawn, with the exception of the weak division which has been left to winter at Tien-tsin, for the troops at Shanghai, Hong Kong, and Canton, may, like some

Digitized by Google

folk who are not generally reputed so faithful as our troops to their engagements, be declared to be "out of sight, out of mind." But the great moral as well as physical effects which the presence of that small but efficient body of soldiers at Tientsin during the winter will exercise upon the rulers of China, as well as upon the inhabitants of its capital, will, it is hoped, be attended by such beneficial results that, together with the more friendly and intimate intercourse which is now being initiated by Mr. Adkins between ourselves and the Imperial Ministers at Peking, a reasonable expectation may confidently be formed that the future will be marked only by the constantly increasing prosperity of both nations.

Our position in China during this winter is certainly calculated to attract the deepest attention of all thinking men. After having experienced, times out of number, the utter bad faith, and the barbaric cruelty of the Chinese—and never more poignantly than during last year—after having taken their capital, and burnt their Emperor's palace, with a display of force never before witnessed so far north—we conclude a hasty peace, transport the greater number of our troops to ports far distant on the coast, and leave behind us, as the only evidence of our triumphs, a solitary Englishman, resident in the capital which never submitted to any arms but our own, and eighty miles distant from that capital 3,000 troops, cut off by the intense severity of a northern winter from all hope of support in case of danger, and surrounded by a population of millions. Never either in ancient or modern times has such a proud example of reliant strength been given to the world, and if power and confidence combined can beget confidence in return on the part of others, then our policy, having that object in view, should certainly meet with its reward in China.

KIDNAPPING FOREIGNERS IN JAPAN.

ORIENTALS are notoriously a most difficult people to deal with. After years of study we sometimes find that we do not quite understand and cannot thoroughly manage them. Our experience in the East has been greater than that of any other nation, and yet we often fail. Who would have said, ten years ago, that we did not know the sepoys of India as well as they knew themselves? Even in that country, where our power has been so long established, and where our knowledge of the character of the people is presumed to be so minutely perfect, disputes of a serious nature, sometimes involving the loss of life, not unfrequently occur between Europeans and natives. Their manners and customs their modes of thought and peculiarities of action, are so entirely different from our own, that it is anything but an easy matter even for those best acquainted with their prejudices sometimes to avoid doing an injury to their feelings. A new arrival, unrestrained by experience, and whose high spirits are not controlled by judgment, is almost certain to get into trouble. If he should avoid giving offence to the religious scruples of the people, by not molesting their sacred bulls, or never saluting with small shot a faqueer's pigeons, or innocently smoke a cigar in the house of a Parsee who worships fire, and looks on our habit of smoking with irritation if not abhorrence, socially he cannot but become in many ways, even though unintentionally, displeasing in their eyes. The same truth, though in a lesser degree, may be affirmed of China, where, though the heads of a thousand citizens are looked upon as of like value, the decapitation of a cock is regarded as a solemn oath. Now we find that the shooting of a goose, though the worshippers of Fusi-yama do not appear to look upon that interesting biped with any feelings of religious veneration, has unfortunately been the occasion of a serious disturbance in Japan.

We need hardly remind our readers that the disturbance to which we allude, and which took place in December last at Kanagawa, is not the first which has occurred since our intercourse with Japan was inaugurated with such hopeful promise about two years ago by the visit which Lord Elgin made to Yedo. Hardly a year has elapsed since a series of complications had well nigh the effect of closing against us the ports which had so recently been opened to our commerce. But we do not think it probable that the present disturbance, though greatly to be regretted, will be followed, if matters are properly managed, by any serious results.

It appears that Mr. Michael Moss, an English merchant resident at Yokuhama, and son of Mr. Moss, merchant of this city, made an excursion in the country a few miles from Kanagawa, accompanied by his Japanese servants, on the 26th of November last. He slept in the house of a Japanese on that night, and on the following day proceeded in search of sport among the pheasants and geese, capturing one of the latter tribe, which one of his servants carried; all went well until his arrival at the pier at Kanagawa for the purpose of procuring a boat to convey him home to Yokuhama. Here the most extraordinary scene followed, and we have taken pains to procure the best authority for the statements we are now about to make. About a dozen two-sworded officials made their appearance and signified they must make him a prisoner, desiring his servants at the same time to retire. Mr. Moss was of course much alarmed for his life and cocked his gun, which was charged with pheasant shot, intimating that he should shoot the first man who approached him. It was suggested to him, however, that the head man should be allowed to approach him, to which he assented; this was speedily followed by an act of treachery. A number of men from behind struck him on the head, and violently wrested the gun from his hand and cast him to the ground. A few minutes after the gun went off, lodging its contents in the arm of one of the Japanese, causing a severe contusion, which it was expected would result in mortification and death. Mr. Moss was then bound with cords, pinioning his arms behind his back with such pressure as to cut the flesh through his clothes, during the scuffle he received several severe blows on the head and face, and was jumped on. In this condition he was carried into the prison at the governor's official residence, from which place he never expected to escape, as he conceived it to be a concocted plan of the Japanese to murder all the foreigners; as during all this affray our readers must notice that no foreigner was a witness. By mere accident, however, Capt. Vyse, the British Consul, heard of the affair while investigating a similar case in reference to a Mr. Telge, a German subject under English protection, and after considerable pains and fatigue—caused by the denial of the Japanese of any knowledge of the affair, he discovered Mr. Moss, and here he made short work in procuring his release. The foreign residents, including the officers of the Russian frigate *Arcona*, had mustered in large numbers and were clamorous for the release of Mr. Moss. Captain Vyse assured them he should be that night, and if he required their assistance he would avail of it. Consequently a force was put into the boats of the *Arcona*, ready to land on a signal which would be given by a rocket. The governor was hard to convince that he must give up his prisoner, and only just in time did he decide on doing so peaceably. Had he not, the consequences would have been very serious, ending only in the entire extermination or murder of all foreigners. Mr. Moss was then conveyed to Captain Vyse's residence as a consular prisoner, his wounds attended to, and on the 3rd December the inquiry commenced and had not terminated when the last mail closed on the following day. Captain Vyse was perfectly justified, we consider, in demanding his release, as according to the fifth article of the Treaty, "British subjects who may commit any crime against Japanese or other foreigners shall be punished by the British authorities according to British law." After this what will our readers think of the decision of the Consul-General, Mr. Alcock, which was, that Mr. Moss should be removed from Capt. Vyse's and be given up to the Japanese custody? This is the greatest blemish on Mr. Alcock's almost untarnished career, but it is a fact nevertheless, and seeing that it was in direct opposition to the letter and spirit of the Treaty, it appears inexplicable. In the above narrative we made mention of a similar atrocity on the person of Mr. Telge, a German, who was notably under the protection of the British Consul. This gentleman, it appears, was kidnapped the day previous to Mr. Moss on his return from a shooting excursion, and while being conveyed to prison, bound with cords, Messrs. Bush, Tatham, and Turner, who were passing at the time, rescued him from the hands of the Japanese officials. This case was also undergoing investigation on the departure of the mail on the 4th December.

From the first the Japanese put themselves entirely in the wrong; on both occasions they were unjustifiably the assailants; and throughout the whole affair their character has appeared in anything but an amiable light. Treachery and cruelty, cowardice and falsehood are stamped on all their proceedings. But of this we should not be surprised, for with all their civilisation the adorers of the Blessed Mountain still possess, and are generally influenced by, all the instincts of a semi-barbarous people. They have yet to be taught by European intercourse juster principles of action, and we trust, especially as Lord Elgin is opportunely on the spot, that an earnest endeavour will now be made to bring them into more direct communication with us for the future. Our object should be

Digitized by Google

to convince them that they never can hope to enjoy with impunity the fruits of unfaithful and treacherous dealings towards us, and this can be effected, not alone by means of our intercourse with them in the East, but by opening to them the wonders of the West, and impressing on their minds, by a contrast which could not fail to be most striking, the true position which their country holds amongst the nations of the world.

Since Japan was opened to us in 1858, the highly-coloured pictures published of its fertility and beautiful scenery, and the pleasing accounts given of its unsophisticated people—fresh accounts, highly-varnished, of old things long before recorded and forgotten—induced us all to believe that it would soon become as well known to us as the Highlands of Scotland, and far more profitable. To many of the present generation a new world was opened to the view, reminding them of nothing so much as the picturesque glories of Montezuma and the Incas. The Japanese people were represented as being so singularly inoffensive; their civilisation, though so different from our own, was yet so elaborate of its kind, and so free from all the evils by which our own is unfortunately afflicted; their industry, ingenuity, and skill were so marked; their desire for commerce and eagerness after gain were so intense, that the vision at once formed of the future, though in many respects well founded, was held by prudent people to be too pleasing to be true, although it was earnestly hoped that in course of time it would become a profitable reality. But dreams of success are easily indulged in, while its attainment is a work of sore labour and painful difficulty. Whatever we were before, we ought now to be awake as to Japan. The vision is still there, but it must be realised by intense toil. Its foundation still remains a solid reality, and by indefatigability and untiring perseverance, which we can always secure, and a moderate degree of sagacity and tact, which, though rarer qualities, should also be forthcoming, we see no reason why we should not succeed in raising in the Japanese islands such a structure of moral, social, and commercial prosperity as should not fall far short of the most splendid imaginings of the past. The materials are there; workmen in sufficient numbers, imbued with the proper spirit, only are wanted. In fact, as yet we are too few in number in that country to be duly appreciated. But a good beginning has been made. In our Consul-General, Mr. Alcock, we have the right man in the right place, and we have no doubt that, seconded by his experience and ability, we shall soon succeed in establishing with the Japanese, notwithstanding the disputes which have taken place, such an intercourse as even that exclusive people will desire progressively to extend and confirm. As we have already shown, the occurrence of incidental disputes and misunderstandings of a local character, must occasionally be anticipated. Some of our countrymen, seeking adventure with as much ardour as profit, and being unused to the peculiarities of the people, may now and then give rise to transient troubles; but with just, impartial, and experienced English officials to appease them, there ought to be little fear of such troubles assuming unpleasant, much less alarming proportions. Our character in the East has not always had entire justice done to it. We never could have succeeded there as we have done if those qualities, which are sometimes denied to our countrymen in that part of the world, were not largely practised in our intercourse with the natives. The exceptions only to the rule have afforded the opportunities of occasionally characterising the conduct of Englishmen in the East as rude and boisterous and as wanting in that forbearing and conciliating, yet firm and determined demeanour, which has always in the end such a powerful effect upon the Oriental mind.

THE DEBATES ON CHINA.

THE curtain has fallen on the last act of the Third China War, and the customary epilogue has been delivered by the Legislature. That it may be long ere a similar drama is put in rehearsal is our earnest wish rather than our confident expectation. This, however, is not the time to prophesy evil; rather let us join in the universal recognition of the services of those brave men who have brought the war to so speedy and successful an issue. Not at the present moment need we discuss the policy of the war or refer to the terms of the peace. More thankful a task is it to leave out of consideration political mistakes, Ministerial inconsistencies, and diplomatic blunders, and to add our mite of applause to the army and the navy, to the officers and the men of both services, for again proving their military discipline, their undaunted courage, and, as we are happy to record, their humanity also. Of the British soldier and sailor in action it may truly be said that their watchword is *Duty*, knowing intuitively as they do the noble truth so well expressed by the poet Tennyson that "the path of *Duty* is the way to glory."

In the House of Lords the Vote of Thanks was proposed by the Secretary for War, Lord Herbert of Lea, being his first appearance in the "hereditary" branch of the Legislature. Those who have listened to some of the oratorical efforts of Mr. Sidney Herbert will think, perhaps, that the occasion was hardly turned to the best account, and will wonder that a statesman of experience so varied, a gentleman with feelings so kindly, and an orator with powers so brilliant, should at such a time have been so wanting in enthusiasm. Whether it was that "the gilded chamber" oppressed him, or that, as usual, their lordships were unsympathetic — certain it is that the oratorical fuel was only just kept ignited. Lord Herbert furnished an agreeable narrative—not an eloquent tribute. Lord Derby seconded the motion; and as their lordships always keep awake to listen to "the Rupert of Debate," the discussion became more animated. He dwelt with his accustomed eloquence in that "pure Saxon" so felicitously chosen, on the circumstances to which Lord Herbert of Lea had somewhat too briefly referred. The talents of the chiefs, the zeal of the officers, the discipline and courage of the men, all were passed in rapid but effective review. Lord Derby stated his inability to give his sanction to the demolition of the Chinese Palace of the Emperor of China, but we suspect that in reality his disapprobation takes the mildest of all possible forms. He is too consummate an artist to present his dish of praise without an atom of spice. The Duke of Cambridge, in a few unaffected sentences, gave the sanction of his official position to the vote, and Lord Clyde bore testimony to the military genius of Sir Hope Grant with soldier-like bluntness and sincerity. The speeches were made and the votes recorded, and their Lordships duly thanked the Army and Navy, not certainly with tumultuous gratitude, but with that quiescent approbation which is their nearest approach to enthusiasm.

In the House of Commons the Vote of Thanks was moved by Lord Palmerston, who gave a spirited sketch of the operations, and paid a warm tribute to the military virtues of all engaged therein. The noble Lord is, however, too pugnacious to secure unanimity on these occasions. The chance of a "wordy war" affects the Premier just as a red kerchief is said to affect a bull. He quickly spied the only debateable ground, and was so successful in occupying it, that Mr. James White informed him that had his address been in as good taste as that of Mr. Disraeli, he, the Member for Brighton, would have saved his speech till another time. In accordance with precedent the motion was seconded by the leader of the Opposition, and the effective and eloquent address of Mr. Disraeli was more distinguished for originality than the celebrated one he delivered on a similar occasion some years ago. The debate was enlivened by Mr. White, who introduced a novel topic by reading an extract from the letter of a correspondent at Shanghai. For this statement we refer our readers to our Parliamentary intelligence, merely remarking, that few of those who are well-informed on the subject will be disposed to take Mr. White's side in the controversy. There is not, we think, any other noticeable feature to indicate in this debate, and it will be sufficient to add that the vote was passed with unanimity, and with more cordiality than characterised the proceedings in the House of Peers.

We come now to the discussion which has since taken place on our relations with China in the House of Lords, and we may state our satisfaction that there seems every probability that this important question will receive more attention during the present than it did in the last Parliamentary Session. Lord Grey was, as we remarked in our review of the session of 1860, the only Peer who then took much interest in this subject, and he still appears disposed to devote to it his talents and his energies. His admirable speech on our relations with China (a careful summary of which we have placed before our readers), is full of matter for serious reflection, and most assuredly the official reply of Lord Wodehouse left many highly important points untouched. We are not indeed prepared to endorse altogether the views of Earl Grey, but we are as firmly convinced as he is himself that on our own future policy, and on our own future conduct chiefly depends the realisation of the benefits which, as we suppose, the recent war was undertaken to secure. While we are desirous of seeing the Treaty of Tien-tsin and the supplementary Convention ful-

Digitized by Google

filled in their integrity, we are anxious that our proceedings should be characterised by no unnecessary violence, and that the word *conciliation* should not be altogether blotted out of our remembrance. Above all, let us not adopt as our own the quarrels of our neighbours. If the "Catholic Cathedral" of Peking and the other "holy places" in China be worth fighting for let France see herself to the "Protectorate." Thus only, as we believe, shall we avoid the recurrence of events which, how much soever they may redound to our military glory, tend not only to impoverish our resources, but also to defeat the only legitimate purposes for which we can *insist* on intercourse with these semi-civilised nations. It is with real pleasure that we accept the evidence which our present Parliamentary intelligence affords, that these views are likely to be more strongly enforced and more consistently advocated in the Legislature of this country.

BANKS CONNECTED WITH CHINA AND HE FAR EAST.

IN our last issue we commenced with the Oriental Bank Corporation a series of notices on Banks in China, &c., and we now continue the same.

In the golden days of India, prior to 1832, nearly the whole of the monetary transactions of the large body of its civil and military services, planters, traders, &c., were carried on through the medium of five or six large agency houses, the partners in which, from their reputed wealth, and the general splendour of their private establishments, were commonly styled the "Merchant Princes" of Calcutta. They were, in fact, bankers, merchants, and agents, receiving, in the first of these characters, deposits to an immense amount from the services, and from all others connected with Europe, who in those palmy days were "making money," and, as merchants, with the ample means at their command, trading largely to England, China, and all parts of the East—in India itself embarking largely in indigo factories and other Indian staples. Some of their vast speculations, it subsequently transpired, were of the most hazardous character. The system was, no doubt, unsound, but the high rate for money (often, we believe, 8 per cent.), and the confidence placed in these houses, induced all classes to become depositors. It was about 1832 that one of these leviathans stopped payment. An event so unexpected spread alarm through the Indian public, who hastened to demand payment of their funds. The result was that, in the course of a few months, five or six of the leading firms were brought down, with an aggregate of liabilities to about fifteen millions sterling.

It is impossible, at this distance of time, to realise the dismay caused throughout India by the overthrow of these establishments. The whole of the savings of the services, laid up through many years—the provision made for numerous widows and orphans—were at once swept away. The effects of that storm of desolation are still felt in many quarters. In this posture of affairs, some members of the service—civilians and officers, then at Agra—in 1833, took up the view that the most likely mode to avoid similar calamities in future would be for the services to become their own bankers by establishing a joint-stock institution, the capital of which, and the deposits that should be received, might be employed in granting loans to their brother officers, &c.—often greatly needed, especially by the junior ranks—the facilities for obtaining which had now been cut off by the failure of the houses to which they had hitherto resorted.

The idea was certainly a bold one, considering that the promoters of the scheme could scarcely be supposed to be versed in such matters, and that the system of joint-stock banking had only recently started into life in England, and was as yet an untried experiment. But clever, practical men have never been wanting in the Indian services, and one or two were then at Agra who took an active interest in the matter. A bank was started, with a proprietary of some half-dozen persons, and a paid capital of ten thousand rupees, or one thousand pounds.

THE AGRA AND UNITED SERVICE BANK (LIMITED).

From this small beginning the Agra and United Service Bank (now one of the leading Indian banks) has grown. There being, at the time of its formation, no competition in Upper India, its funds found constant and profitable employment, ever necessitating calls for new capital (as shown in the subjoined synopsis), and bringing in an accession of shareholders, until the proposed original and exclusive field of business with the Indian services was found too limited. Branches have been successively opened at Calcutta, Bombay, Madras, and Lahore, and more recently its operations have extended to China by the establishment of others at Hong Kong and Shanghai. The unwise and illiberal measures of the Indian Government in 1852, prohibiting its servants from becoming directors of banks, or other public companies, whilst (in Upper India, at least) from no other class could eligible persons, or those commanding public confidence, be selected for that office, compelled the migration of the head office of the bank to Calcutta in 1853, a branch only being left at Agra. In 1857, the majority of its shareholders having retired from the service and returned to England, it was found expedient to obtain a charter of incorporation, and to transfer the bank to London.

At the time of its formation the only existing Joint-Stock Bank in India was the Government Bank of Bengal, but many others subsequently came into existence. Most of those formed in Upper India had closed prior to the mutiny of 1857. In that mutiny the Delhi Bank suffered severely—the manager and all his staff of employés being slaughtered at their posts, and the bank and most of its records burnt. It has now, however, been successfully re-established. The branch of the Agra Bank at Agra, was more fortunate, though it was compelled to take refuge in the Fort, and to suspend for many months all but local operations.

The Bank's proprietary numbers upwards of six hundred. The dividends from the commencement average about 11 per cent. The successive increase of capital from £16,000 in 1834 to one million in 1857, and the stock during that period commanding a high premium have, of course, given original holders very handsome additional profits.

The London office of the Agra Bank is situated at No. 27, Cannon-street. The Indian branches comprise offices at each of the three presidency towns; at Agra and Lahore, in the North-West provinces; and at Kurrachee a new branch was recently opened, and at Hong Kong and Shanghai, in China. The subscribed capital is two millions sterling—one half paid up—in 20,000 shares of £100 each.

F. R. Neilson, Esq., formerly secretary in Agra, and then at Calcutta, upon the removal of the head office to this country, was appointed general manager; and upon his death last April, Mr. Mackintosh Balfour, the manager at Calcutta, succeeded him, but before his return to England will make himself acquainted with the details of all the branches by personal inspection. Mr. Wm. Shipman, many years at Messrs. Overend, Gurney, and Co., and lately one of the managers of the National Discount Company, who is officiating whilst Mr. Balfour is so engaged, was recently appointed London manager of the home department of the bank.

Looking at the recent losses through defalcations in bank officials, a valuable feature in the Agra Bank is to be noticed in the occasional and periodical inspection of the accounts by auditors, unconnected in any other way with the bank, who have permission and power at any time to call upon any official or clerk in the institution to produce his books or cash balance for inspection. The names and characters of the auditors is also a guarantee of the bonâ fide nature of the examinations they institute.

The charge for the fourteen directors of the Agra Bank is £3,200 per annum; much less than the eight directors of the Oriental Bank divide among them. We observe by the proceedings of the last general meeting of the Agra Bank that a motion, emanating from an independent shareholder, to increase this amount was actually carried; but the directors, from what must be considered an overstrained idea of delicacy, not only refused to take any part in the discussion on voting, but finding some dissentients (as may be invariably anticipated where money is to be voted), declined to accept the increase.

The deposits held at interest by the bank on the 31st December, 1859, amounted to £1,105,548. The shares of the Agra Bank previous to the mutiny were worth £68, but consequent on that event, and after the transference of the bank's business to London, there was a temporary decline in value to about £60, from which there was a steady subsequent recovery, and during the past year the range of prices in the market was from 72 to 85, or 70 per cent. premium, showing a success almost as unprecedented as the London and Westminster Bank.

The next annual meeting of the shareholders will be held in April; and we have just heard that the directors have declared a dividend of Two pounds ten shillings per share, with a bonus of a pound per share, being at the rate of 12 per cent. for the year 1860.

Digitized by Google

The following statement shows the average rate of dividend and progressive increase of capital:—

Term.	Average rate of Dividend including Bonus.	Paid up Capital.
31st December, 1834	10 ..	£16,000
Five years ending 31st Dec., 1839 . . .	11½ ..	200,000
„ „ 1844 . . .	11½ ..	400,000
„ „ 1849 . . .	10½ ..	663,150
„ „ 1854 . . .	8¾ ..	700,000
„ „ 1859 . . .	11 ..	1,000,000

The reserve in Dec., 1844, was but £5,095, in 1849 it had been increased to £36,200, and in 1854 to £100,241. The dividends for four years having been restricted to 8 per cent. until the reserve fund reached that amount. It now stands at £190,000.

The following balance-sheet shows the financial position of the Agra Bank at 31st December, 1859:—

LIABILITIES.

Paid-up Capital		£1,000,000
Reserve Fund		175,000
Current Accounts		529,889

IT is rumoured that Mr. Edwardes, the Governor of Labuan has been recalled in consequence of his interference in the affairs of Sarawak.

HIS GRACE THE DUKE OF NEWCASTLE is at length giving attention to the subject of the transfer of the Straits Settlements, and has applied for details of the trade. A few of the merchants here interested in the subject have volunteered to prepare all the information. We believe it will be many months, however, before the transfer will be completed, and his Grace, we may mention, is not at all anxious to accept the charge.

WE understand that Mr. C. Pemberton Hodgson, H.M.'s Consul at Hokodadi, now in this country on leave of absence, has directed legal proceedings to be taken against the *Straits Times* for a libel published in that journal on the 29th Dec. last in connection with statements made in the *China Mail* of the 29th Nov., alleging gross misconduct on the part of an English Consular officer.

The following announcement was with some other paragraphs inadvertently omitted in our last.

We have to announce the appointment of Mr. John Smale, a well-known reporter in Chancery, to the post of Attorney-General at Hong Kong, vacant by the promotion of Mr. W. H. Adams to the office of Chief Justice. Mr. Smale proceeds by the next mail.

IT has been announced by the *Bombay Telegraph* that the Governor-General, Lord Canning, was expected to visit that Presidency in order to meet Lord Elgin, who, it is stated, will visit that place *en route* to England.

The amount of sale of the steamer *Undine* was quoted in our last, by a printer's error, at $4,600, in lieu of $46,000, the property of Messrs. Douglas Laprack, Harper and others.

TRADE OF THE STRAITS SETTLEMENTS AND EASTERN ARCHIPELAGO FOR 1860.

We are enabled to publish, from the various eastern trade circulars and our own private reports, a summary of the trade of the principal eastern countries for the past year, which will be found useful for future reference. The details have appeared in an abstract form in our numbers during the past year.

SINGAPORE EXPORTS TO GREAT BRITAIN.

Coffee „	11,796 ...	8,547
Sapanwood „	2,046 ...	2,678

To India—specie and bullion: gold dust and bars, value, 94,855 dols.; dollars, no., 167,163; rupees, no., 36,221: other treasure, 341,094 dols. Japan copper, 110 piculs; black pepper, 8,858 piculs; tin, 4,073 piculs; gambier, 5,928 piculs; alum, 783 piculs; camphor, 1,102 piculs; sapanwood, 34,392 piculs.

To China the exports for 1860 were—opium, Patna, 59 chests; Benares 194; Malwa, 70. Cotton, 18,399 piculs; black pepper, 3,779; betelnut' 17,491; rice, 429,127; rattans, 13,245; ebony, 2,839; and sapanwood' 4,105.

To United States in 1860—gambier, 76,840 piculs; tin, 9,353; sago flour, 4,815; pearl sago, 1,145; black pepper, 23,066; cassia, 236; gutta percha, 75; nutmegs and mace, 457½; camphor, 41; india-rubber, 463; coffee, 7,240; sapanwood, 1,187.

The revenue of Singapore for the last official year was £77,466, being less than the preceding year by about £8,000. The expenditure amounted to £97,105. There is thus an apparent deficiency of about £19,640. The official returns of the trade of Singapore for the year ending 30th April, 1860, make the amount of imports £4,719,914, being less than that of the previous year by £958,970. The exports were to the value of £5,651,388, showing an increase over those of the previous year of £522,731. No statements have yet been published giving details of the trade or of the shipping which arrived at or departed from Singapore during the year. From the monthly statement of the trade of Singapore published in the *Free Press*, we find that the value of the imports up to the end of 1860 was estimated at 25,130,681 dollars, being an increase over those of 1859 to the extent of 1,194,725 dollars. The value of the exports in 1860 is put down at 19,780,612 dollars, being less than in 1859 by 2,874,851 dollars. The imports were brought as follows, by

1,067 square rigged vessels	$21,273,772
2,325 native „	3,856,909
3,392	$25,130,681

The exports were taken as follows, by

1,092 square rigged vessels	$16,345,642
2,647 native „	3,430,970
	$19,780,612

The past year (it is observed) was, on the whole, an unfavourable one for the trade of Singapore. There was a considerable falling off in the exports of several articles of produce, such as tin, gambier, sago, coffee, sapanwood, &c., while there was very little speculation in rice as compared with the two preceding years. The state of affairs in China operated very disastrously to the Chinese merchants engaged in extensive transactions between Singapore and that country, and the trade with Siam, also, seems to have been overdone in past years, and there was consequently a reaction in 1859 and 1860, many of those who had entered into it largely making heavy losses. During the latter part of 1860 a number of failures occurred amongst the Chinese traders.

PENANG.

The exports to Great Britain were as follows respectively in

	1860.	1859.	1858.
Sugar piculs ...	62,852	62,381	48,209

To the Continent of Europe in 1860 the shipments were 6,066 piculs of black pepper, 295 of white pepper, 2,672 of tea, 505 of cutch, 249 of rattans, 179 of horns, 71 of gum benjamin, and 32 of gutta-percha.

To America, the exports were, 9,047 piculs sugar, 20,623 of black pepper, 21,538 of tin, 6,788 of cutch, 3,240 of rattans, 2,641 of hides, 21 of gum benjamin, 3,098 of india-rubber, 30 of gutta percha, 3,266 of tapioca, 2,382 of nutmegs, and 283 of mace. Besides the above, the miscellaneous shipments to London comprised some cases of nutmegs and other essential oils, mace paste, dragon's blood, green snail shells, cotton seeds.

BANKOK—SIAM.

On the 9th April, 1855, Sir John Bowring arrived and negotiated a new English treaty, which was signed on the 18th April, and copies of the treaty were exchanged on the 17th March, 1856. On the 9th November, 1855, the first steam-boat was built in Siam by the son of the prime minister, who just twenty years before completed the building of the *Ariel*, the first square-rigged vessel of the Siamese. The First King took an excursion in this steamer, the *Royal Seal*, the next day. The Siamese now own 22 steamers, of which 14 are paddle, and 8 screw; 9 belong to the First King, and 2 to the Second King. The mercantile marine of Siam also numbers 70 sailing-vessels, registering in the aggregate 22,523 tons; eleven of these vessels are over 500 tons.

The number of British vessels which entered and departed from Bangkok in 1857 was 119 ships and 36,628 tons. The value of the imports in the same year (including those by the Siam and Chinese vessels) was £525,732; that of the exports to Europe £85,837; to Eastern ports, £432,257, of which £248,177 was in British vessels. The principal exports from Bangkok in 1859 (all in piculs of 133⅓lbs) were, rice, 839,751; paddy, 6,230; sapanwood, 203,596; pepper, 13,504; cardamums, 1,007; bastard ditto, 1,536; hides, 25,536; horns, 4,933; teel seed, 6,294; stick lac, 2,984; tin, 739; silk, 1,079.

The exports to China and Manila in 1860 comprised 272 piculs of cardamums, 1,415 of hides, 204 of horns, 13,705 of pepper, 1,439,735 of rice, 36,346 of sapanwood, 18,569 of sugar, 3,362 of teel seed, 4,540 of paddy, 488 pieces of teak, and 200 piculs of red wood.

To Singapore, India, and Batavia, the exports were 204 piculs of benjamin, 62 of cardamums, 3,137 of hides, 2,016 of horns, 3,238 of pepper, 144,107 of rice, 14,445 of sapanwood, 2,227 of stick lac, 79,185 of sugar, 2,236 of teel seed, 1,513 of paddy, 506 of peas, 370 pieces of teak, and 110,000 fish.

To Europe, 100 piculs of hides, 1,920 of pepper, 2,726 of sapanwood, and 43,005 of sugar.

To America the exports consisted of 10,036 piculs of rice, 920 of sapanwood, and 9,420 of sugar.

THE SIKH CAVALRY IN CHINA.—A letter has appeared in *The Times* in reference to this arm of the Indian service, which was described to be "floundered hopelessly" on the 21st September. The writer, who signs himself as "Robert G. Hope Johnstone, late second in command Fane's Horse, and late Military Secretary to the Chief of the Staff in India," says:—"It was on the 18th of September. The 1st Sikh Cavalry being in reserve, under Lieutenant-Colonel Probyn, the enemy's cavalry, about 2,000 in number, were seen trying to creep round his flank and intercept the baggage of his army. On this Colonel Probyn, with but 106 sabres, charged through the midst of the Tartars, and then wheeling round, charged a second time at one half which had been thus cut off, and so routed the whole body. So great was Colonel Probyn's necessity, and so critical his position at one moment, that Sir J. Michel sent to his aid the only support in his power to give—viz., 24 sabres, who were in charge of some guns! I say these and such like are instances which should be as publicly known to the credit of the Irregulars as their misfortune on the 21st of September is to their chagrin."

THE SEIZURE OF MR. MOSS BY THE JAPANESE.—This affair has been the subject of a correspondence in the *Star*, but with that exception no general interest has been taken in the matter. Mr. S. Moss, the father of the ill-used gentleman, has brought it to the notice of Lord John Russell, the Secretary for Foreign Affairs, and no doubt more will come of it. The friends of the *Star* policy, of course, advocate that the Japanese were quite right, while Mr. Moss gives extracts from his son's letters which confirm the unjustifiable and cruel conduct of the Japanese. The facts of the case being now before the public, we look for the further development of the case, and especially the part taken by Mr. Alcock in the decision he formed—but afterwards gave up—of giving Mr. Moss over to the Japanese authorities in direct contradiction to the fifth article of the Treaty. Mr. Moss gratefully acknowledges the conduct of Capt. Vyse, which we doubt not will be very generally approved when the matter is brought to the notice of the House of Commons, which, we believe, will be done during the present week.

The medals for the Naval Brigade belonging to the *Pearl and Shannon* have been received at the Admiralty, and will be therefore very shortly ready for distribution. The gallant deeds performed by our blue jackets at Lucknow and in other parts of India cannot be very easily forgotten.

The launch of the *Chanticleer*, 17, screw corvette, took place at Portsmouth Dockyard on the 9th, in a very satisfactory manner. The ceremony of christening the vessel was performed by Miss Grey, the eldest daughter of the Rear-Admiral Superintendent.

The Russian steam corvette, *Morge*, bound to China, put into Plymouth on the 10th, with damaged machinery, but sailed in a few days.

JAPANESE PLANTS.—*The Times* notices the visit to Japan of Mr. Fortune, the botanist, thus:—Ever since Siebold and Thunberg visited Japan they have told us that among other beautiful plants the *Sciodopetys Verticillata*, or umbrella pine, was the most beautiful tree in Japan. Since the country has been partly opened to Europeans Mr. Robert Fortune, the Chinese traveller, started last year in search of these plants, and has succeeded in an eminent degree. He left England on the 4th of August, 1860, by overland route, and arrived at Shanghai on the 30th of September: left Shanghai on October 3, arrived in Japan on October 5, visited various parts of Japan, found the far-famed *Sciodopetys*, as well as a number of other fine plants, which are on their passage to Bagshot. Mr. Fortune enclosed a fine lot of seeds, sent them from Jeddo, November 6, to Hong Kong, thence they were sent by post to England, reaching Bagshot on the 18th of January, 1861, and are now vegetating in Mr. John Standish's Royal nursery, and shortly will be fit for distribution among the lovers of hardy plants. It will, no doubt, prove hardy in this country, as its associate, *Thuiopsis Dolobrata*, has proved to be perfectly hardy this last severe frost. Mr. James Veitch, jun., of the Royal Exotic Nursery, Chelsea, has addressed the following letter to *The Times* on this subject. (A notice of the departure of this gentleman's son for Japan was given in the *London and China Express* of 10th Jan.):—I have not the slightest desire to detract from Mr. Fortune in any way, and I hope his researches in China and Japan will prove valuable to the botanical public; but as my son, Mr. John Gould Veitch, arrived in Japan on the 20th of July last (which was before Mr. Fortune had left England), and obtained and forwarded seeds of that magnificent tree, and of the scarcely less beautiful one the *Thuiopsis Dolabrata*, on the 22nd of September, nearly a month before Mr. Fortune reached Japan. Mr. Veitch has also discovered and sent home seeds of numerous other fine trees and shrubs, one of which, a beautiful new fir, he has named *Abies Alcoquiana*, in compliment to Mr. Rutherford Alcock, her Majesty's Minister at Jeddo, to whose kind assistance he has been much indebted, and another entirely new pine has been named by Professor Lindley *Abies Veitchi*, in compliment to the discoverer. These seeds, with a number of others forwarded by Mr. Veitch, are now being raised at our establishments at Chelsea and Exeter. Full particulars of Mr. Veitch's a rival in Japan, with the particulars of his first collection sent home, have, have appeared in the *Gardner's Chronicle*.

SOCIETY OF ARTS.—A very interesting and instructive paper "On the Uses of Tea in the Healthy System," was read by Dr. Edward Smith, M.D., LL.D., F.R.S., assistant physician to the Hospital for Consumption, Brompton, &c., in the hall of the Society of Arts, John-street, Adelphi. Dr. Copeland occupied the chair, and having briefly introduced the lecturer, Dr. Smith proceeded to read his paper, and having referred to the influence of tea on the body, said there were three questions raised regarding the influence of that beverage—1, that the waste of body was lessened; 2, that the body was nourished; and 3, that by lessening the waste they might lessen supply, and yet the bodily powers should be duly sustained. After quoting many opinions in favour of the theory that it lessened waste, he said the experience of Professor Lehmann and himself had come to the conclusion that it increased waste of all kinds. The states in which tea was clearly beneficial were—some time after a full meal, when the system was oppressed by food, or by the heat produced by its conversion in the after part of the day, when the body was full of partly digested food, and when the activity of the transforming function was considerably lessened; for the corpulent; for those in whom vital action was slow; for the old; for hot climates: in cases of suspended animation; for those who eat starchy or fat food, and particularly if they did not eat flesh; for soldiers, who in time of peace took too much food in relation to the waste proceeding from the body; for those marching in the heat of Eastern climates; for the sedentary, and for those who have dry and non-perspiring skins. He then entered into a lengthy and very instructive dissertation to housewives on the nature and quality of teas, and how they could be judiciously selected, showing by samples those which were best, and minutely explaining the properties of each, and which were the most useful and economical.

THE Council for the Propagation of the Gospel, of which the Archbishop of Canterbury is President, have determined upon the establishment of a Christian Mission at Peking.

H.M.'S SURVEYING VESSEL *Firefly* has returned to Alexandria after surveying the Gulf of Suez. The lighthouses are progressing in the Red Sea.

THE P. and O. Co.'s steamship *Ripon* (Captain E. Christian) is in London, being lengthened about 35 feet at the building-yard of Messrs. Wigram, by which firm the *Ripon* was built.

LORD RICHARD GROSVENOR has just returned home after several years' absence, during which period his lordship has travelled in America, Australia, China, and Japan.

AN action has been tried by Messrs. Glass, Elliot, and Co., against Mr. Boswell, the foreman of Messrs. Newall and Co.'s, works, for causing a nail to be driven into an electric cable in course of laying between England and Holland. Verdict for the plaintiffs, but the damages not yet announced.

Correspondence.

(To the Editor of *The London and China Telegraph.*)

SIR,—The statement published in the *Morning Star* of the 15th inst., relative to our trade with China, contradicts the long and able return given in the CHINA TELEGRAPH early in 1860, so completely that it cannot fail to attract your attention. There are many points most unfairly put in the statement in the *Star*, such as the expenditure on public works, the total omission of the enormous indemnity received in the opium war, &c., but they are scarcely worth being noticed. Having served at Hong Kong during that period, I can answer for the statement being very incorrect.—I am, sir,

A. G., late of Hong Kong.

London, 16th Feb., 1861.

[The assumptions in the letter referred to are so manifestly incorrect that we do not feel it necessary to confute them.—ED.]

Digitized by Google

(To the Editor of the *London and China Telegraph*.)

SIR,—In reference to an article in the *Overland China Mail*, No. 29, and the *Straits Times*, Dec. 29, I beg to state that I was at Hakodadi from Oct. 1859 to Oct. 1860, and that consequently I could not have been at Yedo on the 16th June.

The affair in question has been referred, I believe, to her Majesty's Minister, but from personal knowledge I feel almost sure that the accusations will be found to be very much exaggerated.—I am, sir, your obevant, C. PEMBERTON HODGSON, H.B.M.'s Consul at Hakodadi.

Pau, Feb. 17, 1861.

Monetary and Commercial.

The dollars brought by the Mexican steamer have been disposed of at 59⅝d., showing a decline of ⅛d. per oz. from the price realised for those by the last packet. The absence of demand for India and China is the reason of this depreciation; only about £139,000 has been shipped as yet to China during the present year.

The Indian Government have invited tenders for their tea plantations.

The Chartered Mercantile Bank of India, London, and China has declared a half-yearly dividend of 5 per cent.

The share list of the East India and London Shipping Company closed on the 20th inst. The first vessel of the company, the *Indiana*, is announced to leave the docks on the 10th May.

The result of the public trial of the new steamer of the Oriental Inland Steam Company, the *Jumna*, and train, which took place on the River Clyde on the 30th ult., convinced all who were present, including the directors and several shareholders, of the success and practical efficiency of the train system. The report of Captain Eustice, who has been practically acquainted with the steam navigation of the Indus for nearly two years, expresses no doubt of the applicability of this system to the navigation of that river. It is proposed that the train shall be immediately taken to pieces and despatched to India.

The Ceylon Government have offered to pay off the shareholders of the Ceylon Railway Company at par the amount of their paid-up capital, with 6 per cent. interest thereon. The directors are opposed to the measure, but the shareholders have determined to accept the offer.

The complete Board of Trade returns for the past year were issued on the 23rd inst. From these we find that the aggregate value of exports of British goods and manufactures for 1860 was £135,842,817, against £130,411,529 in 1859, of which upwards of £9,100,000 were shipments to the East. The returns show also largely increased imports in the past year of tea, spices, sugar, and other staples of Eastern origin.

The quantity and declared value of the shipments of cottons to the East show an improvement over the preceding year. In 1860, 222,963,784 yards of cotton, valued at £3,157,359, were sent to China and Hong Kong, against 193,935,653 yards, of the value of £2,755,092, in 1859. To Java, 69,804,636 yards, value £1,057,617, in 1860, against 55,074,038 yards, value £824,610, in 1859. To the Philippines, 31,192,255 yards, value £516,567, against 30,714,008 yards, value £455,595, in 1859. The cotton yarn sent to China shows a small decline; the exports were to the value of £8,784,036, against £9,198,629 in 1859. The shipments of lead to China were 5,170 tons, against 2,963 tons in 1859. The exports of woollens to China show a small increase, but there has been a larger shipment of worsted stuffs. 80,367 pieces woollen cloths were exported in 1860, against 79,262 pieces in 1859, and 197,979 pieces of worsted stuffs in 1860, against 142,838 pieces in 1859. The aggregate value of the exports to the countries of the East in the last two years were as follows:—

	1859.	1860.
Siam	—— ...	£13,202
Cambozi, &c.	£505 ...	——
Java	1,135,071 ...	1,413,915
Philippines	685,490 ...	674,235
Indian Islands	372 ...	19,033
China...	2,525,997 ...	2,871,849
Hong Kong	1,931,576 ...	2,446,579
Singapore	1,421,067 ...	1,671,110
Labuan	—— ...	2,583
	£7,700,078	£9,109,506

As respects the imports of articles of eastern origin last year, we find that there is a small increase in Terra Japonica from Singapore, the receipts having been 9,554 tons. There is a large decline in receipts of silk from China, only 2,093,284 lbs. having come to hand, against 3,192,632 lbs. in 1859. Of sugar from Java and the Philippines the imports were 528,142 cwts., against 476,091 cwts., in 1859. Nutmegs 532,221 lbs. in 1860, and 451,361 in 1859; pepper 12,808,027 lbs in 1860, and 8,719,266 lbs. in 1859; tea imports 88,946,532 lbs. in 1860, and 75,077,451 lbs. in 1859. The quantity taken for consumption last year was 76,859,428 lbs., being about half a million pounds in excess of 1859.

The Peninsular and Oriental Company, it is announced, are about to establish an agency at Trieste.

THE MALTA AND ALEXANDRIA CABLE.

Mr. Forde, of the firm of Messrs. Gisborne and Forde, the Government engineers, has proceeded to Malta to arrange all the preliminaries for laying the Malta and Alexandrian cable, and will be assisted in his survey of the route by two of her Majesty's ships. According to the present arrangements the laying of the cable—as described in our last issue—will commence in May, and if successfally done, the cable will be open to the public for the transmission of messages in July, and as the defects in the Suez-Aden section of the Red Sea Cable are believed to be trifling, it is probable that it may also be in working order in July, and thus place London in electric communication, *via* Malta, with Aden.

The amount of bullion by the steamer of the 20th inst. was:—For Alexandria, £2,000 in gold; Ceylon, £4,000 in gold; Madras, £8,992 in gold, and £20,122 in silver; Calcutta, £20,000; Hong Kong, £5,370; Foo-chow-Foo, £250; and Shanghai, £11,235, all in silver.

ARTICLES OF IMPORT.

TEA.—The public sales announced in our last having finished without material alteration in prices, there was a fair amount of business done for a few days, but the rise in the Bank rate to 8 per cent. on the 14th inst., coupled with the very large arrivals during the past few days, and further considerable public sales now in progress, has created a dull feeling; the sales progressing heavily, at rather easier prices for some kinds. But few of the samples recently arrived have as yet been placed on the market, and it will require great firmness on the part of importers, in the present position of trade generally, to prevent a further decline. Low to fair common Congous have been saleable at the fall quoted last month. Fair to good flavoury kinds have sold steadily at previous prices until to-day's auctions, when some, ranging from 1s. to 1s. 3d. per lb., sold lower. Good and fine Kaisows have met with a fair demand at former rates. In black leaf kinds there is no alteration of moment. Good and fine Monings and Wopaks are well supported, the former qualities being scarce. Oolongs, Souchongs and Flowery Pekoes show but little variation in the fortnight. Scented Teas, especially common to fair Capers, are still difficult of sale, owing to further arrivals being pressed on the market. Foo-chow kinds remain without change. In Green Teas the few sales made from time to time have been at previous prices for Taiping, Fychow and Moyune kinds of old seasons import. Ping Suey kinds have sold in some cases rather easier. Those of Japan growth are difficult of sale, the colour being too bright for the generality of the trade, and prices rule low for the quality.

SILK.—The market has been very flat, owing to large arrivals and a disposition on the part of the trade to wait a fall in rates.

SUGAR.—Of 1,769 bags Penang, about 1,000 bags, mostly grocery sorts, sold at firm prices, midding; to fine bright yellow, 39s. to 42s. 6d.; fine brown and low yellow, 36s. to 38s.; middling brown, 33s. to 34.; 2,886 bags Manila, the sound bought in, common clayed at 35s., and unclayed at 32s. to 33s. 800 bags washed sold at 33s., and 30s. to 31s.; 1,895 bags China middling and good yellow sold at 36s. to 38s.; and about 4,000 bags clayed Manila, at 35s.; 450 baskets Java, at 39s.; as also a floating cargo of 2,700 baskets, No. 12½, for Amsterdam, at 26s.

COFFEE.—Colonial sorts have continued in fair request at previous prices. Ceylon is in scanty supply; of Plantation only 161 casks, 192 barrels and bags have been brought to auction, which went off readily, fine ordinary to middling 66s. to 70s. 6d. 228 casks, 591 barrels and bags Native in public sale were chiefly held for extreme rates and bought in, the few sold being at 63s. for good ordinary, up to 65s. 6d. for superior bold picked.

RICE.—There is still no improvement to report in this market, which remains extremely inactive, sales of only small parcels having been effected at about previous rates; good white Bengal at 14s. 6d., and Nakrenzie 10s. 9d. to 11s., low Rangoon, 10s. 2,071 bags white Bengal brought to auction, met scarcely any offers, and were withdrawn; as were also 1,364 bags Ballam.

Digitized by Google

PEPPER.—At public sale, 2,137 bags Penang were nearly all disposed of at the prices lately current, common dusty to good, 3¾d. to 3¾d.; 310 bags heavy Malabar were principally bought in at 5½d.: privately, transactions have been very restricted. White; 97 bags fair bold Penang, in auction, fetched 6½d. to 6¾d. per lb., and a sale of 600 bags fair black Singapore sold at 3d. 15-16ths.

SAGO.—There is rather more inquiry for small pearl, but little business has resulted. About 500 bags SAGO FLOUR have been sold at 16s. 6d. to 16s. 9d. TAPIOCA.—405 bags Penang, in auction, sold readily at 5¼d. to 5¾d. for very good white, and 3¾d. to 3¾d. for common.

SPICES.—Cinnamon: Quotations remain, 1st, 1s. 5d. to 2s. 1d.; 2nd, 1s. 2d. to 1s. 8d.; 3rd, 11d. to 1s. 3d.; and 4th, 7d. to 10d. per lb. Fair clearances made in the lots retired at the recent auction. Cassia Lignea: sales at 86s. to 91s. for third to second pile. Cassia buds: small sale at 177s. 6d. Cloves steady: 6 cases Penang sold at auction, at 1s. 4d. per lb. for good. Mace: No change. Nutmegs: steady, and of 62 cases Penang and 5 cases Sincapore, at auction, three-fourths sold at 1s. 1d. to 1s. 8d. per lb. for ordinary small to good medium.

HEMP.—At a reduction of 20s. to 30s. per ton, increased demand has been experienced, and of 3,695 bales at auction, half sold at £22. 10s. to £26 per ton for fair to fine roping; and £33 to £36. 10s. fine white; a corresponding reduction ruling privately.

COTTON.—Market paralysed; and, in the almost total absence of trade, our quotations, which we have further reduced ¼d. per lb., are still very nominal.

JAPAN WAX.—No transactions.

TOBACCO.—The 20 bales of Manila placed on the market were all damaged, but fetched extremely high prices at auction last week. Cagawn sold from 1s. to 2s. 8½d.

TIN.—Small sales at 127s. for Banca, and 123s. for Straits.

COPPER.—Of the parcels of Japan imported per *Fairy*, &c., sales have been made at 10d., being the price only of old copper, as the descriptions are found to be suitable only for melting down.

GAMBIER.—Sales of about 1,500 bales at 17s. to 17s. 6d.

MISCELLANEOUS.—India-rubber: Very inactive; small sales at 1s. 3d. to 1s. 4d. Camphor: Firm at quotations 160s. to 165s. Sapanwood: Market has improved; 141 tons Siam at auction, nearly all sold at £8 to £9 per ton, with damaged at £7. 10s. to £7. 17s. 6d.; good inquiry also privately for Manila, as well as Siam, and the former commands an advance of £1 per ton. Soy: Continues dull, and no sales. Rhubarb: No business doing; rates nominal. Mother-o'-pearl shells: Sales at 107s. 6d. to 112s. 6d. for Singapore and Manila. Star Anniseed: Rates nominal, at 75s. to 80s. Sticlac: Siam is quoted at 75s. to 92s. 6d. Gum Benjamin: Sales at £6. 12s. 6d. Damar: Sales at 28s. to 40s. Gamboge: Sales at £6. Rattans: Sales of 22,000 bundles at 2s. 1d. to 6s. 7d. per 100. Elephants' Teeth: No sales. Vermillion: Very dull, at 2s. 9d. to 3s. Galangal root: 269 bags at auction all retired; quotations, 26s. to 30s. Cubebs: About 20 bags sold at £7. Dragons' blood: Nominal, at £10 to £13. Galls: Small sales of Japan, at previous rates. Rum: Nominal.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s. to £6. 15s.; nail rods, £7. 5s to £8; hoops, £9 to £9. 10s; sheets, single, £9. 10s. to £10; Staffordshire bars, £8 to £8. 7s. 6d.; rails, £5. 5s. to £7.

STEEL.—Swedish keg, £17. 10s. to £18.

COPPER.—Sheet and sheathing, 11¼d.; yellow metal, 9½d.

TIN.—128s. for block; 129s. for bar;. Tin plates, best charcoal, I.C., 29s. to 30s. per box.

LEAD.—English pig, £21. 5s. to £22. 10s.; shot, patent, £24. 10s. sheet, £22. 2s. 6d. to £22. 5s.; spelter, £18. 10s.; zinc, English sheet, £24; quicksilver, £7. per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£102,709
Foo-Chow-Foo	—	1003
Hong Kong	—	35,450
Manila	—	—
Singapore	4,000	60,107
Penang	—	384

FROM MARSEILLES.

	Gold.	Silver.
Shanghai	—	14,381
Hong Kong	—	9,964
Singapore	560	—

EXCHANGES.

	Bank Bills, 60 days' sight.		House Bills, 60 days' sight.
On Singapore (dols.) Bank Bills	4s. 9d.	Buy at	4s. 3d.
On Hong Kong, ditto	4s. 9d.	Do.	4s. 3d.

GOLD AND SILVER.

Bar Gold (per ounce)	£3 17 9
Spanish Doubloons	3 17 3
United States Gold Coin	3 16 3
Silver in Bars	0 5 1
Mexican Dollars	0 5 11½
Carolus Dollars	0 6 6

MANCHESTER MARKETS.

The decline in 40-inch shirtings is about 3d. per piece since the commencement of the week on 7lb. to 8lb. 4oz. cloth, and 1½d. on lighter makes, and the principal offers are at still lower rates. There are some moderate orders in hand for long cloths and T-cloths suited to the home trade, but other kinds are difficult to sell, and fetch lower rates. Printers are also difficult to sell and increasing in stock, so that prices are gradually being forced downward. There is rather more steadiness in water twist suited to the Continent and to the China markets, but there is very little business. Prices are extremely irregular in all kinds of yarns, sellers being a good deal influenced by the extent of their stocks, which have accumulated largely in many cases, and the consequent pressure upon them to sell. Some of the offers making are very low

COMMERCIAL POSTSCRIPT.

CITY, TUESDAY AFTERNOON.

A meeting of creditors of Messrs. O'Halloran and Co., East India and Ceylon merchants, who failed on the 9th inst., took place yesterday, when a balance-sheet was presented by Mr. C. F. Kemp, the accountant, by which it appeared that the liabilities expected to rank on the estate are £20,541, with assets estimated to realise £27,939, exclusive of private property at Ceylon and Wynaad of the value of £7,500.

The Select Committee on the Red Sea Telegraph Company sat yesterday. Mr. Stephenson, of the Treasury, was examined for two hours, and established on the most direct evidence the unconditional character of the guarantee, together with the fact that the prospectus containing the statement that the shareholders could under no circumstances receive less than a dividend of 4½ per cent. for fifty years was submitted to and approved by the Lords Commissioners of Her Majesty's Treasury.

ARRIVALS NOT INCLUDED IN TABLE.—Feb. 23, off Falmouth, from Macao, Gustav Ernest; from Amoy, Juno; 24, at Plymouth, from Bankok, Cuiding Star; 23, at Portsmouth, from Batavia, Albert Borsig; 21, at Hamburgh, from Hong Kong, Jupiter, Prince Regent; 22, from Batavia, Dorothea; 11, at New York, from Hong Kong, Sea Serpent; 12, from Canton, Sarah; 25, at Deal, from Foo-Chow-Foo, Wagoola; 24, at Falmouth, from Batavia, Maria Charlotta; Jan. 31, at Havana, from Macao, Live Yankee; Feb. 26, off St. Alban's Head, from Singapore, Captain Cook.

DEPARTURE.—Feb. 23, from Falmouth for Hong Kong, Morge (Russian war steamer); from Liverpool for Shanghai, Romeo; 18, from Gibralter for Singapore, Charlemagne.

From BATAVIA.—At London: Richard Thornton. At outports, Johanna Wagner, Albert Borsig. At Falmouth: Koning Willem III., Shooting Star, Adrianus.

From BANKOK.—For Falmouth: San Francisco, Benledi.

FREIGHTS AND CHARTERS.

The shipping loading in London for India, China, and the Cape of Good Hope, is 49,000 tons. There is still great flatness in shipments to Bombay and Calcutta. There is a fair business doing for the Cape. The Council of India made a contract on the 19th inst. for 16,300 hogsheads of porter, and 1,179 of ale, to be delivered at Madras, Cannanore, and Singapore.

Rates of freight current for vessels on berth to Shanghai, 50s. to 60s. per ton, weight and measurement. To Hong Kong, 50s., weight and measurement. To Singapore, 35s., and Penang, 45s., weight or measurement (nominal). To Manila, 35s. and 40s. To Batavia, 50s. weight, 40s. measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. to 50s. China and Manila, 50s. to 60s.

CASUALTIES.

The Versailles, Bingham, from Liverpool for Shanghai, which vessel was stranded in the South Bay, Wexford, on Jan. 19, has broken up at her first or second futtocks. The bottom appears to be held by her anchor. Her beams, planks, &c., are strewed along the beach.

The N. S. del Carmine (Peruvian), Demoro, which arrived at Trieste Feb. 10 from Singapore, reports that she was drifted on to a dangerous bank near Java, but came off with loss of part of her false keel. She afterwards, in avoiding a rock, lost all her sails, and sustained damage to rigging.

The Kelso (ship), of Shields, Capt. Vowell, from Sunderland for Hong Kong, with coals, got on the Longscar Rock at Hartlepool during the gale of Feb. 9 and 10, and sank. The crew were in the rigging all night, and one man was drowned, the remainder (19) were saved. The vessel has since broken up.

The Annie Bucknam, Potter, which arrived at New York Jan. 28 from Hong Kong, had lost two anchors and seventy-five fathoms chain in the Straits of Sunda.

The Augusta (barque) of Bristol, Robinson, from Cardiff to Manila, with coals, put into Cape Town Dec. 23, leaky, with loss of two boats; her main-bulwarks, part of quarter-deck, and main channels, had been carried away, and her sails and rigging much damaged. She had experienced very heavy weather, and would have to discharge and undergo thorough repair.

The Wagoola, Porritt, from Foo-chow-Foo, arrived at Falmouth on the 15th inst., with rudder pintles carried away, and loss of sails.

The Guadaloupe, Munoz, for Manila, put back to Cadiz, Feb. 7 leaky.

The Twee Geyusters, from Batavia for Rotterdam, which arrived at Falmouth Feb. 19, got into collision during the gale of the night of the 20th, and lost jibboom and foretop-gallant mast, &c.

The Esmeralda, from Singapore to the Clyde, was spoken Feb. 20, about 30 miles S.W. of Queenstown, leaky, and with loss of rudder, but had a temporary one ready.

At St. HELENA, Jan. 1.—Argo, van Teutum, from Batavia, and sailed 2 for Schiedam. 2, Henrietta, v. Loewen, from Batavia, and sailed 4 for Amsterdam. J. Wakefield Young, from Macao, and sailed 3 for Havana. Fopsmit Hoffmann, from Batavia, and sailed 4 for Rotterdam. Art Union, Morrison, from Foo-chow-Foo, and sailed for London. 4, Capt. Cook, Cole, from Singapore. Veturia, Rickaby, from Manila, and sailed 7 for Falmouth. Guiding Star, Earnfred, from Bangkok, and sailed 5 for Falmouth. N. Liduina, v. Brink, from Jeddo, and sailed for London 5. Richard Thornton, Sinclair, from Batavia, and sailed 6 for London. Mary Lee, Graves, from Macao and Fort George, Dobson, from Whampoa, and both sailed for London. Electric, Spratt, from Foo-chow-Foo, and sailed for Liverpool. 7, Menamy, Andrews, from Manila, and sailed for London. Walwisch, from Batavia, and sailed 8 for Amsterdam. Luisita, Ager, from Manila. Eloisa, Marcy, from Batavia, &c.

The Brana? (ship), from Foo-chow-Foo to London, with mizen mast and foretopmast sprung, was spoken Dec. 12, by the Wynaud Reid, arrived at St. Helena Jan. 8.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

FIRE. — DESTRUCTION OF THE PLANT, STOCK, and PROPERTY of the Largest Ropery and Ship Chandlery in the Country, Messrs. Frost, Brothers, of Shadwell, London. PRESERVATION of Books, Papers, and Cash, in MILNER'S SAFE, standing by the side of two other safes, (not Milner's) the contents of which were consumed.—See "Times," Sept. 7, 1860.

TO MESSRS. THOMAS MILNER AND SON,
Liverpool, and 47A, Moorgate-street, City, London.

Gentlemen,—We have very great pleasure in bearing testimony to the efficiency of your "Patent" Fire-resisting Safe. In the destructive fire which destroyed the whole of our premises on Sunday morning last, our books, papers, and cash, which were in the safe we purchased from you in March last, were all preserved; and this is the more remarkable because the contents of two other safes, not of your manufacture, standing in the same office within two feet of your safe, were consumed. Our most sanguine hopes have been realised in this severe test, and we leave you at liberty to make use of this letter in any way you may wish.—We are, Gentlemen, yours, &c.

FROST, BROTHERS.

Shadwell, London, Sept. 8, 1860.

KALOS GEUSIS SAUCE, as Improved by Mons. A. SOYER, and so highly valued in our East and West Indian Colonies as a stomachic, is prepared by I. M. ROBSON, 32, Lawrence-lane, Cheapside, London.

BOTTLED ALES AND WINES, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—"Melbourne Journal of Commerce," Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases, by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities, effect so great a saving in labour, &c., that they can supply them at one-third less price to Shippers, who will find it most profitable to order their goods to be so packed in future.

SEYMER & Co., 27, Eastcheap, E.C.

JEAN MARIA FARINA Cologne; London, 2, Salters'-hall-court, and 16, St. Swithin's-lane E.C., begs to recommend his Stock of EAU DE COLOGNE and LAVENDER WATER in Bond — Double, at 9s.; Single, at 5s. 6d. per dozen. Duty paid—Double, at 21s. Sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

HOLLOWAY'S OINTMENT AND PILLS. —CHILDREN'S COMPLAINTS.—While the weekly return of mortality shows a decrease of deaths from small-pox, it displays an alarming increase in fatal cases of measles and scarlatina. Such unfortunate issues would not result were mothers and nurses to rub Holloway's Ointment upon the glands of the neck and upper part of the chest when symptoms of scarlet fever or measles first appear, or even after the eruption has come out. The Ointment, penetrating through the skin to the glands, always stimulates them to throw out a full eruption, which is the safety-valve of both diseases. Holloway's Pills also should be given to lessen the fever, to reduce the irritation of the throat, and to quiet the cough, which are most distressing to all suffering from these complaints.

NOTICE TO PASSENGERS BY THE OVER LAND ROUTE, via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

TO MERCHANTS AND EXPORTERS.

UMBRELLAS, PARASOLS, AND WALKING STICKS.

G. T. CHAMBERS & CO.,

Manufacturers of every description of Umbrellas, Sun Shades, and Parasols; also Walking Canes and Umbrella Sticks, Mounted or otherwise. Sword and Dart Sticks, and Life Preservers, &c., &c.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT.

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

AN OXFORD MAN, who holds an appointment in King's College, is desirous of meeting with ONE or TWO GENTLEMEN who wish for assistance in their studies for the University or the Civil Service Examinations. He will not object to pupils whose education has been neglected. Terms moderate.

Address, S. H. N., Post-office, Northaw, by Barnet (N)

A GENTLEMAN aged 44 wishes for an APPOINTMENT to go out to Hong Kong, or to any the of Consular Ports in China, to take charge of or assist in a Store. He has had experience as a draper in London, and knows the value and quality of goods well. He has been to China, the West Indies, America, Australia, New Zealand, California, and various parts of the world. His last engagement was manager to a sugar plantation in the West Indies; he is honest, industrious, and can be well recommended, and would be willing to accept an appointment such as the above for a very moderate salary. Any merchant requiring a steady, middle-aged man to take the management of a store will find this an eligible opportunity.

Letters to be addressed to T. H., care of Mr. JOHN THOMPSON, Meat Salesman, Leadenhall Market, E.C.

PATRONISED BY THEIR MAJESTIES

QUEEN VICTORIA, NAPOLEON II

AND THE PRINCIPAL CROWNED HEADS OF EUROPE.

DEBAIN'S HARMONIUMS AND PIANOS-MECANIQUES.

WAREHOUSE, 43, WATLING-STREET, CHEAPSIDE, LONDON, E.C.

REPRESENTED BY C. GENTILE.

DEBAIN'S PIANO-MECANIQUE.

PERSONS without the least knowledge of MUSIC can, on this Piano, execute any and the most difficult compositions in the style of a finished Pianist, producing the varied kinds of expression, &c., as indicated by the Composer, with a truthfulness not attained by any other mechanical means. It is also provided with a Full Grand Key-Board (7 Octaves), which can be played on in the ordinary manner. These Instruments have three strings to each note and check action, and are well adapted for Exportation, being strongly made, to resist the action of extreme climates. Price from Guineas to 200 Guineas.

DEBAIN'S ANTIPHONEL, OR SUBSTITUTE FOR AN ORGANIST.

This Instrument can be placed on the Key-Board of any Organ Harmonium, and is admirably adapted for Churches that have not an efficient organist, as by it a person without the slightest knowledge of music can, with equal facility, play the common chant or hymn tune and the mass or oratorio chorus. Price from 12 Guineas.

DEBAIN'S HARMONIUMS.

These celebrated Harmoniums, for Power, Sweetness of Tone, and Superior Construction, stand unrivalled. Price from 6 Guineas.

DEBAIN'S HARMONICORDE.

(TESTIMONIAL FROM THE GREAT MAESTRO ROSSINI.)

MR. DEBAIN,—*I have heard with extreme pleasure your new instrument, the Harmonicorde. It is a beautiful invention, and cannot fail to be well received in the musical world.*—G. ROSSINI

PRICE FROM SEVENTY GUINEAS.

PRICE LISTS FORWARDED ON APPLICATION.

CAN BE HEARD DAILY AT

DEBAIN'S WAREHOUSE, 43, WATLING-STREET, CHEAPSIDE, LONDON, E.C.

OVERLAND ROUTE.

COMMUNICATION by STEAM to INDIA, AUSTRALIA &c., *vis* EGYPT.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers, leaving Southampton on the 4th and 20th of every month. For Gibraltar, Malta, Egypt, Aden, and Bombay by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne, and Sydney, by the steamers leaving Southampto on the 20th of every month.

Yeatman and Harrison, Mr. Proctor (clerk to Mr. Smale, Attorney-General for Hong Kong), one male and one female Chinese servants, per Mr.. Lyall. From Marseilles, 13th March, to Hong Kong: Mr., Mrs. and Miss Smale. Mr. Harvey. To Shanghai: Mr. H. P. Haussen. To Singapore: Mr. Laly Maintz, Mr. G. Corvettes.

Per P. and O. str. Indus. 20th March.—From Southampton to Hong Kong: Com. J. E. Montgomerie, R.N., Lieut. W. M. Cornewall, R.N., Lieut. Bainbridge, Mr. Petit. To Singapore: Mr. Greig To Shanghai: Mr. Spence, Mr. Eaton. From Marseilles, 28th March, to Hong Kong: Dr. and Mrs. Murray, Messrs. F. A. Rangel and Jerdein, To Singapore: Mr. and Mrs. F. P. Voermans, Mr. Reid.

Per P. and O. str., 4th April. From Southampton to Singapore: Rev. Mr. Matheson. To Penang: Miss Vermont. To Hong Kong: Messrs. J. P. Duncanson and Weston, Ensign, Danby. To Shanghai: Mr. W. W. Ripley. From Marseilles, 12th April, to Singapore: Capt. and Mrs. T. A. Welstead and Miss Welstead. To Shanghai: Mr. L. Oliphant. From Alexandria to Singapore: Messrs. T. J. Leeuwen, Kolff, and A. Driessen.

Per P. and O str., 20th April.—From Southampton to Singapore: Capt. Colyer and three ladies. To Penang: Mrs. Waller and two daughters From Marseilles, 28th April, to Penang: Mr. and Mrs. L. Chasserain. To Hong Kong: Mr. and Mrs. Elzinger and infant, Hon. A. Marsham.

ADDITIONAL PASSENGERS OUTWARD.

Per P. and O. str. 4th March, from Southampton to Shanghai: Mr. R. Wesbon. To Hong Kong: Mr. G. McCrindle.

Per P. and O. str. 20th March, from Southampton to Hong Kong: Mr. A. Williamson, Mr. J. Laing. To Singapore: Mr. Dreyer. From Marseilles, 28th March, to Hong Kong: Mr. Pye.

Per str. 4th April, from Southampton to Hong Kong: Mr. F. T. Williams, Mr. W. R. Brown. To Singapore: Miss M. Holtins. From Marseilles, 12th April, to Singapore: Mr. J. H. Reid. To Hong Kong: Mr. F. A. Rangel.

Per str. 20th April, from Southampton to China: Ensign Pollard, Lieut. Symons, R.A. To Singapore: Rev. Mr. Matheson. From Marseilles 28th April, to Singapore: Mr. Stricker.

Cancelled and re-entered for other mails.—Per str. 20th March, from Marseilles to Hong Kong: Mr. F. A. Rangel. To Singapore: Mr. Reid. Per str. 4th April, from Southampton to China: Ensign Danby. To Singapore: Rev. Mr. Matheson.

PASSENGERS ARRIVED OUTWARD.

At Hong Kong, per mail steamer, from England.—Lieut. Trimmer, Capt. Archen, Rev. J. Molesworth, Colonel Crane and servant, Messrs. Noble, Freeman, Downie, Gray, Wiener, McIntosh, Gourley, Payne, Blackwood, Orr, Rickett, and Bobot. From Singapore: Messrs. Phipps, Schutze, Feguste and servant, Silverlock, Mr. and Mrs. Talbot. For Shanghai: Mr. and Mrs. Green, Mrs. Evans, Mr. Van Clupp. Per Orbit, from San Francisco: Messrs. Leonard, Lunds, Robert, and Hitch. Per Fides, from Melbourne: Messrs. Lann and Jones, jun., and 321 Chinese.

Summary of News from the Far East.

JAPAN.

MR. MOSS'S CASE.

The dates from Kanagawa are down to the 10th January, by H.M.S. *Imperieuse*, which vessel arrived at Hong Kong on the 20th January, with Admiral Jones and Mr. Moss, who had been sentenced to three months' imprisonment in Hong Kong jail, and also to pay a fine of $1,000, and be deported from Japan. Great excitement ensued between the Japanese and foreign community, and it appears evident that the sentence of Mr. Moss was a political necessity (in the opinion of Mr. Alcock). Such a policy, being forced and unreal, never did succeed anywhere, and it certainly will not in Japan; and we are surprised that Mr. Alcock should have parleyed with his difficulties by such a piece of injustice to his countrymen. It appears that Mr. Alcock, at Yedo, received notice to the effect that a conspiracy had been discovered to attack the foreign settlement at Yokuhama, to burn the houses and massacre all the foreigners, and then assault the Legations and Consulates. About 600 Yakonins were landed near Kanagawa, it was supposed to carry this into effect. The Japanese authorities had intimated to

Digitized by Google

Mr. Alcock that they could no longer protect foreigners, or be responsible for their lives, and urged them to take refuge within the citadel. The Japanese Minister says an outbreak is impending, but he does not know if its aim is the subversion of the existing Government, or the extermination of foreigners. Strong guards are on the road between Kanagawa and Yedo, and at the British Legation there are 200 extra soldiers and two field pieces, with a damio in command.

The following *resume* of what did take place at Yokuhama is from the *Overland Trade Report*, collated from correspondents' letters :—

A large meeting of Japanese officials was convened at Yedo, consisting partly of governors of provinces, and partly of ministers extraordinary for foreign affairs, which subject it was the object of the meeting to discuss. The debates would appear to have been rather stormy, and one of the results was a reprimand to the ex-Governor of Yokuhama for having been, as we infer, too favourably disposed towards foreigners. This being deemed by Japanese etiquette a deep insult, the ex-governor destroyed himself by way of avenging it. This brought matters to a crisis, and the pro-foreign party, strongly advocating the cause of the deceased, finally succeeded in overawing their opponents—but we should imagine the presence of the men-of-war had something to do with it. At this juncture it was that the Japan Government sent officers of low rank to the consular people at Kanagawa, urging them to remove to Yokuhama. The foreign ministers at Yedo were also entreated to remove into the citadel. Both these requests were stoutly refused.

This is the point where the Japanese Government are accused of playing a double game. No doubt, had the foreigners complied with these requests they would, by showing the white feather, have materially augmented the aggressive projects of the anti-foreign party; and it is equally clear that the refusal of foreigners to comply, preferring to take up a position which indicated "touch us if you dare," must have tended to strengthen the cause of the pro-foreign party. But, at the same time, during such a state of excitement in the council, it surely should be admitted that it was a simple act of prudence on the part of the Japanese Government, attempting to place foreigners out of danger in the manner they did.

This occurred about the 3rd or 4th of January. Admiral Jones being then at Kanagawa in the *Imperieuse*, induced the governor of that place to go on board his ship, where Consul Vyse being present, a conference of some kind took place. The result is unknown, but we may be sure from the names of the admiral and the consul that a determined front was exhibited. The admiral had determined upon leaving for Hong Kong the day following, (Saturday, the 5th Jan.) sending the *Scout* and *Encounter* to Shanghai, and the *Pioneer* to Hakodadi, but during the night despatches arrived from Mr. Alcock, the minister at Yeddo, urging the admiral to remain either for his protection, or more probably to overawe the anti-foreign party. The admiral sent the *Pioneer* to Shanghai with despatches for Admiral Hope. On the 10th, however, matters having assumed a more pacific appearance, the admiral not only left himself, but despatched the *Scout* and *Encounter*, doubtless with the view of removing all isritating influences.

The house of the British Minister was guarded at Yedo by 160 Japanese soldiers and some field pieces. On Sunday, the 6th Jan., 200 Japanese soldiers (armed with muskets) and three field-pieces were sent to protect foreigners at Yokuhama.

After our authorities in Japan had played with Mr. Moss much in the same manner as a cat does with a mouse, they put him on board H.M.'s ship *Imperieuse*, which is Admiral Jones' flag-ship. This vessel, after a rapid run of about a week, arrived at Hong Kong with one hundred and fifty cases of small pox on board. The day after her arrival the prisoner was landed and delivered over to the local authorities, who although they received him, were not so culpable as to put him in the criminal gaol, but assigned him quarters in the debtor's jail, where they placed him in quarantine.

Mr. Moss's legal advisers having obtained a rule *nisi*, came before the Chief Justice, praying that cause might be shown for the incarceration. The Chief Justice ordered a writ of *habeas corpus* to issue to the governor of the gaol to bring up the prisoner on Monday, and to certify the cause of his detention. This procedure is the more correct way of bringing the question of the legality of his detention before the court than by a mere rule *nisi*. Mr. Moss will, therefore, be brought up to-day, and if the governor of the gaol does not show cause for his detention he must be discharged. That there is no sufficient ground for his detention is clear. First—because the warrant from H M.'s Consul Vyse is dated January, 1860, and purports to commit the prisoner in execution of a sentence of three months, passed in November, 1860, the term of which must have expired before the date of the warrant. The date of the warrant is no doubt a mistake, but the court has to deal with the fact as it appears in the face of the warrant, and when the liberty of the subject is concerned this must be construed strictly. Second—There is an informality on the face of Mr. May's (assistant magistrate of this colony) warrant to the gaol governor. It purports to give the prisoner into his custody in exercise of a power to that effect contained in an order of her Majesty in Council, dated 3rd March, 1859. That order in council is no longer in force. It was repealed by a subsequent order in council of date 23rd January, 1860! This is of itself fatal; and entitles Mr. Moss to his immediate discharge. Mr. May can scarcely be blamed for this, as this subsequent order has never been published in Hong Kong, but only in the *North China Herald*.

In consequence of this informality in the warrant, we are happy to say Mr. Moss was released.

Mr. Pollard, the counsel for Mr. Moss, moved for a writ of *certiorari* to remove the consular conviction into this Court, and have it quashed, on the ground that the Consul-General, in revising the sentence of Mr. Consul Vyse at Kanagawa (who tried the case), had added three months' imprisonment to the fine of $1,000 inflicted by the Consul, while the Order in Council only gave him (or Consuls) power to fine or imprison, but not to do both. His lordship the Chief Justice, decided that he had no jurisdiction to grant the writ, and said, had it not been for the technical defect in the warrant of committal the defendant would have been absolutely remediless. He pointed out also that the consular warrant directed him to deport the prisoner to England, but as neither his letters patent nor the charter of the Court authorised the judge to do such a thing, he did not see how Mr. Vyse could give him power to do it. His lordship also commented on the fact that his letters patent only gave him certain powers under the Order in Council of March, 1859, and as that was repealed he had at present no jurisdiction whatever; and that even if the old Order were still in force, he had no power over criminal matters, his jurisdiction being limited to civil matters; so that, however much a Consul in Japan might exceed his powers or jurisdiction, the party affected was without remedy, except by going to England and moving for a *certiorari* in the Queen's Bench. He regretted the present anomalous state of things, but he must refuse the writ, having no jurisdiction. The judge said he thought it right to say that it was no error on Mr. May's part that the warrant was informal, as the order of 1860 had never been published here or communicated to the local authorities, and that he himself did not know of its existence until produced in Court on the motion. Mr. Pollard explained that it was simply owing to the accidental circumstance of his having been in Shanghai when the order appeared in the *North China Herald* (the official organ of the Embassy in Japan), that he was aware of its existence.

The following is from the correspondent of the *New York Herald*, dated Kanagawa, Dec. 29, 1860.

Matters here are in a very bad state, I can assure you—a war or a fight being certain between the Americans, English, French, and, in fact, all the European residents on the one side, and the Japanese on the other. The cutting down of the French Consul-General's butler by the Japanese in the manner they did has excited the most deadly hatred—they are sworn to have revenge. The French Consul has removed from Yedo down to Kanagawa, being afraid to reside there any longer. The Americans are determined upon having a fight. Every one here carries his sword and revolver whenever he goes out after dark. There is no doubt but the French and English are going to compel Japan to give Prussia a treaty, which certainly would not be granted without compulsion.

But what is still worse is the quarrel going on between the English residents and Mr. Alcock, the British Minister, and Captain Vyse, the Consul. Neither of these gentlemen dare go into the street alone after dark, although they both carry pistols. They appear to be universally disliked, although both are of high standing at home.

The English and Japanese shooting case—Moss and the *yachonine*—in which the latter was mortally wounded, closed in the Consular Court on the 20th inst. The sentence of Moss was :—"Three months' imprisonment in her Majesty's jail in Hong Kong, to pay $1,000 to the wounded man, and costs of court and deportation from Japan." Costs of court, $60. Moss was indicted and tried in the Consular Court here in Kanagawa. Captain F. Howard Vyse, British Consul, A. J. Macpherson, J. B. Ross, and E. Clark, three respectable English merchants of Kanagawa, the latter belonging to the house of Dent and Co., composed the court. The trial lasted several days, and excited a great deal of bitterness and angry feeling among all classes of Europeans, especially the English. There were thirteen Japanese witnesses who testified on the part of the prosecution, and nearly as many Europeans for the defence. Moss was defended by Cooper Turner, Esq., Crown Solicitor and Queen's Proctor of Hong Kong, who undertook the defence at the urgent solicitation of many English residents here, because they wanted fair play—to see the rights of Englishmen fairly and legally tested according to the Treaty. Moss summed up his own case, if summing up it could be called, and he is considered to have paid dearly for his folly in doing so. The summing up consisted mostly in pitching into the British Minister and the Consul, contradicting the witnesses who had testified against him, calling on the court to discredit all they had sworn to, and to believe all of defendant's story. The indictment charged Moss with committing three criminal acts, upon all of which he was found guilty.

The testimony closed several days before the case was summed up and the opinion of the courts publicly known, all except the sentence. There being no unanimity between the Consul and the assessors as to the verdict, the case was referred to his Excellency Mr. Alcock, her Majesty's Minister at Yedo. The case having been carefully reviewed, was returned, sustaining the Consul's sentence and adding three months' imprisonment. The opinion of the assessors being almost unanimous that Moss did not fire the gun—that the gun exploded accidentally—that he did not know the men who came to arrest him were officers—that he was justified in pointing the gun—that he was ignorant of the game-law—that he was not aware he was doing anything wrong, &c., &c., the defendant was acquitted of every charge against him by the assessors, and, by the Consul, found guilty of them all. The sentence was anticipated, it being predicted, from the commencement of the trial, from the fact that the Consul and Minister were both opposed to Moss—this being the charge made by the English residents.

Digitized by Google

The fine of $1,000 was paid over under protest, in order that Moss might appeal to the Queen. The British Minister is threatened with criminal prosecution before the Governor of Hong Kong, for adding to the Consul's sentence the imprisonment, which some of Moss' friends pretend was a criminal act on the part of his excellency. Moss, as soon as the sentence was read, was escorted by a detachment of marines from her Majesty's steamer *Pioneer* on board ship, in which he will be carried to Hong Kong in the course of a couple of weeks.

The quarrel between the British Minister and Consul and the English residents here has reached fighting pitch; all intercourse is suspended, and the only thing one now hears in the street, the counting-room, or bar-room, is Alcock and Vyse. The order lately issued by the Consul against carrying firearms during the daytime is disregarded. A meeting of Englishmen was called soon after the order was issued, and resolved that they "would carry revolvers," notwithstanding their Consul had forbidden them to do so. At the Consular Court at the trial of Moss, Englishmen went there as witnesses, each man carrying his revolver strapped to his side. Within a few days the Minister has issued an order making it a crime, punishable with deportation from Japan, for any English subject to carry firearms between sunrise and sunset, besides many other prohibitions.

Michael Moss, the prisoner, has a house in Yokuhama, where he has been permitted to come during daytime, under the escort of marines, but goes on board each night. The prisoner is an English Jew, about twenty-four years of age, a native of Jamaica, and left there when only a year and a-half old. His father, it is said, is Michael Moss, of Lombard-street, London, a rich broker and colonial dealer, and a friend of the Rothschilds. His case, it is said, will be brought into Parliament and there overhauled.

I have just seen a paper circulating among the English residents here, calling upon all Englishmen to meet on Monday at twelve o'clock, to take into consideration the circular issued by her Majesty's Consul in reply to the letter sent him concerning the game laws. Her Majesty's subjects had better stop where they are; the quarrel has gone far enough; otherwise they may find themselves in the condition of Moss—deported from Japan, and obliged to leave suddenly in a man-of-war, leaving behind what little property they had scraped together.

The Prussians are trying to get the English to assist them in getting a treaty with the Japanese, who are very much disposed not to give them one. Our Minister, Hon. Townsend Harris, has been instructed by the President to interpose his friendly offices so far as it would be proper in assisting the Prussians.

What the French are doing at Yedo no one knows; there are all sorts of rumours afloat, the principal one is that they have gone to Yedo to demand satisfaction for the assault committed last fall on the servant of M. de Bellecourt, the French Consul-General. M. Bellecourt has demanded ten thousand dollars for his servant being cut down, and he is determined upon having it. The Peninsular and Oriental Company have recommenced running steamers between here and Shanghai twice a month, to connect with the mail line for England and overland. This arrangement formerly existed till the steamers were bought by the Government for transports after the commencement of the China war. Since then, till now, there has been no regularity or certainty about sending or receiving letters; we had to depend on sailing vessels.

The following further particulars relative to the naval forces in the Japanese waters, and the movements of Sir Hope Grant, may also prove of interest:—

The steamer *Granada*, belonging to the Peninsular and Oriental Company's line, arrived here on the 17th, five days from Shanghai, and leaves to-day for Shanghai and Hong Kong.

Among the passengers were Lieut.-General Sir Hope Grant, K.C.B., commander-in-chief of the land forces in China, accompanied by Lady Hope Grant and the following military staff.—Captain Grant, A.D.C.; Major Sarel, A.D.C.; Major Wilmot, Lieut.-Col. Woisley, Major Reboul, Capt. Biddolph, Military Secretary.

The following vessels of the French and English fleet are now in this port, which they will make their winter quarters:—

The English have the *Imperieuse*, fifty gun frigate, Admiral Jones, flagship; *Encounter*, Capt. Dew; *Scout*, Capt. Corbett; *Pearl*, Capt. Borclau. The last three are twenty-one gun corvettes. There is also the *Pioneer* gunboat.

The French have the frigate *Renommee*, fifty-two guns, Admiral Paget, flagship, and an iron gunboat, twelve guns. Several more ships are expected.

The Prussians have two frigates, *Thetis* and *Ancona*, each forty-four guns, and the *Elbe* storeship.

The Dutch have one brig, twelve guns, and the Japanese the war steamer *Candinmarruh*, and the yacht-steamer *Victoria*, given them by the English Government.

NAGASAKI.

Dates from this port are down to the 7th Jan. All quiet, and business progressing satisfactorily. The exports to China continue on a large scale, one firm alone having despatched in the previous month six vessels for Shanghai. The quotations are:—

For grey shirtings, 6½ cy., we quote 3 dols.; white ditto, of good quality, 3 dols. to 3 dols. 10c.; white brocades, 3 dols.; white figured shirtings or spots, 2 dols. 90c., these latter being less admired than brocades; chintzes, common, 2 dols. 40c.; good quality, 2 dols. 65c. to 2 dols. 75c.; dyed damasks, 6 dols.; brocades, 3 dols. 75c; dyed spots, 3 dols. 75c.; long ells, 10 dols.; camlets, BB, 28 dols., SS, 26 dols., X, 24 dols. 50c. Other fancy goods not much enquired for at present. T-cloths difficult of sale at covering rates; spelter, 8 dols. 25c.

In Tea a large business has been done, several cargoes having been shipped to Shanghai of the better sorts, such as are made up to suit the English and American markets, but at present prices are very high, and settlements smaller. Silk, scarce, high rates being also asked for this article. Vegetable wax, saucer shape, unobtainable; block, moderate stock, obtainable at 11 dols. 50c. for best; beeswax, none pure in the market; sulphur, 2 dols.; iron, 3 dols.; isinglass, best, 24 dols. to 27 dols.; tobacco, best, 6 dols. 50c. to 7 dols.; common, 3 dols. to 4 dols. 50c.; gallnuts, 6 dols. 50c.; pearl-shells, 1 dol. 50c.; rapeseed oil, at present unobtainable; rapeseed, 1 dol. 60c. to 1 dol. 80c.; camphor, 17 dols. for best.

CHINA.

PEKING.

A house is being prepared for Mr. Bruce, and he was expected to reach there in February.

In answer to a memorial praying his return to the capital, the Emperor is said to have threatened the memorialists with severe punishment in the event of their repeating the offence. The effort to raise the indemnity money has led to a stoppage of the soldiers' pay and a depreciation in the value of paper money.

TIEN-TSIN.

From this port the dates are to 7th Jan. The troops and the diplomatic staff of Mr. Bruce were all in good health.

A correspondent who writes from Tien-tsin, *via* Chee-foo and Shanghae, describes the place as unapproachable, or nearly so. A mail had reached the Gulf and many attempts had been made to land it, but without success, save in the case of two boxes which were got ashore. Only a few of our friends there had received their letters. They expect to be shut up till spring. The ice at present is a foot thick. There is scarcely a single vessel outside, all having gone to the Miataou Islands or to Chee-foo. At a later date the *Plover* is reported to have arrived at Tien-tsin, but without any likelihood of being able to land. The people are very anxious to begin trade in the spring, and in the meantime amuse themselves by taking as much of the indemnity money back as they possibly can get out of the foreigners' pockets by levying high prices on their articles. It is possible that the garrison may be broken up by May.

SHANGHAI.

The review of the year's trade, &c., for 1860, which appears in the *North China Herald*, will be noticed in our next.

The expedition up the Yang-tze-Kiang was to leave Shanghai on the 5th Feb. under the charge of Admiral Hope and Mr. Consul Meadows.

The Hon Mr. Bruce, her Majesty's minister, has made the following appointments:—Martin C. Morrison, Esq., acting consul at Tang-chow; James Mongan, Esq., acting consul at Tien-tsin; Robert Swinhoe, Esq., acting vice-consul at Tai-wan, Formosa.

An expedition, partly scientific, partly sporting, is about to strike through a nearly unknown country in Central Asia; making, in fact, an overland journey from Shanghai to Simla in the Himalayas:—

It is composed of two or three military and civil scientific celebrities. One of the party has already gained renown in Northern America, and is a naturalist in the fullest sense of the term, as well as a clever ornithologist. Another enjoys a well-deserved fame as a daring sportsman, who has already penetrated into Western Thibet through the Himalayas. A celebrated surgeon and botanist of this settlement is a third, and we understand that through the kindness of Bishop Boone, they have been enabled to secure the services of a compete t interpreter. The general commanding-in-chief has given them every encouragement, and altogether they start under auspicous circumstances. They purpose to take advantage of the expedition shortly to start up the Yang-tze-kiang, to its extreme limits; thence they strike in a north-westerly direction to Tching-tou (in the western part of Se-tchuen), and from there follow an indicated track through the mountains to Pa or Batan, which they expect to reach in May, thence they will go to Lassa, a place which, though known by repute, is not described particularly in any work that we know of. This city they expect to find the most opposition to their progress in, as its inhabitants are said lo be unfriendly towards Europeans. While there, or rather from there, they purpose to explore the uncertain part of the Brahmapootra which lies to the south of that capital: this done, they keep along the northern slopes of the Himalayas, and will we believe enter India about the spot where the four great rivers Indus, Jumna, Ganges, and Brahmapootra have their origin about October.

The following has been issued by the American Consul:—

"Notice is hereby given that D. F. Coombs and E. R. Goodrich, both citizens of the United States, belonging to Charlestown, in the State of Massachusetts, left this port on the morning of the 18th day of December last, in a boat manned by a Chinese crew, and proceeded up the Whangpoo river, with the expectation of being absent from this port eleven days, and they have not returned, nor have they been heard from. It is believed that they are dead, and died intestate within this consular jurisdiction, either accidentally or from unlawful violence."

Some numbers of the *Peking Gazette* had been received at Shanghai, from which the following information is gathered:—

"Chang-kwo-fan has been busy in Anhui, and re-took a place

Digitized by Google

called Ehsien. The rebels made desperate attempts to regain their position, but in vain. The rebels sustained a defeat at Wen Chang in Czu-chuen, after reducing the city to great straits."

Supposing that his Imperial Majesty must be in want of money, the loyal governors-general of Fokien and Chekiang, with several officers of less note, have memorialised his majesty to request the governors of every province to subscribe sums varying from three to ten thousand taels. The Imperial sanction is graciously given to this proposal, which was accompanied by the sum of 3,000 taels. Hung-ke, of Peking celebrity, has been promoted from the third to the first rank, for his skill and energy in conducting the exchange of the ratifications of the Tien-tsin Treaty.

Mr. Fullerton Henderson has been authorised to sign the firm of Jarvie, Thorburn, and Co.

Mr. Charles Hagedorn has established himself at Nagasaki as a commision merchant.

The business of Messrs. Wadman and Co., Ningpo, will be liquidated by Mr. J. Bohstedt, who will continue the same on his own account.

Mr. H. M. Wright has been admitted a partner in the firm of W. J. Alt and Co., of Nagasaki, Japan.

Mr. John A. T. Meadows has resigned his office of interpreter, and intends opening business at Tien-tsin as a commission merchant.

Mr. Wade, the Chinese Secretary, left Tien-tsin for Pe ing on the 2nd Jan.; and Mr. Morrison has left to open the Consulate at Tang-chow.

The two men, H. A. Allen and William Hamilton, who were concerned in the robbery of Mr. Trannack's boat, and other piratical offences, and who were captured some time since by the boat from H.M.S. *Centaur*, have escaped from the Consulate jail.

The regular monthly meeting of the Royal Asiatic Society was held; the Rev. Dr. Bridgman in the chair. William Howard, Esq. was elected a resident member. The paper for the evening—an Essay on Agriculture in China—was read.

AMOY AND FOO-CHOW-FOO.

The new Treaty has been disseminated among the natives, and well received.

SWATOW.

It is reported that Ting-chow, in Fukhien, fell on the 11th Jan. before the Chang-maous; the whole country, therefore, is now open for them to Chauchowfoo. Hing-lin and Keaying are already threatened. The Imperialists are now falling back from Wooping, which lies on the road to them. The Chuntai (Commandant) at Chauchowfoo has called out the militia from the district about Swatow, and 3,000 have already been collected and marched to the city.

A notice has been posted up, purporting to be issued by the local gentry, naming foreigners *kih*, guests, calling on the people to remain quiet on seeing them, and expostulating on the folly of hooting and pelting them. The proclamations about the new Treaty have, however, been defaced at Chau-chow, and squibs appeared against the Taoutae, one of which said that a conspiracy had been formed to kill him directly foreigners entered the city. This roused his ire, and he at once issued peremptory orders to his subordinates to seize any one caught posting up anonymous papers of any kind.

HONG KONG.

Lord Elgin left Hong Kong for Manila on the 28th January, whence, as already stated, he proceeds to Batavia. The steamer that conveys his lordship is the *Feroze*, H.M.I.N. A salvo of artillery from the British and foreign men-of-war in harbour, which also manned their yards, greeted his departure.

The *Dayspring* (Brit.) has been sold for $8,000; the *Albers* (Am.) for $7,500; the *Loch Lomond* (Brit.) for $4,500; and the *J. C. Humphreys* (Am.) for $6,800.

The Civil Service Abuse Commission has not yet terminated, the next meeting being appointed for the 2nd Feb.

The cession of Kowloong has been formally made to England, and inaugurated by Lord Elgin by an imposing ceremony.

All that portion of the late army in China which has returned from Tien-tsin and Peking—by far the larger proportion of the forces engaged—has arrived at Hong Kong under orders to proceed to England and India, and has been embarked under the superintendence of Colonel MacKenzie. The total number that has already been received on board ship amounts to—Officers 270, rank and file 3,500, horses 900, native followers 3,631, number of transport vessels 48.

The *Hong Kong Government Gazette* confirms a notice of deceased persons to whom letters of administration have been granted, and the value of estate, among which we observe that of T. L. Walker, $7,638; George Chape, $6,424; James Gray, $13,800; J. B. Compton, $1,331.

A notification also appears, setting forth the local and Imperial acts for the conveyance of Chinese passengers.

A new monthly publication, called the *China Record*, is to be started from the office of the *Daily Press*, which paper, we may also observe, has been increased in size.

The *Granada* and *Chusan*, P. and O. steamers, have been chartered by the French for the conveyance of troops to Saigon. A considerable force is now on its way thither.

A third dividend on the American Canton claims has been just paid, leaving less than 20 per cent. for the final discharge of the certificates. Lord Elgin, in reply to questions as to the British claims, could not promise when, but it "shall be paid soon" was all that could be elicited from his lordship touching the British Canton claims.

It is announced that Governor Robinson intends visiting England to confer with her Majesty's Government on several important matters connected with the colony and the new territory of Kowloong.

The *China Mail*, in noticing the departure of Lord Elgin for England, takes the opportunity of reviewing the results of his lordship's mission, which is looked upon as eminently satisfactory. It is regretted that Lord Elgin did not visit all the ports, with a view to initiate his subordinates into his policy, with that firm, temperate and kind spirit which has characterised all his lordship's proceedings.

The *Hong Kong Register* gives the conclusion of Mr. Griffith Johns's sojourn among the rebels, and promises an account of his visit to Nanking.

It is the intention of the P. and O. Company to resume the line between Shanghai and the ports in Japan.

The revenue and expenditure tables have been published, and show total receipts £94,183, and expenditure £72,390, showing a nett increase in receipts of £28,957 and in expenditure £6,281 over 1859.

The *Friend of China* notices the departure of H.M.S. *Adventure*, for England, on the 17th Jan. She sailed from Canton, and for a fortnight before had small-pox on board, from the effects of which she lost only one man.

The *Red Riding Hood* left Canton for Demerara with emigrants on the 18th Jan., and will be preceded by the British ship *Chapman*.

CANTON.

The following is from the *Friend of China*:—

It is an established fact that mercantile houses of long standing in the East are very conservative in their ways, and view with little favour the innovations caused by steam and electricity. Lieutenant Waghorn, the pioneer of the overland route to India, found small acceptance when he visited Canton in 1838, and proposed to British merchants a formation of the line afterwards made by the Peninsular and Oriental Steam Navigation Company; and had Chinese affairs remained as they were—had there been no opium war, no Hong Kong under British rule—it is more than probable that we should not to this hour have a line of mail between this and Suez. Bearing this conservatism in mind, it seems problematical whether the proposed line of telegraph between China and Russian Europe is not deemed by leading merchants here a nuisance rather than a good. This telegraph way, according to late advices, is making rapid progress, and is already complete over some 600 miles to the eastward of Moscow—viz., to Perm, on the border of Siberia, say to long. 55 deg. E. and lat. 58 deg. N. From Perm the line will cross the Uralian Mountains to Iekaterinberg, and thence to Toumain, on the left bank of the Irtysch. From Toumain the line is to run to Omsk, a fortified town, the importance of which may be judged by the circumstance of its having a garrison of 4,000 men. From Omsk the line will proceed to and through Tomsk and on to Krasnoyarsk. This place is only 500 miles north-west of Kiakhta, to reach which, however, the wire will pass through Irkutsk, the capital of Eastern Siberia. From Kiakhta (Mai-matsin, in China), it is proposed to carry the line over the Yablanovoi Mountains to Cheta, to which place steamers already run from Nicalouski, on the Amoor. The line will not follow the line of the Amoor river, however, but across to Nestchmisk, and then down the Shilka river to Ourstrelka, a point just 6,000 miles from Moscow. How long it will take to construct the whole line we are not in a position to say—two or three years perhaps. Once constructed, however, the terminus on this side will become a place of note, and prove a leading instrument in the steady march of civilisation in the East.

COCHIN CHINA.

SAIGON.

The latest intelligence from Saigon announces a victory by the French on the 1st of January. In a battle, which lasted two hours and a half, the French captured two forts and killed six hundred of the foe, with a loss to themselves of six wounded. The French army in occupation at Saigon numbered about

Digitized by Google

seven hundred, but nearly a third of them were sick and unfit for duty. The Anamese had stopped supplies from the interior, the cost of rice having thereby been quadrupled. Vessels had been sent up the coast for live stock. Business was very dull. It is said that a powerful reinforcement of French will shortly proceed from Hong Kong to the South, to assist in bringing matters to a definite settlement.

There are some 25,000 Anamites waiting to repulse the French troops expected to land at this port. The French will not attack Saigon, but proceed to the chief power there, or before commencing hostilities. The French have adopted this measure in order to save bloodshed.

BORNEO.

LABUAN.

The Roman Catholic Mission schooner *Marterio de Tonquin*, with the Right Rev. Mr. Cuarteran, bound for Manila, returned here from Balabac in November last, after several unsuccessful attempts to beat up against the North-East monsoon. The brig *Pacifico* had left Balabac for Manila on the 14th of September, and the residents at that settlement were short of supplies, as there had been no communication from Manila for several months.

The Pangeran Tumongong of Brune, and the heir apparent, accompanied by several Rajahs, arrived here a few days ago, and returned again to Brune. The trade between this and the Suloo Archipelago is getting more regular, and notwithstanding the prohibitions by the Pangerans of Brune of exporting sago, and to whom the natives are obliged to sell in preference to better paymasters, the general trade of the colony is satisfactory. The oppressive system carried on by the Rajahs of Borneo on the North-West coast, has caused many of their people to seek an asylum in this colony, and the few flourishing settlements are now in a hopeless condition, the natives beginning to resume their old habits of piracy; and a little slave-trade is also carried on with impunity.

All the coal works are progressing favourably. The company have succeeded in getting coal from the old workings for the purpose of starting the pumping and saw mill engines.

SARAWAK.

H.M S. *Nimrod* had arrived at Sarawak with Mr. St. John, the consul-general, and was about to proceed to Brune. All was quiet at Sarawak, and trade prospering.

Sir James Brooke was expected to leave Singapore on the 8th Feb. for Sarawak in his steamer, the *Rainbow*. The news of Capt. Brooke's death, reported elsewhere, is not confirmed.

JAVA.

The Government have employed the native master of ceremonies at Batavia to go to Banjermassing, and endeavour to persuade the rebels there to capitulate. The slave-trade at Nias (Sumatra) seems to go on with impunity, the traders being seldom caught by the Government.

Trade in Batavia is very slack. Several small failures have taken place among the Chinese.

At Banjermassing there is nothing in the shape of news. The Dutch appear to be barely holding their footing in the country.

The crew of the Dutch war steamer *Claeszen*, were on the 25th Jan. beaten off from Pulo Salius, one of the Paternoster group, by pirates, who, driven to desperation by the loss of their praus, enticed the men-of-war's men into a field exposed to a covered fire from three sides, when nine men were placed *hors de combat*. The crew of the *Claeszen* then retreated, and the vessel proceeded to Macassar for assistance to complete the destruction of this nest of pirates.

MALACCA STRAITS.

SINGAPORE.

A rumour prevails in semi-official circles that Colonel Cavenagh, the governor of the Straits Settlements, is about to accept a higher appointment in India. Great credit is given to the colonel, as a hardworking, conscientious man, but it is remarked that during his administration he has done little or nothing to advance the interests of the settlements. This opinion is founded on the facts, that he did not oppose the introduction of the Income-tax and Licence Bill, from both of which the inhabitants of the Straits have been exempted, in consequence of the protests of all classes of citizens. Still, his departure will be regretted. By his example, and that of his highly esteemed family, he has imparted a healthy tone to the society of Singapore; he has been foremost in every social virtue; in short, as a *man*, he is learned; as a governor, he has drawn little respect.

Sir James Brooke's steamer, *Rainbow*, arrived out from Glasgow on the 30th of January.

The French steam-transport *Wezer* has been totally wrecked on a rock near Cape St. James.

Mr. Thomas Dunman, who for fifteen years has alternately filled the situation of superintendent of police, magistrate, and commissioner of police at Singapore, embarked for Europe, on leave, in the *Robert Small*, on the 28th of January. Mr. K. B. S. Robertson officiates for Mr. Dunman during his absence.

The American ship *Isaac Walton* was lost on the 15th of December, on a reef near Pulo Panjang. The crew were saved, and conveyed to Bangkok by the Peruvian ship *Empress de Lina*. The wreck was sold by auction for $120.

Merchants and planters in the Straits have now an opportunity afforded them of becoming more intimately acquainted with the Eastern Archipelago by the establishment of the *Cories de Vries* line of steamers, which touch at Rhio, Muntok, Padang, Bencoolen, Samarang, Sourabaya, Biliton, Pontianak, &c., the Moluccas, Amboina, Ternate, Bali, and Banjermassing. The steamers are well found, and provide in every respect for the comfort and pleasure of the passengers.

PENANG.

Our latest dates from this place are to the 9th February. It is said Government contemplate running three small steamers in the Straits, to ply regularly between all three settlements. Two are expected from China, and one from Bombay. The latter is the *Sir Hugh Rose*, the former the *Thor* and *Mahor*. They are much wanted, and will be most welcome to the inhabitants of the Straits.

Mr. Plunkett arrived here on the 21st January, in the *Hooghly*, and took over charge of the police the following day. It is to be hoped our new deputy will not have so many malicious enemies as Mr. Robertson. Mr. Plunkett always bore the character in Singapore as a very kind and gentlemanly man, and as Mr. Robertson has now been removed from the sphere of Penang official malice, his successor will not have occasion to defend the vexatious suits, rather too prevalent in former days, and the denunciation of the local press.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CAINE—On the 13th inst., at Star-hill, Rochester, the lady of George W. Caine, Esq., H.B.M.'s Consul. Swatow, of a son.

CHALDECOTT—At Hong Kong, on the 8th January, the wife of T. A. Chaldecott, Esq., M.D., of a son.

GRAHAME—At Manila, on the 10th Jan., the wife of R. V. Grahame, of a son.

LABUAN—On the 9th inst., at Stormanstown House, near Dublin, the wife of the Right Rev. the Bishop of Labuan, of a daughter.

PEARCE—On the 24th ult., at Staplegrove, Taunton, the wife of Richard Pearce, Esq., of a daughter.

PIERCY—At Canton, on the 5th Jan., the wife of the Rev. George Piercy, Wesleyan missionary, of a daughter.

RAWSON—On the 28th ult., at Killinchy, county Down, the wife of the Hon. Rawson W. Rawson, Esq., C.B., Colonial Secretary of the Cape of Good Hope, of twin daughters.

THORNE—At Shanghai, on the 13th Jan., Mrs. Thorne, of a daughter.

WATSON—At Broadfield, Singapore, on the 29th Jan., the wife of N. B. Watson, Esq., of a son.

WHITLOW—At Shanghai, on the 19th Jan., Mrs. James Whitlow, of a son.

MARRIAGES.

RODRIGUES—FELIX—On the 22nd inst., at the Roman Catholic Church of St. Peter, Malacca, by the Very Rev. M. J. Gomes, Mr. Jose M. Rodrigues, P. and O. S. N. Co.'s service, Singapore, to Julia, only daughter of Mr. S. Felix, of Malacca.

CUMMING—FRASER—On the 14th inst., at St. George's, Hanover-square, London, by the Rev. Robert Holberton, M.A., incumbent of Norbiton, Surrey, James Bannerman Cumming, Esq., of Singapore, to Elizabeth Sarah, widow of the late Edward Fraser, Esq., advocate, and daughter of the late Captain Melville Gore Matson, H.M.'s 59th Regiment.

JACKSON—HALL—On the 24th Jan., at the English Church, Penang, Lieutenant Jackson, H.M.B. *Krishna*, to Miss Hall.

DEATHS.

DUNN—On board the steamer *Chow Phya*, forty-eight hours after leaving Singapore, Mr. G. Dunn, proprietor of the Steam Rice Mills at Bankok.

GISBORNE—On Friday, the 8th inst., at 1, Dartmouth-street, Westminster, Lionel Gisborne, Esq., civil engineer, aged 37.

Digitized by Google

HULME—On the 1st inst., at Brighton, in the 57th year of his age, John Walter Hulme, Esq., late Her Majesty's Chief Justice of the Supreme Court, Hong Kong, China.

LITCHFIELD—On the 21st January, at Hong Kong, Eliza, wife of Deputy Assistant-Commissary-General E. Litchfield.

MORRIS—On the 21st January, at Hong Kong, Mr. John Morris, of the firm of Messrs. Blackhead and Co., aged 24 years and 7 months.

RAWSON On the 6th inst., at Bestwood-hall, near Nottingham, George Rawson, Esq., in his 54th year.

RODE—On the 25th ult., at 11, Cavendish-square, the Countess of Rode, aged 66.

STERLING On the 19th January, Private Musician Daniel Sterling, aged 33 years, late 21st Regt. Madras N.I. He left a wife and three children to lament his loss.

VINCENT—On the 20th January, at Shanghae, Isabel, the infant daughter of Mr. Thomas Vincent.

WETHERELL—On the 7th inst., at Warneford-place, Wilts, Lady Harriet Elizabeth Wetherell Warneford, widow of the late Sir Charles Wetherell, Knight, aged 57.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The business transacted during the fortnight at all the ports has been unusually small. At Shanghae.—Black: Settlements for the fortnight are—4,970 chests, of which 3.000 are Ningchow, at 24 taels to 28¾ taels, and 1,300 very low to fair common congous, at 15 taels to 20 taels; purchases to date now amount to 60,500 chests, and the stock on the market of all kinds is not more than 9,500 chests. Greens: Scarcity continues to exist, and it is generally admitted that a large portion of the crop has been destroyed. Foo-Chow Settlements Congou: 10,000 chests and 7,500 half ditto, at 7½ to 12 taels for trashy and low, 12 to 15 taels for very to good common, 16 to 20 taels for but middling to middling, 19 to 24 for medium to fine Ningchows. Oolongs: 1.500 half-chests, at 11 to 20 taels for low Foochow packed to good cargo. Flowery Pekoe: 500 chests at 24 to 45 taels common and middling are easier. Scented Teas: 8,500 boxes middling to fine, 21 to 24 taels; a small parcel very inferior brought 16½ taels only. Canton.—Congou: Four chops Oonams and Oopacks, at 22½ to 28¾ taels. Scented Teas: 1,500 boxes Orange Pekoe at 24 to 29 taels, and 5,000 boxes Caper at 15 to 24 taels. Powchong: 500 half-chests and 1,000 10-catty boxes, at 20 taels. Canton Greens: 6,000 boxes Gunpowder, at 17 to 19 taels. 800 packages Imperial, at 19 to 20 taels. 100 half-chests Young Hyson, at 20 to 22 taels. 500 half-chests Hyson Skin, at 15 to 17 taels.

RAW SILK.—Shanghae: The receipt of further unfavourable accounts from Europe, together with the maintained advanced rate of exchange, have resulted in a fall of 10 to 15 taels per picul on lower classes. The settlements are—3,500 bales, making total to date 67,000 bales for Europe, and 1,400 bales for America, against last season 46 000 bales to Europe, and 1,000 to America. The unsold stock is estimated at 6,000 to 7,000 bales; at same time last year it was 4,500 b les. Canton: Reereeled Cum-chook is offered at 465 to $470 - the contract price is $15 higher. Loonkong is quoted 440 to $450. Gowkong, 400 to $410. The only settlements reported are 100 piculs of all kinds.

DRUGS, &c. Casia Lignea: The Canton market has been cleared at 17½ dols. per picul. There is still some stocks at Macao where the quotation is 16 dols. to 17 dols. Cassia oil is quoted at Canton 275 dols to 280 dols. and at Macao 260 dols. to 265 dols.; there is ample stock and little demand. Cassa Buds: About 100 pls. have reached Canton, half of which has been disposed of at 39 dols. Star Aniseed: There is a stock at Macoa of 500 pls., the quotation for first quality is 14 dols. 75c. to 15 dols. 25c. Anniseed Oil is in reduced stock—the Macao quotation is 160 dols. to 165 dols. Galangal can be had at Canton at 4 dols., and China root at the same figure. Vermillion is still quoted 38 dols. Galls have advanced to 17 dols. 50c., and are scarce. Matting at Canton still continues high, say white four-quarter, 11c., five-quarter, 129½c., six-quarter, 16c. per yard., checked being 13½c.

CHINA—IMPORTS.

The business transacted in manufactured imports has been very limited indeed during the fortnight, which may be entirely attributed to the usual cessation of business on the approach of the holidays.

At SHANGHAI.—Grey shirtings, deliveries 15,000 pieces; white do., deliveries 1,200 pieces; T cloths, deliveries, 7,000 pieces American goods are very dull, but it is hoped they will find a market at the North in the spring. The sales of the fortnight are reported. Drills, 6,000 pieces; sheetings, 1,200 pieces; jeans, 5,000 pieces; leaving a heavy unsold stock of 320,000 pieces; drills, 33,500 pieces sheetings; and 28,500 pieces jeans; camlets, sales 36 pieces; long ells, sales 40 pieces; Spanish stripes, sales 100 pieces; iron, dull and large stocks. Tin scarce and wanted; tin plates are saleable. Lead in fair request, and small stock. Straits produce, no sales whatever reported.

At HONG KONG.—The sales of the fortnight are reported as under: 30 bales yarn; grey longcloths, none; white ditto, 500 pieces; T cloths, none except sales to arrive; long ells, 500 pieces scarlet; Spanish stripes, 600 pieces; camlets, 450 pieces; lastings, 120 pieces; iron, 800 piculs; tin plates, 420 boxes; lead is neglected; window glass in enormous stock.

At CANTON.—Sales of the fortnight: Cotton yarn, 160 bales; grey shirtings, 9,150 pieces; white ditto, 2.750 pieces; T-cloths, 960 pieces; Am. drills, 600 pieces; do. jeans, 4,000 pieces; long ells, 380 pieces; camlets, 120 pieces; lastings, 100 pieces; betel nut, 1,200 piculs; rattans, 500 piculs; lead, 1,100 piculs; quicksilver, 620 flasks; nail rod iron, 1,250 piculs; tin plates, 500 boxes.

MANILA.—Imports there have been two arrivals from England. The market is in a fair condition. Exports: Produce continues scarce. Sugar: There is little or no current clayed left for sale, and though dealers ask higher rates the value cannot be quoted over 5 dols. 75c. per picul. Sales of Zebu and Iloilo were at 3 dols. 84½c. to 3 dols. 87½c. per p cul. Hemp: Nearly all that has lately come to market was contracted for some time ago. The present quotation is 4 dols. 50c. to 4 dols. 62½c. per picul for current quality, with a good demand for shipment to Europe.

SINGAPORE AND BATAVIA.—The markets are reported as inactive, owing to the approach of the Chinese new year.

BANKOK.—The *Bankok* has sailed for Bordeaux. The sugar season had commenced; prices were very full, and supply small. No purchases had been made for Europe in consequence.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 4d.	6s. 4¼d. to 6s. 5d
Ditto	3 ditto		
At Foo-Chow-Foo (per dol.)	6 ditto	4 9	4 9½
At Canton, At Hong Kong, At Macao	6 ditto	4 8½ to 4 8½	4 8½
Ditto	3 ditto

SHIPPING INTELLIGENCE.

ARRIVED.

At SINGAPORE.—From Cardiff: Jan. 22, Japan; Feb. 1, Carl and Auguste; 5, Asia. From Amsterdam; Jan. 23, Nieun Lekkerland. From Sunderland: 29, Rauma. From Glasgow: 30, Rainbow (steamer).

At SHANGHAI.—From London: Jan. 16, James Lemon; 17, Japan. From Queenstown: 18, Victor Emmanuel. From Liverpool: 18, Queen of England; 21, Benares. From Cardiff: 12, Vision. From New York: 8, Tsar.

At HONG KONG, MACAO, and CANTON.—From Liverpool: Jan. 17, Corea. From Cardiff: 17, Sir W. F. Williams; 29, Reginius Adolphus; 31, Cornelia From Newcastle: 19, P. C. Kinch; 28, Montmorency. From Rotterdam: 26, Maria Elizabeth. From Swansea: 26, Pathfinder. From New York: 18, Levanter.

At MANILA.—From Liverpool: Jan. 10, Teide; 18, Jose Maria. From Cadiz: 11, Constantine; 23, Reyna de los Angeles.

At PENANG.—From London: Jan. 10, Irene; 18, Roseau. From Liverpool: 29, Isabella Harnet.

At BATAVIA.—From Cardiff: Jan. 22, Prius Veldmaarschalk. From Sunderland: 23, Macao. From Rotterdam: 22, Johanna Maria; Dorothea Henriette. From Amsterdam: 22, Calypso.

LOADING.

At SHANGHAI.—For London: Bacchante, Glencoe, Tung Yu; For Liverpool: Sir Isaac Newton. For New York: Onward, Sportsman.

At FOO-CHOW-FOO.—For London: Spray of the Ocean, Spartan. For Sydney: Psyche. For Australia: Adelaide.

At HONG KONG, MACAO, and CANTON.—For London: Corea, James Patton, Shantung, Dawstone. Orissa, Vanguard, Wolverine. For Liverpool: Chevy Chase. For Havre: Maria Eliza. For Hamburg: Siwa. For Havana: Fides, Independence, Forest Eagle, Kate Hooper, Leonidas. For New York: Comet, Flying Scud. For Demerara: Mystery, Saldanha, Sea Park. For San Francisco: Bald Eagle, Kingfisher, Lotus, Rapid, Willy, Challenge, Imperial.

At MANILA.—For London: Fanny McHenry, Mary Shepherd. For Liverpool: Albion, Sales. For Cork: Agamemnon, Eliza Stewart. For Boston: Kit Carson. For New York: Storm King. For Sydney: Constantine, Tropic. For San Francisco: Memnon.

At SINGAPORE.—For London: Linselles. For Liverpool: Jacatra, Mary Spencer. For Falmouth: John Brightman. For Hamburg: J. H. Becker. For New York: Ferdinand and Louis, Game Cock.

At PENANG.—For Boston: Isabella Harnett.

At BATAVIA.—For Holland: Hebe, Spencer. For Melbourne: Korner.

SAILED.

From SINGAPORE.—For London: Jan. 28, Robert Small; Feb. 1, Knight. For Hamburg: 28, Aristides. For Falmouth: Feb. 5, Souhabaza.

From FOO-CHOW-FOO. For London: Jan. 17, Bankside; 21, Moneka. For Cork: 19, Witch of the Seas. For New York: 16, Florence.

From HONG KONG, MACAO, and CANTON—For London: Jan. 1, Heroes of Alma; 12, Dishona; 16, Pruth; 20, Shantung. For Liverpool: 11, Seawfell. For England: 15, H.M.S. Cruiser; H.M.S. Adventure; 28, Powerful (str.) For Hamburg: 18, Mathilde. For Havana: 13, Encarnacion; 18, F. P. Sage; 12, Alice Thorndyke. For Demerara: 21, Red Riding Hood.

From MANILA.—For Cork: Jan. 19, Bonadventure; 24, Eliza Stewart. For Boston: 9, Revere. For New York: 10, Horizon, Wizard.

From PENANG.—For London: Jan. 9, Clara; Feb. 2, Zenobia; 6, Roseau. For Boston: 3, Humboldt.

From BANKOK.—For Bordeaux: Jan. 5, Bangkok.

From BATAVIA.—For London: Jan. 22, West. For Holland: 17, Argonaut; 18, Louisa Kroup Zweden; 19, Corvette Pallas; 24, Eva Johanna; 25, Minister Pahud Isabella; 27, Johannes Christian.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: tea, £2. 10s.; silk, £5. To New York: tea, $10; silk, $20. The only business doing is for Japan, the demand for vessels for the China trade having fallen off, owing to the proximity of the new year.

At FOO-CHOW-FOO.—To London, £3. 10s. To New York—nothing doing. There is a good business doing for England and Australia, and several ships are required for both ports. The coast business is also improving. The Yaratilda and Humphrey Nelson are on the berth for London, at £3. 10s.

At AMOY.—Freights are very brisk, and tonnage exceedingly scarce. The present demand is for the Straits and Shanghai, to which latter port extreme rates are being paid for sugar, which is likely to be maintained for some time.

At HONG KONG, MACAO, and CANTON.—To London: £2. 15s. to £3. To New York, no quotation. A good business is expected to be done, as there is every prospect of the Tien-tsin Treaty being carried into effect, which will open several new ports for employment of shipping. A large business is being done for San Francisco, Demerara, and Havana, for the two latter ports vessels being still wanted. For the rice ports a large business also continues to be transacted. The charters reported are—for London, Orissa, Wolverine, Vanguard, and Siwa, all from Canton at above rates. Siwa to Hamburg at £3. Bald Eagle to San Francisco, with passengers, at $9,500. Willy to San Francisco, $13,000. Ten more vessels have been laid on for Bangkok and back, at 55c. to 60c. per picul. Sea Park to Demerara, at £9 per head. The Independence and Fides for Havana, at $65 per head.

At MANILA. To London: £2. 10s. to £3. 15s. The Mary Shepherd is on the berth for London, at £2. 10s. for current, and £2. 15s. for unclayed sugar, and £3. 12s. 6d. for hemp. The Albion, for Liverpool, at the same rates for sugar, and £3. 15s. for hemp.

At SINGAPORE.—To London: £2. 15s. to £3. 10s. A good demand is still experienced for the rice ports, and nearly all the available shipping has been taken up. The J. H. Becker has been laid on for Hamburg, at £3 to £3. 5s. per ton.

At PENANG.—To London: £3 to £3. 5s. for tin, &c., £3. 15s. measurement, at which rate the Isabella Harnet is now loading at. To New York, $13 per ton.

At BATAVIA.—To Holland: £4. 5s. To Melbourne: £3. 15s. Freight is in good demand, and rates firm. The Hebe and Spencer are on the berth for Holland, and the Korner for Melbourne.

CASUALTIES.

The Alma was boarded on Jan. 15 by the pilot boat Underwriter, after having been seventy days from Hong Kong, and lost two suits of sails and topmasts.

The American Hesperus, from Liverpool, with a cargo of coals, caught fire on the morning of January 6, and was totally consumed by the evening. Captain and crew arrived at Shanghai next morning.

The Coquimbo, with Chinese emigrants, has had to put into Kanagawa, being in a leaky condition.

The Elizabeth, from Manila January 19, to Amoy, after having undergone repairs, commenced leaking shortly after leaving, and sunk sixty miles S.E. of Pratas Shoals, heavy seas on at the time. Twenty-seven of the crew, including the chief officer, were taken in tow by the Formosa, but the gig boat, containing seven, has not been heard of since.

The America, from Liverpool to Shanghai, was sighted on January 8 by the Fielong, and on approaching her, was told that part of the crew were sick, and would like a few hands. This the Fielong was not able to comply with, and having seen several men on deck and not considering her in distress, left her in command of the chief mate, the captain having died the day before. Nothing has been heard of her since.

The Fielong afterwards picked up a fishing boat containing six Chinamen who had been blown off the land near Shantung, in a gale. Two of them were frozen to death, and the others more or less frost-bitten.

The Neva encountered a gale and lost her head stays, and sustained other damage, and has had to put back.

The Mountain Wave, from Manila December 30 to Sydney with a cargo of sugar, has had to put back to port and discharge, having sprung a leek in a typhoon a few days afterwards.

The Rival has to be re-coppered, having been run ashore on the north bank when going into Shanghai. She was on the bank about fourteen hours.

The Siamese barque Seaforth, from Shanghai November 19, in charge of a pilot, sprung a leek soon after during a severe gale, when the pilot immediately deserted her, and stuck on the ground four days. The master succeeded in getting her off, when a Russian steamer got athwart her hawse and did a great deal of damage afterwards the cotton in the forehold took fire, and did considerable injury to the cargo. Again left Shanghai on December 27, when, three days after, the Melbourne ran right into her in broad daylight and smashed the quarter galley and broke lower yards, and much more mischief, which the master promised to pay, but did not after delaying three weeks to have it settled by the Consul. On January 27 the Seaforth arrived at Hong Kong during a violent gale from the N.E.

PASSED STRAITS OF SUNDA.

From China to England and Continent: Jan. 14, Queensberry; 21, Patrician, Catharina; 22, Southern Cross; 23, Cambalu, Bride of the Seas, Standard; 25, Seawfell, Congo, Bangkok. To New York: 22, Sancho Panza; 23, Snow Squall; 26, Starr King. To Havana: 15, Rema del Oceano; 17, May Queen. To Demerara: 17, Claremont. To Melbourne; 26, Odin. From Cardiff to Singapore, 12. Carl en August. From Batavia to Bordeaux: 14, Canton. To London: 25, West. From Singapore to England and Continent: 15, Steamer Magicienne; 22, Ralston, Virginie; 23, Caroline. From Manila to Melbourne: 22, Militus. To Boston: 23, Revere. To New York: 24, Horizon.

OF WHAT BENEFIT TO JAPAN HAVE THE NEW TREATIES, POLITICALLY, SOCIALLY, OR MORALLY BEEN?—COMMUNICATED

HAVING now visited all the open ports in Japan, and having resided at each some time, not long enough indeed to have learnt, but very superficially, the manners and customs of our new friends; still, as I fancy I have had as fair an opportunity as most others of judging them, I will venture to give a short sketch of these interesting islands, and try to prove they have been the gainers by our new Treaties. May I ask you to take up the map of Europe, and regard for a moment the British Isles, the Channel, and the Continent of Europe? Will you then turn to the map of China and Japan? Is there nothing peculiar y striking? You exclaim, "One is to the far East, the other to the far West; that is all I see." Is not, then, the geographical position, not the geological, eminently interesting? The Atlantic and North Seas wash the one, the Pacific and Japan Seas bound the other. The latitudes of Great Britain are higher, but yet occupy nearly the same amount of degrees. The ports of the British Isles are not, naturally, more magnificent and safe than the recently surveyed harbours of Japan. Nagasaki for Cork. "Absurd," some will say. Hiogo and Osaka for Falmouth and Plymouth; Simoda, Enora, Heda, Tago, for Portsmouth, Southampton, and the South; Kanagawa for the Capital; and then last, not least, the bay of Hakodadi, described by the Americans and others as one of the finest harbours in the world for accessibility and safety. Please remember also that these ports have not had the millions bestowed on their improvement which British harbours have had wasted on theirs.

The adjacent continent of Asia has, by traditional report, for many centuries witnessed the same scenes of continuous conflict as those which reddened the soils of France and England with the chivalrous blood of their warriors. Tartars, Moguls, Coreans *v.* Japanese; Norman, Frank, and Gascon *v.* England. Nearer home we have read of the almost civil wars between England and Ireland, repeated between the Coreans and Japanese; and, if for nearly 300 years these external forages had ceased, we hear of internal wars which the feudal lords or "Daimios" have been continually waging against their Imperial Sovereign, the Tycoon or Siegoon, as it was written. Whenever one Prince felt himself strong enough to aim at independence, either alone, or supported by other kindred spirits, the scenes we read of in the middle ages of our own history were re-acted.

The Japanese islands are both warmer and colder than the British isles. At Nagasaki the thermometer in August and September, reaches 96 deg. in the shade. At Hakodadi, during December, January, February, it has been observed as low as 18 deg. below zero. When we take into consideration that Hakodadi is lat. 41 deg. 40 sec. N., or about parallel with Naples, we may be surprised at this variation, and still more so when the result of observations, taken in 1859, makes the summer of Hakodadi correspond very nearly with the summer of Edinburg, which is in lat. 55 deg. 57 sec., or more than 14 deg. to the northward of Hakodadi. The only explanation to be offered for this unnatural eccentricity of climate and atmosphere is, that the prevailing winds during the seven cold months are from the N., N.N.W., and chiefly N.W.; that they pass over the eternal ice-fields of Siberia and the main and of Tartary and Mantchouria; that they have but a narrow sea to cross, not sufficiently broad to modify their temperature, and are charged with storms of snow, —and so burst with undiminished severity and violence on the devoted peaks which encircle Hakodadi. In the few milder months, during which the wind is southerly, E.S.E., generally S.E. during parts of May, June, July, and August, the scene is changed; the snow disappears towards the beginning of April, and rain, brought up from the great Pacific, is incessantly pouring,—not showers, but almost tropical volumes, on the newly snow-denuded earth.

Hakodadi is not healthy, therefore. Colds, blindness, cutaneous irruptions, catarrh, fevers, and other natural maladies, caused perhaps by the one universal diet (fish, rice, and vegetables), are common. It is said that longevity is frequent. I have met with persons of either sex who appeared to have well passed the "three score years and ten." I have no observations of Yedo, Kanagawa, or Youkahama; but from hearsay I believe that, with the exception of the low and damp position of the sites occupied by the foreigners, which will, I fear, sooner or later be felt, the climate around ought to be, as it is, I am assured, salubrious. Of Nagasaki my observations are limited but accurate, extending over the three hottest months of the year. The thermometer ranged, from June 13 to September 13, 1859, from 70 deg. (coldest) to 96 deg. (greatest heat) in the shade; and what made this heat the more unbearable was, that the nights were as oppressive as the days, and the water was generally bad. During those three months there were twenty-four days of continued rain, real torrents, never ceasing, ever pouring. These rains were most incessant from June 24 to nearly the end of July, and the damp exhalations from the saturated and steaming earth made it really, at times, a very vapour-bath. Every breath of wind was greeted with fond embraces, and all that art could invent to seduce or increase it eagerly employed. The S.W. breeze would glide gently up the lovely bay, and then, but then only, could one for a moment admit the beauty of the harbour. I speak only of the summer months; during the other nine months it may be Paradise, for, certainly, Nature has wonderfully done her work—few eyes are tired by gazing on the panorama even in the summer months. What, then, when the camelia, the rhododendron, and all the blossoms of the fruit-trees – orange, peach, plum, cherry, pear, citron, and lime—are present in profusion to gladden sense and sight!

At Nagasaki there is more disease than at Hakodadi. In addition to those of Hakodadi, which are more or less prevalent at Nagasaki also, I will mention only cholera and typhus fever, which are often virulent. At Hakodadi the best of water is plentiful; at Nagasaki the best is bad.

Of the southern portion of Kiusiu little more is at present known by us than what Kœmpfer and Von Siebold have recorded. The Prince of Kagosima is an important "Daimio," but it is yet not satisfactorily determined whether he be or be not also the fesdal lord of the Lew-chew Isles. Doctors differ; "et, adhuc sub judice lis est." I do not wish here to argue this point; I only desire to show that Japan, *i. e.*, Japan Proper, extends from 31 deg. N. lat., the latitude, approximatively, of Alexandria, and Maderia, to 45 deg. 30 sec, or somewhat below Bordeaux, the nearest corresponding latitude in Europe; and thus that nearly all the products of the several countries, raised in the Western Hemisphere, might naturally be expected to be met with in the Japanese isles. So we find silk, tea, tobacco, sugar, plantains, rice, Indian corn or maize, almonds, grapes, flax and hemp, oranges, and most of our common fruit trees, wheat, peas, beans, potatoes (sweet and European) common and cheap. I do not speak of the coal, lead, iron, copper, gold, silver, or other mines; but these are also here. The sea produces a superabundance of fish—salmon, salmon trout, turbot, herrings, mackarel, cod, plaice, and even whitebait for the Londoner. The mountains and valleys send forth their bears, deer, cattle, pigs, fowls, ducks, pheasants, grouse, partridges, and wild fowl. What, then, did a nation, a nation which for centuries has been as sealed to us as the mysteries of Cumæ ever were to the uninitiated Romans, require more? Her own islands were sufficient to support her; her own hills, valleys, fields, lakes, rivers, seas, and mountains yie ded all she required. What her almost tropical climate could not, her more equable, or more frigid latitudes could and did, supply. Her people were happy, or as happy, in their ignorance and atheism, as many of us are with our learning, wealth, and Christianity. What, if a few princes, owning nominal obedience to one sway, were sometimes exacting and tyrannical! What, if money, gold or silver, were unknown to them what, if costly jewels, or rich lace, French and Rhenish wines, were unknown! Were they required? What, if their pagodas rung only with the sounds of idolatry and the wild frenzy of fanatacism!—*still* they trod in the steps of their forefathers, and had only learnt from them affection to their soil and to their families and institutions.

We will examine into the case, and discover, if possible, the inestimable boon which has been secured to them by the new treaties lately made by them with foreigners. The task will, doubtless, be easy, for the West is so far advanced in all things, in religion, in honour, in morality, in arts and sciences, in commerce, that the poor Japanese cannot but be vast gainers by the change from isolation to reciprocity of good fellowship with their superiors. We must have so much to teach our newly-discovered friends, that no doubt they will rush into our arms and imbibe all with avidity. We have shown them our fleets, our steamers, our guns, our muskets, our revolvers, and swords; we have paraded our ambassadors, our officers, our sailors and marines. They have seen the mighty leviathans alongside of their puny junks; they have heard our thunder, and witnessed our parades; but—have they gazed on all this with more awe and curiosity than we have done on examining one of their fabled salamanders?

For more than five centuries, B.C., the present dynasty, *i.e.*, the spiritual power, or Mikado, has been in undisputed possession of all its rights and privileges of living encaged with a dozen wives, of putting on daily a complete suit of new garments, and maintaining a miraculous silence for and contempt of all the world out of the precincts of the sanctuary of Miako and its Dairi. This dynasty *may* have wanted a successor in a direct line occasionally, in that case the vacuum was supposed to be filled up by a substitute sent from Heaven direct, so that the celestial line might never be lost to the Japanese nation. With temporal affairs HE has now nothing to do - although, nominally, official acts of importance should be clothed with his signature, his other and graver occupations leave him no time to descend from Heaven to earth. I only mention this great personage, and simply introduce him as the head of the Japanese religion, which is, as in China, Buddhism, with an exceptional dash of their original Sintooism, which existed ages before Buddhism was known. These are the two religions of the people, and many a good time and oft must the sleek and jolly priests, who with their acolytes, form a by no means inconsiderable portion of the official community to be fed, clothed, and housed by the poor, look down with bowels of compassion on the more than twenty millions of their pious believers—through them they live and are supported - be it only a cash (a "cash" of iron is the 5.320th part of a dollar), it is welcome—for, as many beads make the necklace, so many cash make a "cobang" (the cobang, a gold coin, is equal to four dol ars and a third.) I have lived near a temple for nearly a year, and have always remarked that the larger proportion of the visitors consisted of women of all classes, children, and beggars. The men who attended the ceremonies were chiefly merchants (merchants are despised in Japan, and not even allowed to ride a horse), shopkeepers, and the rabble, and these in no great numbers. It was very rare to see a two-sworded individual, even of the lowest rank, attend at any time, unless at the burial of a friend or at the celebration of some rite to the memory of a departed hero or sovereign.

The higher officers and the men of learning have their own doctrines, which, I am told, are very exalted, and highly tinctured with lofty philosophy. Whether they are searchers after the truth, or not, I cannot say; but, as religion here is useful as part of the State or Government, it would at present be dangerous to try and introduce Christianity, as the jealous pride of the Government and Daimios would be instantly and unanimously aroused, and all factions would coalesce to crush its taking root. The very memory of the Jesuits is execrated; and yet no person can enter the Buddhist temple without immediately remarking the *debris* of their former power. The aureole round the idol, the tabernacle or "niche" enclosing the "hostie" or "ostensoir," the lighted tapers on the altar, the genuflexions, the hours of prayer, morning, noon, and evening, all these remind us of the Roman Catholic religion. Affection for the dead seems, to be a really pious sentiment, and the memory of the departed is respected by frequent offerings and prayers. Through the priests, the Government publishes its edicts and directions; therefore they are, temporarily as well as spiritually, the enlighteners of the people. That the Roman Catholics were, before their downfall and expulsion, already very numerous, there can be little doubt; but since that expulsion and savage butchery, no other foreign religion has been openly admitted into Japan. Death is the penalty. The Dutch, who admit the share they had in the massacre of the Portuguese at Papenberg, defend the act by the assertion and excuse, "that at that very moment the Jesuits and Roman Catholics were ruthlessly committing all the cruelties and horrors of religious warfare in their own native land, and that they joined the Japanese to exterminate

Digitized by Google

them, moved only by a spirit of vengeance, and a cry for retaliation from their own distant country. The cry was too loud for them, and the opportunity of revenge too easy and tempting not to be taken advantage of." Was this their real reason? Had their dimly-seen monopoly no distant influence on their motives? Since that massacre up to the present day the religion of Japan has undergone no change, and the nation has been happy and contented, if not advancing in science or enlightened by intercourse with mankind. Thus the nation, in its ignorance, we may say, at the signing of the treaties, had no known reason to wish to alter its religion; it was prospering in its idolatry, and satisfied with its lot. It is not for us to judge the past or the future: let us leave it in the hands of the Omniscient.

For centuries, centuries wrapt, as Mont Blanc, in its perpetual snow, or the Fusiyama, in its volcanic mysteries, the Empire of Japan, consisting of the four great isles of Niphon, Sikok, Kiusiu, and Yezo, and innumerable minor islets has enjoyed the almost perfect privilege of perfect isolation from the rest of the known world. Like in all Eastern nations, and other more savage lands, the origin of this people is traced to the clouds and chaos; their Chinese derivation is scouted: before China was, Japan existed, and, as a proof of this fact, they appeal to the original religion of the land, a Sintooism, which had been established long before the Christian Era, or Buddhism was known. Look at the Chinaman, and then glance at the Japanese. One has imperceptible eyes—the other, intelligent expression; one is lazy, indolent, cowardly, and physically weak. The Japanese is active, muscular, and brave. We read indeed of powerful princes invading the Corea, and numerous conflicts betwixt the native Daimios. The Japanese invaded, and for some time possessed, the Corea, and perhaps parts of China; it is a boast, and the origin of their wish to live alone, that the enemies who have invaded their isles, have all been repulsed; they declare that, against their consent, no nation can subsist, or has subsisted in Japan. Poor nation! Let us hope our treaties may be respected as treaties of peace.

The Japanese Empire dates from the seventh century before Christ; but even before that period there had been large tribes, probably under nomadic chieftains; civil wars occurred, and the Emperor, who, then, in his sacred person, was King and Divinity, appointed great warriors to quiet them; and, perhaps, their wars were not very bloody. Several men and women made themselves conspicuous in this early Japanese history, and have been deified in consequence; but it was not until the twelfth century, when the Ecclesiastical Emperor's "Siegoon," or military commander, Joritomo, usurped the chief civil power, that the Spiritual and Temporal Government became divided.

Since that time the "Siegoon" has been the real Sovereign of Japan; the "Mikado" existing only as a political but useful appendage to the Civil Government.

The Tartars in the thirteenth century vainly endeavoured to take any part of Japan, they made several attempts, and were each time terribly defeated. Japan was not to be taken; and no foreigner should reside on, nor no Japanese leave her shores, on pain of death. Independent Japan we are now in the nineteenth century!

Civil wars and dissensions more or less disturbed the country until the end of the sixteenth century, and it required all the energy and action of a brave and enlightened man to arrange matters. This man, however, appeared as if raised up for the occasion, and is celebrated all over Japan as our Black Prince, Wallace, Henry the V., and Cromwell are in England, for he was a warrior and statesman too. His revered name is Taiko Sama, and from him is lineally descended the present temporal Emperor or Tycoon of Japan.

Marco Polo, who returned to Venice in 1295, was the first European to furnish any account of Japan. The Portuguese, then the most enterprising discoverers and merchants in the world, were, however, the first, about the middle of the sixteenth century, to establish commercial relations with the Japanese at Nagasaki. We have mentioned their wretched fate, and regret to find that their end merits but little pity, inasmuch as with religion they sowed discord, and with their Christian doctrines inculcated disobedience to the actual sovereign, and while preaching peace and love they were secretly moulding weapons of civil hatred and enmity.

The Dutch, full of enterprise, and inspired by love of gain, for which, if reports are true, they denied everything, even their religion, succeeded the Portuguese, and carried on a very profitable monopoly with Nagasaki. The indignities they submitted to in order to maintain their exceptional privileges, are too notorious and public to need recapitulation here. They bore with slavish patience all ignominy, provided their annual quota of ships was duly laden with the one thing required. In fact, a proud and gallant nation at home, cowed, in Japan, to an inferior race, for the sake of a few paltry dollars! Time, however, flies on. The West is too little for its hardy and adventurous people; India is discovered and occupied; Singapore, China, are opened to commerce; California becomes an American State—and, as Commodore Perry says, the United States were thus "brought closer to Asia;" Japan lay directly in the course from California to China, and from its reputed possession of coal it was regarded with much interest by Americans." Coal has made England what she is: may not coal, with the blessing of God, make Japan a mighty nation? The Japanese princes were brave—their soldiers followed them; their priests prayed for them; the people cultivated their lands, and attended to their commerce and manufactures, in order to supply the necessary sinews of war. There was no groaning, no cry of complaint; it was the will of heaven that Japan should be happy, and happy alone. Alone, she had peopled her countless islands, and all her miseries had come from abroad: alone she wished to be; and, if we may believe the reports of early writers, Spanish, Portuguese, German, Dutch, and others, Japan was happy in her solitude, and yet had an irresistible charm for all foreigners, who became more and more delighted with the people as they became better acquainted with them. Twenty millions recognised their spiritual and temporal sovereigns. If not too "liberally" governed (as "we" understand "liberal" institutions), we hear of no murmur. If some of their laws were oppressive, or their punishments too severe and even barbarous, consider how long it is since, with us, horse stealing was followed by hanging, and apostacy by martyrdom. probably as Japan was, when we were naked savages, apan is to-day; although men of great research pretend that she has been steadily advancing. But we know little of her ancient history previous to the sixteenth century; its past is like the legends of the Rhine, full of fable and romance, of mighty deeds by men and women. We are almost sure that Japan was never conquered, and that she was ever able to maintain herself in ease, comfort, and comparative opulence. If sometimes internal peace was broken, the fight was between brothers, and not of long or perhaps bloody duration; if their commerce was not extensive, their junks were expressly limited in size, by law, for the sole convenience of their islanders; if they despised foreigners, it was because they had been able to compare the habits, customs, and laws of Corea, China, and the Tartars with their own, and they preferred their own. Since the sixteenth century we know more of Japan, and we can all read its history. What has it gained from the Jesuits, what from the Protestants? A power they can no longer resist, the power of might and mind, has *now* declared Japan to be a part of the civilised world. Such is its present "dayspring." We are no longer the Spaniards of Mexico, the Portuguese of Goa, or the Britons of former India: an honest trade will be met with reciprocal honesty; but Japan is a nation of warriors, and is able to resent, aye, and punish injustice. I have tried to prove that the Japanese themselves had no desire to change their religion; I now try to prove that, with the exception of some Tartar engagements, and some few civil wars, they were happy in their constitution, and animated with sufficient patriotism in any common and general cause to be able to defend their own from aggression, and even chastise intruders. Have the treaties benefited their constitution—have they ameliorated their moral or political economy? We will answer this question shortly.

The Coreans, Tartars and Chinese, were not the only visitors who tried to settle in Japan. In 1540 the Portuguese visited the island of Kiu, and a small trade was opened; St. Francis Xavier followed with his new religion in 1550, and speaks highly of the people, "as the delight of his heart." Some twenty years later Nagasaki was made the emporium of trade with the Portuguese; and yet, though perhaps one of the most civilised of European nations at this date they were more anxious about success in their search after gain, than in introducing any real improvement. No doubt it would have been a difficult and even dangerous task, but was it even attempted? About 1600 the Dutch first appear on the Japanese waters; their rivalry with the Portuguese in commerce, and perhaps religion, was often the cause of violent animosity, which could not have well disposed the quiet Japanese to admire or imitate them. The Portuguese and Spanish missionaries converted with success many thousand natives; and then, fancying themselves stronger than they really were, tried to tamper with their laws and religion. This roused the priests, and awakened the Government to a sense of its danger. The Dutch Protestants magnified their crimes, and encouraged the Japanese in the idea that the Romanists were teaching sedition and heresy. Love could not have been their motive! but they succeeded so well that, in 1637, after numerous martyrs, natives and missionaries, had nobly fallen, an edict came forth, "that the Portuguese were banished for ever from Japan."

Did the Dutch, however, benefit themselves? No. They were despised even for their readiness to assist at the murders of the Christians. They have never enjoyed the same distinctions or privileges which the Portuguese enjoyed, but were often treated with contempt, if not ignominy and open disrespect. Thus the Japanese had hitherto little reason to bless the arrival of foreigners. The two foreign nations already admitted, were jealous of and at enmity with each other. Here then there was no good example to imitate, no good lesson to be learnt. One introduced a religion which caused ultimately the death of many of their countrymen, and was the cause of serious troubles. The other carried on a questionable commerce to the real mutual benefit of neither party. About this moment a third nation appeared in the waters of Japan. An Englishman, Captain Saris, brought an autograph letter from our King, James I.; he visited the capital, and concluded a favourable treaty with Japan, A.D. 1613. This was the first European visit to the capital. But India was too rich, and yielded nearer and surer gain; little by little our commerce ceased entirely, and when, in 1673, it was attempted to revive it, the proposals were rejected, thanks to our Dutch friends, who loved solitude like their hosts. In 1792 the English and Russians tried again, but without success, to open a trade with this people. In 1804 the same two nations again attempted to resume negotiations for a treaty—the same reply and repulse.

In 1811, 1812 1814, and 1822, successive endeavours were made by English and Russians to establish themselves. The Russian Commander Golowin was imprisoned, no progress made, but the name of the English was not advanced, nor did their cause gain ground. The *Phaeton*, in 1814, disgraced his Majesty's service, and caused the death, by suicide, of several high officers, whose honour had, in their nice judgment, been tarnished, and whose reputation had been disgraced by the wilful disobedience of her commander. Thus far, again, the Japanese had no great reason to love foreigners. The Russians, irritated at their failures, made reprisals on some unprotected fishing villages in Yezo. The English caused the death of the Governor of Nagasaki and some ten other officials. The Americans, in 1797, tried also in vain to demand free-trade—and when, in 1837, they re-appeared in the Bay of Yedo with the philanthropic intention of restoring some shipwrecked Japanese to their country, even then they were repulsed—nay, even fired at—so little desire had the Japanese hermits to be disturbed in their solitude or quiet. Two more attempts in 1844 and 1848 were made by the English, with still the same want of success. We evidently did not go the right way to work, or we were most cordially detested, for all our experiments ended in disappointment. (*To be continued.*)

Correspondence.

(To the Editor of *The London and China Telegraph.*)

SIR,—As piracy seems to be again increasing in the China seas, the following suggestions made in 1855, by a gentleman in Hong Kong, might, perhaps, not be out of place in your esteemed paper.—Yours truly,

London, March 1, 1861. HONG KONG.

(Extract from a letter, dated Hong Kong, December, 1855.)

"I now come to what I conceive to be the great point to be noticed

Digitized by Google

and it is one to which I have given much consideration. As it is piracy which obstructs the native trade which would otherwise centre in Hong Kong, and causes the dearness of provisions, I think our Government is bound to adopt some means for its suppression. My own conviction is that the only way to do so effectually would be to prohibit all Chinese vessels of whatever description (war junks excepted) from carrying fire-arms, powder or stink-pots—in this prohibition lorchas are to be included. To effect this it would be necessary to procure the consent and concurrence of the Portuguese and Chinese authorities to the measure—and after a certain given time any Chinese-built vessel or lorcha being found with fire-arms, powder, or stink-pots, should be considered as having them for an unlawful purpose, and should instantly be deprived of them, and the guns and ammunition destroyed; to do this effectually, and, at the same time, to protect the coast trade, Government should provide at least two small armed steamers to cruise up and down the coast, with competent persons on board capable of communicating with the people; and public notifications should be issued calling upon trading vessels to inform the cruisers of any vessels they may know of having fire-arms on board. If these measures were adopted by the Governments, and carried out with energy and efficiency, I am certain that piracy would seldom be heard of, and the prosperity of the colony be greatly promoted."

Naval and Military.

There is nothing to report, specially in connection with China or the East India Station. In the list of the stations of the British army and navy published in this impression will be found the regiments and vessels ordered home.

The 2nd Bn. 1st, the 1st Bn. 2nd, the 1st Bn. 3rd. and the 87th Regiments, which embarked at Hong Kong in the middle of December, are expected home early next month.

We have much pleasure in announcing that Colonel Urquhart, of the 1st Royals, whose distinguished services extend over a period of thirty years, has had the honour of C. B. conferred upon him.

Brigade Major Milward, of the R. A., has been appointed First Staff Officer of Woolwich Garrison, in recognition of his able conduct with his battery in China, vice Major Shaw, who vacates the post under the new regulation, which limits the term for holding that office to five years.

We took occasion in our last to advert to the Horse Guards' Circular of the 15th of February, which, we find, is still more prejudicial to officers' interests than we at first supposed, for it prevents any future purchasing of unattached promotions—certainly a harsh regulation on the part of the authorities, and one which will cause considerable annoyance in most military circles.

The Queen has been graciously pleased to give orders for the appointment of Major-General Sir Patrick Grant, K. C. B., of the Bengal Infantry, serving with the local rank of Lieut.-General in the East Indies, to be an Ordinary Member of the Military Division of the First Class, or Knights Grand Cross, of the Most Hon. Order of the Bath.

The Queen has given Lieut. Henry Huxham, R.N., commanding her Majesty's gunboat *Kestrel*, permission to wear the insignia of a Knight of the Imperial Order of the Legion of Honour, which the Emperor of the French has conferred on him for his services against pirates in the vicinity of Chusan, in the course of which he recaptured a junk belonging to the French Catholic mission at Ningpo, and was severely wounded.

It is rumoured that the hut barracks at Aldershot will not be used much longer, and it is probable they will be pulled down and replaced by more substantial structures. We are sure no one who has been doomed to spend a wet winter in these confined and dismal dwellings would regret their destruction, and that the general health and comfort of the troops would be greatly enhanced by the change.

The chartered troop-ship *Belvedere*, Capt. Atkinson, which arrived a Gravesend from the Cape of Good Hope with detachments of troops on board, disembarked her invalids for Chatham. The troops brought home belong to the Royal Engineers, Medical Staff Corps, 2nd (Queen's Royals), and 85th Regiment, numbering twenty-seven non-commissioned officers and men, together with a few women and children. The troops were generally healthy during the passage, and no death occurred on board.

In consequence of the suggestion of certain M. P.s that the evidence of Sir B. Walker was indispensable in the forthcoming investigation on Admiralty affairs, the steam-tender *Avon* was despatched to intercept the *Narcissus* (which sailed for the Cape on the 4th inst.), but returned without falling in with her.

The fitting of her Majesty's iron-clad steamship *Warrior* in the Victoria Docks is progressing rapidly. Steam was got up to try her engines, of 1,250-horse power, and Griffith's screw, weighing thirty-five tons, was afterwards applied. The *Warrior* has been put "stem on" at the end of the dock in which she has been receiving her engines, and their full force exerted for a considerable time. As was to be anticipated, from the extraordinary care with which they have been made, they worked with perfect smoothness and regularity. Messrs. John Penn and Son have taken exactly six weeks to remove from their factory in Greenwich, and erect on board the first of the new iron sides, these machines, which are the largest marine engines ever made, being of 1,250 nominal horse power, and able to work up to about 6,000 horses indicated.

A new disconnecting apparatus, on the principle of Capt Taylor, an officer commanding one of Mr. Green's East Indiamen, was yesterday received at Woolwich, to be submitted to a course of trials at full speed.

Second Captain and Brevet-Major G. A. Milman is appointed instructor at the school of gunnery, vice Taddy, resigned on account of ill health; Lieutenant the Hon. R. Dillon is appointed to the Horse Brigade, vice Ward, promoted; Lieut. the Hon. A. Stewart is appointed to the Horse Brigade, vice Burnaby promoted; Lt. W. G. Stirling is appointed to the riding establishment, vice the Hon. R. Dillon; Lieut. H. C. Lewes, 7th Brigade, is appointed to the Company of Gentlemen Cadets, vice Crawford, appointed assistant-instructor in plan drawing; Lieut. D. N. Allan, 10th Brigade, has been raised to increased pay, vice Ward; Lieut. H. Metcalfe 4th Brigade, has been raised to increased pay, vice Burnaby; Lieut. E. Marshall, 2nd Brigade, has been raised to increased pay, vice Ellis.

In consequence of the representations made by Colonel Harness, C.B., the newly-appointed director of the Royal Engineer establishment at Chatham, to the Duke of Cambridge, his Royal Highness has sanctioned a re-organisation of the sys em pursued at the Royal Engineer establishment, by which the non-commissioned officers and men of the Royal and Indian Engineers will in future be employed more on the operations connected with that department of the service, and will be in a great measure exempt from the drill and other duties performed by the soldier, making, in fact, the engineers more a scientific corps, and employing that body less in mere military duties. With this view an order has been promulgated at head-quarters, Brompton, defining the rules and regulations for the future guidance of the corps, as sanctioned by his Royal Highness the Commander-in-Chief.

The screw steam gunboat *Penguin*, 5, Lieut.-Commander M'Hardy, which left Plymouth Sound in order to join her consort, the screw steam-frigate *Narcissus*, 51, Capt. Risk, flag of Rear-Admiral Sir Baldwin Walker, experienced heavy weather. She shipped several seas and one of her bow ports was washed in, and it was determined to wear ship for Plymouth, where she arrived on the 7th inst.

The first batch of wind's signals was received at Woolwich. We have already described them.

A patent for the consumptiou of smoke on board steam vessels is now under investigation.

It is not true that Major Yelverton resigned his commission in the army. The subject is under the consideration of the Horse Guards.

Parliamentary Intelligence.

HOUSE OF COMMONS.

ARMSTRONG GUNS IN CHINA.—(Feb. 26.) Major GAVIN asked the Under-Secretary of State for War to place on the table the copy of the report made by the officers commanding the artillery as to the efficiency of the Armstrong guns in the recent operations in China.—Mr. T. G. BARING said, in reply, that the reports which had been received with reference to the Armstrong guns used in the recent operations against China were satisfactory. These reports, however, related to numerous points of detail. He would be happy to allow the honourable and gallant gentleman or any other honourable member to read the reports if they should be so inclined, but he thought it would not be advisable to lay those reports on the table. The House would be glad to hear one portion of the report of the Ordnance and Select Committee, to whom those reports were referred. They stated, "All defects have been corrected, or are in course of correction; not one which has been brought to light by the short campaign in China has been entirely new."

OUR POLICY IN CHINA.—(1.) Mr. WHITE asked the Secretary of State for Foreign Affairs whether he had received intelligence by the last China mail of the occupation of Woosung (in the port of Shanghae) by the rebels, and whether such occupation would induce her Majesty's Government to modify its policy, and cause it to carry out the principle of non-intervention as between the insurgents and the Imperial Government of China?—Lord J. RUSSELL said her Majesty's Government had received no authentic information by the last China mail of the occupation of Woosung by the rebels. The only letter received by the Government was from the Hon. Captain Foley, at Shanghae, and that contained no mention of the occupation of Woosung. With respect to the latter part of the hon. gentleman's question, whether her Majesty's Government would modify its policy for carrying out non-intervention between the insurgents and the imperialists in China, he could only say that the Government had never varied their policy of neutrality, and they had no intention of deviating from it.—(4.) Col. SYKES gave notice that he should postpone until the 12th inst. the motion in reference to China, which stood on the notice paper for the next night.

OUR RELATIONS WITH JAPAN.—(4.) Mr. WARNER asked the First Lord of the Treasury whether it was true that a considerable naval force had been directed to proceed to the Japanese waters; and whether precautions had been adopted to prevent any consul or civil authority from commencing a war with Japan without instructions from the Government?—Lord PALMERSTON said that he believed that part of the fleet which was in the Chinese waters had been sent to Japan, not, however, with any hostile purpose, but to secure that moral support to the British authorities which in the present state of affairs was thought necessary.

COLONIAL MILITARY EXPENDITURE.—(5.) Mr. A. MILLS moved for a select committee on Colonial Military Expenditure, to inquire and report whether any, and what alterations might be advantageously adopted in regard to the defence of the British dependencies, and the proportions of cost of such defence as now defrayed from Imperial and colonial funds respectively. He observed that the question was of considerable importance, since it involved the expenditure of £4,000,000 a-year, nine-tenths of which sum fell upon the taxation of this country. Our military stations, such as Malta Gibraltar, the Ionian Islands, Hong Kong, and dependencies of that class, would be excluded from the inquiry. They were ten in number, and the cost of our military expenditure in regard to them was about £1,500,000, while there were twenty-seven or twenty-eight colonies and dependencies that absorbed the remaining amount of £2,500,000.—The motion was seconded by Mr. MARSH.—Mr. C. FORTESCUE said that the question was not a fit one for inquiry by a committee.—Mr BAXTER, Lord R. CECIL, and Mr. ADDERLEY having supported the motion, Lord PALMERSTON said that although he could not anticipate any practical result from the appointment of this committee; nevertheless, if it appeared to the House that an inquiry was

Digitized by Google

desirable, he should not oppose the motion.—The motion was then agreed to.

JAPAN.—CASE OF MR. MOSS.—(7.) Lord J. RUSSELL, in answer to Mr. Wyld, stated that her Majesty's Government had not received any despatch from the Consul General at Jeddo, complaining of an alleged outrage upon an Englishman named Moss by the Japanese authorities. He had heard from an hon. friend that he had received letters on this subject, but he thought it desirable to avoid any premature discussion upon it.

CABLE BETWEEN MALTA AND ALEXANDRIA.—(7). In reply to Mr. Coningham, Mr. M. GIBSON said when the present Government came into office they found an order in existence which had been given by their predecessors to certain manufacturers to make a cable for the purpose of forming a telegraphic communication between England and Gibraltar. Messrs. Gisborne and Forde were appointed engineers to superintend we manufacture of the cable and to see it carried to its destination. Since that time the destination of the cable had been changed, and it was not to be laid down between Malta and Alexandria. The Government had, however, made no change in the engineering officers, who were still Messrs. Gisborne and Forde.

FORCES IN CHINA.—(11.) General PEEL asked the Under-Secretary for War what was the amount of force retained in China, of what troops it was composed, and if they were on Indian pay and allowances?—Mr. T. G. BARING replied that by the last returns from China the number of troops that remained there belonging to the Imperial army were—Artillery, 1,223; Engineers, 304; Military Train, 279; Infantry of the Line, 5,851; in all, 7,657. Of the India force there were 3,840, making a grand total of 11,497. In this return was included all the troops, whether at Canton, Tien-tsin, or elsewhere. The last despatch relating to the disposition of the troops received from China was dated Nov. 12, 1860. Great changes might have taken place since that time, as Mr. Bruce had received instructions from the Government to issue such orders from time to time as he might be able to give with respect to the withdrawal of any portion of the troops, either Imperial or Indian. When Imperial troops were on service with Indian troops they received Indian pay and allowances.

RED SEA TELEGRAPH BILL.—(11.) Upon the motion for going into committee. Mr. KINNAIRD expressed his regret at the course the Government had pursued. No one could reasonably doubt the validity of the contract.—Mr. AYRTON hoped the Chancellor of the Exchequer would be in his place when the Bill was read a third time, as the present position of affairs was not quite clear. The effect of the Bill would be to give to shareholders an annuity for forty-eight years at the rate of 4½ per cent. upon their capital, with something added for the expenses of the company. It was the duty of the Government to consider whether it would not be more for the benefit of the nation to repay the capital and take possession of the telegraph, worthless as it might be at the bottom of the sea.—Mr. WYLD did not consider the cable worthless; he understood that by the expenditure of £200,000 it was possible to restore the telegraph to working order.—Mr. CONINGHAM reprobated the conduct of the Government in evading responsibility by handing over this question to a committee.—After a few words from Sir H. WILLOUGHBY, Mr. F. PEEL said that the select committee had inserted in the present Bill a declaration that it was the intention of Government when giving the guarantee that it should take effect even though the line was not in working order. In every other respect the relations between the Government and the company would remain the same under this Bill as they had been before.—Mr. VANSITTART suggested that the company was of no use now, and that no expense should be incurred for directors.—Mr. DUNLOP added a few words of explanation in respect of the course taken with the Bill. The Bill then passed through committee.—(14.) On the motion for the third reading of this Bill, Mr. AYRTON asked the Chancellor of the Exchequer whether he contemplated paying these annuities, or closing the contract in a manner more beneficial to the public? The evidence disclosed great laxity in the manner in which the business had been transacted. The *ex officio* director seemed to have acted quite independently, without the sanction of any Treasury minute.—The CHANCELLOR of the EXCHEQUER deprecated any attempt to impute blame to the permanent officers of the Government. As this Bill was a ***restitutio in integrum*** of the original contract, of course all the powers originally reserved to the Government would remain in full force. Of course, it must not be presumed that they had a foregone conclusion as to the policy of continuing the annuity.—Sir S. NORTHCOTE said that the officer of the Treasury had acted throughout in communication with the political heads of the department.—The Bill was then read a third time and passed.

CHINA—THE TAEPING REBELLION.—(12). Colonel SYKES called attention to the papers relating to events at Shanghai, and made inquiries as to our future relations with the Tae-pings, or national party, in China. He moved an address for any further papers that may have been received relating to events at Shanghai, prefacing his motion by a long detailed narrative of the origin and progress of the Tae-ping insurrection and of the occurrences at Shanghai. At that city we had, Colonel SYKES said, collected the Customs revenue, and handed it over to he Tartar officers to be employed by the Chinese Government against our own army in their advance upon Peking, and consequently against the extension of commerce and Christianity. We had, moreover, demanded from the Chinese payment for the services rendered by our troops in the shedding of blood, a proceeding which left an almost indelible stain upon our honour. In an official letter addressed to the noble lord, it was stated that the profession of religious and patriotic motives on the part of the Tae-pings was merely a pretext to upset all authority, and that the chief was an ignorant fanatic, if not an impostor, the profession of Christianity being intended to conciliate the missionaries. He was not the advocate of the rebels, nevertheless he found that many of the doctrines of the Tae-pings were similar to those of the Church of England. As the House appeared to take little interest in the religious opinions of these people, perhaps it would take some interest in their earnestness to remain on good terms with us and to promote commerce. He found that the chief advocated the introduction of railroads, steamers, life and fire insurance. Various letters that had appeared in the newspapers bore testimony to the wish of the rebels, as they were called, to be upon good terms with us. The hon. member then read extracts from letters and reports of American missionaries, showing that the towns and districts in the possession of the rebels were not the desert wastes they had been described; and quoted the conditions of the treaty relating to the navigation of the Yang-tze-Kiang, contending that they must bring on collisions between the English traders and the Taepings, likely to lead to war. But could this country engage in a war with the party that held six of the finest provinces of China, and had three armies of 100,000 men each? Such must be the result, unless they came to an amicable understanding with the rebel party in China.—Lord JOHN RUSSELL found very great difficulty in replying to the remarks of the hon. and gallant gentleman, and was not able to conceive the object which he had in view. He could not at all see the advantage of going into a discussion of the religious doctrines of the rebels in China. When Mr. Bruce found that a place which was open to British trade was about to be made the scene of civil war, and that our commerce would receive a severe blow, he thought it his duty to make some representations on the subject. He went to the place where the rebellious army were assembled, and informed them that if they made an attack, it would be resisted. As to their religious opinions, whoever wanted information on that subject should read the account furnished by Mr. Holmes, an American Baptist missionary, who lived some time among them, and became entirely disgusted with them. Their doctrine is really a blasphemous parody on Christianity. They have added to the tenets of our faith an idolatrous religion of their own. Some among them claim to be the sons and brothers of Christ, and, governing according to their own cruel and profligate fashion, they call this Christianity. They were really idolaters, and no better than the Chinese idolaters. With regard to our policy, the only course is that of perfect neutrality, at the same time not allowing the towns where our merchants are congregated to be destroyed, simply because some persons in this country have a false notion that they are a national party, and that we ought to support them.—The motion was then withdrawn.

SUPPLY.—THE THIRD CHINA WAR.—(14.) General PEEL inquired of the Chancellor of the Exchequer what portion of the sum of £850,000, granted by Parliament at the beginning of last Session to cover the entire expenditure on account of the China war during the financial year 1859-60, had been appropriated to, or was reserved for, the liquidation of the claims of the Indian Government on account of advances made or expenses incurred in India? He observed that the Chancellor of the Exchequer then believed the vote referred to would cover all the charges. Remarking that with the exception of a battery of Armstrong guns, not a single man in that Chinese expedition went from this country, the whole of the army proceeding from India, he stated his belief that so long as there were votes of credit, so long as there were unsettled balances and open accounts with India, so long as the Treasury were able to apply money voted for one purpose to meet an excess of expenditure on another, so long would that House have no control whatever over the expenditure of the country.—The CHANCELLOR of the EXCHEQUER complained of the course taken by General Peel in his remarks upon the Estimates. He proceeded to reply in detail to the inquiry, reminding the House that last year, when we were called upon to make a heavy financial provision for the existing Chinese war, we were likewise obliged to pay up heavy arrears for a former Chinese war. At the present moment we were pretty well up with the Indian Government, and, indeed, he might go the length of saying that, including all that the Indian authorities had spent on behalf of the Chinese expedition, they owed us a good deal more money than we owed them. We were, therefore, out of pocket for the moment, but with a prospect of reimbursement. The separation of expenditure on the part of the War Department between the Chinese services and the ordinary services was not yet completed, and he should leave his hon. friend the Under Secretary to enter further into that matter.—Mr. DISRAELI made a few remarks in vindication of the course adopted by General Peel.

HER MAJESTY'S LEVEE.

The following gentlemen were presented to her Majesty on the 13th inst., in connection with China:—

Lieutenant-Colonel Travers, on return from China, and appointment as Assistant Adjutant-General Royal Marines, by the Duke of Somerset; Lieut. Chaplin, on promotion and return from China, by the Duke of Cambridge.

Major Lowe, on his return from China, by Col. Hon. James Lindsay, Captain H. R. Martin, on promotion and return from China, by Colonel Charles Bingham.

Major T. W. Milward, on appointment to the staff of the garrison at Woolwich and return from China, by Col. Charles Bingham.

Rev. E. Mooyvart, H.M.'s Chaplain at Point de Galle, by the Archbishop of Canterbury.

Col. Alex Murray, on return from India and China, by the Duke of Cambridge.

Major Van Straubenzee, on promotion and return from China, by Major-General Sir C. van Straubenzee; Colonel Sutton, on return from China, by the Adjutant-General.

London Gazettes.

The Queen has been graciously pleased to appoint Laurence Oliphant, Esq., to be Secretary to her Majesty's Legation in Japan.

The Queen has been graciously pleased to give orders for the appointment of M. Charles Guillaume Marie Appoline Antonine Cousin Montauban, General of Division, Commander-in-Chief of the French Land Forces in China, to be an Honorary Member of the Military Division of the Second Class, or Knights Commanders, of the Most Hon. Order of the Bath.

The Queen has been pleased to approve of Mr. Samuel Lilly as Consul-General at Calcutta for the United States of America.

The Queen has been pleased to appoint William Walter Raleigh Kerr, Esq., to be Colonial Treasurer; and Edward Everard Rushworth, Esq., to be Auditor-General for the Island of Mauritius.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Suggestions for the insertion of information required by our subscribers will have due attention and acknowledgment.

G. K.—We believe the report perfectly correct, but for obvious reasons we do not publish it.

R. G.—We will endeavour to procure the information.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., *via* Marseilles, to the Editor, Box No. 70, General Post-office, London, E.C., which has been opened specially for the same.

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

The London & China Telegraph.

LONDON, MONDAY, MARCH 18, 1861.

MR. MOSS'S TRIAL.

ARBITRARY SENTENCE ON A BRITISH SUBJECT IN JAPAN.

SINCE the following article, headed "JUSTICE VERSUS INJUSTICE IN JAPAN," was in type, we have received full particulars relative to the decision of Mr. Moss's case, that gave rise to the CONSULAR NOTIFICATION and which we thought it our duty to communicate to our subscribers by issuing an extra on the 13th inst. Had we been in possession of those particulars before we wrote, our view of the general question as to the rights possessed by the English residents in opposition to the unauthorised and illegal assumption of power on the part of the British authorities in Japan, would undoubtedly have found expression in far stronger and more condemnatory terms. For the present, however, we must confine ourselves to a few remarks upon Mr. Moss's trial and sentence, which we at once declare to be altogether most informal, most illegal, and most unjust. The whole affair reads as if the BRITISH CONSULS concerned did not owe allegiance to our crown and country, but obeyed the dictates of some unprincipled ministers of the EX-BOMBINO tyranny of Naples; and, certainly, if the proceedings, which are dignified by the name of a trial, had occurred a year ago in a Court of Injustice not far off from the dungeons of St. Elmo, or in a Papal Court of Inquisition, presided over by one of the tools of ANTONELLI, they could not well have been more flagrantly in contradiction, than they were, of all the principles of fair-play, truth, and justice. The Court by which Mr. Moss was tried was composed of CAPT. VYSE, the BRITISH CONSUL, and of three highly respectable English merchants at Kanagawa, MESSRS. A. J. MACPHERSON, J. B. ROSS, and E. CLARK. The proceedings occupied several days, and after what we cannot doubt was a patient investigation and impartial consideration of the whole case, the three English merchants deliberately, and in the fullest manner, acquitted Mr. Moss of the three charges which had been brought against him. CAPTAIN VYSE, however, took a different view of the case, considering Mr. Moss guilty, and, upon his own responsibility, adjudged him to be deported from the country, and to pay a fine of $1,000, about £250 sterling. Such, in a few words, is the gist of the matter, a full account of which will be found in another column. But now MR. CONSUL-GENERAL ALCOCK comes on the stage. The sentence was submitted to that official for his approval and confirmation, and from an *ex parte* statement, which we are warranted in characterising CAPTAIN VYSE'S report of the proceedings to be, he took upon himself to perform the functions both of judge and jury, and, without hearing the evidence, to add to the already severe and unjust sentence of fine and deportation, a further sentence of three months' imprisonment. It is impossible to conceive that such proceedings as these could have been the result of a calm and passionless consideration of the question. Much ill blood must have prevailed before such extraordinary decisions could have been arrived at. The atmosphere was not pure; the light, as BACON terms it, was not dry; all things must have borne an unnatural and distorted appearance. To us, they appear, at this distance, clear and distinct enough.

For example, who will not, on perusing the account of these matters, at once ask himself why the three English merchants were appointed to sit on the Court with CAPTAIN VYSE, if their opinions and verdict were to have no weight in the decision of the case? To set their verdict aside, in the manner in which CAPTAIN VYSE did, was simply to cast a most unmerited and injurious imputation upon the fidelity, veracity, and honour of those gentlemen, who, before they officially sat on that Court, must have taken upon themselves a solemn obligation to do justice in the matter that was brought before them. If the CONSUL was resolutely bent upon making a victim of MR. MOSS, as appears to have been the prevailing belief before the trial commenced—if such a course had, from the first, been determined upon—why did not CAPTAIN VYSE try MR. MOSS himself, without resorting to a sham impartiality, and deliberately adding the deepest injury to the grossest injustice, whereby he has unnecessarily added to the already numerous causes of complaint which the English residents justly urge both against himself and MR. ALCOCK? As regards the extraordinarily illegal conduct of this latter officer, in adding imprisonment to the severe sentence passed on MR. MOSS, we care not to characterise it as it deserves; but would not the English public open their eyes if, after a man had been sentenced at the Bow-street Police-office to pay a fine of five pounds, the LORD CHIEF JUSTICE were to add to the sentence penal servitude for three years? Yet this is precisely analogous to MR. CONSUL-GENERAL ALCOCK'S conduct.

We may confidently assert that this is not the last which we shall hear of these extraordinary proceedings, which, if permitted to pass unnoticed by the Government, would seriously imperil the honour and safety of British residents abroad, where they should be able to reside with as little fear of injustice being done to them as in their own country. The question at issue is one of the utmost importance. If the Japanese are allowed to kidnap an Englishman in the brutal manner they did Mr. Moss, and their victim subsequently receive, at the hands of his PROTECTOR, a further punishment, we may expect to see the Life Insurance Offices charging 20 per cent. on risks in Japan, and the Japanese become so overbearing, that it will be practically the means of stopping all the trade promised by the new Treaty, and we shall become as degraded as the Dutch were, confined to the Island of Decima. We cannot but believe that it would be exceedingly difficult for honest and impartial people to express too emphatically the surprise and indignation which they must feel regarding such arbitrary proceedings on the part of our CONSULS in Japan—proceedings which we feel quite certain will meet from the people of this country with a condemnation as unqualified, as it will be prompt, hearty, and just.

JUSTICE *VERSUS* INJUSTICE IN JAPAN.

THE ancients considered the *summum bonum* of existence was best attained by skilfully steering a middle course between the extreme joys and sorrows of life, and he who most steadily kept in the narrow but tranquil path, without being attracted by the SCYLLA of delight on the one hand, or deluded on the other by the CHARYBDIS of despair, was deemed the happiest of mortals. Those old saws and yet older legends, so full of wisdom and figurative truth, can still teach mankind, in more ways than may be generally apparent, the most useful lessons regarding the conduct of life. Amongst other things they impress upon us the wisdom of impartiality—that jewelled rule of prudence—so highly extolled, yet individually so often left unpractised. As a nation, it is true, we are noted for the possession of that quality. The spirit of compromise, to which we owe so much of the glory of our constitution, and our internal peace and prosperity, is its first and most favoured offspring. Without its deliberate influence, the surest ballast of the vessel of State, we should have been often tossed about from one dangerous rocky shore to another in extremest peril, if indeed we should not, like so many others, have been long ago utterly cast away. Is it not therefore strange that we should so often signally fail individually in that for which nationally we are so much distinguished? To assure ourselves of this fact, we have but to look abroad to our colonies and dependencies, and study the actions of those there placed in authority. The Englishman so situated, surrounded by peculiar circumstances, and scared by the idea lest he should forfeit his much prized impartial character, straightway becomes grossly partial. As a matter of course, to be deemed thoroughly just, he will always take part against his countrymen, and when remonstrated with for doing so unjustly, will infallibly point, with a sense of injured innocence, and a strange obliquity of moral vision, to that very fact as his strongest argument that

Digitized by Google

his conduct is basely calumniated. Is it at all likely that a man would condemn his own countrymen willingly? It is manifestly too absurd to suppose such a thing; and therefore when the case is considered in England, the public, with the national impartiality by which it is characterised, but without sufficient insight into all the details and circumstances connected with the question, will gravely shake its head, confess that much is to be said on both sides, and, finally, at the risk of subsequent disaster, will give the benefit of its doubt to what it charitably supposes to be the weaker party. Thus Englishmen abroad are, by the national impartiality, too often pushed unmeritedly to the wall.

A case in point (which we trust will not be decided after the fashion indicated above) has just occurred in JAPAN, it having arisen, as our readers are probably aware, in consequence of the late arrest of Mr. Moss by Japanese officials. We think we made it clearly apparent in our last issue that the two-sworded gentry were upon that occasion entirely in the wrong, and that they unjustifiably and treacherously took Mr. Moss prisoner, and cruelly ill-treated him. But the BRITISH CONSUL on the spot, with the usual desire of acting, we suppose, a strictly impartial part, will not allow that such is the case; nay, more, he considers the Japanese to be injured people, and Mr. Moss and his fellow-countrymen grievous wrongdoers, who, by their intemperate proceedings, are effectually calling down upon themselves the wrath of the TYCOON and all his officers. CAPTAIN VYSE in his notification says all this, and even something more, in such a tone and manner, too, that we are in no way surprised that it has elicited from the British merchants of Kanagawa, to whom it was addressed, such a crushing reply. The points at issue are of such vital importance that, if we thought them any way doubtful, we should certainly entertain no small degree of anxiety regarding their decision. In the first place, CAPTAIN VYSE has laid it down, as an incontrovertible maxim, that "the manifest law of Japan is as binding upon foreigners as Japanese." But not so, happily, says her Majesty's order in council of the 23rd of January, 1860, by which it is prescribed that no act of a British subject in Japan shall be deemed punishable, unless, if done in England, it would be held punishable by our laws. Such is our policy not only in Japan, but in China, in the Levant, in Africa—in fact, in all countries in which, from the nature of their governments, justice to Englishmen resident in them could not reasonably be expected from the native authorities. Let any of our countrymen, whose notions of justice are naturally associated with Westminster-hall, honestly put it to themselves how they would like to be tried by a copper-faced semi-barbarian, according to a code founded on principles diametrically opposed to all their preconceived ideas of law and justice, and most probably run the risk, even though innocent, of being summarily condemned by prejudice and hatred? Yet this is what CAPTAIN VYSE (query CONSUL ALCOCK'S own notification, and signed only by CAPTAIN VYSE) wishes to subject Englishmen to in Japan, just as the civilians of India, though always careful to exclude themselves from the same fate, have long been desirous of seeing their countrymen tried for their lives in the corrupt and perjured courts presided over by Hindoos and Mahomedans. If the law is good enough for the native, is it not equally good for the Englishman? But to show that what is in this case sauce for the *goose* is not equally sauce for the gander, CAPTAIN VYSE'S remonstrants very pertinently point out that it is contrary to the law of Japan to ride. And shall Englishmen be tried as criminals for indulging in an exercise for which they are famous all over the world, and which in Japan, as in all other eastern countries, is absolutely necessary for the comfort and health of Europeans? We trust this is the last we shall hear of Englishmen being threatened by Japanese law—a threat which could have proceeded only from a misconception, such as it is difficult to account for, on the part of CAPTAIN VYSE, otherwise than by referring it to a certain idiosyncrasy from which the sons of Mars are not always exempt.

But the British Consul is not at all staggered by the consideration of the extreme to which his self-constituted edict must infallibly lead him. If Englishmen in Japan are to be subject to Japanese law they must, as a necessary corollary, be likewise subject to arrest by Japanese officials; and CAPTAIN VYSE does not hesitate to say that, if a British subject "resists a Japanese "officer, who seeks to arrest him for any offence against the "Japanese laws, he is guilty of a serious offence, and becomes "responsible for any evil consequences that may attend his resistance. and that it will avail no one to plead that he did "not know the persons arresting him to be in the lawful "execution of their office." This is impartiality with a vengeance. The subjects of the TYCOON are liable to arbitrary arrest for every conceivable and inconceivable offence; and, therefore, Englishmen must be so likewise. Such an edict, if fully carried out to its legitimate results, would have the effect of converting British subjects in Japan into the slaves of the TYCOON. They could be arrested for no offence whatever; and according to CAPTAIN VYSE, if they resisted such arrest, would be subject to punishment for having committed a serious offence. But the condition of the country is such that it is a most difficult matter to discriminate between the officers of justice, so called, and hired assassins. All go armed; and it is quite possible that Englishmen might be arrested (as they have been before) for a treacherous and bloodthirsty purpose of revenge, and carried away bound and helpless, if they paid any regard to CAPTAIN VYSE'S notification, and did not resolutely make use in their personal defence of those advantages which their superior civilisation has bestowed upon them. We, therefore, unhesitatingly endorse the statement of the British merchants of Kanagawa, that no British subject should be liable to arrest in Japan, unless under a warrant from a British authority; and we cannot but unreservedly condemn the indiscreet—if, indeed, we may not characterise it as the ignorant and reckless—intervention in this matter of CAPTAIN VYSE. The Treaty is most explicit. Englishmen in Japan are to be tried, for offences of every kind, by British authorities, in accordance with British law; and we cannot but confess that it is to us inconceivable that a British officer, in the position of CAPTAIN VYSE, could possibly have acted as he has done, and yet be fitted to hold the very important and responsible post which he at present occupies.

The question as to the right of Englishmen in Japan to carry arms is also deserving of a few words. That country is not the safest one in the world where a man may reside. The inhabitants are noted for their cunning, treachery, and cruelty, and their ideas of the inviolability of personal liberty, and of the sanctity of human life, are not of such a nature as to create confidence amongst strangers dwelling in their midst. Defenceless and inoffensive people have been assassinated in broad daylight repeatedly, and it is impossible to know when such red-handed acts of revenge may not be perpetrated by the hired instruments of those in authority, who are known to be inflamed with hatred and to entertain the most hostile feelings against us. When it is further added that the Japanese officials, who form no inconsiderable portion of the population, and most even of the lower classes go about armed, what can we think of Capt. VYSE having prohibited British subjects, under the penalties of fine and imprisonment, from carrying arms in self-defence? There is "no apparent danger to justify the practice," says the CONSUL, though he admits that foreigners may receive "provocations," and be even sometimes "assailed" by the Japanese. To carry arms in self-defence, when every Japanese one meets with is provided with a weapon, is calculated, he says, to provoke a "hostile feeling and distrust among the natives." Ride unarmed into a city teeming with armed men, and trust to Providence! How can English officials be so timidly absurd? Not in Japan only, but elsewhere the case is the same. The Indian Rebellion had hardly been suppressed when an Arms Act was passed prohibiting Englishmen from carrying arms. It was necessary to disarm the natives, and therefore to be impartial, Englishmen must be disarmed too. Lord CANNING, however, was somewhat fairer than Captain VYSE, seeing that the former disarmed both parties, while the latter disarms only his own countrymen, thus leaving the natives more powerful for mischief than ever. But from which party is danger to be apprehended? Is it expected that two or three will assail thousands, or that thousands will exterminate the two or three? Lord CANNING soon saw the error of his ways, and immediately afterwards called upon Englishmen in India to form Rifle Corps; and we trust, if Captain VYSE is to remain where he is, that he has before this seen the necessity of allowing his own countrymen to protect themselves from danger while the Japanese are armed to the teeth, and retain their present character of a faithless, cruel, and revengeful people. By a reference to our Parliamentary intelligence it will be seen that although intelligence reached us of this affair nearly a month since, the Government has not yet received advices on the subject from Consul-General Alcock. This is individual responsibility carried to extremes.

THE REBELLION IN CHINA.

WE are not surprised to find that some notice has been taken of our articles on the Chinese rebellion in the journals published in China itself. The *Hong Kong Register* and every other journalist has a perfect right to form an opinion on any public question, and to give expression to that opinion, and we cannot expect that our views should pass uncriticised. But the question of the great rebellion in China is not a question which may be decided by the indifferent observer, or by a mere observer of events which are to influence our commercial prosperity or non-prosperity in the East. Nor can the *dicta* of any mere visitors to the rebel camp be taken for more than they are worth in forming our estimate of the rebellion itself. It is not a question of the treatment of individuals even, as the *Overland Register* seems to think, when it accuses Mr. Holmes of being an "ungrateful guest;" as if the hospitality which he experienced at the rebel head-quarters had anything whatever to do with Mr. Holmes's statements of what he saw, or his opinion of the character of the rebellion as a whole, excepting that their good offices would have led him to write in their favour, if truth had not been at stake. A poor, benighted traveller, who had chanced upon a den of thieves, might be hospitably entertained on the spoil they had abstracted from the last richer wayfarer on the same route, but that would not prevent an honest man from describing the character of the place and people he had seen. We are sorry, therefore, to see Mr. Holmes thus spoken of, while Mr. John's account is held up to admiration. His statements we think prove almost as forcibly as those of Mr. Holmes the unsatisfactory nature of the religious views and tenets of the insurgents. One extract from Mr. John's narrative, which is given by the *Overland Register*, proves just nothing in their favour. It runs thus:—*Idolatry, and the use of tobacco, opium, and ardent spirits* are forbidden, and yet he says "*not a few*—which, we suppose, means nearly all—*smoke opium*." The same critic of Mr. Holmes attempts to apologise for the rebel notions and creed by calling it the "dawning of truth," and "Asiatic imagination," in opposition to the "fuller development" and the "cold European reason." These are terms which we confess we can only partially comprehend in this connection. We imagine that the argument (if, indeed, it might be so called) would resolve itself into a *petitio principii* fallacy. The assumption is that the dawnings of truth are there, and that the rebel leaders are really anxious to gather up the fragments of truth which they may meet with, and develope them into an harmonious whole; and that we may allow Asiatic imaginations to wander in theological subjects without danger to the sacred cause of truth itself. Why, almost every error that has ever afflicted the Church of God has arisen from some overheated brain and fervid fancy, while the very gift of a chastened reason has been set aside for what appeared to be the sublimer revelations of the phantasy. We deny the premises—the dawnings of truth are not among the rebels, but from the truth they have constructed a system of error based on their own wild imaginings and suited to their own purposes—viz., the subjugation of the empire and the overthrow of the Tartar rule.

The testimony of the Rev. Griffith John confirms us in our opinion and judgment. The following remarks taken from his diary will explain our meaning:—"With most of the days' conversation I felt disappointed and grieved. Both the chief and the officer have doubtless a great deal of religion among them, still it is very plain that the power of the former is to a considerable extent built on a delusion. By means of this pretended mission of the Eastern and Western Kings, as well as of his own, he has acquired a magical influence over the minds of the kings, officers, and soldiers. Now they see clearly that the preaching of the Word of God would soon break the spell, and they dread the consequences in the present crisis of their history. The King Kan (sometimes called Kan-wang or 'Shield King,') would rather sacrifice the cause of truth to the interests of the Hung family, than the reverse. In many points he is actuated by temporary expediency rather than by Christian principles."

The Kan-wang, the most promising and most enlightened of the leaders, from whom the missionaries of Shanghai appear to have expected much, has been drawn into the vortex of heresy, which is promulgated by the Chang-wang; and having yielded to the question of polygamy he finds that he must give up other points of his faith to boot. In another part of the same narrative we find the celestial King exercising his judgment on a paper he happened to have read about ancient heresy, and deciding that the ancient heretics were right, who denied the equality of Jesus Christ and God, and that the moderns who it assert are wrong. To agree, therefore, with these Rationalistic Fanatics (if we be allowed the use of apparently so contradictory a designation for them), we shall have to give up some of the fundamental elements of our faith; and while we shall be called upon to believe in their strange visions and direct intercourse with heaven, and to countenance their propensities for plunder and rapine, we shall be under the necessity of subscribing to a creed made up of the fragments of ancient heresy explained by the light of the Chinese mind. On the one side we have to listen to their lying wonders and blasphemous assumptions, while on the other we hear the proud but ignorant Oriental reasoning on points of doctrine, embracing ideas long since exploded and refuted over and over again. The intentions of the rebel leaders may be very pure, and they may really care so little about their own forms of teaching as to permit missionaries to enter in and to dwell among them. This will have its advantages, and will further the cause of truth, but so long as the Bible is shut out, and these delusions about God and themselves has possession of their minds, we cannot hope to see many converts from among them. As regards our interference with them this will depend upon the amount of impediment which they may place in the way of our trade. The proper course we conceive will be to open up the Yang-tze-kiang in spite of them.

We are glad to see that the views of our Foreign Minister agree in the main with this. The ports on the Yang-tse-Kiang are to be opened for trade, and in those ports our merchants will congregate, and although Lord John Russell declares it to be the intention of our policy to be that of "perfect neutrality," at the same time we shall "not allow the towns where our "merchants are congregated to be destroyed, because some people "in this country have a false notion that the rebels are a national "party, and that we ought to support them." Our military and naval authorities in China will doubtless act towards the rebels, should they oppose our trade, in much the same way as they would treat any fleet of pirates they might happen to fall in with on the sea-board. Colonel Sykes's motion (which will be found under the head of Parliamentary Intelligence), has made the best of their cause, but he was fully answered by Lord John Russell, and this will, we hope, give peace to the minds of many misguided persons, who imagine that we are persecuting these Chinese religionists.

These latter are aware of our power, and they will be slow to act against us. Let us, therefore, keep on the defensive, and go about our business quietly. If the rebels constitute a government and foster trade, her Majesty's Government will surely have no scruples about entering into a convention which might be reciprocally advantageous to both the parties concerned in it. The great tea and silk districts are now in the possession of the insurgents, and unless they are overawed by the presence of troops or vessels of war from the first, or are in such a position of power as to warrant a convention which would advance the interests of both parties, our trade will flag for some time, and an immense loss will accrue both to native and foreign merchants in the north of China. It is our opinion that, with a small amount of encouragement from foreign governments, the whole of the six provinces now under their control would be laid open at once to the enterprise of the West. What we should like to see is the permanent settlement of the towns and villages which they have sacked, and the acknowledgment of the Tai-ping rule. In this event greater confidence would be inspired in their cause, and the preaching of the word of God among them would, we think, be likely to produce good fruits in due season.

The *New York Herald* on the subject says:—There never was a wider field open for missionary efforts than is now to be found in China. There never, perhaps, was a people more ready for embracing the doctrines of Christianity than the numerous insurgents who have enlisted under the banner of Tae-Ping-Wang, the self-styled rebel Emperor, whose head-quarters are in the old capital of the Ming dynasty—Nanking—a city of such importance that it bears the same relation to Peking—the Chinese metropolis—that Moscow does to St. Petersburg.

It is interesting to trace the rise and progress of this modern revolution in the person of its leader, who, born in 1813, was, a few years ago, a poor schoolteacher in a rice province near Canton. In a country like China, where the manners and customs of the people may almost be said to be stereotyped, and the son is rarely permitted to rise above the social rank of the father, it is extraordinary that Tae-Ping Wang, whose original name appears to have been Phuh but afterwards changed to several others, should have so far succeeded in his assumption of the reins

Digitized by Google

of power as to accumulate an army of men, numbering tens of thousands, by which he captured numerous towns and cities, and among them the city where he is now domiciled, and over which he exercises supreme control. We are told that he became entranced for forty days, and imagined himself carried up to heaven, where he had visions of his future mission, and became inspired to the performance of his appointed task. This, however, is as wild a legend as any of those current among the Hindoos or Mahomedans. But the followers of Tae-Ping believe it, and, as it is the real basis of the religion they profess, it possesses some importance.

Acting upon the instructions supposed to have been given him in heaven, Tae-Ping-Wang, with a sword in one hand and the seal of Christ in the other, went forth like one mad. But he assured the people that he was not mad, and urged them, with tears in his eyes, to join him in the service of the "Old Man above," at the same time telling them that by worshipping their idols they were in fellowship with Satan, and that the "Father" had commanded that all men should turn and follow him, paying him tribute and reverence as Emperor of China. This modest statement convinced those around him that his was a confirmed case of frenzy. He still continued his school, and rapidly acquired the reputation of being a ranting, raving teacher. At length, after converting three of his neighbours by means of some religious tracts that he had discovered, and which probably had their source in the workings of the Jesuit missionaries in China for the previous three centuries, he set out as a preacher, intent upon the regeneration of China. Gradually new converts flocked to him, although his own destitute condition was not calculated to attract the multitude; for during the first year of his proselytising tour he and his followers subsisted chiefly upon wild fruit, alms, and a modicum of looting. From the year 1844 the number of converts was largely on the increase. They resolved themselves into armed bands, praying, preaching, plundering, and, if necessary, fighting, wherever they went.

It is one of the favorite maxims of the rebel Emperor, that as the Tartars captured China by force, he and his followers have a perfect right to do exactly the same thing if they can, and he sums up his argument by saying, "There is, therefore, no difference between us who levy contributions on the towns and villages we have taken and the officials sent from Peking to collect the taxes." Although the Tae-Pings entirely prohibit the use of opium and tobacco among themselves, they have shown their moral elasticity by offering to sustain the English opium trade with the unconverted inhabitants of China, with a view, of course, to secure the friendship of the British nation; and it would be hard to name anything they would not do provided it tended to the advancement of their worldly interests. We have said there is a wide field for the exercise of missionary labour in China; but we are disposed to believe that the fruits of that labour will be reaped by the Romish, and not by the Protestant Church. The Roman Catholic religion, with its forms and ceremonies, appeals strongly to the imagination of the people of the East, whereas that of the Protestants is cold and uncalculated to draw forth their sympathies sufficiently to their becoming converts. And although the religion of the Tae-Pings may be considered half Christian, it will, we think, only be developed and perfected under the benevolent auspices of the Church of Rome. In the success of Xavier and his fellow missionaries in the sixteenth century in Japan, when Catholicism gained so great a hold upon the popular mind, we have an instance of the subtle and potent influence of the Romish faith over the Orientals; and the day may come when the entire East will bow to its fascination, and the seat of the Papacy will be no longer in the Vatican, or even Italy, but in some portion of the far Orient. We anticipate great results from the spread of this revolution in China. It will, as long as it exists, be a safety valve and a protection to the Western Powers in their relations with the empire under the Tartar dynasty, and it will eventually either overrun all China, or lead to many concessions in behalf of liberty, free-trade and free institutions on the part of the Government at Peking.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, March 6.

An underhand current is plainly perceptible, though the real promoters keep out of view, and the results of their intrigues are all that is seen. I have again to report another Ministerial crisis, the possible effect of which may be of the greatest importance. Last week Baron F. A. van Hall, the Prime Minister and Minister of Finance, tendered his resignation to the King, who was pleased to accept it. Mr. Lotsy, the Naval Minister, is charged with the current business of the finance department till the definitive appointment of a new Chancellor of the Exchequer. In the mean time the resignation of Baron van Hall has led to the breaking up of the whole Cabinet, and the formation of a more liberal one is now going on, under the auspices of Mynheer Thorbecke, the well-known political writer, and formerly himself in the Cabinet, from which, however, he retired shortly after the accession of the present King, on account of his uncompromising liberal tendencies, which embroiled him with the Ultramontane party.

In consequence of the mildness of the weather, the work of repairing the broken dykes, and otherwise removing all traces of the late calamitous inundations, is progressing as favourably as could be expected; but there is still a large tract of country under water, and it will require a long time to restore the *status quo ante*. The King, accompanied by the Prince of Orange, went to the scene of the disaster to inform himself by ocular demonstration of the extent of the damage, which so much exceeded his expectations, and he was so completely appalled by the scenes of horror and distress that everywhere met his view, that he lost no time in publishing a Proclamation, ordering a general subscription from house to house throughout the Kingdom for the benefit of the sufferers, and put down his own name at the head of the list for the munificent sum of 40,000 florins, which appeal was not made in vain, and a large sum of money, besides gifts of clothes, flour, and other necessities, have been subscribed. This trait of good feeling on the part of the King, and his sympathy with the distress and misery of his subjects, made a deep impression on the mind of the public generally, and the Second Chamber of the States-General, as a mark of their strong sense on the subject, not only voted unanimously an address of humble thanks to his Majesty, but passed a resolution to wait on him with it, not by a deputation, but by the whole House *in corpore*, which was accordingly done the next day. On receiving the address the King was visibly affected, and after thanking the Second Chamber for their expressions of loyalty, he made use of these memorable words:—"As long as I live, the dreadful scenes of distress and misery which I have lately witnessed will never be effaced from my memory; and I may add, gentlemen, that I shall never forget the sense of pleasure I feel at the present moment in the agreeable task of thanking you for your loyal address."

A despatch has been received at the Colonial Office from Mynheer I. H. Donker Curtis, the Dutch Commissioner for Japan and Siam, announcing that the Commercial Treaty between the Netherlands and Siam was signed at Bangkok on the 17th of December last. He further states that his reception by the two Kings was of the most flattering and cordial description, and that both of them had expressed themselves as animated with the most friendly intentions and perfect respect towards Holland, and delighted to give their subjects an opportunity of entering into mercantile relations with the Dutch. The stipulations of the Treaty are said to be extremely favourable, and are nearly similar to those obtained by other European States who have succeeded in concluding a convention with the Kingdom of Siam. The Commissioner adds that he was on the point of returning to Holland himself with the original treaty, for the purpose of obtaining the needful ratification by the King and the States General, after which it will be published.

In commemoration of the King's birthday, when he attained the age of forty-four years, a large promotion in the army and navy has taken place, as well as a considerable distribution of orders to officers of the naval, civil, and military services. Amongst the newly-decorated civilians of note may be mentioned Mr. J. S. Lotsy, Minister of Marine, who has received the Grand Cross of the Netherlands Lion, whilst the Ministers, J. Bosscha and J. A. Mutsaers, as well as Mr. J. A. Philipse (President of the First Chomber), and Mr. G. J. van Reenen (President of the Lower Chamber of the States General) are decorated with the Grand Cross of the Crown of Oak.

The Colonial Minister has given notice that in accordance with the Royal Decrees of 26th November, 1845, and 15th June, 1850, five appointments as military apothecaries will be given this year to students who shall pass the necessary examination, and receive certificates of qualification from Professor Mulder of the University of Utrecht. Four of the above appointments are for Netherlands India, and one for the West India Colonies.

By the last overland mail a despatch was received at the Finance Department, announcing the arrival at Java of another box containing 208 letters, being part of the mail from Holland to Netherlands India lost in the harbour of Galle by the unfortunate wreck of the steamer *Malabar*, but since recovered by Mr. Heincke's divers, and transmitted to their destination by the authorities at Ceylon.

Six private bills have been presented to the Second Chamber of the States General for the naturalisation of the following gentlemen: Mr. J. A. Thomas, of Batavia; Mr. S. A. Thomas, of Sourabaya; Mr. M. Carapiet-Macartich, of Batavia; Mr. P. J. F. Boumin, of Lamarang; Mr. J. A. Durand, of Sourabaya; and Mr. A. F. Praatje, of Tjoraal, in the Residency of Tagal.

The *Staats Courant* announces officially that the Governor General of Netherlands India is authorised to sell by public auction this year at Java one hundred thousand piculs of sugar belonging to the Government. The sale of one-half the above quantity will take place in September, and that of the other half in December next.

A letter from Harderwyk states that the first detachment of supplementary troops of this season embarked for India on the 3rd inst. at Nieuwe Deep on board the *Hercules*, Capt. J. Detering, for Batavia. The detachment is under the command of Capt. G. L. van Vught, of the E. I. Infantry, returning to duty from furlough, accompanied by First Lieutenant A. van Winsheym, and the Second Lieutenants, P. J. van Loo, W. C. Goteling-Vinnis, and M. A. Du Croo, all of the E. I. infantry.

Three native Malays, who came to this country some time ago as sailors and were condemned to death for piracy, have had their sentence commuted by the Royal prerogative of clemency, and been sent under due surveillance to Nieuwe Deep, where they were also embarked for Java by the *Hercules*.

Another detachment of 150 men, under the command of Capt. F. O. Weber, of the E. I. Artillery, returning to India on expiration of his leave of absence, is under orders to embark on the 10th inst. at Rotterdam, on board the chartered ship *Rotterdam*, Capt. H. Poort, for Java. The following officers belonging to the detachment go out also in the above-named vessel :—Second Lieutenants J. W. Hoynck van Papendrecht, and S. D. Kramers, of the E. I. Infantry, as well as Second Lieutenants A. J. Willemse, A. M. Kryger, J. C. Baron van Hoerdt. J. A. Broerse van Groeneweg and D. J. Schafer, of the E. I. Artillery, H. G. Luykens, of the Engineers, Quartermaster A. A. Rip, and the medical officers of the third class, H. J. van der Weide, and H. H. Dieperink, of the Indian Service.

The Netherlands Trading Company have given notice that their usual spring sale of Java sugar will take place in this city on the 21st of March, and consist of 71,165 bags and kranjangs in the warehouses at Amsterdam, Rotterdam, Middelburg, and Schiedam. Subjoined is a list of the quantities of Java sugar brought forward for sale at the Company's spring auctions during the last twelve years :—

THE *Epoca* declares that it is not true, as stated by some Paris journals, that in the projected expedition against Cochin China, the Spaniards will take no part : their troops will, on the contrary, co-operate with the French.

WE understand that preliminary steps are being taken to form a Company for the purpose of running steamers on the Yang-tze-Kiang, and that Capt. Morice, lately in the employ of Messrs. Dent and Co., in China, is engaged in the undertaking.

THE steamers building for the China trade are numerous. We hear of one building by Laird, of Birkenhead, for Messrs. Jardine, Matheson, and Co. Two on the Clyde, for Messrs. Apcar and Co., one nearly ready to be launched for Messrs. Lane, Harper, and others, and another laid down for the same parties. One for Messrs. Lyall, Still, and Co. is shortly to be laid down, and three are said to be ordered at the yard of Messrs. Mare and Co., Blackwall. From America the *Fire Dart* and *Hankow* have already sailed for Hong Kong.

WE have made inquiries in reference to the announcement made in the *Bengal Hurkaru*, of the death of Capt. Brooke *ne* Johnston, the representative of Sir James Brooke at Sarawak, and find that letters have been received here from that gentleman up to the 23rd January, and as the communication from Sarawak to Calcutta is *via* Singapore, any later intelligence would have come at the same time by the mail for England. The report, therefore, must be in error.

MR. CHARLES WINCHESTER, late Vice Consul at Whampoa, is, we understand, to succeed Mr. C. Pemberton Hodgson as Consul at Hakodadi, Japan.

WE regret to notice the death of Lionel Gisborne, Esq., from disease of the heart. Our readers will remember that his firm —Messrs. Gisborne and Forde—has been extensively engaged as the Civil Engineers for Government and the Red Sea Company, and are at present employed in the intended submarine line between Alexandria and Malta. We noticed in our last the departure of Mr. Forde to superintend the management of laying this cable.

COCHIN CHINA.—The Paris papers notice a telegraphic despatch in anticipation of the Indian Mail, to the effect that the Annamite army having been beaten by the French before Saigon, had quitted the Gia-den-Bhù, and were in full retreat on Hué, the capital of the empire. Another account, received by way of Trieste, fixes the date of victory as the 1st of January, and states that the French took two forts, and killed 600 of the enemy.

FOREIGN POLICY OF THE JAPANESE.—In a late report of Dr. Macgowan's lectures on Japan, we find the following explanation of the policy of that country towards foreigners. In their reported refusal to negotiate a treaty with Prussia, and in the expulsion from Nagasaki of a Swedish vessel, as soon as she anchored, we see an augury of peaceful intercourse with the Japanese. To appreciate aright these and analogous proceedings in that country, we must look to China, whence the astute Japanese draw deductions for guidance in their foreign policy In that country they perceive a Government which, like their own, has been compelled to abdicate sovereignty; that is, to relinquish the right of trying foreign offenders. The consequence of this extra-territoriality is, that foreign visitors who violate the laws of China, generally go unpunished. With the exception of the protection afforded by the British Consular system, the Chinese have no suitable compensation for their renunciation of a natural right. Other states have a most inadequate Consular system, or none at all, hence the most flagrant outrages are often committed with impunity. In their attempts to avert such a state of things from their land, the Japanese are entitled to our sympathy and support. Unless a country will go to the expense of guaranteeing the observance of law on the part of its citizens, it ought not to claim privileges for them in such a country as Japan.

JOHN WALTER HULME.—The late John Walter Hulme, Esq., Chief Justice at Hong Kong, was the son of a highly respectable solicitor. He entered as a student of the Middle Temple in 1820, and became a pupil of the late Joseph Chitty, Esq., the barrister. He married his daughter, by whom he had three children, two sons and a daughter, who survive him. He edited some well known works, amongst others are "Chitty on Bills," and "Chitty's Statutes." In 1844 he received the appointment as Chief Justice of the Court of Hong Kong. In 1847 he was compelled to proceed to England to seek justice from the hands of the home authorities, when he received addresses from the members of the special jury, the residents generally, and solicitors (barristers then with the exception of the Attorney-General, seem to have been unknown in the colony), all expressing their deepest sympathy and respects He returned to Hong Kong in the steamer *Braganza* on the 16th June, 1848. Although of a strong constitution, and having for a long time resisted the advice of his medical attendant, he was compelled to proceed again to England on sick leave in April, 1854, when, as before, he was presented with addresses from the committee and the members of the legal profession, which now numbered, with the Attorney-General, two barristers and five solicitors, an indication that the colony was progressing. On his return he found that his health was shattered, and finally was compelled to return again to England on account of ill health, in 1858 with a view of obtaining a retiring pension. which we regret he enjoyed only for a short time. Mr. Hulme was a most honorable man, beloved by all who knew him, esteemed for his true English character as a gentleman, and admired for the upright, impartial, and patient discharge of his public duties. His decisions met with almost universal approbation, and in the few cases appealed against, we belive his decisions have been supported by the higher tribunal to which they were referred. He died at Brighton on the 1st inst.

CHINA.—GENERAL ORDER.—The Queen having been graciously pleased to command that a medal, similar to that granted by her Majesty in 1842, shall be conferred upon all the officers and soldiers of her Majesty's Army and Indian Forces employed in the operations in China which resulted in the capture of the city of Pekin; and that clasps inscribed "Canton, 1857," "Taku Forts, 1860." and "Pekin, 1860," be granted to such of her Majesty's forces as may have been engaged in those services; And, further, that an additional clasp, inscribed "China, 1842," shall be granted to such of her Majesty's forces as may have received the medal granted in commemoration of the former operations, and who have also been engaged in the war recently terminated; his Royal Highness the General Commanding-in-Chief desires that this mark of her Majesty's gracious approbation of the services of that portion of her forces employed under Major-Gen. Sir Charles T. Van Straubenzee, K.C.B., and Lieut.-Gen. Sir James Hope Grant, G.C.B., in 1857 and 1860 respectively, shall be published in the General Orders of the Army. The general officer commanding the forces in China has been instructed to furnish nominal lists of the officers, non-commissioned officers, and men entitled to receive the honourable distinction which it is her Majesty's gracious intention to bestow upon them.

A NEW CHINESE LAKE.—The Russian journals have recently been filled with an account of an extensive lake, called Nor-Nuissan, lately discovered to the south of the Altai Mountains, in Chinese Droungaria. It is said to be 138 kilometres (⅛ of a mile each) in length, and from 15 to 20 in breadth. It is frozen from September to May, but is so full of fish that a great number of Russians, with the consent of the Chinese authorities, have established fisheries on its banks, being on the best terms with the natives.

CAPTAIN BRABAZON.—A correspondent states that our Government, struck by some inconsistencies in the dates and circumstances put forward by the Chinese authorities, have offered the Chinese Government a large sum of money (£20,000) for the production of Captain Brabazon alive.

MR. LOCH, late ecretary to Lord Elgin in China, is mentioned as the probable successor to the Marquis of Stafford, in Sutherlandshire.

THE *Cairngorm*, formerly employed in the China trade, has just made the passage home from Sydney in seventy-three days.

SIR JOHN BOWRING, we are informed, has partially recovered from the severe attack of paralysis with which he was seized some days since. He is, however, not yet able to leave Rome for this country.

THE CHINA WAR.

OFFICIAL DESPATCHES ON AFFAIRS IN CHINA.

MR. BRUCE TO LORD J. RUSSELL.

Tien-tsin, December 2, 1860.

I have the honour to transmit copy of a correspondence between myself and his Imperial Highness Prince Kung, on the opening of the two ports of Han-kau and Kiu-kiang in the Yang-tze to foreign trade.

My letter was drawn up in consultation with the Earl of Elgin. Under the Treaty of Tien-tsin we had technically no right to insist on the immediate opening of the river, but the capture of Soo-chow by the insurgents, and the bearing of this incident and of the progress of the rebellion particularly on the import trade, rendered it most desirable to find an uninterrupted channel of communication with the Western Provinces of China. At the same time the opportunity was afforded of placing it under such regulations as will, I trust, confine trade to legitimate articles of commerce, and ensure to the Chinese Government a revenue which otherwise hey have little chance of obtaining.

I entertain the hope that this step may prove of great advantage to the industrious part of the population, by restoring life and animation to the provinces which have languished since the use of this magnificent highway has been denied to them. It is difficult to calculate what strength the revival of commerce may give to the orderly and respectable Chinese who have suffered so long from the ruthless and blind ferocity which has characterised the proceedings of both parties in this protracted civil contest. Increased wealth and industry will create a stronger desire for tranquillity and order; and whichever of the two parties is wise enough to enlist this feeling in its favour will have made a great step towards securing its ascendancy in the country. Moreover, whatever be the political mutations and divisions of China in future, it is of the highest importance that the Government recognised exclusively by foreign Powers should have given us an indisputed right to push our navigation into its very centre. The Earl of Elgin has undertaken to concert with Mr. Lay, at Shanghai, the measures in detail necessary to give effect to this privilege.

INCLOSURE.—MR. BRUCE TO THE PRINCE OF KUNG.

Tien tsin, Nov. 21, 1860.

The undersigned, her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary, &c., &c., has the honour to acquaint his Imperial Highness the Prince of Kung that, in accordance with the provisions of the Treaty of 1858, he is about to station consular officers at the following ports:—New-chwang in Tung-tien-fu, Tien-tsin in Chih-li, Tang-chau in Shantung, Ching-kiang in Kiang-su, Tai-wau (Formosa) in Fuh-kien, and Kiung-chau (Hainan) in Kwang-tung.

The undersigned has to request his Imperial Highness will instruct the Governors general and Governors of the jurisdictions above enumerated to give such directions to the local authorities of the ports in question as will ensure the consular officers a proper reception upon their arrival, and facilitate the opening of the ports to the British trade.

With reference to the Yang-tze-Kiang, up which river British vessels are, by Article X. of the Treaty of 1858, authorised to trade, the undersigned regards it as expedient that for the present but two ports should be opened; namely, Han-kau and Kiu-kiang; and in order to the prevention of abuses in the present disturbed state of the river, he would propose that the trade with these be carried on under the following regulations:—All duties leviable under the new Tariff upon import or export cargoes on board British vessels proceeding up or down the river, will be payable at Shanghae or Ching-kiang-fu, and the Customs authorities will take such steps as seem to them necessary for the enforcement of this rule.

Every British vessel proceeding up or down the river shall be permitted to carry for her protection such an amount of arms and ammunition as shall appear to the Chinese Customs to be reasonable, and this amount of arms and ammunition shall be entered in a certificate to be called the "Arms' Certificate," which shall be delivered by the Customs to any master of a British vessel applying for it. Any vessel trafficking in arms or ammunition, or carrying an amount of either in excess of that specified in her arms' certificate, shall be liable to have her cargo confiscated, and to be prohibited from farther trading on the river. The undersigned will be obliged to his Imperial Highness to issue the necessary instructions to the high authorities of Kiang-si and Hu-peh.

(Signed) FREDERICK W. A. BRUCE.

SECOND INCLOSURE.—THE PRINCE OF KUNG TO MR. BRUCE.

The Prince of Kung, Imperial Commissioner, makes a communication in reply. His Imperial Highness received yesterday (or recently) his Excellency the British Minister's despatch of the 9th of the 10th moon (21st November). He has acquainted himself with its contents, and it will, of course, be his duty to make all arrangements in conformity with the Treaty.

His Excellency states that it is his intention, as British vessels are by Article X (of the Treaty of 1858), authorised to trade up the Great River, in the first instance to open the two ports of Han-kau and Kiu-kiang under certain regulations which he details. Duties leviable upon the cargoes of British vessels ascending or descending the river are to be paid under the new tariff either at Shanghai or at Chin-kiang; the Customs authorities taking such steps as may insure observance of this rule. Upon this the Prince would remark, that whether the passage up and down the Long River be open or not, it is not in his power to divine, as there is still war in the Southern provinces. If his Excellency is resolved to station consuls at different places along it, such a step being in entire accordance with the Treaty, the Prince is in reason bound to take such action as shall in every respect correspond with that taken by his Excellency the British Minister, to whom he must leave it to manage matters as upon consideration he shall find it expedient (1).

As to what course it may be found most advisable to pursue in regard to the regulations under which duty on import and export cargoes will have to be collected at the ports of Kiu-kiang, Chin kiang, and Han-kau, the Prince trusts that his Excellency will deliberate upon the new regulations and all the conditions essential to the collection of duties with the Customs authorities at Shanghai, as these are easily within his reach, and arrive with them at whatever decision is fair to both parties; which done the Shanghai Customs can give notice with all speed to those of the ports of Kiu-kiang, Chin-kiang, and Han-kau, so that these may make satisfactory arrangements. If, however, after the new regulations shall have come into play, it shall appear that there is a falling off in the revenue, it will of course be right that, notice having been given of such deficits as they present themselves, by the Superintendents of Customs to the Imperial Commissioners, the two Governments should consult together, and decide on the adoption of whatever measures they shall find calculated, consistent with principle and with the circumstances, to convert this deficiency into increase: that they should with equal fairness on the part of either towards the other, pursue such a course as may be expected most to advantage the Customs revenue.

The further proposal in the letter under acknowledgment, that British vessels should give notice to the Customs of the arms and ammunition required for their safety, and should apply for a certificate before they enter the river (*lit.* port), being liable if they carry any in excess of the amount certified, to have their cargo confiscated, and to be sent out of port, and refused further permission to trade, is ample evidence of his Excellency's forethought and complete preparation for all contingencies; this course of procedure is most fair and equitable. The Prince is writing, as the letter under acknowledgment requests, to the high authorities of Hu-peh and Kiang-si; he will also explain the arrangements made to the Imperial Commissioners (2) in charge of the commerce of the different ports, in order that they may duly consider what course will be most secure (what will most satisfactorily protect revenue) and pursue it.—A necessary communication addressed to his Excellency the Honourable F. W. A. Bruce, C.B. Hien-fung, 10th year, 10th moon, 13th day. (Received November 27, 1860.)

NOTES.

(1.) The Prince means that his Government is not to be held responsible should we come to harm by ascending the river.

(2.) The Governor-General of Two Kiang is still Imperial Commissioner for the Superintendence of Trade; the Governor-General of Hukwang is an Imperial Commissioner of War.

(Signed) T. F. WADE, Interpreter.

THE EARL OF ELGIN TO LORD JOHN RUSSELL.

Shanghae, December 6, 1860.

I am now engaged in considering with the officers of the Imperial Customs in this place, and with some of the leading merchants, the conditions under which it may be practical and expedient to open up the Yang tze river at once to trade. The right to navigate it beyond Chin-kiang-fu does not in strictness arise under the Treaty of Tien-tsin until the civil war, which now rages on its banks, shall have been suppressed. The Prince of Kung has, however, as your lordship will perceive from the correspondence of which a copy is herewith inclosed,* met in a liberal spirit Mr. Bruce's proposal to anticipate that period by a provisional arrangement. If a legitimate trade can be established on this river I believe that great advantage will accrue from it both to the people of China and to the foreigners who engage in it; more especially at present when the communication between the producing districts and the ports on the seaboard are obstructed by the rebellion.

It will go some way towards affording to the inhabitants of the interior a market and security, which are all that a Chinaman requires to render him one of the most valuable of customers. But very different consequences will, I fear, ensue from this measure if smugglers and filibusters, under the protection of terror and exterritoriality, are enabled to avail themselves of this channel of communication to introduce foreign arms and recruits into the disturbed districts, and thereby to extend and perpetuate the reign of anarchy which threatens to convert one of the most fertile regions of the earth and its industrious population into a wilderness haunted by a band of ruffians.

Irregular profits on consignments of guns and gunpowder will be dearly purchased if they are obtained by processes which will dry up the sources of the production in the tea and silk-growing provinces of China. Your lordship can well understand the anxiety which I feel to frame such regulations for the trade on the Yang-tze as shall keep in some check, if they do not altogether prevent, this great mischief.

ROYAL GEOGRAPHICAL SOCIETY.

Account of Four Excursions in the Japanese Island of Jesso. By Pemberton Hodgson, Esq., F.R.G.S., H.M.'s Consul at Hakodadi.

Mr. Pemberton Hodgson and his party made four journeys in the Island of Jesso, during the months of June, July, and August, last year. These journeys were principally along the coast in various directions, but on the last he ascended the great volcano, about 4,000 feet high. The country passed was described as exceedingly rich and beautiful, abounding in forest and flowers; chesnut, oak, pine, beech, elm, cherry, sycamore, magnolia, roses, honeysuckle, convallarias, orchids, vines, clematis, and numerous others, as yet unknown varieties. They were received everywhere with the greatest attention and civility during the excursions. He visited, likewise, the celebrated mines of lead and iron. Jesso he believed to be inhabited along the coast only; the interior being full of bears and other animals, the forests containing "all the woods necessary for the fleets of any country." The natives of this island, consisting principally of the "Amos," a servile race conquered by the Japanese, and amounting to about 80,000 souls, appear to live chiefly upon fish and vegetables. Large quantities of sea-weed and Bêche de Mer are collected. Quail, pigeon, partridge, woodcock, and snipe abound. Gold was also found. Mr. Hodgson concludes by giving his opinion that "Jesso is not known, even to the natives; it is still a nut, of which, with the exception of the shell, they are entirely ignorant."

The Chairman, in returning the thanks of the Society to Mr. Pemberton Hodgson, adduced this as an instance of the great utility of the ociety, without which this interesting and instructive paper, relating to a country never explored by an Englishman before, and pointing out new channels of commerce, would probably have been lost to the public.

* See Inclosures 1 and 2 in No. 1.

Mr. Lawrence Oliphant, F.R.G.S.—who is about to proceed to Yedo as Secretary of Legation—hoped to be able to send to the Society any information he might collect. By the conditions of the treaty the right of travelling into the interior was confined to the members of the mission at Jeddo. He alluded to the wrecks on the coast in the vicinity of Yesso, and thought it a reflection upon us that we should know so little respecting it; and referring to the favourable disposition of the Japanese towards the Europeans, remarked that he was quite sure it rested with the English merchants there so far to conciliate the ruling classes, as to render the task of conducting our relations with that country every day more easy.

Sir Frederick Nicolson, R.N., F.R.G.S., had visited Hakodadi, and had found the survey most accurate. He corroborated the statements with regard to the kindness evinced by the natives, and agreed with Mr. Hodgson in comparing the country to Switzerland, citing many points of similarity. With respect to the importance of Hakodadi as a port, he stated that there were vegetables in abundance, including potatoes. He thought that generally the Japanese ports would be of the greatest possible advantage to our ships in the Chinese seas. Referring to the change in the boundary of Russia, which included a net of magnificent harbours, he thought that it was of great importance that we should have harbours also.

Mr. P. Hodgson said that Hakodadi was one of the largest ports in Japan. The exports chiefly consisted of fish for the Chinese market. The mineral productions of the country were sulphur and lead. There was also a good deal of tea. While he was there several Russian men-of-war had visited that place. Mr. Hodgson had travelled in the country, accompanied by his wife, and eulogised the behaviour of the inhabitants.

The Rev. Mr. Wylie said he might be wrong, but his opinion was that the Japanese were inferior both physically and mentally to the Chinese. They were accomplished in the art of deception, but he must observe that there was a great deal to be said in their favour. They were very energetic, and desirous of improving their position. He remarked that now that the country had been thrown open, if we did not make allowances for their ideas and habits, we should inevitably get into trouble. A great many Japanese are well acquainted with the Dutch language, and they now evince an earnest desire to understand English, not only for the sake of commerce, but also in order to be enabled to read the books published in Europe, an evidence of which they had in the fact that Dr. Hobson's anatomical works had been largely distributed in Japan. The tea trade was still increasing, and there was an immense store of mineral productions.

Travels in Siam. By Sir R. H. Schomburgk, Cor. F.R.G.S., H.M.'s Consul at Bankok, which was read by Mr. F. Galton.

Sir Robert, accompanied by an interpreter and two nephews of the King of Siam, started from Bankok in December 1859, visited Aguthia, the old capital, thence ascended the Menam and reached Lahaing, the most southern of the Lao States, on the 23rd of January. Continuing the journey on elephants, the river being too low to admit of his doing so in boats, he reached, after a journey of eleven days, Lakong, and proceeded onwards to Lampun and Zimay, the largest city of the Lao States. Leaving this and following the River Pingfoo, he struck across the great mountains which divide Siam from her Majesty's Burmah and Tenasserim possessions. Sir Robert concludes his communication by fearing "that this is his last exploring expedition. He is now in his fifty-seventh year, and suffered so intensely from rheumatism during his last journey as to have need of the assistance of two persons when walking."

Mr. Crawfurd, F.R.G.S., after having made some remarks upon the nature of the country through which Sir Robert had passed, alluded to the belief which the natives have, that the white elephant contains the soul of a being on his way to heaven. He also informed the meeting that the exports had increased half a million, and the imports the same amount, and hat the best fruit grew in that country.

Literature.

A Seaman's Narrative of his Adventures during a Captivity among Chinese Pirates on the Coast of Cochin China, and afterwards during a Journey on Foot across that Country. By EDWARD BROWN, of Amoy. Charles Westerton, St. George's-place, Hyde Park-corner.

Mr. Edward Brown has played some strange freaks with the English language, but he has nevertheless produced a most interesting book. It fell to his lot, as he tells us, to be "hard up" on the beach at Hong Kong in October, 1856; and, as he disapproved of the system of flogging in her Majesty's navy, he sought and obtained the not very enviable post of a police-constable, in what he is pleased to term that "inhospitable colony." We are not surprised that Mr. Brown soon grew weary of capturing Chinese delinquents and tying them together "by their tails," or that in defiance of the warnings of his superintendent he should have been willing to take the command of a registered lorcha "bound for Wai-how, on the west coast." He invested his spare cash in opium, and with an inoffensive, but excessively stupid, Chinese crew, set sail on the 18th of February, 1857. After a narrow escape of becoming a wreck, the lorcha was chased and ultimately captured by a *fleet* of seven large "Canton-built vessels," which Mr. Brown rightly judged to be pirates. They were, indeed, in a dangerous neighbourhood "off the coast of Cochin China, and in sight of the pirate-haunted Cape 'Verela.'" Our hero was treated with more courtesy than his Chinese crew, and was even honoured by Ching Ah'ling, the pirate chief, with an invitation to dinner. The fact was that he had worked the guns of the lorcha with such effect during the chase that the chief thought his services would be worth more than his carcase. He was, therefore, posted as gunner to the "second tymung," and for some time he laboured with laudable (?) zeal to teach the pirates the art of gunnery. Mr. Brown's conscience interfered, however, with his promotion, and he was glad to make his escape to the coast of Cochin China. The narrative which follows of his detention during eighteen months in that country, with the incidental sketches of the manners and customs of the people, will be found full of interest. The detention on the part of the authorities was alleged to be, and probably was, to ensure Mr. Brown's safety; and he records, as his deliberate opinion, that "the Cochinese gen erally are a kind and liberal people, much superior in every respect to their neighbours, the Chinese."

Having said thus much in commendation of the book under our notice, we are bound to add that its literary merits are of the very lowest order. We are aware that a finished style of composition is scarcely to be expected in a "Seaman's Narrative;" but we submit to the publisher (who is himself a gentleman of taste and talent) that, in the event of another edition being called for, some of the coarseness should be expunged, and a few, at least, of the blunders rectified. We would rather not read in print of a man keeping *his weather eye open*, or of his being on his *beam ends*, or that he makes attempts which are *no go*. And there are other vulgarities worse than these which we are compelled to refrain from quoting. Moreover, the writer does not always say what he evidently means to say. Why, for example, when he dresses in a new suit of clothes, does he tell us that he feels comfortable *by the transition?* It is saying no little for the interest of the book when we affirm that, in spite of elegancies such as these, it will be found well worthy perusal.

The Straits Calendar and Directory for 1861. Singapore: S. Bateman and Son.

This is a useful publication, but it might be greatly improved, with advantage, at least for European reference, by the addition of some statistical and descriptive information respecting the trade, shipping, and products of the settlements. It comprises, firstly, a list of all the principal inhabitants of the three settlements, their occupations or possessions, and residences of the Government *employés*. The other contents are lists of the consuls and consular agents, of whom there are 19—10 life insurance agents; 9 fire insurance ditto; 41 marine insurance ditto; 3 London bank agencies.

In province Wellesley there are 11 sugar estates and 1 tapioca estate. There is now a District Grand Lodge of Freemasons for the Eastern Archipelago, established by patent from the Earl of Zetland, dated 4th of March, 1858. at Singapore, the R. W. W. H. Read being Provincial Grand Master. There are two English lodges and a chapter.

The *Wooghly* steamer belongs to the Straits, and the gunboat *Singapore*. There are 2 gunboats, employed by the Marine Police, at Singapore, with 2 tindals and 20 peons. The land police force consists of 3 inspectors, 2 sergeants, 1 subadar, 2 jemadars, 11 havildars, and 34 duffadars, with 326 peons of different classes. There are 134 vessels registered at Singapore, 15 of which are above 500 tons.

The periodical press of the Straits numbers 2 daily papers at Singapore, 1 bi-weekly, 3 weekly, 2 bi-monthly, 3 monthly, and 2 annual directories. At Penang—2 weekly. The "Straits Calendar and Directory" is remarkably well printed for an Eastern publication.

TRADE OF THE FAR EAST.

We have given a notice in previous issues of the commerce of some of the principal ports and countries of the East coming within the sphere of the trade supervision of our journal, and we now follow up those details with notices of the trade of China generally, and Manila. The details are given in our Export Supplement to the present issue.

The exports from all the China ports for the half-year ending Dec. 1860, have been

TO GREAT BRITAIN.

Aniseed and cassia oils, 436 boxes; camphor, 69 piculs; canes, 693 milles; cassia, 1,230 piculs; cocoons, 691 piculs; galangal, 670 piculs; Japan wax, 232 piculs; matting, 3,786 rolls; nankeens, 2,000 piculs; rhubarb, 206 piculs; silk piece goods, 97 cases; waste silk, 269 piculs; soy, 671 packages; sugar, 7,070 piculs; sweetmeats, 4,587 boxes. Tea, 54,157,521 lbs.; silk, 54,718 bales.

Digitized by Google

TO THE CONTINENT.

Tea, 1,112,500 lbs.; silk, 5,019 bales; canes, 20 mils; Cassia, 1,680 piculs; buds, 15 boxes; rice, 11,000 piculs; silk piece goods, 26 cases; sugar, 6,000 piculs; sweetmeats, 2,000 piculs; vermillion, 30 boxes.

TO THE UNITED STATES.

Aniseed, 20 boxes; cassia, &c., oils, 600 boxes; camphor, 200 piculs; cassia, 6,887 piculs; China ware, 51 boxes; crape shawls and scarfs, 74,625 pieces; fans, 5,558 boxes; fire crackers, 170,281 boxes; Japan ware, 40 boxes; levantines, 875 pieces; matting, 26,592 rolls; pongees, 23,805; rhubarb, 147 piculs; sapanwood, 350 piculs; sarsnet, 2,628 pieces; sewing silk, 2 piculs; silk handkerchiefs, 350 pieces; split rattans, 820 piculs; sugar, 40,650 piculs; straw braid, 52 boxes; sweetmeats, 9,600 boxes; vermillion, 114 boxes; wool, 630 piculs. Tea, 18,893,890 lbs.; silk, 1,474 piculs.

TO AUSTRALIA.

Chinese sundries, 27,807 packages; matting, 1,150 rolls; tea, oil, and cocoa nut oil, 7,635 piculs; prepared opium, 167,600 lbs.; sugar, 650 piculs; tea, 7,855,290 lbs.

TO SAN FRANCISCO.

Chinese sundries, 22,496; fire crackers, 5,572 boxes; matting, 1,100 rolls; cocoa nut oil, 2,960 piculs; prepared opium, 352,930 lbs.; rice, 59,333 piculs; sugar, 8,916 piculs; tea, 19,728 packages.

TRADE OF MANILA.

Monetary and Commercial.

It is now very generally believed that the late Indian loan of Three Millions was not for the purpose of railways, but for expenses incurred by the Indian Government for the China expedition, and in order to save an immediate application to Parliament for the outlay. The Chancellor of the Exchequer operated through his colleague the Indian Minister.

A petition to Parliament has been prepared against the double Income-tax on Indian securities, the claim to which, although abandoned in one form, is liable to be raised in another. It will be presented by Mr. Crawford, and lies for signature at the Oriental Bank and the Agra and United Service Bank.

At the Court of Bankruptcy judgment has been delivered in the case of Streatfeild, Laurence, and Co. The Court ordered that the certificate of Laurence should be refused, that that of Mortimore should be suspended for one year, and that of Schrader for two years.

It is understood that Messrs. Dent, Palmer, and Co., the contractors for the Turkish Loan of 1858, are adopting all the steps in their power, by protest and otherwise, to prevent any future breach of agreement by the Turkish Government as regards the mode of collecting and remitting the funds specially hypothecated for the dividends on that stock.

The bar silver brought by the Mexican steamer has been disposed of at 59¼d. per ounce. Business to some extent has, however, been effected at 61d.

The Red Sea and India Telegraph Company, the committee have agreed to introduce a clause into the Bill declaring the unconditional nature of the Government guarantee, so as to leave no opportunity of question as to its validity by any future Government.

The Board of Trade returns for the month of January show a falling off of £1,021,796 in the declared value of our exportations compared with the corresponding month of last year. This, however, is believed to be principally attributable to the severe frost, the effects of which were temporarily manifested in a like degree on the railway traffic of the United Kingdom. The chief items showing a decrease are cotton and wollen yarns —articles of less importance than those involving more extensive manufacturing labour. In the shipments of the higher descriptions both of cotton and woollen goods there has been an augmentation.

The quantity of the cotton goods supplied to China and Hong Kong in the month was—31,320,356 yards, against 27,269,222 yards, in January, 1860. To Java there has been a smaller shipment, 5,146,028 yards, against 7,519,332; to the Phillipine Islands 9,019,498 yards were shipped, none having been shipped in the corresponding period of the two previous years; to the Straits Settlements the shipments were 4,403,795 yards; the shipments of cotton yarn were to China and Hong Kong but 361,620 yards, against 1,933,162 lbs.; to Singapore, &c., 914,625 lbs. Of lead the shipments to China were 285 tons, against 400 tons; in woollen goods the exports have been 11,604 pieces, against 8,230 pieces; and of worsted stuffs 7,992 pieces, against 16,056 in January, 1860.

The amount of bullion by the steamer of the 4th inst. was: to Ceylon, gold, £3,700; Madras, gold, £2,371; silver, £9,900; Calcutta, gold, £1,190; silver, £105,400; Singapore, £485; Hong Kong, £30,123; Foo-chow-Foo, £845; Shanghai, £13,403, all in silver.

ARTICLES OF IMPORT.

TEA.—There has been some inquiry for low and fair common Congous for export at a slight improvement on the prices quoted last month, whilst the last few days there has also been a moderate demand for good common, which is now quoted at 1s. to 1s. 0½d. per lb. Fair to good Sinchune Kai kinds show a decline of ½d. to 1d. per lb.; fair Kaisow kinds, under 1s. 7d. per lb., have been in over-supply, and are difficult of sale at lower ates. In Ho-How and Ning-Chow kinds there is but little alteration to notice, the quantity on offer being moderate. Good and fine Moning and Wopaks have met with a steady demand at about former prices. Good and fine Kaisows may be quoted at ½d. to 1d. per lb. dearer. Tayshans have been offered freely; the lower qualities have been taken for export: fair to good descriptions have been saleable for home consumption, the prices being moderate relatively with black-leaf Congous. Souchongs have not been readily saleable; but there is no material alteration to notice in prices. Oolongs of common to medium qualities are heavy of sale, fine have been better supported. Flowery pekoes are without inquiry, and prices must be considered altogether nominal. Scented teas have been again freely offered, and common capers sold at rather lower prices; a few good and fine are still in moderate request. Orange pekoes remain much as last month, difficult of sale, except in small quantities. In Foo-Chow kinds of orange pekoe sales made show a reduction of about 1d. to 2d. per lb. Capers remaining much as before. Some parcels of Japanese Oolong have found buyers, but at lower prices. In green teas there has been a fair amount of business, both at public auction "without

Digitized by Google

reserve" and also privately. The supply on the market at one time has been considerable, but consisting chiefly of Japan kinds and Ping Sueys, the former of which are not popular with the trade, owing to the *face* being too bright, and they are only saleable at low rates, quality considered. The few Taiping, Fychow, and Moyune kinds still on offer have been saleable at full prices for the two former kinds, and at former prices for the latter. Ping Sueys have in some cases sold rather lower for the finer descriptions, those up to 2s. per lb. commanding full rates. Canton gunpowders of fair to good quality have been saleable, but the low descriptions are neglected. The stock on the 1st of March on all descriptions of black was, in London, 52,362,310 lbs., and 5,717,380 of green. The total delivery was 11,823,443 lbs. of black, and 1,695,830 lbs. of green. The stock at Liverpool was 2,349,911 lbs. of black, and 58,786 lbs. of green. The total delivery was 1,151,849 lbs. of black, and 109,433 lbs. of green. The imports in London to the 1st of March have been 17,416,577 lbs. of black, and 1,273,945 lbs. of green; and at Liverpool, 1,380,720 lbs. of black, and 121,635 lbs. of green.

SILK.—The silk market is in a most unsatisfactory condition—large stocks with a very limited quantity of the better classes, and a very limited demand for manufactured goods. All was going well during the first fortnight of February, but the advance in the rate of interest checked the demand for silk, and from that moment we have had no regular business—for a week all waited for the public sales but, these concluded without any result, we have had a continual repetition of forced sales at continually drooping prices. In China Silk the arrivals have been very large, fully 14,000 bales—these have now all been opened and afford, what it was difficult to believe, scarcely any of the better classes, and much that is lower than almost any that came forward last year, for which low prices only will find a vent. In Japan Silk about 500 bales were sold at the public sales, but nothing has since been done except an occasional forced sale. Consumers are very reluctant buyers of this silk—as in China silk the proportion of good is very limited, and the "breaks" of all classes are so small as to cause great trouble. Chinese thrown silk continues to be completely neglected.

SUGAR.—The market has lost the improvement lately shown. Of 2,137 bags of China, about one-half sold at 35s. to 36s. for low yellow; 700 baskets of Java, at 35s. to 36s. 3d.; 3,093 bags of Penang sold at, for middling to fine brown, 33s. to 35s. 6d.; low and mid. yellow, 36s to 38s. 6d.; good mid., 39s. 6d. to 41s.; 4,000 bags of clayed Manila, sold at 34s. to 34s. 6d.

COFFEE.—Prices are fairly maintained. Of Ceylon only 67 casks, 81 barrels and bags plantation have been brought to auction, which went at previous rates; middling to good middling, 70s. to 72s. 6d. Native has been in only moderate request, and no sales of consequence have taken place; 200 bags (pickings), at public sale, realised 35s. to 41s. 6d.

RICE.—The market has remained in a languid condition, and where transactions have resulted, they have been at easier prices. Very little is reported privately beyond some sales previously effected on cheaper terms, viz., of Bassein and Rangoon 10s. to 10s. 3d., and a small parcel of Ballam at 10s. 3d. 12,480 bags old weevily Moulmein, brought to auction, were disposed of afterwards at 9s. 3d. to 9s. 6d., which is also moderate.

PEPPER must be reported on the whole rather lower. Only 963 bags Penang brought to auction, and sold at 3⅞d. to 3⅞d. per lb. ordinary to fair. Moderate business in Penang upon similar terms, and in Singapore at 3¾d.

SAGO.—No public sales have been held, and privately transactions have been trifling. FLOUR.—Dull, and of 327 bags offered at auction one-third only found buyers at 15s. 6d. per cwt. for middling quality repacked. TAPIOCA.—49 bags of Penang, fine white, were partly taken at auction at 5½d.

SPICES.—Cinnamon: transactions small, and no change in quotations. Cassia Lignea: Of 142 chests at auction about one-fourth sold at 90s. to 91s. for fair first pile. Cassia Buds: Prices have advanced, but no sales are reported. Cloves small sales at previous rates. Mace has had a slight change for the better; and 53 cases Penang and 3 cases Singapore brought to auction chiefly sold at 1s. 4s. to 1s. 5d. per lb. for middling palish, and 8d. to 1s. 2d. for low dark to very good reddish. Nutmegs: some little increase of demand visible; and of 279 cases Penang at auction, the greater portion sold at 3s. 6d. to 3s. 9d. per lb. for fine bold, and 1s. to 1s. 11d. for ordinary small and shrivelled to fine medium.

HEMP.—Market dull, and of 2,200 bales offered, a few lots sold at £23 to £23. 10s. for good roping.

COTTON.—Sales more active, at an advance of ⅛d.

JAPAN WAX.—Market quiet; of 232 boxes at auction, only part sold. Good block, 50s. 6d.

TOBACCO.—Large imports of Java have been made, and sales at 8½ to 9¼ for good and dry parcels. No further sale of Manila.

TIN.—Market is again depressed. Banca, 124s. Straits, 118s.

GAMBIER.—Of 737 bales at auction, about one-half sold at 17s. to 17s. 3d. Cutch: Of 3,700 bags at auction about one-third sold at 25s.

MISCELLANEOUS.—India-rubber: market remains dull, at 1s. 3d. to 1s. 4d., and scarcely any transactions to record. Camphor may be quoted about 20s. higher. Sapanwood: 115 tons of Manila sold at £5. 17s. 6d. to £6. 5s. for sound. Soy: sales of a portion of 115 tubs of Japan at 1s. 4d.; 182 casks of China were all retired. Rhubarb: of 192 chests, part sold at 1s. 2d. to 1s. 3d. for round and flat. Mother-o'-pearl shells: 170 cases of Manila retired at 107s. 6d.; Singapore shells are scarce. Star Anniseed: 52 cases at auction retired. Sticlac: 75 bags at auction all retired. Gum Benjamin: small sales at previous quotations. Damai: 80 boxes at auction all retired. Gamboge: no sales reported. Rattans: 7,140 bundles of Penang, and 319 of Singapore, sold at 2s. 3d. to 4s. 6d. Elephants' teeth: no sales. Vermillion: 10 cases at auction sold at 2s. 9d. for good genuine. Galangal root: no sales. Cubebs: 92 bags chiefly sold at £6. 17s. 6d. to £7, for fair quality. Dragon's blood: of 42 chests, half sold at £14. 10s. for superior lump. Galls: 22 cases of Japan are in the market. Rum: nominal, at 1s. 7d. to 1s. 9d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 5s. to £6. 10s.; nail rods, £7. to £7 15s; hoops, £9. to £9. 6s; sheets, single, £9. 5s. to £9. 15s.; Staffordshire bars, £8. to £8. 7s. 6d.; rails, £5. 5s. to £7.

STEEL.—Swedish keg, £17. 10s. to £18.

COPPER.—Sheet and sheathing, 11¼d.; yellow metal, 9½d.

TIN.—124s. for block; 125s. for bar. Tin plates, best charcoal, I.C., 29s. to 30s. per box.

LEAD.—English pig, £21 to £22. 15s.; shot, patent, £24. 10s.; sheet, £22. to £22 5s.; spelter, £18 to £18. 10s.; zinc, English sheet, £24; quicksilver, £7 per bottle.

The export of metals to China up to the 1st of March has been as follows. Pig Iron, 55 tons; bar and nail rods, 826; hoops and sheets, 78; steel (English), 5; foreign, 20; copper, 1; yellow metal, 53; lead in jugs, 1,145; sheets and pipe, 11; spelter, 75; tin plates, 310 boxes; quicksilver, 50 bottles.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£116,112
Foo-Chow-Foo	—	1848
Hong Kong	—	65,573
Manila	—	—
Singapore	4,000	60,592
Penang	—	384

MANCHESTER MARKETS.

Messrs. Du Fay and Co., in their Circular, state the course the raw material has taken has disappointed many who speculated on a rise in consequence of the disturbed state of America and the difficulty of bringing the cotton to this country. Short time, turns out, and unremunerating prices of textile fabrics lessened the demand, and for the present, prices are not likely to experience a rise; but, on the contrary, to sympathise with the downward tendency of our market.

Mr. Mendels' Circular says the prospects of an ample supply of cotton for the present year, at least, have put a check on the excitement in Liverpool; stocks are increasing at the ports, and the imports are coming forward on a liberal scale. If a peaceable dissolution of the United States confederacy take place, there appears to be no likelihood of a suspension of cotton cultivation, so that the late panic seems to have been, at least, premature.

COMMERCIAL POSTSCRIPT.

CITY, MONDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN TABLE.—Jan. 22, off St. Helena, from Batavia for Rotterdam, Wilhelmine; March 9, at London from Bassein, Von Berg; 8, at Queenstown from Manila, Recorder; 11, in the Clyde, from Manila, Veturia; 8, at Cuxhaven from Akyab, Martha; 9, at Brouwershaven from Batavia, Maria Anna; at Flushing from Akyab, Gustaf; 11, at Waterford from Java, Esther; 14, at Deal from Canton, Capriolani; 6, at Santander from Manila, Paz; 13, at Weymouth from Manila, Clifton; 15, at Deal from China, Millbrook; off Dungeness from Batavia, Jeddo; at Liverpool from Singapore, John Bibby; 16, at Cowes from China, Hermann.

DEPARTURES.—March 9, from London for Cardiff and Singapore, Calliope; for Hong Kong and Canton, Chaa-sze, Prince Alfred; from Liverpool for Shanghai, Mallard; Jan. 14, from Buenos Ayres for Batavia, Hendrika; March 12, from London for Cardiff and Singapore, Thames; from Hartlepool for Shanghai, Carausius; 13, from Liverpool for Hong Kong, Jessie Beazley; 14, from Swansea for Hong Kong, Judge Shaw.

SPOKEN.—Veloz, ship, of Liverpool, for Hong Kong, Dec. 8, 18 S., 36 W.; Mensagaro, Balley, to Hamburg, 19 Dec., 22 S., 92 E.; Sourabaya, packet, from Amsterdam to Sourabaya, Jan. 20, 1 N., 25 W.; President van Ryckevorsel, Dutch barque, Rotterdam to Sourabaya, Jan. 12, 1 N., 23 W.; Clifton, Manila to Falmouth, Feb. 21, 27 N., 37 W.; Sandale (?), Siam to Falmouth, Dec. 22, 35 S., 19 E.; John Bibby, Singapore to Liverpool, Feb. 22, 29 N., 38 W.; Delft, Dutch barque, for Batavia, Feb. 3, 21 S., 28 W.; Johanna Wagner, Batavia to Falmouth, Feb. 21, 36 N., 39 W.

COLEROON, Sunderland to Hong Kong, Nov. 13, 36 S., 13 W.
CEYLON, Penang to New York, Dec. 27.

FREIGHTS AND CHARTERS.

The advices from India as to manufactured goods continue very unfavourable, so that the Manchester shippers are operating to a very limited extent for those markets; the rates for fine goods from London continue low in consequence. For Shanghai, however, shipments have been active, the regular China traders loading up with despatch. The development of this trade, to which we have previously referred, seems to make satisfactory progress. Little business has been done in home charters from the East Indies, it being rather early yet to operate for the next cool season's trade, but some vessels are wanted from Java and Moulmein.

Coal freights to the East Indies and China remain firm at our quotations; but as the stock at almost all the ports is considerable, there is at present very little inquiry for vessels, except by the contractors. A further supply of 6,000 tons Bombay, and 1,600 Mauritius has to be tendered for next week.

Rates of freight current for vessels on berth to Shanghai, 50s. to 60s. per ton, weight and measurement. To Hong Kong, 50s., weight and measurement. To Singapore, 35s., and Penang, 45s., weight or measurement (nominal). To Manila, 35s. and 40s. To Batavia, 50s. weight, 40s. measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. China and Manila 40s. to 50s.

CASUALTIES.

The Wellington, Couper, from London for Shanghai, put into Scilly Feb. 19, with loss of boats, galley, bulwarks, &c.

The Energie, Meyer, from London for Batavia, put into Falmouth Feb. 24, with loss of bulwarks.

The Friar Tuck, Darlington, which vessel arrived at London from Canton Feb. 22, reports that when four miles from Whampoa, with a pilot in charge, she struck heavily on a rock, or a sunken junk full of stones, knocked off part of false keel, and damaged rudder, but proceeded, the vessel not making water. She experienced a very heavy gale—Feb. 11, 12—in lat. 44 N., long. 29 W., and was thrown on her beam-ends; had her decks swept, lost head-rails, knees, &c. She encountered very stormy weather till Feb. 18, when in lat. 50 N., lon. 9 W., it blew a hurricane, which commenced at S., veered to S.W., fell nearly calm, and veered to W., the ship being on her beam-ends, and the sea making a clean sweep over all.

The Boston, Potter, which arrived at New York, 13th Feb., from Manila, had carried away starboard cathead and sustained other damage during the gale on the 8th February.

The Maury, from Amoy to New York, was on shore on Long Island on the 9th Feb., but got off and proceeded in tow of a steamer.

The Brederode, Dutch ship, from Java to Holland, got on shore on Hompelvoet Bank, near Brouwershaven, 2nd March, but has been got afloat after discharging part of her cargo.

The Saturnus, Piening, for Singapore and China, put back to Hamburg March 1st.

The Pauline Constance Eleonore, Pybes, from Batavia to Amsterdam, which put into Table Bay, 3rd Jan., was leaky.

At TABLE BAY, Jan. 3.—From Tagal, Pauline Constance Eleanore. 18, from Manila, Carmencita, and sailed Dec. 30 for Batavia. Tweeling Ysters, for Shanghai, Lewes. 31, for Batavia, Christina Jeannetta. Jan. 6, for Singapore, Torrefors. 20, Elizabeth.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

VICTORIA FIRE AND MARINE INSURANCE COMPANY OF MELBOURNE.—We are authorised to accept MARINE RISKS and GRANT POLICIES on behalf of the above Company to Ports in the Colonies and the United Kingdom.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d; Crest Plate, 5s., with the necessary directions for use. Post free Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FIRE. — DESTRUCTION OF THE PLANT, STOCK, and PROPERTY of the Largest Ropery and Ship Chandlery in the Country, Messrs. Frost, Brothers, of Shadwell, London. PRESERVATION of Books, Papers, and Cash, in MILNER'S SAFE, standing by the side of two other safes, (not Milner's) the contents of which were consumed.—See "Times," Sept. 7, 1860.

TO MESSRS. THOMAS MILNER AND SON, Liverpool, and 47A, Moorgate-street, City, London.

Gentlemen,—We have very great pleasure in bearing testimony to the efficiency of your "Patent" Fire-resisting Safe. In the destructive fire which destroyed the whole of our premises on Sunday morning last, our books, papers, and cash, which were in the safe we purchased from you in March last, were all preserved; and this is the more remarkable because the contents of two other safes, not of your manufacture, standing in the same office within two feet of your safe, were consumed. Our most sanguine hopes have been realised in this severe test, and we leave you at liberty to make use of this letter in any way you may wish.—We are, Gentlemen, yours, &c.

FROST, BROTHERS.

Shadwell, London, Sept. 8, 1860.

ROSE OF ENGLAND SOAP (Original) 1s.

See Trade Mark upon each.

CALEB SOUL and CO., EXPORT PERFUMERS AND FANCY SOAP MAKERS, 85, Queen-street, Cheapside, London, or of any Indian Agency Houses.

TO CHEMISTS, STATIONERS, AND CONFECTIONERS.—AGENTS WANTED.

PLUMBE'S GENUINE ARROW-ROOT should be used in preference to any other. It is greatly preferred by the most eminent Physicians in London for invalids, and as the best food for infants.

REPORT ON PLUMBE'S ARROW-ROOT, BY DR. HASSALL

"I have subjected Plumbe's Arrow-root to careful examination, microscopical and chemical. I find it to be perfectly genuine, and of superior quality; equal in all respects to the best Bermuda, for which so high a price is usually charged. (Signed) ARTHUR HILL HASSALL, M.D."

Directions and testimonials with each packet, which bears the signature of A. S. PLUMBE, 3, Alie-place

Retailed in London by Snow, Paternoster-row; Ford, Islington; Morgan, Sloane-street; Williams and Lloyd, Moorgate-st.; Starling, Islington; Weatherley, Peckham.

HOLLOWAY'S PILLS AND OINTMENT. —CONFIDENCE, PUNCTUALITY.—Let the sick, be their ailments what they may, confide in these two medicaments for a few days; let them give them a fair trial, and the gratifying result will induce the sufferer to carry out the instructions accompanying Holloway's curative remedies. In adopting this advice no risk is run, no experiment tried; that they will purify, regulate, and heal is a fact. It is universally admitted that Holloway's preparations overcome inflammation, irregularity, debility, and decay. The action of Pills and Ointment is corrective. The Pills internally and the Ointment applied externally enter the circulation, and neutralise any morbid matter which may be present, and which would at no distant date exert a painful influence.

Voermans.

Per P. and O. str. Indus, 4th April. From Southampton to Singapore: Miss M. Holtins. To Penang: Miss Vermont. To Hong Kong: Messrs. J. P. Duncanson, Weston, F. F. Williams, W. R. Brown, and F. Forckler. To Shanghai: Mr. W. W. Ripley, Mr. Ringer. From Marseilles, 12th April, to Singapore: Capt. and Mrs. T. A. Welstead and Miss Welstead, Messrs. J. H. Reid, and W. Luttenberg. To Hong Kong Mr. F. A. Rangel. To Shanghai: Mr. L. Oliphant. From Alexandria to Singapore: Messrs. T. J. Leeuwen, Kolff, and A. Driessen.

Per P. and O str. Ceylon, 20th April. — From Southampton to Singapore: Capt. Colyer and three ladies, Rev. Mr. Matheson. To Penang: Mrs. Waller and two daughters. To Hong Kong: Ens. Pollard, Lieut. Symons, R.A., Mr. J. Vutt. From Marseilles, 28th April, to Penang: Mr. and Mrs. L. Chasserain. To Singapore: Mr. Stricker. To Hong Kong: Mr. and Mrs. Elzinger and infant, Hon. A. Marsham.

Per Wynaud, from London, March 26 to Shanghai: Mr. E. Major.

Per Assyrian, from London, March 23, to Shanghai: Eight French Missionaries.

Per Ocean Mail, from London to Shanghai: Mr. Yule, Mr. Glover, Mr. Urquhart, Mr. Jacquemont, lady and two children.

Per Hero, From London, March 22, to Hong Kong: Mr. Hart, Mrs. MacFarlane, Miss Carr.

ADDITIONAL PASSENGERS OUTWARD.

Per P. and O str. 4th April.—From Southampton to Hong Kong: Mr. D. Earnshawe, Mr. F. H. Green. From Marseilles, 12th April, to Hong Kong: Mr. and Mrs. Elzinger and infant.

Transferred from 28th.—Per P. and O. str 20th April.—From Southampton to Hong Kong: Mr. F. Forth and daughter. To Shanghai (for Japan): Mr. Enslie and Mr. Flowers, Mr. W. Skeggs.

PASSENGERS ARRIVED OUTWARD.

At Hong Kong, per Lancefield, from Calcutta.—Mr. Ryrie, Mr. Munday, Mr. and Mrs. Greig. Per Messenger, from New York.—Messrs. Smith, Johnson, Perkins, and Stead. Per Southern Cross, from San Francisco.—Mr. and Mrs. Breck, Messrs. C. Baker, J. R. Skiddy, H. A Bafler, Dufficed, and four hundred Chinese. Per Ganges, from England and Bombay.—Messrs. Rickett, Hudson, Dr. Winstone, Mr. Gordon, Messrs. H. G. Howlett, J. McIntyre, J. McLintock, D. Smeaton, Baldwin, A. F. Campbell, McFarlane, J. J. Morem, Cailade, Dupontes and servant.

THE TROOPS AT TIEN-TSIN.

Dates from Tien-tsin have been received *via* Chefoo and Shanghai to the 21st January, or fourteen days later than our last.

The small pox prevailed, but our troops were not suffering to any considerable extent. Communication with Taku was impracticable, owing to the ice blockade, and the latest dates received by the garrison, &c., from England, was 10th October.

There is no news from Peking, nor any special notice of Mr. Bruce or Mr. Wade subsequent to the last mail's dates.

General Collineau, of the French army, died on the 15th January, from the effects of small-pox primarily, but the immediate cause was palsy. Dr. Gordon, C.B., principal medical officer, and Dr. Rennie, staff surgeon of the English army, were called in consultation, and they concurred with Doctors Gerrier and La Riviere, the *medecins-en-chef* of French troops, in viewing the case as one beyond the scope of human art.

A subscription had been raised by Mr. McGhee, chaplain to the British forces, of $800, for distribution to the poor, which appears to have been done in a scramble, the result being that in the rush nine women and one child were killed, and several severely injured.

The weather was comparatively fine, the thermometer ranging between 4 deg. and 20 deg.

The following letters from our correspondent should have reached us by last mail:—

TIEN-TSIN, December 28, 1860.

The winter has fairly set in here, the frosts having been very severe during the last twelve days, so much so, as to cut off all communication with the vessels in the anchorage off the Peiho; a field of ice extending out to sea several miles from the Taku forts. The thermometer has been down to twenty-seven degrees below freezing. The Peiho was frozen over in one night, and the following day the inhabitants were crossing from one bank to the other, and the soldiers amusing themselves on the ice. Taken altogether the health of the troops continues good, though a considerable number of deaths have taken place. Report says that the barrack accommodation of the men is not as good as it ought to be, and that if the weather was warmer, serious results would be the consequence of the manner in which they are over-crowded.

Digitized by Google

The English mail of the 26th of October has arrived in the anchorage at Taku, but has not yet been able to communicate with the shore, owing to the ice. The *White Star* transport arrived about fourteen days ago with drafts from England, and the depots from Hong Kong, of the 31st, 60th, and 67th Regiments, in all about 600 men. Only 200 of them were got on shore, and the remainder, including Colonel and Mrs. Muter, of the 60th Rifles, are frozen out: 105 men of the 31st, and 96 of the 67th Regiment composed the 200 landed. The detachment, after a week's detention at Taku, marched up to Tien-tsin, and arrived there on the 23rd inst., after a very severe march, with the thermometer down as low as 10 deg. One man, private Holt, of the 31st, was found dead in his bed the morning after arriving at Tien-tsin, and he is supposed to have died from the effects of cold.

Admiral Hope has made arrangements for the conveyance of the mail every fortnight from Shanghae to the Peiho, and from thence back again, but from appearances, it is doubtful that they can be landed. Vessels for this service have been detailed by the Admiral, and winter at Maitau, a small group of islands near Cheefoo.

Mr. Bruce will, in all probability, proceed with the Legation, and take up his residence at Peking about the end of February. This is an event which is looked forward to with much interest, as it constitutes the last grand act in the drama which has been performing for the last three years in China, and on the mode of his reception may be said to depend the final termination of the war. As far as appearances enable one to judge, everything at present is progressing favourably. Hang-Chi, formerly Happo of Canton, is now residing at Tien-tsin as commissioner from Prince Kungs, for the interchange of communications. The Emperor has not yet returned to Peking, still residing at his winter palace of Je-ho, about forty miles from Peking.

Two thousand French troops, under the command of General Calinot, remain at Tien-tsin.

TIEN-TSIN, 7th Jan., 1861.

My last communication was dated the 28th of December and contained the news of the English mail of the 26th of October having arrived in the anchorage off the Peiho, but that from the field of ice extending out for several miles it had been up to that date impracticable to land it at Taku. When the letter referred to is likely to reach you is, of course, problematical, as, from last accounts, the mail in which it is contained remains at Taku, no opportunity having occurred of communicating with the anchorage. On the 29th ult. a Chinese courier was despatched to Cheefoo with the English and French embassy mails, from whence they would be taken by a French steamer to Maitau, thirty miles off, where the English fleet is lying, and thence to Shanghai.

As there is no prospect of communications being re-established with the anchorage off Taku until the winter is over, the troops (with the exception of two hundred men belonging to the 31st and 67th Regiments, that were fortunate enough to get on shore) that came up in the *White Star* have been transferred to H.M.S. *Urgent*, and which has gone down to the anchorage at Maitau, where she will have to remain until the winter is over, and the landing at Taku practicable, which, it is supposed, will not be until the middle of March, or, possibly, later, owing to the dangerous masses of loose ice which will be then constantly passing down the river out to sea.

This letter will go *viâ* Cheefoo by Chinese couriers, a limited mail having been authorised by that route for the army; but whether we are to be favoured with fortnightly opportunities is, of course, not known, the present being a special occurrence. Some hopes are entertained that at least the latter portion of English mails may be landed at Cheefoo, and sent up overland by the couriers on their return to this place.

There is no political news of importance to communicate. Reports are current amongst the Chinese that San-ko-lin-sin has met with a serious defeat in an engagement with the rebels near Shantung—but the details are somewhat contradictory, and the news is not altogether reliable.

The Allied legations will proceed to Peking, it is believed, about the end of February. Mr. Wade, Chinese Secretary of Legation, started for Peking a few days ago, and will remain there until the arrival of the envoys and their official reception is over, when it is stated he will proceed on leave of absence to England, his health being a good deal impaired by a prolonged residence in China.

Notwithstanding the frozen condition of the river, trade is busily carried on by sleighs, and proves how unnecessary were the fears entertained by the military authorities, that the army could not winter at Peking, owing to the difficulty of getting up supplies from Tien-tsin during the frost, when the opposite is the case, the ice actually affording greater facility for communication and transport by the Peiho than existed during the summer, the strong tides that impeded the progress of the boats being avoided while the river is frozen. Lord Elgin wished the army to winter in Peking, but, for the reason stated, his wish was overruled by the Commander-in-Chief—a caution that in the absence of specific information he was fully justified in exercising—but at the same time it seems strange that with a number of able interpreters attached to the army, this very important fact was not ascertained by them, for the information and guidance of the Commander-in-Chief. The sleighs in common use are small and exceedingly ingeniously propelled, namely, by a man standing at the back of the sleigh with a sharp pointed pole, which he places between his legs and thus propels himself and heavy loads at the rate of from six to ten miles per hour, according to the weight on the sleigh. The thermometer has been down as low as 20 or 30 degrees below freezing. There are about 250 sick in the military hospitals, but the general character of the sickness is not considered serious.

Summary of News from the Far East.

JAPAN.

The steamer *Carthage* has brought us some important news from Kanagawa, showing that when the last mail left affairs in Japan were in a most dangerous state. Mr. Husken, the Secretary of the United States Legation, had been murdered at Yedo, and, in consequence of the commotions that existed, all the foreign ministers, excepting Mr. Harris, of the United States, had fled to Yokuhama, having first hauled down the flags of their respective nations. With a resolution worthy of all praise, the American Minister, who seemed most in danger, if regard be had to the murder of his Secretary, alone remained, determined to perform his duty, and to defend himself to the utmost if attacked, for which purpose he at once caused the houses belonging to his Embassy to be barricaded. The contrast between such conduct, and that adopted by Mr. Alcock, who, frightened out of all propriety, lowered his country's flag, and fled, cannot but be as great a source of regret to us, as it certainly will be one of pleasure to our cousins in America. Mr. Alcock appears to be in the right place, only so long as he has the safe *rôle* of a despotic Minister to play, and can indulge his propensities in fining and imprisoning his own countrymen for actions in which he himself, and his subordinates, have been in the habit of indulging: but the moment his own personal safety is concerned, his firmness, it seems, forsakes him, and he thinks less of his duty than he does of himself. This is not the sort of character which we require in a new country where so many circumstances calculated to try a firm and courageous man may arise. If Mr. Alcock had had a couple of ships-of-war to fall back upon, he would doubtless have acted otherwise, but such support is not always, at every hour in the day, to be relied upon, while it *is* expected that an officer in our CONSUL-GENERAL'S position, should always have a little more reliance upon himself.

At the time the mail left there were only two Prussian men-of-war at Yedo, the *Thetis* and *Arcona*, and their presence seems to have been not a little required. The Prussians had fortified the temple in which their Embassy was located, and no foreigner thought it prudent to leave his house. The details received are it is true, as meagre as they are unsatisfactory, in their nature, and it were to be wished that further particulars had reached us; but it must strike everyone as remarkably strange that our Minister should, in a moment of panic, have timidly deserted his post and duty, while so many Europeans, as well as the Prussian and American Embassies, remained at Yedo. We hope that further accounts will throw a more dignified light around the actions of our CONSUL-GENERAL, who, as at present represented, appears to have acted in a manner altogether unworthy of his high position.

CHINA.

SHANGHAI.

We promised in our last to notice the *North China Herald's* review of the course of events in China during the year 1860, and now proceed to redeem our promise. We shall not follow our contemporary through his summary of the chief events of the war, which are so well known, nor dwell upon those points connected therewith, to which he takes exception, but will at once proceed to the results which are likely to flow from the late contest. Upon this point our contemporary observes :—

"We reasonably expect soon to have new ports open, and to be able to travel where we list into the bosom of this vast land. We hope to be able to buy teas in the most favoured plantations, and by placing them at once in foreign ships to avoid the iniquitous exactions of rapacious officials through whose hands each chest has hitherto passed. We shall be able to offer our woollens in the cold North to people who before could only get them after paying the enormous charge for land carriage over several provinces. If nothing prevents the operation of the Treaty, our commerce will receive an enormous impetus. All these disputes which the obstinacy and ignorance of the Mandarins at the five treaty ports have made of such common occurrence, will be at once referred to the highest officers of the realm, and we shall get justice done, as we sincerely hope, without the further use of the Enfield Rifle. But although the residence of our Minister at Pekingwill obtain for us, some new arrangement must be made by which the Superintendent of Trade will be enabled to reside during the winter at some approachable place. We find it impossible for whole weeks together, to hold communication with the shore at the Peiho during the winter; and while this lasts, all questions, however important, sent for final decision, must wait the breaking-up of the ice. Perhaps a Consulate-General will be established at Shanghai, and the difficulty thus solved.

The latter suggestion is worthy of notice, and will, no doubt, have to be carried out before long. The next point deserving attention is the opinion of our contemporary regarding the much talked-of poverty of the Chinese Empire, with reference to the smallness of the indemnity demanded to cover the expenses of the war :—

"The idea that China is ridiculously poor, and only hangs together by chance, pervades Downing-street, and it was feared that any handling rougher than ordinary might break down the Government, and give the Celestial Empire over to the most frightful anarchy. There is some truth in all this, and at one time, on the flight of the Emperor, the condition of affairs was perplexing enough. It would be bad for all parties were the last few threads that bind the Manchoo Government to the Chinese Empire loosened and destroyed, for we are not prepared or capable of building up any rule in China to take the place of the present one; the rebel power is so utterly objectionable that no hope could be built on it, and the British Empire is large enough already without making any addition to its territory. And yet we would assert that the idea of the poverty of the Empire is a mistake. We care but little whether no more than nine millions of taels reach the Emperor; it is not the poverty of the land, but the corruption of the mandarins that causes the scarcity of revenue. Had twenty millions been demanded instead of eight, it would easily, with a little longer allowance of time, have been paid without injury to the resources of the country. The framers of the Treaty looked with mercy on the Chinese; they forgot altogether that the overtaxed people of England must pay whatever is left unpaid by their enemies."

Our contemporary's review of the progress made by the insurgents during the year is as full of details as it is replete with interest; but our space will only permit us to notice briefly his estimate of the insurgents' conduct. Their claims to be considered as Christians are treated with deserved contempt, and he sums up his opinions with the following telling sentence :—

"Ruined cities, deserted villages, and flaming homesteads mark their track, and show how active must be their vaunted faith; mangled corpses, and water-ways choked with dead, show what regard the Taipings pay for the feelings and lives of mortals; and the emblem of the Great Peace dynasty may be fairly represented by that touching picture seen by a foreigner, near Ping-wang, of the little girl sitting and crying most bitterly over the smoking and deserted ruins of the city that once contained her home."

In addition to the new Consular appointments noticed in our last, the following are rumoured :—Mr. Raymond Gingell, to be Consul at Hankow; Mr. W. E. King, to be assistant at ditto; Mr. P. J. Hughes, to be acting vice-consul at Kiu-kiang; Mr. J. Phillips, to be assistant at ditto; Mr. J. C. Browne, to be assistant at Formosa; Mr W. H. Pedder, to be removed from Swatow to Shanghai, vice Meadows, resigned.

Mr. Wade will proceed home on sick leave, and Mr. Parkes, it is said, will take his place. Mr. Hart leaves the Customs and joins the Diplomatic.

There is a talk of a steam communication between this port and San Francisco *via* Japan. It is stated that the saving of time in the conveyance of the mails would be twenty days. As matters now work the United States' trade with Shanghai and Japan cannot afford a line of steamers. As the Japan trade increases, and British Columbia progresses, we think there will be a steam communication that way when some safe, speedy, and commodious means of overland transit shall be established from San Francisco to the Atlantic States.

The three Americans who left Shanghai to proceed up the Yang-tse-Kiang, and whose probable fate we noticed in our last issue, are supposed to have been murdered by their boats' crew, who are not forthcoming. It is suspected that they were engaged in an illegal traffic with the rebels at Soochow, and that they met with their deaths through jealousy on the part of the Chinese engaged in the same occupation.

The *North China Herald* has a very good article on Mr. Moss's case, in which it is stated that the Consular officers themselves in Japan were accustomed to go out shooting game even up to a few days before Mr. Moss was arrested. On the day of that gentleman's capture, Mr. Alcock's secretary arrived at Kanagawa for that very purpose, with Mr. Alcock's sanction. So much for "wilfully violating Japanese laws by shooting game."

Mr. Robert Fortune has brought to Shanghai a magnificent collection of plants from Japan. He will probably return there again in spring, and go from thence to the North of China, perhaps as far as to the Great Wall.

Several explorers have recently arrived, and among them is Mr. Simon, agent of the French Government, sent out on a special mission, with sole reference to the products of China Proper.

The French Admiral has sailed for Cochin-China, taking with him six vessels with as many troops as could be accommodated.

The *North China Herald* notices with disfavour Lord Elgin's opinion that the Foreign Customs Inspectorate should cease as soon as practicable. His lordship, it seems, left without vouchsafing a reply to the communication addressed to him by the Shanghai Chamber of Commerce on the subject.

The Chinese authorities at Shanghai are extorting money from the native traders on the plea of defraying the expenses of the foreign troops and Imperial soldiers kept in that city under the pretence of opposing the rebels. Two wealthy natives, under the severe pressure exercised, had consented to pay 40,000 taels each. The practice has been laid before the Consul, as tending seriously to injure the trade and commerce of the city.

A correspondence of considerable importance has been published regarding the extra imposts levied by the Taoutai of Shanghai on opium, to provide for the Emperor's necessities. Messrs. P. and D. N. Camjee and Co., a first-class Parsee firm, have, in consequence of such proceedings, commenced an action in the Consular Court of Shanghai, against the *Cong-so* people implicated in the matter. The Chinese are not satisfied with the duty payable by the tariff, and therefore levy "squeezes," in addition to the regular duty. While engaged in one of these operations, they sold up one of Messrs. Camajee's constituents, and posted their hong, whereby they estimate the loss which they have suffered at taels 18,300, about £6,000.

NINGPO.

The rebels have advanced to within sixty li of Hang-chow-foo, and are at a place called Hiu-hong. The Footai of Hang-chow has issued a proclamation, to the effect that all the Hang-chow people must lay in a stock of provisions, as he intends to keep the gates closed from the 7th to the 17th of February. The authorities of Ningpo caught a rebel the other night, who, on being promised a pardon, confessed that he had been sent down by the Tong Wong, or Eastern King, with nine others (seven men and two women), to find out what chance there was of being able to take Ningpo; also to ascertain how many soldiers the Taoutai had, &c. He says that ten of them came down from Nanking in a boat, and that the other nine were over on the foreign settlement

AMOY AND FOO-CHOW-FOO.

There is nothing of any moment to record from either of these places.

A Prussian subject named Anders, a storekeeper at Amoy, had absconded, leaving debts to a considerable amount, including $1,700 belonging to the Dutch ship *Jacoba Martena*.

SWATOW.

A correspondent of the *China Mail* at Swatow states that on the 15th January, the master of the *Kent* was on his way from Swatow to Double Island in the ship's boat with four men, when a gust caught the sail, and before sheets could be let go the boat, with about twenty fathoms of chain which served for ballast, sunk from under them. After nearly an hour's interval, the master and two of the men were picked up by a

Digitized by Google

Chinese passage-boat; of the other two (H. Milligan and W. Bugg) nothing has since been heard. On the 6th the master of the *Earl of Chester* when going on shore at Swatow, was knocked down with a large stone, thrown into the water, and otherwise ill-treated. He was rescued by some respectable Chinese. He is a quiet man, of about fifty years of age, and gave his aggressors no annoyance whatever. Though known, they have not yet been apprehended.

HONG KONG.

The races for the present year were fixed for the 19th Feb., and two following days. Each day is apportioned seven races. The Governor's Cup, which in former years formed one of the prizes, is not in the present programme.

The *China Mail* says:—"Mr. Caldwell, in the face of what is considered here as unfair treatment, has protested against the way in which the inquiry is being conducted. His remonstrance, which is to be found in the reports, was ordered to be returned to him as not sufficiently respectful in its language. A second which he sent in shared the same fate. The council *have* treated him unfairly, and they are exceedingly angry a being told so. His resignation of office—that of Registrar-General and Protector of Chinese—was sent in and not accepted. The members of Council do not want to deprive themselves of the power and pleasure of dismissing him. In the meantime he has withdrawn from his duties. The Council meet in a month to receive any written defence he may furnish them with, reserving to themselves the right of cancelling whatever displeases them.

The expedition up the Yang-tze-Kiang was to start on 12th Feb. The vessels composing the exploring fleet include the *Snake, Coromandel, Cowper,* and *Atalante.* The *Centaur* and *Roebuck* will probably be taken up near Nanking, where they have lain for some time back. At Chin-kiang and Kin-kiang, gun-boats will be stationed. The Admiral is said to have expressed an opinion that a point about eleven hundred miles above Hankow may be reached by vessels of a light draught. The expedition will return about the end of March. By invitation of the Admiral, several Shanghae merchants accompany him on behalf of the public. Mr. H. S. Parkes has proceeded from Hong Kong to join the expedition under Admiral Hope.

A public meeting was held in the Club-house, the Rev. J. J. Irwin in the chair, for the purpose of establishing a "Sailor's House" in the colony, and which was attended by the senior partners of the principal mercantile firms, and by a considerable number of the other residents. The Chairman informed the meeting that already the amount subscribed had reached the large sum of $40,000, towards which Messrs. Joseph and Robert Jardine had each, before departure, presented the handsome donation of $10,000. After a motion made by the Hon. Mr. Percival, seconded by the Hon. John Dent, that such an institution should be formed; it was proposed to, and approved by those present, the trust be vested in the senior partners for the time being of the firms, Jardine, Matheson and Co., Dent and Co., and Russell and Co., with the Harbour Master—while the heads of the other chief mercantile houses in the colony were appointed directors for the current year. It was likewise moved and carried, that a donation of $100 shall constitute a life membership, and entitle the donor to a vote at the annual meetings. Besides the chairman, the meeting was addressed by the Rev. Dr. Legge, Mr. MacAndrew, Captain Caldbeck, and Mr. Pollard. After a vote of thanks to the chairman, and a special vote to the Messrs. Jardine, proposed by the Hon. Mr. Dent, seconded by Dr. Legge, and heartily responded to by all present, the meeting dissolved.

Messrs. Dent and Co.'s steamer *Lye-ee-moon*, Capt. Hill, has proved herself one of the fastest in the world, having made the passage from Hong Kong to Shanghae against the north-east monsoon in the unprecedentedly short space of 68½ hours, and the return passage from Shanghae in 62 hours.

On the 2nd February, Lieut.-General Sir Hope Grant reviewed the troops on the new territory of Kowloong; the day was rather wet, but the appearance made by the various regiments was most satisfactory.

The *China Mail* informs us that Mr. Moss was still at Hong Kong when the mail left, but that he intended shortly to proceed to England, to bring his case before a higher tribunal. Our contemporary observes that "Mr. Moss has been made to atone vicariously for the faults of the whole community, and in that respect is a victim to the looseness of the Consular administration." While in jail at Hong Kong, this gentleman's daily fare was "a loaf of bread and a tin of tea water."

The *Daily Press* takes Admiral Jones strongly to task for culpable negligence of the inhabitants' health and lives, in having anchored his flag-ship *Imperieuse* in the midst of the shipping in the harbour, and communicated freely with the shore, when he had 150 cases of small-pox on board. The ship could have anchored in safety in many places without being a source of danger to the inhabitants, and there were half-a-dozen unemployed gunboats to attend upon her; but the commonest precautions were disregarded, and officers and men have been landed from her, and her boats pulled everywhere about the harbour. All the severe cases were put on board the condemned hulk *Minden*, which lies close in shore, the worst possible place for the sick, as well as for the healthy inhabitants in the town. Altogether, great carelessness, if not recklessness, appears to have been displayed in this matter.

CANTON.

The following items we glean from the *Friend of China*:—The British ship *Chapman* is lying off Shameen, under contract to convey emigrants to Demerara, and the *Leonidas* for Havana with coolies.

Whampoa is remarkable now for the number of its graving docks. Formerly, Couper was the only proprietor of such establishments. Now, there are Hunt's Docks, and Hall's Docks, and Badenoch's Docks, and Thomas's Docks, and I can't tell how many besides, and for months past nearly all these docks have been continually in use. Last week I counted no less than eight hulls under repair. The shipchandlers there are Hunt and Co., Talbot, Devine and Co., and Blackhead and Co., and there is a most useful floating establishment, viz., Kenward's Dispensary; Dr. Lewer, the only resident surgeon, occupying a shop close by. Of hotels there are three, viz., the Oriental, the Excelsior, and the Mercantile; attached to each being very good billiard tables and bowling alleys.

The Americans and other foreigners manage to do without a Consul at Whampoa; but her Britannic Majesty finds it necessary to keep the old hulk *Alligator* as a residence for the Vice-Consul, Dr. Hance, and, what with one thing and another, he has enough to do, it is said.

But the greatest institution of all is the Custom-house, located in a hulk near the spur end of New Town. Mr. Matheson, erst of the Ningpo firm of C. S. Matheson and Company, is the principal at present; Messrs. Smith and Johnston being deputies, with some dozen tide-waiters, at salaries ranging from $40 to $80 per month. Masters of ships and others engaged in transhipments make sad complaints of the way business goes on here; it being hardly possible, I believe, to get a package over a ship's side till about an hour or so before noon.

COCHIN CHINA.

SAIGON.

It is said that the French expedition to this place will be composed of 4,000 men, under the command of General Montauban. Hue, the capital of Aunam, is to be the principal object of attack. Some Spanish troops will be simultaneously despatched from Manila. The combined force is to rendezvous off Saigon, whence it is to proceed to Turon, and make a dash on Hue. When the expedition sails, Shanghai and Canton will be well nigh denuded of French troops.

At the latest date the state of political affairs was said to be improving.

SIAM.

BANKOK.

Advices from Bankok are up to the 9th February. As the Siamese steamer *Chow Phya* was leaving, a large French transport steamer, name unknown, passed up the Menam, with the object, it was expected, of conveying the Siamese Embassy to France. The well-known interpreter Achune, and some French missionaries, will accompany the Embassy. The American frigate *John Adams* was in the harbonr when the mail left.

BORNEO.

H.M.S. *Nimrod*, whose arrival at Sarawak we noticed in our last issue, had returned to Singapore, but brought no news of importance.

It was hoped that the trade of the west coast of Borneo would soon be perfectly free.

The latest advices state that some of the petty native chieftains had laid an embargo on exports, and that commerce had to a considerable extent, suffered thereby.

Digitized by Google

Sir James Brooke left Singapore on the 8th of February for Sarawak in his new steamer *Rainbow*. In our next we shall, no doubt, be able to announce his arrival there and his preliminary steps, as also those of the Consul-General, Mr. St. John.

The actions of Mr. Edwardes, Governor of Labuan, and Her Majesty's Acting Consul-General in Borneo, have given rise to strong expressions of disapproval amongst all parties in the East acquainted with that settlement, although his proceedings have been disapproved of by the Home Government, and he has by this time been superseded in the post which he showed himself so incompetent to hold, yet the mischief which he has caused cannot be so easily repaired.

We find the following comments in a long article in the *Bombay Times and Standard*:—"To understand the full extent of mischief caused by his diplomacy, it must be borne in mind that he has so weakened and humbled the Sarawak Government, as to render it doubtful whether it will be able to keep in check the wild and piratical population under its flag. Whether the whole of Mr. Edwards's proceedings are to be ascribed to incompetence, or not, we shall not disguise the fact that darker motives are plainly attributed to him by our informants. He is said to have been jealous of the sago trade of Sarawak, and to have wished to divert it to Labuan. He was commonly believed to be hostile to Sarawak, and to be only awaiting an opportunity to deal a blow to its prosperity. The most inexplicable part of Mr. Edwards's conduct is the protection he has extended to the chief, Sheriff Musahore, the murderer of Messrs. Fox and Steele. Mr. Consul St. John was so satisfied of this man's guilt, and of his dangerous character that he wrote to the Sultan of Bruni, demanding his surrender to take his trial before the Sarawak courts. This letter of his predecessor Mr. Edwardes took upon himself to suppress, subsequently declaring his belief in the sheriff's innocence, and restoring him to his former position. This is the very man who figures as the leader of the hostile movement that now threatens Sarawak, the man who has already begun a cruel war against native tribes friendly to that settlement, and who boasts of the friendship and alliance of the Governor of Labuan.

JAVA.

BATAVIA.

The Dutch war steamer *Claeszen*, has at length succeeded in capturing the desperate gang of pirates who formerly drove off her crew from one of the Sailoe groupe. The news from Banjermassing is more cheering than by last accounts. The officers and men were becoming inured to jungle fighting. The rebel chief had called for new levies.

Great dissatisfaction is expressed at the intention of the new Netherlands Minister for the Colonies, Mr. Van Hall, to appoint a new Governor-General for Netherlands India. The Procureur-General has been succeeded by Mr. Rappard, late officer of justice.

Lord Elgin and suite had been hospitably received in Batavia. His Excellency was lodged in the palace of the Governor-General.

MALACCA STRAITS.

SINGAPORE.

It is whispered that Colonel Cavanagh will be removed to India, and that Sir James Brooke will be the first governor under the new *regime*. We sincerely trust that the health of the latter gentleman will be sufficiently restored to enable him to govern the Straits Settlements with the vigour and sagacity that distinguished his career in Borneo.

From Singapore papers we learn that on the opening of the Criminal Session on the 3rd January last, a prosecution on the part of Government against an European police-officer for receiving bribes from gambling-houses, came to an unexpected termination by the Recorder, Sir Richard M'Causland, declaring that the course pursued by the prosecutors was illegal, unconstitutional, harsh, and oppressive, and that a bill of indictment could not be sent to the grand jury in the case alluded to, as the preliminary investigation of the charges had been conducted before an irregularly-constituted Court, that if the Government had determined on prosecuting the offender, the inquiry should have been made by a magistrate, and the witnesses should have been examined on oath. We are sure that our readers in Singapore will regret the unfortunate issue of the affair, for it is a matter of the greatest importance that our police in the East should be kept as pure as possible; and this result can only be attained by punishing numbers of the police most severely when convicted of dishonest practices. It is to be hoped that the authorities have commenced proceedings before a magistrate in compliance with the Recorder's opinion.

The termination of the same session on the 17th January was marked by the presentment of the Grand Jury, which is characterised by the local press as a most judicious production, fully setting forth the various matters in which reform is needed. As we cannot enter fully into minor details we will merely allude to the subject affecting our mercantile community in all parts of the world; we allude to the necessity of Government appointing a second professional judge and an assistant magistrate to the present establishment of functionaries. When we state that the subject is of world-wide interest, we must remind our readers that probably more civil cases, actions for damages caused by collisions at sea, breaches of contract between shippers of goods and ship owners in all parts of our dominions, besides other interesting cases, including those between shipmasters and seamen, come before the judicial authorities of Singapore than in most of our foreign ports; it is absolutely necessary, therefore, that ample provision should be made for the administration of justice in such an important place as Singapore.

A monthly magazine has been started at Singapore, of which our contemporary, the *Straits Times*, speaks with high praise. The gem of the number is said to be a paper on "The Mercantile Year, 1860."

It is proposed by the Government to erect a new market on the bank of the Singapore River. The site is an admirable one, and if well designed and constructed, the market will be one of the cleanest and healthiest in the world.

House property is becoming very valuable, if we may judge from the fact that rentals in the business part of the town have been in many cases doubled.

A movement is going on among the semi-barbarous people of the southern end of the Malayan Peninsula, which, if successful, will have the effect of consolidating under one government all the petty states not tributary to Siam. The nobility of that portion of the Peninsula are about to restore to power Tunku Alee, the ex-Sultan of Tohore, and for this purpose the chieftains of Moar, Rainbow, Jehole, Pahang, and many influential Orang-Kaya of Tohore, have prepared a force of 30,000 men, fully armed, to carry out their intention. Sultan Alee has consented to put himself at the head of this force, to carry into effect the wishes of the chieftains, and it was expected that the army would be in the field by the 5th March, to carry out, by force, if necessary, the plans that had been determined upon. The consolidation of these petty states would probably have the effect of developing on a more extended scale the mineral, agricultural, and commercial resources of the southern portion of the Malayan Peninsula.

The *Nimrod* was about to leave Singapore for England, the gun-boat *Beagle*, from China, taking her place.

Famine prevails even in the Straits. The people in the interior of Malacca and Nanning are said to be starving, owing to the failure of their paddy crop. They have also suffered from a buffalo murrain. Subscriptions to alleviate their distress are solicited by the Straits journals.

The Siam steamer *Viscount Canning*, sold at — on the 6th inst. for 74,500 dols.

A rumour has obtained currency that the Local Government intends to buy the *Young Queen* and turn her into a State yacht.

The improvements now commenced in the shape of a sea-wall from Johnson's Pier to New Harbour, will, it is estimated, cost $100,000. When the wall is completed as far as Mr. Guthrie's property at Tanjong Paggar, Mr. Guthrie undertakes its construction to Bain's Hill; at this point Mr. Bain takes up the work, and continues it to Mr. Purvis' property at New Harbour. Mr. Purvis completes it to his wharf. When this is accomplished, it is proposed to construct a tramway the whole length, so that goods may be landed at the wharves at New Harbour, and brought to the square in trucks.

According to a statement in the *Hong Kong Register*, the troops in China were stationed as follows:—At Taku, 75; at Tien-tsin, 3,080; at Shanghai, 1,875; at Canton, 2,820; at Kowloong, 688; at Hong Kong, 1,837; at Stanley, 79.—Total, 10,454.

Another shock of an earthquake was felt at Singapore at 7.25 P.M on the 16th of February. So severe was it that the natives rushed terrified in large numbers in o the street. The same shock was felt at Malacca at the same time as in Singapore.

Three Russian war vessels arrived at Singapore on the 12th of February, namely, the steamer *Dzjiget*, the *Woencord*, and the *Boerine, en route* to Europe, *via* the Mauritius and the Cape.

PENANG.

The *Penang Argus* publishes the following letter from the Home Government on the subject of the Income-tax :—

"I am directed by the Secretary of State for India in Council to acknowledge the receipt of your letter of the 16th of August last, and to acquaint you in reply, that it appears from a despatch which has been received from the Government of India, that you have been informed that the Indian Income-tax would not at present be brought into operation in the Straits Settlements; and I am further directed to state, that Sir Charles Wood has approved of the communication made to you by that Government.

"(Signed) "HERMAN MERIVALE."

"To. L. Nairne, Esq."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BRAND—On the 19th inst, at Bedford-hill House, Balham, Surrey, the wife of James Brand. Esq., of a son.

COSTERTON On the 19th inst., the wife of John Costerton, Esq., of Hong Kong. China, of a son.

COUTTS—At Hong Kong, on the 11th Jan., the wife of James C. Coutts, Esq., of a son.

DAUELSBERG—At Sanssaussi, on the 7th Feb., Mrs. H. Dauelsberg, of a daughter.

FRANKS—On the 22nd inst., at Lynmouth Cottage, Streatham-common, the wife of Mr. J. F. Franks, of a son.

PARFITT—On the 19th inst., at 2, Stanhope-place, Mornington-road, N.W., the wife of William Parfitt, Esq., of a son.

PHILLOWHOSKY—At Hong Kong, on the 27th Jan., the wife of Mr. J. Davies Phillowhosky, of a son.

PURDON—At Spring Gardens, Hong Kong, on the 3rd Feb., Mrs. James Purdon, of a son.

STILL—At Canton, on the 3rd Feb., the wife of E. A. Still, Esq., of a son.

MARRIAGES.

MACHADO—MARQUES—On the 3rd Feb., at Macao, Francisco Guilhermo Machado, Esq., to Margarida Barbara, daughter of Jose Martinha Marques, Esq.

MELDRUM—KEASBERRY—On the 6th Feb. at Singapore, by the Rev. A. D. Nicolson, Residency Chaplain, Mr. James Meldrum to Eliza, eldest daughter of the Rev. P. J. Keasberry, Protestant Malay Mission. Singapore.

THORBURN—JAMIESON—On the 19th inst., at 6, Park-gardens, Glasgow, by the Rev. Dr. Caird, William Thorburn, Esq., of Shanghai, to Barbara, daughter of James Jamieson, Esq.

DEATHS.

EE—At Hong Kong, on the 24th Jan., Mary Elizabeth Gee, infant.

HAY—On the 19th inst., at Dunragit, N.B., Sir James Dalrymple Hay, Bart., in the 72nd year of his age.

KATE—On board the P. and O. steamer *Madras*, on the 5th Jan., at sea, Annie Kate, youngest daughter of Henry Evans.

MATTHEWS—In Hong Kong harbour, 14th Feb., on board the British ship *Mystery*, Edward Matthews, Master, aged 51 years.

TURNER—At Shanghai, on the 2nd Feb., George Cooper Turner, Esq. Crown Solicitor, Hong Kong.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—At Shanghai the amount of business transacted in this article during the past fortnight has been very small. Settlements are 1,450 chests, making 6,420 chests for the month, and 61,940 chests for the season to date against 213,300 chests at corresponding period last year. The stock on the market amounts to 8,900 chests, of which 4,600 are fair to common Hohows, 2,400 common Congous and Hoochow kinds, and 1,900 Flowery Pekoes. In Greens, purchases for the fortnight are 3,134 half-chests of China and 1,016 half-chests Japan Teas, making to date 67,300 half-chests of the former and 29,650 of the latter kinds. These purchases have been effected at about former rates. At Foo-chow-Foo the transactions comprise—Congou: 7,500 chests and 8,500 half-chests, at 9 to 12 taels for trashy and ordinary, 12½ to 16 taels for ordinary to good common, 15½ to 19 taels for but middling to middling. Oolong: 700 half-chests inferior to fair cargo, at 16 to 18 taels. Flowery Pekoe: 350 chests at 25 to 30 taels for interior to medium. Leaving a stock unsold upon the market of 24,000 chests Congou, 1,700 half-chests Oolong, 1,500 chests Flowery Pekoe, and 2,500 boxes Scented Teas. At Canton and Macao the transactions are next to nothing.

RAW SILK.—After the departure of last mail the holders seemed more anxious to realise medium and inferior grades. The subsequent arrival of further unfavourable news from Europe caused purchasers for a time to hesitate, but this was not followed by any fall in prices. The belief in the future small supply of good silks for the remainder of the season made the dealers very firm, and they now demand fully last mail's rates; indeed, on some few parcels of rather better classes an advance of 5 to 10 taels per picul has been paid. The purchases of the fortnight amount to 3,000 bales, making the total settlement to date for Europe (Japan and China silk), 70,000 bales, against 48,500 bales for 1859-60; America (Japan and China silk), 1,400 bales, against 1,100 bales for 1859 60. Present unsold stock, 8,000 bales, against 3 500 bales for 1859-60. Prices very firm at last quotations. This steamer takes about 2,200 bales silk for Europe, and the Bacchante and Glencoe, loading for London, have about 1,200 bales on board. Quotations:—Tsatlees, No. 1, 450 taels; 2, 420 to 430 taels; 3, 385 to 410 taels. Yuenfas, 280 to 370 taels. Sewhings, 260 to 320 taels. Taysaams, No. 1, 355 to 370 taels; 2, 320 to 335 taels; 3, 275 to 295 taels; 4 and 5, 250 to 270 taels. At Canton and Macao the transactions have been too trifling to report.

DRUGS, &c.—CASSIA LIGNEA.—Canton, no stock and no settlements. Macao, sales of the remaining stock are reported at 16 dols. 75 c. to 17 dols. Supplies are shortly expected. There is a good demand for the article. Cassia oil is quoted 280 dols. at Canton, and 260 dols. to 265 dols. at Macao—the supply is very ample. No settlements are reported. Cassia Buds, no settlement—the stock consists of 50 piculs at Canton, which is held at the extreme price of 40 dols. per picul. Star Anniseed, no settlements. The stock for sale is comprised of 400 piculs at Macao, for which 14 dols. 50 c. to 15 dols. is demanded. The stock of Anniseed Oil is all at Macao likewise. There is little on the market, the quotation is 160 dols. to 165 dols. Galangal can be had both at Canton and Macao. The price is 3 dols. 75 c. to 4 dols. 25 c. Rhubarb, neither supplies nor settlements. Galls are scarce and wanted—the stock consists of 100 piculs at Canton, for which 19 dols. is asked. Vermillion is 38 dols.

CHINA—IMPORTS

The New Year festivities have materially checked the import trade. The transactions of the fortnight are not only small, but made, as many of them are, under peculiar circumstances, they form no criterion of value. The feeling generally is good—the stock in the hands of dealers is known to be small—supplies have lately been trifling, and hopes are entertained that upon the resumption of business a good trade will be done, especially if the opening up of the Yang-tse and of the Peiho, lead to the results which are generally looked forward to.

PROVISIONS, SHIP CHANDLERY, &c.—Without a single exception, the market is glutted to a degree with every article under this heading. Sales can hardly be made—the expense of storing being heavy. The following quotations are those which late sales have been made at:—Flour, best galego, 7 dols. to 8 dols.; beef and pork, Am., per bl., 9 dols. to 10 dols. for the best; navy bread, 3c. per lb.; canvas, 25 per cent. below cost.—Coals have still to be sold at auction afloat owing to the scarcity of storage. English steam fetch 10 dols. to 11 dols; Sydney, 6 dols 50c.; Am. Anthracite, 8 dols. At Shanghai, the quotations are: English Tls. 14 to 14·5; Japan, Tls. 5·6.

JAPAN.—The markets at Nagasaki are in much the same state as previously given. The *Juanpore* was loading for London, and several vessels for China. At Kanagawa business was quite suspended.

MANILA.—The mails had not reached Hong Kong in time to come forward.

SINGAPORE.—Business had hardly been resumed since the Chinese holidays.

PENANG.—Since date of our last report the *Isabella Harnett* has arrived from Liverpool, and the *America* and *Barracouta* are expected with considerable imports of Manchester staples. Demand for piece goods is still dull, and as importers have been meeting the market freely, prices are, if anything, rather lower than they were previously. Exchange, too, has given way, and will likely go lower, and this tends to render results of Manchester adventures still more unprofitable.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 4d. to 6s. 4d⅛.	6s. 5d. to 6s. 5⅛d

For San Francisco: Bald Eagle, Willy, Challenge, Imperial.

At SINGAPORE.—For England: Boverine (str.), Dgiget (str.), Nimrod (str). For Liverpool: Jacatra. For Hamburg: J. H. Becher.

At PENANG.—For London: Isabella Harnett.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: tea £2. 10s.; silk, £4. 10s. To New York: tea, 9 dols.; silk, 20 dols There is very little business doing both for Great Britain and the United States, rates to the latter being quoted lower. The coast trade is interrupted by the new year festivities. The settlements reported are – Marco Polo to load at Foo-chow-Foo for Australia at £4; A. Hermann to Ningpo and Singapore, thirty lay days, 2,000 dols.

At FOO-CHOW-FOO.—To London: £3. 10s. All the vessels in port have been taken up either for Australia, London, or the coast. In New York there is nothing doing, the season being over. The Whirlwind is reported for London at current rates.

At AMOY. Freights still continue at remunerative rates. and vessels of small and moderate tonnage find active employment on the coast, there being scarcely a disengaged vessel in port. The charters are—President Furrer, to Singapore and Samarang, fifty days, 3,450 dols; Welcome, to Ningpo and back forty days, 4,900 dols.; Asia to Shanghai and back, 4,000 dols.

At HONG KONG, MACAO, and CANTON.—For London, £2. 10s. to £3. Very little business is doing for Great Britain and the United States, all suitable craft being exhausted; the disengaged vessels are considerably too large for the general requirements of the trade. Small vessels to carry tea to Australia are much wanted. To San Francisco a good business is being done, and also in the emigration to Havana and Demerara, owing to the anarchy and distress prevailing among the coolies. The amount of disengaged tonnage is very trifling in comparison to former years, caused by the small arrivals and large departures. The settlements reported are Merchantmen to London, at £2 10s. per ton. Dr. Jurius Jantzen, Cawline, and Rostock for Cowes for orders, at £3. Arabia to Sydney and Melbourne £3,250, and a few small craft to Saigon and back at 60c. to 65c. per picul, and also to Bangkok and back, at 55c. to 60c. and owners account.

At SINGAPORE.—To London: £2 15s. to £3 10s. The demand still continues for vessels for the rice ports, and the above rates would be given freely for suitable craft. The only charters reported are Dakotah to load from Rangoon to the United Kingdom at £5 per ton for timber, or £3 10s for rice to Great Britain or Continent. Lady Hobart at £4 5s. for timber from Maulmein to the United Kingdom.

At PENANG.—To London, £3 to £3 15s. Tonnage is scarce and very much wanted, a few vessels would find ready employment to London at advanced rates, as also to China.

CASUALTIES.

The captain of the Elizabeth, from Manila, has arrived at Hong Kong with his wife, and the rest of the crew, they having saved nothing but the clothes they stood in.

The Fearnought, from Hong Kong bound to Singapore, struck on a rock on the 7th of February during very thick weather. The steamer Yangtsze was engaged to tow her off, but could not move the ship, and had to leave her there where she now lays, and is considered a total wreck.

The Spartan, from Foo-chow-Foo, to London, struck on the South Bank in coming down the Min, and broke her back. She remained on one side, and was towed up the river. Though completely out of shape she does not leak.

The Weser, bound for Saigon, with stores for the army, run into a small river about the 16th Jan., in very thick weather, which is full of mud banks and rocks, and struck. She is expected to become a total wreck, but the greater part of her cargo will be saved.

The Captain of the Myrtle, which left Hong Kong in June last for Siam, has arrived in Singapore in a China junk. and reports that the vessel was wrecked on the coast of Cochin on the 8th June during a typhoon, and that he and the crew reached the shore in the long boats but were driven to sea again, it being well provisioned. Nothing has since been heard of either the crew, boat, or treasure that she had on board.

PASSED STRAITS OF SUNDA.

From England and Continent to Singapore: Feb. 2, Seabelle; 5, Jan de Witt. To Manila: 8, Jan Daniel. From China to England and Continent: Jan. 28, Anthony; 31, Heroes of Alma. RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

ST. PETERSBURG, March 22.

The Emperor's pet project for the emancipation of the serfs is at length ripe for execution, and the official communication is published in the shape of an Imperial manifesto, dated on the 19th of February, but only printed and sent out three days ago. In this proclamation the Emperor says:—"Providence has reserved to me the satisfaction of fulfilling the testamentary intentions bequeathed to me by my ancestors for improving the condition of the serfs throughout the empire. I commenced this great national work with the most implicit confidence in the co-operation of the nobles, and my expectations have been perfectly realised. The new law ensures to the serfs the most complete liberty and freedom, and guarantees the aristocracy their full rights of property in landed estates, but they are bound to leave the peasants in their present occupation of the farms they hold, and other lands provided by the new law, in consideration of certain regular payments of rent. During the period of transition, the serfs will be called 'provisionally bound peasants.' At the same time, the peasants shall enjoy the right of purchasing the farms and lands they occupy, and even other estates, with the consent of their present proprietors, in which case the peasants will become free landholders. This new order of things must be carried out within two years, till the expiration of which period the peasants will remain in their present state of dependence on the landed proprietors, and have to fulfil their duties without any opposition. I rely with confidence on the good sense of my subjects."

As might be expected, the publication of this important document, involving, as it does, such a complete revolution in the hereditary system of this empire, has not failed to make everywhere the most intense sensation, which, of course, finds its full expression in the daily press. The *Northern Bee* is amongst the foremost in greeting the measure with the most enthusiastic welcome in an article which commences in this way:—"Down on your knees, oh! Russians—down on your knees and thank the Almighty for this supreme and incomparable happiness vouchsafed to us, for this extraordinary event without a parallel in the annals of history, for this golden page which adorns the national records of this country!" The article then proceeds to dispel any fears that may be entertained of tumultuous excesses produced by the publication of the Imperial manifesto, adding that those who have such misgivings on the subject have a very unjust and imperfect knowledge of the national character of the Russian people, which in such important events is always shown by the most philosophical equanimity and composure, in proof of which the writer of the article quotes the patient demeanour of the Russians during the serious famine in 1840, as well as when the country was visited by the dire infliction of the cholera morbus and other national calamaties, and feels assured that the good sense of the people will teach them to bear with dignified composure and self respect this immeasurable happiness as they evinced when they had to submit to the above misfortunes. At the end of the article the writer—who signs himself "Michael Pogodie"—proposes to form a capital, "contributed from the first copecks earned by free labour," for the purpose of erecting a new church at Moscow, to be dedicated to the national patron saint (St. Alexander Newsky), in which an eternal lamp shall burn, and where public prayers and thanksgivings be for evermore offered up for the welfare and happiness of the magnanimous Czar, "in commemoration of this public act, which immortalises his name, and will glorify his reign to the end of time."

General Count Murawieff-Amoorsky, Governor-General of Siberia, has arrived here from his seat of government, for the purpose of again imploring the Emperor to accept his resignation, on account of ill-health. It will be remembered that the General wished to lay down his appointment last year, and was only induced to go out again to Siberia at the personal request of the Czar. Since then, however, his health has again declined so much as to make it imperative on him to remove to a more genial climate than that of Irkutzk. The Emperor has now granted his request, and accepted his resignation, nominating him at the same time to be Member of the Imperial Council of State. His functions as Governor-General of Siberia will be performed provisionally by his second in command, Major-General Korsakoff.

From Siberia we learn that a further extension of the telegraph is on the point of being completed. It is the section between Tjumen and Omsk, a distance of 632 wersts, or more than 400 miles, at an expense of 39,120 silver roubles, being just 100 roubles, or £15 per English mile, which is, no doubt, much cheaper than a similar work would cost in England. It is thought here extremely probable that the overland telegraph through Siberia to America will be completed before the projected line by the North Atlantic between Great Britain and the Western Hemisphere via Iceland and Greenland.

Sir J. Crampton, hitherto H.B.M.'s Ambassador at this court, has had an audience of the Emperor, to deliver his letters of recall, and at the same time Lord Napier, his successor, who has arrived here with his family from the Hague, had an audience of the Czar to present his credentials.

Lieutenant-Colonel E. Stanton has received his exequatur as British Consul-General at Warsaw.

The following is a summary of the Imperial Manifesto proclaiming the emancipation of the serfs, dated the 3rd of March:—

"The proprietors of landed property preserve the right attached to the same.

"The landed proprietors are, however, to cede to the peasants for their permanent use the dwellings with the ground, which will be allotted to them anew by law, in consideration of the payment of dues.

"During this state of things, which will form a transitory period, the peasants are to be designated 'tributary peasants.'

"The peasants are permitted by law to purchase their dwellings, and with the consent of the landlords, the land also.

"The peasants will then become free landed proprietors.

"This new order of things is to be carried out throughout the Empire, within two years, and until then the peasants remain in their former state of dependence upon the landlords."

A committee has been appointed for the uniform regulation of the affairs of the serfs. It will be presided over by the Grand Duke Constantine. The Imperial manifesto has produced a good impression at St. Petersburg and Moscow.

The *Nord* announces that Colonel Baluzek, one of the Emperor Alexander's aides de-camp, who took an active part in General Ignatieff's negotiation with the Chinese Government, has just been appointed Resident Minister from Russia to the Court of Peking.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, March 23.

The most important political news I have to communicate to-day is the formation of the new Ministry. In my last letter I informed you that the King had sent for Mr. Thorbecke, and charged him with the responsible task of forming a Cabinet, but that gentleman, meeting with unexpected difficulties, gave up the attempt. Equally fruitless were the endeavours of Mynheer Rochussen, the late Colonial Minister; and it was not without surmounting numerous obstacles that Baron van Heemstra has succeeded in forming the Ministry, which is now finally composed, as follows:—

Baron J. P. P. van Zuylen van Nyefelt, to be Minister for Foreign Affairs (formerly at the head of the same department), vice Baron van der Goes van Dirksland, resigned (not to be confounded with his distant relative the Count of that name, whose initials, moreover, are different, being J. P. J. A.). The Baron was Minister for Foreign Affairs from October, 1852, to April, 1853.

Mr. J. A. Jolles, late Advocate-General of the Provincial Court of North Holland, to be Minister for the Ecclesiastical Affairs of the Reformed Church, vice Mr. J. Bosscha, resigned.

Mr. M. P. H. Strens, member of the Second Chamber of the States General, to be Minister for the Ecclesiastical Affairs of the Catholic Church, vice Mr. J. A. Mutsaers, resigned.

Baron Huyssen van Kattendyke, Captain R.N., to be Minister of Marine, vice Mr. J. S. Lotsy, resigned.

Mr. M. H. Godefroi, to be Minister of Justice (was head of the same department in the late Cabinet).

Baron S. van Heemstra, to be Minister of the Interior (head of the same department in the late Cabinet).

Mr. J. Loudon, hitherto Secretary-General of the Colonial Department, to be Minister for the Colonies, vice Mr. J. P. Cornets de Groot van Krayenburg, resigned.

Mr. J. G. H. van Tets van Goudriaan, formerly Minister of the Interior, to be Minister for Finances, vice Baron S. van Hall, resigned.

Major-General E. A. O. de Casembroot, to be Minister of War (head of same department in the late Cabinet).

It will thus be seen that only three members of the late Administration have seats at the new Ministerial Council table.

In accordance with the principles of the Constitution, fresh elections will take place for seats in the Second Chamber of the States General, in consequence of their occupants having accepted office, as follows:—At Zwolle, vacant by the appoint-

Digitized by Google

ment of Baron van Zuylen, van Nyevelt to be Minister for Foreign Affairs, and at Roermond to elect a successor to Mynheer Strens, or re-elect that gentleman, should he come forward again as candidate.

At the same time an election must be held to appoint a successor for the responsible office of Advocate-General of the Provincial Court of North Holland, vacant by the promotion of Mr. Jolles to be Minister.

In consequence of the above Ministerial arrangements, Mr. J. P. Feith, hitherto Referendary of the Colonial Department, is appointed Secretary-General of that Ministry, vice Loudon, promoted to be Minister for the Colonies, and Baron van der Goes van Dirksland is to receive a high appointment at Court—report says Grand Master of the Ceremonies—to console him for the loss of his office as Minister.

An interesting legal question has been mooted whether Mr. Loudon, the new Colonial Minister, is a Dutch subject or not. It appears that his father was an Englishman, settled at Java, who continued to reside there for some time after that island was restored, in 1811, to the Dutch sovereignty, and eventually removed to Holland. According to the law of the 28th of July, 1850, he is not a natural born subject of the King of the Netherlands, his father not having been domiciled in this country for a longer period than three years, when Mr. Loudon was born, which event is said to have happened whilst his father resided in Java. If this account is correct, Mr. Loudon is, to all intents and purposes, a British subject, and, consequently, cannot be appointed Minister in this country or even hold the office of Secretary-General, which he has held for some years, it being a well-known fact that a natural born Englishman cannot lose his nationality under any circumstances whatever; whilst the fundamental law of 1815 expressly restricts the office of Minister of State to Dutch subjects "born within the limits of this kingdom, or its dependencies."

In answer to the above objections, the *New Rotterdam Courant* states that Mr. Loudon was born in Holland in 1824, long after his father had resided here three years and become naturalised; so that, if the above-named journal makes this statement from authority, there can be no doubt of his being a natural born Dutch subject, and, therefore, perfectly eligible to hold the high office conferred on him by the confidence of his sovereign.

The Netherlands Trading Company has issued the following notice concerning the reduction of freights on shipping chartered by them for voyages to India and back:—

"The Netherlands Trading Company hereby gives notice to shipowners that, commencing with the charters signed from the beginning of March, the hitherto usual freight on Government return cargoes will be paid, but with a reduction in the primage hitherto added, which will be in future 5 per cent. instead of 10 per cent.

"The reductions in freight, on account of the size of the ships and number of voyages they have made, remain in undisturbed force.

"It is further ordered that in future all vessels having sailed from a port in Holland direct to Java previous to the end of December, 1859, and wishing to be offered to the Netherlands Trading Company for charter, as well as ships not yet freighted, shall be bound to place the whole of their tonnage at the disposal of the company.

"The Netherlands Trading Company reserves to itself the right of making whole, or partial, or no use of the tonnage offered, at the freight of 90 florins per last in full for the usual goods, with the usual reduction for heavy articles."

From the above it appears that the return freights are reduced 5 per cent. These freights, however, still amount to one hundred and ten florins per last of two tons, with the usual reductions for vessels that have made more than nine voyages, or are of the inconvenient size of more than 800 tons measurement, which for the year 1859 were subject to a reduction that left a profit to the company of four florins thirty centimes per last. The favoured shipowners who charter their vessels to the Government—or the company, which is much the same thing, as it is all one concern—have, however, no reason to complain, when we learn by the most recent advices from Java that vessels were offering to load produce at the different ports of that island at eighty to eighty-five florins for coffee and sugar to this country, whilst not long ago vessels might have been secured at as low a freight as thirty-five florins! And yet the shipowners make a great cry out against this trifling reduction as an innovation that must infalliably lead to the utter ruination of the national shipping interests, forgetting, however, the protection they enjoy from the countervailing duties in their favour, and the other important advantages reserved exclusively for the Netherlands flag, both in the mother country and the colonies. Holland may be considered an essentially maritime country—perhaps, in respect to its size and population, quite as much so as England. Shipping is a favourite investment for capital. Children are accustomed to the sea from their earliest youth—the interest taken in the different yacht clubs and regattas are quite national; whilst the country to which Peter the Great came to learn practical shipbuilding has always been famed for the solidity of construction and the general safety and seaworthiness of their vessels. And yet fears are entertained that the above-named reduction in the primage will open the door to parsimonious economy in fitting out vessels in future, and the supply of second-rate materials, such as cordage, sails, and chain cables, and tend to lower the standard and reputation hitherto enjoyed by Netherlands vessels in the estimation of the rest of the maritime world.

In the meantime, the noisy opposition of the shipowners appears not to have been totally disregarded, for the Netherlands Trading Company are again making inquiry for further tonnage for India, at the usual freight, but with the former primage of 10 per cent. The vessels tendered must be ready for sea by the 10th of April, and those on their passage out must be placed at the disposal of the company's factory at Batavia on or before the 10th of August next. The clause relating to the obligation for the outward cargo is totally abolished. The company further advertises for tenders for a vessel of about four hundred tons to take a cargo of light measurement goods and fifty lasts of heavy commodities from Holland to Sumatra, and bring back a return cargo of colonial produce. To be ready to load on the 9th of April, either at Rotterdam or Amsterdam, as may be required. Offers open till the end of this month.

H.R.H. the Prince of Orange is appointed Inspector-General of the Cavalry.

The steam corvette *Amsterdam*, Capt.-Lieut. J. P. Muller, sailed from Nieuwe Deep on the day appointed for her departure to the East India Station, under the usual salutes from the batteries. The three Malays, Siding Serang, Kasiderie, and Pa Suno, who were lately convicted of piracy in this country, and were sentenced to death, but received a pardon from the King, were sent home in the *Amsterdam*, and not in the troopship *Hercules*, as stated in my last, counter orders having been received by telegraph just as the latter vessel was getting under way.

Captain J. Bouten, commander of the merchant ship *Kosmopoliet*, lately arrived from the East, has had conferred on him the insignia of Knight of the Order of the Crown of Oak.

The Senate of the Free Hanseatic City of Bremen has appointed Mr. Rudolph Heinsen, merchant at Shanghai, and Mr. George Wilhelm Schwemann, merchant at Foo-chow-Foo, to be Consuls for that republic at the above-mentioned ports respectively.

The Danish Government has appointed Mr. T. C. Heuck, merchant at Honolulu, to be Consul for the Sandwich Islands.

Mr. Hirschfeld, lately appointed Danish Consul at Swatow, having died on his passage, the Consulate is again vacant.

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

NEW YORK, March 10, 1861.

MONETARY AND COMMERCIAL.

Since the inauguration of Lincoln as President of the United States, on the 4th inst., the public mind has become more quiet, though, so far as can be seen, political troubles look as unpromising as ever, especially the hopes of the re-union of the States, which have become divided. Contrary to expectations, the New Tariff Bill before Congress passed both Houses within a few days of its close; it was modified in some respects. The tax on tea and coffee was struck out; still it is a very objectionable and oppressive measure; although it will act strongly against many descriptions of English and French manufactures; it fails to give satisfaction to the commercial classes, as its main features look to the protection of manufacturers at their expense. It was considered unwise and impolitic to adopt such a measure in the present divided condition of the States, especially as the policy of the Confederated States of the South looks to a policy of free-trade. It will also fail, as all high or prohibitory tariffs do, to yield a revenue.

Since my last letter the money market has been without material alteration, the rates in the main ruling pretty steady, at 6 to 7 per cent. on call, and first-class paper, at 7c., 8c., and 9c.

The new (8 millions) United States Loan, which was taken at 90¼c., has since been sold at 91c. to 91⅜c. for those with coupons annexed, and at 93c. to 93¼c. for the registered description.

The previous Bank statement exhibited the enormous balance of $38,000,000 in specie, about $121,000,000 loans, and $89,000,000 deposits. The returns this week show $34,000,000 in specie, $119,000,000 in loans, while the deposits remained about the same. Sterling exchange rules steady, at 105⅜c. to 106c. for Bankers' Bills, and at 105¼c. for Merchants' Bills.

Digitized by Google

The previous buoyancy in East India and China goods, previously noticed, has been sustained. The enhanced duties on spices has improved prices for many descriptions, as also the value of linseed, &c.

TEA has been in more general demand, and prices for both green and black have become quite firm. Sales of oolongs and low grades of green have been made at an advance of two cents per lb. within the past week or ten days. The market closed with a buoyant feeling. We also report 2,000 short oolong, and 2,500 ditto green at full prices.

TIN is in better demand, and higher prices are paid for both Banca and Straits; 600 and 700 pigs of the former were sold at 26c. to 27c. each, now held at higher rates, and 900 ditto Straits at 26c. cash. The imports during February embraced 12,000 pigs, against 8,000 last month.

INDIGO is in some better inquiry, though sales have been limited; about 25 to 30 of Manila, and a small lot of Bengal on private terms. Imports for February were 261 cases and 751 ceroons of all kinds, against 71 cases and 824 ceroons for the same time last year. Small sales of opium were making at $5 62½c. to $5 35c.; 200 bales gambier at 2¾. Small lots of ginsing at 45c. for Northern, and at 55c. to 56c. for Southern.

COPPER.—The market has been sustained with a good demand from the trade, while sales of Java have been pretty freely made in mats at 16½c. time, and 2,000 pockets Singapore sold at Boston at 16c. 6 months. The stock here on March 1st embraced Ceylon, none; Manila, none; Singapore, 200 bags; Java, 500 bags.

SUGARS have been active, and prices better, as a general thing. The sales of Manila and China have not been reported to any material extent. The stock of East India and China on the 1st inst. was as follows:—China bags, 42,374; Manila, 77,675; Siam, 11,661; Penang, 3,357; Batavia, 188 baskets.

RAW SILKS.—The transactions were high, comprising about 60 bales Taysaams, and 50 cases Canton, within quotations, which are lower; there is, however, more inquiry for fine silk lately. Imports, Jan. 1 to date, 500 bales China, 925 cases Canton. Deliveries, Jan. 1, to date, 800 bales China, 200 cases Canton. Stock, March 1, 1,350 bales and cases unsold.

HEMP.—Manila continues in good request, with sales of 3,200 bales at 5½c. eight months, and 6,000 to arrive at 5c. six months. Total imports, foreign, January 1 to February 28, 1861, 19,658 bales. The stock of Manila embraces 28,379 bales.

FIRE CRACKERS.—A sale of 1,000 boxes No. 1 Canton has been made at private terms, and 4,000 do. No. 1 40 packs on private terms.

SPICES.—The market was firm, though not very active. The sales have embraced 2,300 bags pepper at $8 8½c. to 8¾c. cash, nine and six months time; about 17,000 mats cassia at 18c. to 18½c.; 25 bales cloves at 8½c. now held at 9c.; 70 cases mace; 10,000lbs. nutmegs, No. 1, at 42½c. to 45c. six months; 1,900 bags Singapore pepper at 8c. in bond and cash. Imports: pepper from January 1 to February 28, 18,265lbs., foreign and coastwise.

SALTPETRE.—Sales in Boston: 500 bags crude at 8½c. to 9c. per cwt., six months.

The following table gives the total exports for the week, and since January 1, 1861, at this port.

	1859.	1860.	1861.
Total for the week	$1,484,214	$2,089,372	$2,497,058
Previously reported	7,451,401	11,541,967	21,421,537
Since January 1	$8,935,615	$13,631,339	$23,918,595

ARRIVALS.—Kathay, Stoddard, at New York, March 5, from Amoy.

DEPARTURES.—Penguin, Butler, from New York, Feb. 27, for Hong Kong; Daylight, Sanger, from New York, March 5, for Hong Kong.

CASUALTY.—Hankow, Sands, which cleared Feb. 18, for Hong Kong, returned 24, having experienced some damage in the Gulf Stream.

LOADING.—At NEW YORK and SINGAPORE.—For Batavia: Surprise, Ranlett. For Hong Kong: Hotspur, Johnson; N. B. Palmer, Low; Lark, Mary.

At BOSTON.—For Batavia: Cromwell, Symmes.

JAPAN AND THE WESTERN POWERS.

[From the *New York Herald.*]

Our last news from Japan was not of a very satisfactory character. There was a great stagnation of foreign trade, owing chiefly to American gold being rated by the Japanese at sixty-five cents per dollar, and silver itzabus, which are really worth only thirty-three cents, being estimated at forty cents. Such an inequitable arrangement with regard to the currency is in itself an insurmountable drawback on the purchase of Japanese wares, and the foreign merchants out there have consequently to rely more upon their imports than their exports. We, however, trust that very soon we shall hear of an adjustment of this vexed question, by the agency of the late Embassy to this country, the leading members of which devoted considerable attention to the subject, particularly at the Mint in Philadelphia, where they spent two entire days in witnessing the process of assaying their various coins. There is no doubt but that a strong party exists in Japan hostile to foreign intercourse, and that at present the country is passing through a revolutionary ordeal in respect of opening the empire to intercourse with the Western nations. That the Liberal party will triumph in this age of the world is certain, but we are sorry to see that the conduct of the English Consuls at Yeddo and Kanagawa has been such, both public and private, as to give the Conservatives fair ground for a good argument. In their official capacity these gentlemen have been extremely arbitrary and obnoxious, and in private life they have displayed a libertinism which cannot be other than a reproach to the British nation. One of these has recently distinguished himself, not only by the crime of seduction, but of murder, for he shot the father of the woman he had wronged.

The recent exploits of the British and French in the East are, however, working such a prodigious effect upon the native mind that the Japanese stand in awe, and are afraid to say even bah to the British goose. In this impression the visit of their countrymen to the United States cannot but confirm them, for the Japanese had here afforded them a good idea of the powerful machinery which may be brought to play in modern warfare, and of the small chance of deceiving or frightening us their canvass fortifications would possess. It it is quite possible, however, for foreign nations to gain all the advantages of trade with Japan without resorting to a threatening policy, or invading the sanctity of Japanese homes, and it is very discreditable to do either, and will tend more to prejudice the entire Japanese community, but particularly the conservatives, against us than anything else. It is but a poor victory if the West takes advantage of the weakness of the East to commit uncalled-for offences against Government and society there. It is a good thing to have power, but it is a still better thing not to abuse it.

The Japanese, we observe, are contemplating sending an Embassy to England in the ensuing summer, but they are for the moment at a loss for a vessel and a crew to make the required voyage. They have asked Mr. Townsend Harris if they can get either or both from the United States Navy, but Mr. Harris was unable to answer so unexpected a question. That, by hook or by crook, the Japanese will send an Embassy to England, we, nevertheless, feel convinced, and that they will extend the compliment to France and the other nations with which they have executed treaties is no less probable. They may perhaps adopt the plan of killing two birds, or more, with the one stone, and allow the Embassy alluded to to make the round of the courts of Europe. Such a diplomatic excursion would make the realm of the Rising Sun something more than a nine days' wonder, and very likely set an example which would be followed by the Celestials of the great tea land. The capture of Peking has elevated Asiatic opinion of "outer barbarians," and increased the prestige of all the Western Powers. Russia would not have been able to negotiate the treaty she did at the close of last year only for British and French arms. It is the national failing of England, however to be aggressive rather than conciliatory. John Bull is easily put into a high state of dudgeon, and then he will listen to nothing but the beat of the drum and the cannon's roar. England and France have paid the bill which has bought Russia her tract of what was a few weeks ago Chinese territory, and her advantages of communication with all China; and, omitting the cost of entertaining the shaven headed Japanese, we shall gain more in the East by the arts of peace than the allies have by resorting to war. We look with no jealous eye to this proposed Embassy to Great Britain. The bamboo-complexioned gentlemen will doubtless be a source of intense curiosity, and an ample fund of amusement wherever they go; and it is to be hoped that both the visitors and the visited will be the better for the arrangement.

Correspondence.

PROPOSED CHINESE COLLEGE AT SOUTHAMPTON.

(To the Editor of *The London and China Telegraph.*)

SIR,—Mr. Godwin, of Newbury, who does me the favour of transmitting his letter to Mr. Stebbing, formerly resident here, was the first to suggest the establishment of a Chinese professorship at King's College, London, and the first to encourage it by giving twenty guineas towards it.

The late Sir George Staunton, Bart., M.P. for the southern division, who was thoroughly conversant with Chinese matters, and had been presented to the Emperor at Peking, in Lord Macartney's embassy of 1793, assisted this project, on my application, by a donation of 100 guineas, and by his extensive influence effectually promoted it. Upwards of £2,000 was raised. His Royal Highness Prince Albert, with his intuitive foresight, and uniform appreciation of everything important and consequential, gave his £100. The East India Company and the Right Hon. the late Lord Bexley, £200 each; Mr. Lancelot Dent, Messrs. Coutts, and the late Duke of Portland, £100 each; his grace having subsequently sent me £50 for Chun di Quang, a Chinese Christian convert, who the Bishop of Victoria took back to Hong Kong with him. After a while the principal of King's College informed me Lord Clarendon had then appointed sixteen of the Chinese students to place in China. Dr. Stace's son, returned from Hong Kong, told me he "knew them all." Mr. Forrest and Mr. Edkins (mentioned by Lord John Russell in the Commons' debate, last night, on Colonel Sykes's motion), student interpreters in the British embassy, are of the number. I remember Sir George Staunton saying—"Those young men may rise up to stipends of £2,000 a-year."

As far as pecuniary impulse goes, this may stimulate some of our "rising generation" to acquire a language spoken by upwards of three hundred millions of our fellow-creatures, and which might be infinitely more useful to themselves and others than the study of dead and obsolete languages; and, with reference to the higher aim—Protestant missionary motive—I cannot better describe it than in Mr. Godwin's words, "The bare contemplation of a civilised but unchristianised population embracing one-third of the whole human species, born to the same immortal destinies as ourselves, but strangers to the same glorious hopes, almost bewilders the mind with conflicting emotions; but, amidst the alternation of hope and anxiety, one conclusion is certain, that such a harvest of souls now presents itself to the spiritual husbandman as never before has courted and never again will court the sickle until that day when the angels shall be the reapers; and cold, indeed, must be that heart which does not thrill with trembling exultation at the thought of being allowed to assist, however humbly, in gathering these precious sheaves into the heavenly garner."

A gentleman who accompanied Lord Elgin to Japan leads me to hope the most accomplished Anglo-Chinese scholar, Mr. Wade, the secretary to the British Legation at Peking, on his return, and with the aid of native literati, might undertake the object Mr. Godwin's letter propounds. I am not sure Cambridge Alma Mater may not be competing with her juvenile sister at Southampton for the "Professor." A "chair" might very well be instituted at each of these "Universities." I have written to Mr. Wade. Some may infer from Mr. Godwin's letter the Hartley Institute has funds for effecting it. Had not the original legacy, by law expenses, &c., been reduced from £103,000 to £40,000, subject to a further abstraction of £8,000 legacy duty, all the objects the will specified might have been carried out. It can now only be done by the supplemental aid of contributions. If anyone is disposed to imitate those illustrious and eminent persons whose names I have mentioned (more or less), I shall be happy to be a medium in placing their deposits in the hands of the Hampshire

Digitized by Google

Banking Company, to the credit of the Mayor and Corporation, for the time being, as permanent trustees of the Hartley Fund.—I am, sir, your obedient servant, JOSEPH TOOMER.

Southampton, March 13th, 1861.

MR. GODWIN, F.S.A., TO MR. J. R. STEBBING, OF SOUTHAMPTON, (ABRIDGED.)

SIR,—As a former inhabitant of Southampton, still retaining a grateful remembrance of much kindness received there from all classes, I have never ceased to watch the progress of your town with interest, and to hail her prosperity with pleasure. Of course the munificent bequest of Mr. Hartley has not been regarded by me with indifference, and the opportunity which it appears to present, of promoting, not only the interest of science and literature, but of raising the position, and augmenting the influence and resources of your town, has induced me to trouble you with the following remarks.

Among the many excellent purposes to which the fund bequeathed and the institution so happily inaugurated by our noble Premier may be made subservient, I know of none more consonant with the design of the bene factor—more beneficial to the town—or more extensively useful, than the appropriation of a portion of the building, and a part of the income to the cultivation of Oriental literature; more particularly to the diffusion of a practical acquaintance with the Chinese language.

A very small contribution would suffice for this purpose, all that is at present required being a class-room, one or two private rooms, a portion of the library, and an allowance of £250 per annum for the salary of the professor or teacher, and for incidental expenses.

The Peninsular and Oriental Company, having selected Southampton for their great English port, it is important for your town to maintain this enviable distinction She should at once arise and show herself worthy of her high destiny of being the grand emporium of the East. She should provide and render as accessible as possible all that can be required by those who seek communication with that quarter of the globe, especially information o every kind, both commercial and statistical. As Govern ment Commissioners, merchants, missionaries, and travellers would embark from her port, they would naturally feel disposed to sojourn where they could be supplied with that knowledge which would conduce to the success of their future plans, and Southampton should place herself in a position to offer them this advantage, and to render it more available by means of resident consuls, interpreters, and agents. Nothing would so effectually enable her to fulfil this, her proper mission, as the establishment of a good chool, where the language should be taught by a native Chinese, or a person familiarly acquainted with it by residence in that country. This would, I doubt not, be the commencement of an Oriental College; mercantile establishments, Government institutions, and possibly missionary schools, would follow.

I am happy, in conclusion, to state that should the town of Southampton be disposed to adopt my proposal, I have reason to believe that one of the first Chinese scholars of the day, now resident in China, and holding a very important office in the British Legation there, with the assistance of native linguists, would not be indisposed to place his invaluable services at your command.

A letter has been sent us from Mr. Edward K. Stace, of Hong Kong, now in England, addressed to Mr. Toomer, from which we extract the following:—

"I perceive that in a paragraph in the *Ham shire Advertiser* of the 16th inst. I am mentioned as informing you that I was acquainted with the student interpreters of China. I feel quite pleased at being an acquaintance of these estimable, intelligent young men, who, by their industry, ability, and integrity, are acquiring for England a noble name in China. Without the aid of these young men the treaty with China would have been almost useless, since without a proper representative its conditions could not have been carried out at the different posts. Now, however, thanks to the foresight and patriotism of the persons named by you in your communication to the above paper, we shall find the treaty to work satisfactorily. I dare say the efforts of these praiseworthy persons made little or no stir at the time, yet those who have lived in China, and where the necessity for a high-toned class of interpreters is so clearly seen, can scarcely exaggerate the importance of the system of student interpretership to England's commerce, and to what some may deem of more value—her honour as a nation.

"I refer to the Chinaman you mention, Chun ki Kwang, as an instance of the slight dependence to be placed generally on Chinese educated in the English language for the object of promoting the better or Christian intercourse of the two nations. In the absence of the Bishop, Mr. Chun quarrelled with the Colonial Chaplain, and quitted the roof of St. Paul's College, betaking himself to the trading part of Hong Kong. Here he got quite entangled in merchandise, in the traffic of sugar-candy, dried fish, and opium.

"I am convinced that if there were more mutual knowledge of each other's language, wars with China would be more difficult to get up. As with individuals, angry words and the argument *ad hominem* spring oftenest from misunderstanding."

CHINESE PIRATES.

(To the Editor of *The London and China Telegraph.*)

SIR,—The author of "Twelve Years in China" has lately favoured the public with a pamphlet, "Is Our War with the Tartars or the Chinese?" and Lord John Russell with a letter on the same subject.

It is not my purpose now to show that Mr. Scarth's advocacy of the Chinese rebels, is in a great measure unwarranted, and based on what I believe to be imperfect information, although I admit that Mr. Scarth has had opportunities to acquire more knowledge of some rebels than others could, still he must excuse me from believing that he rather outsteps the limits of modesty when he expresses himself as he did in a letter which appeared some time ago in the *Globe*, that he is possessed of "a knowledge of it (the Chinese question) that must be far in advance of that of most people in this country." Nothing like boldness and assurance to ensure fame and success; still a little prudence is recommendable, and arguments advanced should be founded on facts. My attention has lately been drawn to several cases of piracy committed against foreign shipping on the coast of China, and this induces me to notice Mr. Scarth's pamphlet, at page 14 of which he says, "and the only instances known of their (pirates) attacking vessels under a foreign flag were when these vessels were employed in convoying native junks." The best answer to this is Art. LIII. of the recent Treaty, viz., "In consideration of the injury sustained by native and foreign commerce from the prevalence of piracy in the seas of China, the high contracting parties agree to concert measures for its suppression." It is here admitted that piracy is injurious to foreign as well as native commerce, and no one acquainted with the recent history of China can doubt that such is the fact.

Within a "twelve years' residence" piracies have occurred on foreign shipping, causing loss of property and lives. I have no means at hand to ascertain every case, but recollect some cases, viz., on the *Celestial, Margaret, Emma, Privateer, Torrington, Petrel, Polly, Omega, Caroline, Zephyr*, when in search of the *Nymph*, which in 1853 had a narrow escape, and is supposed to have finally fallen into the hands of pirates and every one on board murdered by them, at or near, I believe, Wangchew, and numerous other cases, to say nothing of vessels never heard of, the fate of which is very doubtful.

You, Mr. Editor, may perhaps recollect the murder of the Rev. Messrs. Lowrie and Fast, Mr. Vaucher's attack, and narrow escapes of others, such as Messrs. Pages, Orense, Evans, and Dumayne. The case of a French lady detained for some time by pirates, and other cases, might be stated if I could refer to old Chinese newspapers: be it enough for to-day to remind you of the case of a Dutch vessel, loaded with coals, boarded by Chinese pirates, who, on finding the cargo not tempting enough, congratulated the captain on not being an Englishman, as, in that case, they would have murdered him and his crew.

As the coasting trade of China will fall more and more into the hands of foreign shipping, and thus displace a number of native sailors of their employment, it is not unnatural to suppose (considering also the natural propensity of the Chinese) that piracy may increase to a great extent; and it is, therefore, necessary that the public should know the actual facts about it. As to those pirates who assume the Taiping war-flag, and call themselves patriots, they undoubtedly deserve great credit for having, even in China, discovered the standard of international law now applied in some other parts of the old and new world—a sure indication of the progress of civilisation!

I enclose my card, and remain, sir, yours respectfully, J. F. W.

London, March 8th, 1861.

(To the Editor of the *London and China Telegraph*).

Sir,—In one of the last numbers of your valuable paper I met with a correspondency from Hamburgh, in which it was reported that very unfavourable news about the Prussian Expedition to Japan was received from Singapore, especially that besides malignant fevers, scurvy and small-pox, &c., had done great injury to the crew of the *Elbe*. As physician of this vessel, I consider it my duty to contradict those reports, which are wholly unfounded. During our stay at Singapore there was the best state of health on board of all vessels in the harbour. Only in the last days, after a stay of twenty-two days, when the *Elb* was at New Harbour in dock, the crew was affected by climatic fever, that common prowess of acclimitisation to which almost everybody is subjected in tro pical climates. Not a single soul died on board, and even in Hong Kong harbour, where the epidemical Hong Kong fever was prevalent in September and October, not a single loss has been undergone. You will favour everybody who is interested in our fate, sir, if you would kindly admit these lines into your highly-estimated paper, and even more still, if you would state that the report of the loss of the *Thetis* with nearly almost all hands, given by the *North China Herald* (October 21) is a mere fiction of some idle talker. Allow me, sir, to sign myself,

Yours very obediently,

C. FRIEDEL, D.M. & C.

Yokuhama Roads, Jan. 1.

London Gazettes.

The Queen has been pleased to confer the honour of Knighthood upon Colonel George Everest, C.B., and F.R.S., on the retired list of the Bengal Artillery, formerly Superintendent of the Great Trigonometrical Survey, and Surveyor-General of India.

The Queen has been pleased to confer the honour of Knighthood upon Colley Harman Scotland, Esq., Chief Justice of Madras.

Mr. J. J. Enslie and Mr. Marcus O. Flowe s have been appointed interpreters at Japan, and passed their examinations.

DEATH OF SIR JAMES DALRYMPLE HAY, BART.—This respected baronet died on the 19th instant at his seat at Wigtonshire. The late Sir James was son of the first baronet, Sir John Dalrymple, by the only daughter and heir of Sir Thomas Hay, Bart., of Park, who, on inheriting whose estates in right of his wife, in 1794, assumed the name of Hay. The deceased was born July 26, 1789, and married, first, September 1, 1819, Elizabeth, daughter of Sir John Heron Maxwell, Bart., by whom, who died in February, 1821, he had an only son, Captain John Charles Dalrymple Hay, R.N. The late Sir James married, secondly, in March, 1823, Anne, daughter of Mr. George Hathorn, which lady died in July, 1838. The late baronet is succeeded by his son above named, who married, in 1847, the third daughter of the late Lord Napier. As flag lieutenant to Admiral Sir Thomas Cochrane he participated in the operations in Maluday Bay, and on the coast of Borneo in 1846. He was commander of the *Columbine* and senior officer at the destruction of piratical vessels in Bias Bay, China, and in Tonquin river in 1849, for which he was promoted to captain, and received a service of plate from the merchants in China.

LONDON, FRIDAY, MARCH 29, 1861.

LORD JOHN RUSSELL ON MR. MOSS'S CASE.

OFFICIAL people all the world over, so far as their own actions are concerned, have rarely been wanting in the effrontery to maintain that "What is, is Right." It is a pleasing doctrine, no doubt, but to extend it to its legitimate results, it is necessary that officials, with reference to the actions of those who differ from them, should declare its converse to be equally true, and, consequently, when required to do so, they never hesitate also to affirm that "What is, is Wrong." To accomplish this effectually, their will is not greater than their power. They can generally have things their own way; they can colour and represent them just as they please; and when called upon to show that they are in the right, they take especial care to produce only so much regarding the points in dispute as to prove their opponents to be entirely in the wrong. Nay, more, they will even go the length, as Mr. DUNLOP has lately shown us, when the other side are not to be silenced, of "cutting and "garbling" their statements, and presenting extracts to establish a case which they were originally intended to disprove. To contend against men possessing such great advantages is, it must be confessed, a hopeless task. But, although what has been said and done may remain unaltered, truth is great, and it will prevail; and, therefore, with a view to brush away from a plain subject the dust by which it has been obscured, a few remarks may not be deemed out of place with reference to Lord JOHN RUSSELL'S statement in the House of Commons on the case of Mr. Moss.

We are happy to observe that his Lordship does not directly defend Mr. ALCOCK'S conduct. He merely tells us what that official thought and did in this matter, without expressing any opinion as to the legality of his having added three months' imprisonment to a sentence already decreed. Few are deemed so learned in constitutional law as Lord JOHN RUSSELL, and we should therefore like to hear whether, in his opinion, Mr. ALCOCK did not in this case take upon himself to exercise a power which is denied even to Majesty in this country. If any one in England were sentenced by a magistrate for any offence to pay a fine, and such were considered insufficient as a punishment, could even the highest authority in this kingdom add to that sentence a term of imprisonment? And can what is illegal here be said to be legal when performed by a subordinate authority in Japan? It is evidently to be understood that what the FOREIGN SECRETARY advanced on this head is to be regarded simply as Mr. ALCOCK'S statement, which can easily be shown to be as inconsistent and illogical as his conduct was undoubtedly contrary to all law. To do this, the plain facts only are needed. Three merchants sat on Mr. Moss's trial, in conjunction with Captain VYSE. A finding was arrived at by the latter official, in the justice of which those merchants could not agree, and, consequently, as assessors, they refused to award either fine or punishment of any kind. Captain VYSE alone found Mr. Moss guilty, and, contrary to the opinion of the assessors, delivered the sentence, acting, it is generally believed, under instructions from his immediate superior in authority; and because the assessors could not concur in the sentence, Mr. ALCOCK, his Lordship is reported to have said, declared that "they were not competent to give an opinion on the innocence "or guilt of the accused," and was highly indignant that they did not blindly punish Mr. Moss whether he was guilty or not. This, according to the FOREIGN SECRETARY, is Mr. ALCOCK'S statement, and it appears to have passed unchallenged in the House of Commons. But it will be clear to all people, whose faculties are not obscured by pride or passion, that those merchants, sitting as assessors, must have been appointed to assess something; that the mere fact of their being assessors implied that they were to form their own opinion as to the innocence or guilt of the accused; and that to tell them that they were placed there to concur in a sentence, whether it were right or wrong, and in the justice of which they were not competent to decide, was nothing but a piece of supercilious ignorance or presumption.

Well may Lord JOHN RUSSELL decline to offer any opinion of his own as to the legality of such proceedings as these. From the beginning to the end of them, officialdom in Japan, with persistent folly and wrongheadedness, resolutely refused to go right. Even when they had everything their own way, and they desired to go right, they went wrong. Captain VYSE sets aside the opinions of the assessors; Mr. ALCOCK disregards the opinions both of the assessors and of Captain VYSE; and when the victim is fast in their power, the warrant for his imprisonment is informal in three different ways. It is dated ten months before the sentence was passed; it is founded on the authority of an Order in Council which had been repealed; and it directed the Chief Justice at Hong Kong to deport Mr. Moss to England, after the term of his imprisonment had expired. After this we should be prepared for anything coming from Japan. The wonder is that these Japanese Dracos, in the garb of English Consuls, did not order the Chief Justice to decapitate their prisoner first, and deport him afterwards, for he had just as much authority to execute the one sentence as the other. Luckily for Mr. Moss, the seat of judgment at Hong Kong was not occupied by an ALCOCK, but by a magistrate who knew and respected the extent of his power and jurisdiction. When every step in these proceedings is, as we have shown, marked either by the grossest folly, error, ignorance, or contempt of law, it is hardly surprising that the FOREIGN SECRETARY should refuse to give the papers connected with them until he had first submitted them to the law officers of the Crown. The inference to be deduced from this is certainly open to doubt, for it may be supposed the papers will not be given at all, if the opinion of the law officers should prove unfavourable to Consular authority in Japan. That, however, remains to be seen; but it is impossible not to remark that the mere fact of their having been so submitted points directly to the conclusion that Lord JOHN RUSSELL himself entertains serious doubts on the question.

It is not difficult to raise a cheer in the House of Commons when a pompous philanthropical platitude is uttered there regarding overbearing and offensive conduct on the part of the strong towards the weak. Mr. ALCOCK knew what he was about when he deliberately charged the English residents with "thinking themselves entitled to set at defiance the laws and customs "of Japan." He was furnishing the FOREIGN SECRETARY with an argument which he knew would prevail over every other consideration in Parliament. Mr. ALCOCK is, of course, considered to be right, and his countrymen to be wrong. He charges them, be it observed, not with defiant acts; he accuses them only of "thoughts." But even here we can meet him on his own ground, and prove that he has utterly misrepresented the thoughts as well as the feelings of his countrymen in Japan. The protest which the merchants at Yokuhama addressed on the 10th of last December to Captain VYSE clearly demonstrates the desire of the English residents in Japan to live peacefully and amicably among the Japanese, and far from thinking themselves entitled to infringe their laws, or to set their customs at defiance, they manifestly evinced in that document the liveliest desire to avoid offending even the minor prejudices of the people. All that Englishmen wish for in Japan is to be as free from illegal arrest as they are in their own country, and not to be denied permission to exercise the first and highest privilege of mankind in defending their lives when endangered. It is easy for an officer like Mr. ALCOCK, when he finds himself in an unpleasant predicament, to get up in his own defence a general and indefinite case of calumniation against those who disapprove of his proceedings; but before that case is believed, the other side of the question should in justice be heard. We would, therefore, again express our hope, as we did in our last issue, that our countrymen in Japan may have an impartial hearing, and that they may not, by the national predisposition to decide in favor of the weaker party, be pushed unmeritedly to the wall.

THE DUTCH IN TIMOR.

FOR many years past the Portuguese and Dutch have had settlements on Timor—the most easternly of the group of Sunda Islands, and within two hundred miles of the north-west coast of Australia—and been rivals in their several endeavours to subjugate the native tribes and extend their own separate territory. This state of continual antagonism naturally ended in disputes about their boundary line, which, however, have lately been amicably settled by a State treaty between Portugal and Holland. Though this treaty was agreed to and signed by the two Governments as far back as 1855, great difficulty was experienced in obtaining the needful ratification on the part of the representatives of the nations severally, as the States-General of Holland refused in more than one session to sanction it, so that the Bill was only passed last year. Our correspondent at Amsterdam, in his letter of the 22nd of August, 1860, in the *London and China Express*, No. 43, communicated the intelligence that the treaty had been ratified after receiving the sanction of the Portuguese Cortes, "which, however, was not obtained without a series of long and fiery debates, and a considerable show of opposition." The publication of the treaty in the Dutch official gazette, the *Staats Courant*, did not, however, take place before the 4th of October last.

According to the stipulations of that treaty the frontier line runs between the provinces of Cova and Juanilo on the north coast, and Suai and Lakecune in the southern part of the island. Holland evacuates Pulo Cambing, a little fortified island opposite Dilly, the most populous place of the Portuguese settlement, and of great strategical importance, as it commands the sea approaches to that town. On the other hand Portugal cedes her claims to the islands of Flores, Adenara, Solor, Lomblen, Pantare, and Ombai, as well as the group of islands constituting the so-called Archipelago of Solor; as a set-off to which Holland remunerates Portugal with an indemnity of 200,000 florins.

Timor may fairly be called the most thoroughly neglected of all the Dutch possessions in the East, though it contains all the natural elements of becoming at some future time a valuable and flourishing colony. How little is known in Europe of the population of the island may be gathered from the fact that in an *official* paper on Timor in a late number of the *Tydschrift voor Nederl Indië*, the number of inhabitants is stated on authority "to range between 95,256 and 2,757,119." We have, however, reason to believe that the population is somewhere about 700,000, of whom some 300,000, or nearly one-half, are subject to Holland, not quite so many are claimed by Portugal, and the rest are governed by their own native rajahs, some of whom are suzerains of Holland, and others of Portugal. Some of these rajahs are "black Portuguese," a local appellation signifying their descent from half-caste Portuguese. They are styled Rajah or Fettor, and in some instances even Emperor. Thus the Emperor of Great Sonnebait is one of the most powerful vassals of Holland.

In the year 1852 the Dutch had a dispute with the Rajah of Lidak, a neighbouring chieftain, and an expedition was sent to Atapupu to chastise him, in which they took his son-in-law—a Chinese—prisoner. But as the Rajah did not take this lesson to heart, and the Dutch longed to possess his territory, on which some very valuable copper mines had lately been discovered, a larger military expedition was fitted out in 1857 at Kupang, the chief town of the Dutch settlement, situated near the south-western point of the island. The expedition embarked on the 26th of July, and was composed of a battalion of infantry with some artillery and engineers, the whole under the command of Col. L. J. Kroll. Before attacking the Rajah of Lidak they made a detour to chastise Bakikooi, the Fettor of Takaip, another neighbouring chieftain, who had formerly been a fief of the Emperor of Great Sonnebait, but thrown off his allegiance, asserted his independence, and to prove it, had undertaken a predatory expedition, and exacted tribute from the natives under the protection of the Dutch flag. On the 26th of August they came up with the enemy, ensconced behind their bamboo palisades, who received them with a sharp fire. Judging from the comparatively large number of Dutch officers killed and wounded, they appear to have been good shots, but were soon driven from one position to another till they had retreated to Soni Leo, the capital of Bakikooi. This kampong was also soon taken and burnt, but the victory cost the attacking party more than twenty men killed and wounded. The inhabitants sued for mercy, but the chieftain had retired to the mountains with a handful of his light troops, and determined to harass the Dutch in their flank, as his wife confessed, who was made prisoner. After destroying several kampongs and laying waste the country, the troops eventually retreated after a campaign of fifteen days, but the Fettor continued to assert his independence, and it was only last year that he sent in his adhesion to the Dutch from his inability to vanquish Oppohava, who claimed to be the legitimate Fettor of Takaip.

After this somewhat doubtful success the greater part of the troops were sent back to Java, and there only remained two companies of the 10th battalion of Javanese, a detachment of Europeans, twenty-one in number, thirty negroes, and the armed band of music, with two small mortars, and these were embarked in September under Col. Kroll, and reached Atapupu the next day. After a weary march among the mountains they nearly fell into an ambuscade, but perceiving the danger in time, a peloton under the command of Lieut. Timmermans was sent to dislodge the enemy, which that officer not only effectually did, but followed them in their retreat for more than two hours, when he found they took refuge in a fortified kampong on a steep rock 200 feet high. Finding it inaccessible in front, he proceeded round to the other side, and attacked it with such briskness that the besieged surrendered themselves prisoners after a short defence, when the kampong was burned.

Early the following morning Col. Kroll continued his march over very rugged and broken ground till he came to the range of mountains, on the summit of which was situated the chief kampong of the Rajah of Lidak. Here he found the ascent most dangerous and difficult. In many places the soldiers had to sling their muskets to climb up the rocks on all fours, exposed all the while to a galling fire from the enemy, well sheltered behind breastworks, and concealed in caverns, from which they could take a good aim as the attacking party slowly toiled up the mountain. It was here that Capt. Hamers and two Europeans were wounded, and three native soldiers killed. When they arrived at length at the kampong, the Rajah and his men abandoned it for a still more elevated position, which the colonel twice attempted to take by storm, but without success. He then set fire to the kampong and destroyed the enemy's stores of provisions and water, ultimately making good his retreat, though with a loss of thirty men. The withdrawal of this column without accomplishing the object of its mission may be considered as something very like a defeat, and the Dutch accounts of the affair acknowledge their want of success and loudly praise the great bravery exhibited by their opponents. In the afternoon they reached their camp. The troops were drawn up in a square, and the tents for the wounded, the baggage, and ammunition, were placed on the left wing. A guard of five-and-twenty men was placed over the camp, and sentries posted near the well. Close to the camp was a bamboo jungle which seemed impenetrable. Just before dusk, when the troops were reposing quietly after their hard day's work, they were suddenly alarmed by the cries of the sentinel on duty at the well, and found themselves surprised by a band of four hundred natives, who had approached them unperceived by creeping noiselessly through the jungle. Lieut. Timmermans repaired immediately with his section to the post of danger, but most of his men, having never yet been under fire, fairly ran away, leaving him with but a very few soldiers to bear the brunt of the attack, till the colonel had time to form his men and proceed to his relief, in which he did not succeed without further very serious loss; and indeed the number of their killed and wounded was so great, that after ultimately routing the natives, it was found expedient to retreat immediately further towards the coast, destroying their ammunition stores and baggage in order to move more quickly, and after a very difficult march all night arrived at Atapupu the next day without further adventure. The official despatches glossed over the real discomfiture of the expedition, and spoke only of victory and inflicting summary chastisement on the Rajah.

Of the real state of the case the public in Holland were long kept in the dark, and it was only by chance that the true character of this episode, which gives a lively picture of military life in Netherlands India, leaked out from a comrade of Lieut. Timmermans, whose description of the affair differed greatly from the official bulletins. The reason that induced him to publish a truthful statement of the events of the expedition throws further instructive light on the military operations of the Dutch in the East. After the return of the expedition against the Rajah of Lidak, the whole of the officers—with the

Digitized by Google

single exception of Lieut. Timmermans—received the decoration of the Military Order of William. As all the comrades of this officer protested against his exclusion from the distinction they had all fairly earned, he sent in a remonstrance on the subject. Col. Kroll then sent for him and advised him to withdraw his complaint, or else he should be compelled to charge him with cowardice, as he had with his section run away when the natives surprised the camp at the well. Lieut. Timmermans was of course indignant at this accusation, as it was well known he had stood the brunt of the attack with but few followers, after the greater part of his men had been panic-struck, and continued to make head against the enemy till the troops had formed and come to his relief. So far from retracting his remonstrance, Lieut. Timmermans now insisted on being tried by a court-martial, which was granted him, and he was, after a long and patient investigation, most honourably acquitted. In consequence of this Col. Kroll quitted the service, and Timmermans, who in the meanwhile had been promoted to the rank of captain, was not only decorated with the Order of William, but received the insignia of the Order of the Crown of Oak also. Whilst it is our pleasant duty to record that subaltern officers have the means of obtaining redress when wronged, on the other hand it is lamentable to contemplate the moral condition of a service where such acts of petty jealousy are practised by superior officers on their juniors.

Though the above particulars—which we have derived from what we consider reliable authority, and have every reason to believe strictly correct—relate to an expedition in itself but of secondary importance, they serve to throw a peculiar light on the elements on which the Dutch supremacy in the East Indies is based. We see here a few Europeans, with a handful of negroes and native troops composed of Javanese sepoys, subjugate one after the other native rajahs of the same religion and the same origin as themselves. In this description of desultory mountain warfare the original lords of the soil appear to be a match for their foreign subjugators, who act upon the somewhat doubtful principle of *divide et impera*. As it is in small things so it is in more important ones. Were the Javanese, Malays, and other inhabitants of the Indian Archipelago to combine together for their mutual security and defence, or should ever some principle be discovered—such as the Mahomedan religion or some fixed political dogma—to awaken among them the necessity of a union of their joint resources, the Dutch supremacy in the East would be found to totter and be far more weak and untenable, as well as less prepared to go through such a fiery ordeal as that which Great Britain experienced, and from which she came out so thoroughly triumphant in the late memorable mutiny in India.

BANKS CONNECTED WITH CHINA AND THE FAR EAST.

No. III.

In previous numbers we have given detailed accounts of the Oriental Bank Corporation and the Agra and United Service Bank; we now have to notice a Bank which originated in Western India, but has since established itself in London, and struck out for itself a more extensive field of banking operations than was afforded by the original location in the presidency of Bombay.

THE CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

This Bank was originally formed in Bombay in Oct., 1853, under the auspices of the present Chairman, William Howard, Esq., then Advocate-General. Its subscribed capital of Rs. 5,000,000 or £500,000 sterling, was paid up during the first twelve months of its existence.

At the end of the first half-year, with a small paid-up capital and heavy preliminary expenses, it realised a net profit of £3,769, which amount was carried forward towards the formation of a reserve fund. For the second half-year, a dividend at the rate of 6 per cent. was declared, and the sum of £41,032 carried to the reserve fund. Without going more ully into the early details, it may be stated that the Bank continued steadily to prosper, paying regularly dividends at the rate of 8 per cent. until the half-year ending 30th June, 1857, when a dividend at the rate of 14 per cent. was paid, after completing the reserve fund to £50,000, the amount to which it was limited by the deed of settlement.

It is true that at that time, and subsequently in January, 1858, the directors took upon themselves the responsibility of a departure from the strict letter of the deed of settlement, in so far as they did not divide the whole of the surplus profits, but they felt that, were the Mercantile Bank to continue, it would be prudent, considering the very extensive scale of its business, to ask the sanction of the shareholders to their eventually increasing the limit of the reserve fund from 10 per cent. to 20 or 25 per cent. upon the capital. Having completed the reserve fund, they commenced the plan of carrying forward large amounts of unappropriated profit to the account of the next half-year; and the prudence of the step was fully demonstrated by subsequent events. For the half-year ending December, 1857, a dividend at the rate of 16 per cent. was declared, and £38,860 carried forward.

During the four and a-half years the business of this Institution was carried on in the name of the Mercantile Bank of India, London, and China, a return was made to the shareholders in the shape of dividends of 42 per cent. on their capital.

A Royal Charter of Incorporation having been obtained on 22nd May, 1858, necessitated the withdrawal of the head office of the Bank from Bombay to London, where it is now established, under the title of the "Chartered Mercantile Bank of India, London, and China," with a Court of Directors, consisting of seven members, including the Chairman and Manager, who holds office *ex officio*.

We now come to the great commercial crisis which occurred at the end of 1857, and from the effects of which it would be unreasonable to expect that the Mercantile Bank, with its large business, could have escaped entirely uninjured. The losses sustained, however, were far exceeded by the profits, and were less than might have been anticipated from the largeness of its transactions and the severity of the crisis. For a short time numberless and most exaggerated rumours were circulated on this subject, which had the effect of sending the price of the shares at one time below par. They soon rallied, however, and regained their former position, and with but slight fluctuations have since always stood at a good premium.

By the Charter, the new Bank was precluded from commencing business until one-half of its capital (£250,000) had been paid up to the satisfaction of the Commissioners of the Treasury, the same to be evidenced by a certificate under the hands of any two of them for the time being. This certificate was granted to the Corporation on the 22nd day of May, 1858, and the Bank then opened in London for the transaction of business.

The following are the dates on which the capital of the Bank was paid in London:—1858: 11th May, £250,000; 26th July, £60,000; 21st October, £50,000; 19th November, £40,000; total, £400,000. The remainder of the capital, making a total of £500,000, was paid up early in 1859.

The Bombay Agency opened on the 1st July, 1858; the Calcutta Agency, 1st August; the Madras Agency, 1st July; the Ceylon Branch, 1st July; the Singapore Agency, 1st August; the Hong Kong Branch, 1st July; the Shanghai Branch, 14th July, 1858; the Mauritius Branch, 1st April, 1859; and the Penang Agency, on the 1st Feb., 1860.

The first ordinary general meeting was held in London on the 30th May, 1859. The profits then shown for the portion of the half-year during which the Bank had been at work, after paying its charges, and all preliminary expenses connected with obtaining the charter, amounted to £15,109, which was appropriated among the shareholders, being a dividend at the rate of 6 per cent. on the capital, but £9. 15s. per cent. on the amount actually employed during the half-year. Mr. G. P. Robinson, who had been manager of the old Bank in Bombay, was elected a director. In their second annual report at the meeting held on the 22nd May, 1860, the accounts submitted showed a net profit (after providing for all bad and doubtful debts) of £74,650, which was appropriated as follows:—£50,000 for a dividend at the rate of 10 per cent., £20,000 carried to a reserve fund, and £4,670 to the next account.

The premises hitherto occupied by the Bank in Old Broad-street having been found too small for the increasing business of the Company, a lease of a portion of the building in 52, Threadneedle-street, formerly known as the Hall of Commerce, was taken on favourable terms.

The accounts of this Bank are audited half-yearly by professional auditors, which affords greater security to the shareholders and the public than an annual examination.

The third ordinary annual meeting will be held in May next, to receive the report of the directors and the financial statement for the year 1860, which is not yet published, but a dividend

Digitized by Google

of 10 per cent. per annum has been paid for that year, the directors having the power of declaring the dividends. The allowance for the six directors is £1,800 per annum.

The chief manager, Mr. Alexander Anderson, was engaged at its formation, and is now abroad on a tour of inspection; his seat being filled by the Inspector and General Manager, Mr. D. T. Robertson, who was also engaged in the Bank at its formation in Bombay as chief accountant.

The balance sheet for 1860 is not yet published; but at the close of 1859 it was as follows:—

General Balance for the half-year, ending 31st December, 1859.

LIABILITIES.			
Proprietors capital		£500,000	0 0
Current accounts, fixed deposits, drafts, and notes in circulation, &c.		3,238,038	2 4
Profit and loss balance from last half-year	12,898 12 2		
Profits for half-year	36,771 11 10		
		49,670	4 0
		£3,787,708	6 4
ASSETS.			
Cash on hand at head office and branches ..		431,479	17 3
Government securities ..	£25,352 15 6		
Bullion at head office and branches	498,027 12 1		
		523,380	7 7
Bills of exchange, Bills discounted, loans, &c...		2,824,966	15 7
Office furniture at head office and branches ..		7,881	5 11
		£3,787,708	6 4

1859 PROFIT AND LOSS ACCOUNT.

Sept. 15 To dividend on 20,000 shares at 10 per cent. per annum	£25,000 0 0		
Dec. 31. To balance carried down	49,670 4 0		
		£74,670	4 0
1859			
Jan. 1. By balance brought forward from last year		£109	14 4
Dec. 31. Nett profits for the year ending Dec. 31, 1859, after deducting all charges, rebates, Income-tax, and bad and doubtful debts &c.			
Half-year to June 30 ..	£37,788 17 10		
Ditto, Dec. 31	36,771 11 10		
		74,560	9 8
		£74,670	4 0
1859			
Dec. 31. By balance brought down		£49,670	4 0
Out of which there has been paid subsequent to Dec. 31, 1859.			
Dividend of 10 per cent..	£25,000 0 0		
And a reserve set aside of ..	20,000 0 0		
	£45,000 0 0		
Leaving a balance to be carried to next half-year	£4,670 4 0		
		£49,670	4 0

Mr. Lawrence Oliphant, the new Secretary of Legation at Yedo, who proceeds by the next mail, will, we understand, discharge the duties of Consul-General during the absence of Mr. ALCOCK, who has applied for leave of absence.

Mr. Miller, at the Jerusalem, will receive subscriptions for Mr. George Coleman, late of the H.E.I. Company's service, whose useful career has given rise to a movement for the formation of a fund for his support. Mr. Coleman is now 78 years old.

Parliamentary Intelligence.

HOUSE OF LORDS.

RED SEA TELEGRAPH.—(18.) Lord STANLEY of ALDERLEY, in moving the second reading of this Bill, explained that its object was to ensure to the shareholders in the undertaking the benefit of the Government guarantee, which had been given, but in reference to which the law officers of the Crown had advised that some technical difficulties existed. The Bill was read a second time.—(19.) The Earl of ELLENBOROUGH said some better means should be provided for communication between this country and India.—Lord STANLEY of ALDERLEY said that the principal object of this Bill was to correct a clerical error that had been made in the contract between the telegraph company and the Government.—The Earl of ELLENBOROUGH said it was impossible that any efficient telegraph could be laid down without an agreement being come to between the Governments of England and Turkey upon the subject. The Bill then passed through committee.—(21.) On the order for the third reading of the Bill Lord LYVEDEN said he hoped that her Majesty's Government were prepared to say that they would not enter into any future engagement of a similar character with this or any other company without notice to Parliament. The Earl of CAITHNESS wished to express his opinion of the danger incurred in guaranteeing any company connected with submarine works. At one time submarine cables were supposed to to be indestructible; but he could say, from experience as a director of a telegraph company, that they were not. Mr. Robert Stephenson gave it as his opinion that the experience we had of these cables was unfortunate as regarded their destructibility, though he thought they would ultimately be laid over a large portion of the world. Some had worn out or become much decayed in five years, some had endured for ten, and it was probable that others would last for twelve or fifteen years. The construction of an overland telegraph cost £30 a mile, of a submarine £300, and of an underground £120. The maintenance of an overland was £8 per annum, and of a submarine £25. These figures showed the great expense of a submarine as compared with other telegraphs.—Lord STANLEY of ALDERLEY said that her Majesty's Government had learnt a lesson from the unfortunate case of this Red Sea Telegraph, and that they would not give any guarantee to any future company for the construction of any electric lines without previously submitting it to Parliament, and letting the public have a full knowledge of all the circumstances. The Bill was then read a third time.—(22.) This Bill received the Royal Assent.

GOVERNOR-GENERALSHIP OF INDIA.—(18.) In answer to a question from Lord LYVEDEN, Earl DE GREY and RIPON stated that arrangements had been made for continuing Lord Canning in the Governor-Generalship of India for a few months beyond the usual period of five years.

HOUSE OF COMMONS.

NAVY ESTIMATES.—(11.) The House having resolved itself into a Committee of Supply on the navy estimates, Lord C. PAGET prefaced the usual exposition of the several votes by some general remarks upon the state and condition of our naval force. The total amount of the estimates for the year was £12,029,175, against £12,836,100 for last year, which sum, however, included several extraordinary items of charge.—Sir J. PAKINGTON reviewed at some length the principal topics embraced in the speech of Lord C. Paget, adding remarks upon the discipline of the navy.—Mr. BAXTER called attention to a comparison of the strength of the British and French navies, as a reason for reducing the estimates.—Sir M. Seymour, Mr. Liddell, Mr. Bentinck, and Mr. Lindsay, took part in the debate, as did also Mr. Bright, who believed that the estimates might have been reduced by three or four millions.—On the subject of the number of men in our navy, Sir J. ELPHINSTONE said that between 2,000 and 3,000 seamen, in a high state of efficiency, were coming home from China, and he would suggest that they should be retained in the place of an equal number of the worst men in our fleet.—In reply, Lord PALMERSTON said it was impossible to shut our eyes to the fact that the policy of France had been to get up a navy superior to that of England. If we wished to be friends with France we must keep in such a condition that our weakness should not invite attack; and, in respect to iron ships, we were not in that condition. There was no ground for saying that the demand proposed in these estimates was larger than the interests of the country required. Several votes were then agreed to.

SUPPLY.—ARMY ESTIMATES.—(14.) Mr. T. G. BARING made the usual introductory statement, accompanied by details, of the numbers and several heads of expenditure of the Army. The number of men proposed for the current year was 146,044, exclusive of the force in the East Indies, which would raise the aggregate number to 212,773. The sum to be voted was £14,606,751. In the course of his speech he gave some interesting details relative to the Armstrong guns, and referred to recent improvements in their manufacture. He observed that a good deal had been said respecting the guns used during the recent operations in China. Those guns were inferior in range and in accuracy and in every way to the 12-pounders now issued. They were hastily equipped, without any of the improvements which were now being applied, but still the practical test furnished of their efficiency was eminently satisfactory, and the manner in which they were worked did the greatest credit both to the officers and men engaged. He alluded to an article in the *Mechanics' Magazine*, which purported to give an extract from the report of an officer who served in China (said to be Major Hay), but the information was quite inaccurate. The statement was that, though the Armstrong guns under the most favourable circumstances gave very accurate shooting, the casualties to our outlying riflemen were so serious that the guns had to be withdrawn at the most critical part of the action in which they were engaged. There was, he observed, no foundation for this statement; and he read extracts from reports of Captain Millward, who, writing after the disembarkation at Peh-tang, reported all the guns to be "in excellent preservation and fit for work," and added, "this is the eighth time the battery has been embarked or landed since leaving England, each time in boats, mounted and dismounted, never once landed at a wharf, and at Odin Bay landed in a surf." He concluded by proposing the vote for the number of men proposed.—The estimates were severely criticised by Mr. W. Williams, Colonel Dickson, and Mr. Henley, defended by Lord Palmerston, and ultimately the vote was agreed to.

BRITISH SUBJECTS IN JAPAN.—CASE OF MR. MOSS.—(21.) Mr. Alderman SALOMONS asked the Secretary of State for Foreign Affairs whether he could inform the House of the circumstances under which a British subject had been tried at Kanagawa by a court composed of the Vice-Consul and three merchants as assessors; whether the court so composed agreed in the decision come to, and whether the sentence pronounced by the Vice-Consul was fine, deportation from Japan, and three months' imprisonment at Hong Kong; and, lastly, whether the court at Hong Kong had pronounced the imprisonment unjust and illegal, in consequence of which the British subject referred to had been discharged from imprisonment.—Lord J. RUSSELL said that the circumstances were briefly these:—Mr. Moss had gone out shooting, and had killed a wild goose or some other bird. On his way home, when he arrived at Kanawaga, he met certain persons employed by the police of that district, who advanced towards him with their swords. He cocked his gun, and threatened to fire if they advanced; but some other persons behind, employed by the same authorities, took away his gun, which in the struggle went off, and

Digitized by Google

inflicted serious wounds on one or two persons who tried to take it from him. The Japanese seized him and carried him to a place of confinement, from which he was rescued by the British Vice-Consul, who took him to his own house. According to the Treaty and to the orders of Council he was there tried for the offence of having gone out with his gun, and also for the offence alleged by the Japanese, of having deliberately fired at those Japanese who were wounded. The British Vice-Consul had two assessors for the purpose of this trial. It did not appear that the Vice-Consul thought Mr. Moss guilty of the crime alleged by the Japanese—namely, that he had fired deliberately at these persons—but the Vice-Consul referred to an order or notification, issued in 1859, to the effect that it was not lawful, according to Japanese laws and customs, either to carry firearms or to go out in pursuit of game without permission, and he also found that his resistance to the police authorities was likewise a violation of the general order which had been given by the Government. The Vice-Consul, in consequence of these offences, condemned Mr. Moss to deportation from Japan, and also to pay 1,000 dollars as a fine. The two assessors refused to concur in the sentence. The matter was, therefore, referred to Mr. Alcock, who said that the two assessors were not competent in any way to give an opinion on the guilt or innocence of the accused. Mr. Alcock thought the punishment too mild, and he added to it three months' imprisonment at Hong Kong. Mr. Moss was accordingly sent to Hong Kong; but when he arrived there it was found that the warrant of the magistrate was informal. It professed to be given upon the authority of the order of Council, which order in Council was repealed, and there was not, therefore, any justification for the sentence of imprisonment. Mr. Moss was thereupon liberated, not at all upon the merits of the case, but from this technical defect. He was sorry to say that the conduct of Mr. Alcock on one side and the opinion of the British merchants on the other had led to a good deal of discussion and ill-blood in Japan. Mr. Alcock's representation was that between the question of conforming to the Japanese laws and customs on the one hand, and a certain liberty to British subjects on the other, a line ought to be drawn; but he said that many of the British subjects in Japan thought themselves entitled to violate the laws of that country, whereby they excited on the part of the Japanese a great deal of resentment and complaint. The merchants, on the other hand, said it was absurd to suppose that all the Japanese customs, their mode of dress, and various other things were to be observed by English residents. That might be perfectly true on their part, but he must say he thought that Mr. Alcock was quite right in saying that while on the one hand a fair liberty should be allowed to British merchants and others engaged in their common pursuits, yet that to set at defiance the laws and customs of the Japanese was a course of conduct that would lead to very serious results. With respect to the legal question, that must be referred to the law officers of the Crown, and he could therefore offer no opinion upon it, nor could he give the papers until that opinion was given. These, however, were the facts, and he must say he should very much lament if the conduct of the English residents in Japan should neutralise the good effects which the active commerce springing up between the two countries could not fail to produce.

CHINA WAR EXPENDITURE—(22.) Sir S. NORTHCOTE called attention to the mode in which the vote of credit of 850,000*l.* for naval and military services in China for the year 1859-60 had been dealt with, and to the importance of regulating the system of dealing with the unexpended balances of votes for army and navy services. - General PEEL criticised the disbursement of the sum referred to, and supported the views of Sir S. Northcote.—Mr. PEEL gave explanations as to the expenditure of the vote of credit, professing himself unable to see how it could be alleged that there had been any misapplication of the vote.—The CHANCELLOR of the EXCHEQUER at considerable length defended the application of the money, and contended that all information respecting this war expenditure was essentially uncertain, and to say that giving that information tied up the hands of the Government—the same as if half-a-million had been added to the vote for the army, and a quarter of a million to the vote for the navy—is a doctrine that would destroy votes of credit altogether. The Government must have a larger discretion in the application of the money between all the services engaged in the operations of the war. If the hon. gentleman's doctrine is a sound one, no such thing as votes of credit can be asked of the House of Commons. He added that as the subject was to be referred to a committee, he would render every assistance in its discussion.

TEA AND SUGAR DUTIES—(22.) Mr. GREGSON called attention to the Customs duties now levied on tea and sugar, and to suggest to the Government that they should take the subject into their early consideration. The hon. member proceeded to show that the duty on tea bore an undue proportion to the value of the article. The value of tea as imported was 1s. 3d. per lb., while the duty was no less than 1s. 5d. per lb., being more than 100 per cent. as compared with the value; while the Chinese admitted our manufactured goods at a duty of 5 per cent. The reduction of the duty, by increasing the consumption, would be greatly to the advantage of the revenue, as had been shown by past experience. In 1846, when the duty on tea was 2s. 2½d. per pound, we imported 47,000,000lb. of tea, but last year, with the reduced duty of 1s. 5d., our imports of tea were 77,000,000lb. In the case of sugar the same results took place. In 1842 the amount of sugar imported was 20,000 tons; last year it was not less than 400,000 tons. This was clearly the result of the reduced duty on sugar. The CHANCELLOR of the EXCHEQUER declined to enter into a discussion of any subject connected with the duties upon tea and sugar. The facts given as to the growth and the consumption of tea and sugar, and as to the trade with China, were facts of the highest interest and importance. To one administrative question, relating to the classification of the duty upon sugar, apart from the amount of the duty, he took occasion to refer. The subject embraced not merely the classification or non-classification of the lower descriptions of sugar, but likewise whether the uniformity of duty for which he would call is to be extended to refined sugar or not, because the duty upon unrefined and refined sugar is a matter of degree just as much as the difference between different sugars of any other classes. This being so, he was not sanguine that the difficulty would within any reasonable time be entirely overcome. The House then adjourned to Monday, April 8.

OF WHAT BENEFIT TO JAPAN HAVE THE NEW TREATIES, POLITICALLY, SOCIALLY, OR MORALLY BEEN?—COMMUNICATED

(*Continued from page* 177.)

The French now appear on the scene, and their first reception in 1846 was courteous. The same year Commodore Biddle, with two American men-of-war, visited Uraga, to request formally the Japanese to open some of their ports to the whalers of the United States frequenting their seas. His request was answered by an edict, through the Dutch, that all foreign business must be done through the Dutch or the Chinese. Even up to 1852 had Japan maintained its bold position of isolated policy. This expedition was actually ordered by the President of the United States, and yet it failed. Two years later the faint "no" was to become a weaker "yes." The Portuguese had been expelled, the English, Russians, French, and Americans were each in their turn repulsed. True, no force had been used; persuasion, reiterated endeavours, presents, promises, and all the moral power of five of the greatest countries in the world had tried to move the Japanese empire, in vain. She was deaf, or would not hear; and she preferred her happy existence and present state to all the tempting baits held out by unknown wanderers. "She was content to bear those ills she had, and fly from others that she knew not of."

But there is a Providence above who ordereth all things. He saw the time was come, perhaps to gather all his sheep into one fold, and he puts a word into the minds of our rulers, and so it came to pass.

We cannot honour the Portuguese privileges with the denomination or consequence of a Treaty, nor can the miserable existence and career of the Dutch at Firando and Decima be deemed worthy of such a title. Captain Saris, on his visit to Yedo, obtained perhaps the nearest approach to establish an honourable and reciprocal intercourse; but—"*palmam, qui meruit ferat,*" it is to Mr. Fillmore, President of the United States, and Commodore Perry, that belongs the distinction and responsibility of having opened Japan to the five great Western Powers. On March 31, 1854, was signed at Kanagawa the first treaty of Japan:—each successive Power may have improved a little on the original text, but the importan-basis is American. Admiral Stirling, in 1855, obtained the same privit leges, it is true, but the pathway had been trodden down and the way opened.

We all know the immediate rush which the other great powers made on the immolated victim—how, with eagle eye they saw their prey afar off, and how each bettered the other by fresh demands. A destructive volcanic eruption, a decimating cholera at Yedo, and the death of an Emperor, sealed and consecrated the treaties. This was enough to make even Europeans tremble. What, then, must have been the effect on the for-centuries-closed Japan and her people? Stupor, awe, and a confirmed conviction that her gods diappproved of the treaties. And yet, in 1859, when the ports of Kanagawa, Hakodadi, and Nagasaki were opened, what did we find?—the treaties had been made, and they would be recognised and held sacred. True, it was too late to recede. Force, such a force as the simple Japanese cannot even yet imagine, might have compelled them; but who would have been bold enough to strike the first blow? All Christendom would have execrated the monster and his nation.

The ports were opened, and preparations were made for the reception of the expected but undesired guests; in their ignorance of foreigners they knew not what to expect, they had all to learn, and their lesson, I fear, has been a rude one. I arrived in June at Nagasaki, my first news was that even then, the laws of Japan had been violated in one of its most sacred and severe ordinances. A Frenchman had carried to China a Japanese mistress. Here was the beginning. These were Japan's new friends who pledged themselves to the observance of peace and amity, and to respect Japanese laws. All was new to Japan; we, that is our foreign community, most of them unscrupulous specimens of all the nations they claimed the protection of, wished and expected to find money exchanged as at Paris, Custom-houses as well organised as at London, ships as soon and as richly freighted as at New York or Liverpool. Patience was no word in the vocabulary of the new comers. Insults, threats, words of doubtful celebrity met the quiet and wonder-struck Japanese, as often as they endeavoured to pacify their indignant guests.

When too much was exacted, and, while the attempted means of exaction were tried ineffectually, then the Japanese pride, not to be curbed by the presence of men of war representing all the flags of the favoured nations, was aroused, and complete stagnation of business ensued. Blame not the Japanese, the foreign community are alone to blame. No standard of exchange had been previously arranged, all the monies of the foreigners were new to the Japanese; there is but one power in Japan to settle these matters, and that power is at Yedo. The currency question is referred to that capital, and by the energy, tact, and patience of our Minister, aided by his colleagues, it was, at last, satisfactorily assured.

What then! Merchants, or men calling themselves so, owning only some thousand dollars, put down applications for millions, under the gentlemanly names of "Nonsense," "Snooks," "Jack Ketch," "Walker," "Brown," "Jones," and "Robinson." Our minister nobly and instantly branded this outrage on the delicacy and respect due to the panic struck officials with the epithets such ignoble conduct justly merited. Yet these were the men whom the unknown millions of Japan were to receive and welcome! They asked from the treasury of Kanagawa, on the 2nd Nov., 1859, only four months after the opening of the port, exchange in itzabous for 1,200,666,778,244,601,066,953 dollars!! *Quel horreur!* Was this fair, was this honourable, was this the way to win them over?—to wring out of them a treaty, and then insult them in their own treasury and in the presence of their officials? Mockery has its limits, even where ignorance is speechless; patience and good breeding may support, but cannot pardon ridicule and coarseness. Can they like or respect such specimens of their new friends? Surely not.

What followed? No mint could meet such exorbitant demands. Paris, London, New York—all the capitals united, could not have supplied these exigencies. Exchange was stopped—then trade; then idleness on the part of the foreigners. On the part of the Japanese, one feeling predominated and

Digitized by Google

still predominates—a regret that they conceded a treaty to the Americans, a bitter repentance of the signatures of 1854, which the voice of their gods told them plainly was the death-warrant of their former bliss and contentment. The Japanese have gained nothing! They have sold gold at 100 per cent. profit to the foreigner—they have received a few presents—but they are sick of us, and view with wonder no more our fleets, our arms, or ourselves. They may have bought a few yards of flannel, a few bales of Manchester goods, a few toys; in exchange they have offered us, at indescribable profit, nearly all they have to offer. So punctilious are they in carrying out the treaties, so ready are we to profit by their generosity and abuse their confidence!

They have been insulted; they have revenged themselves. Blood has reddened the Japanese sword, and yet we, unmindful of the provocation, already cry for vengeance. We are the lambs, the Japanese the butchers. Believe it not, my friends in England and France! The Japanese are a race worthy of our esteem and affection. The foreigners they have to meet with have disappointed and wounded them in their pride, their sensibility, their institutions, their habits, their hopes, and their desires. Pause, then, England and France, ere you order one gun to be fired on a Japanese! Passion may be difficult to control, but history will not be the less severe.

Thus, then, I have attempted to prove that Japan has gained nothing politically, socially, or morally from the treaties with foreigners. Support me ye who think as I do—examine kindly once more ye who doubt or disagree with me—and tell me where have you seen the social benefits conferred by us on Japan? As merchants we have our end before us, and with patience, time, and honour we may succeed, but as Christians, what have we *not* to do? This is a task which Heaven imposed on us when the *Little Lee* steamed into Yedo with the present of Queen Victoria. Commerce must come, commerce will come, but if the products of this land are to be obtained only by blood and treachery—what good have we done it?

The future of Japan is yet before us—but all who look can see but one crisis. The Japanese are proud, brave, and courteous, they have been wantonly insulted in their pride, tempted too often to show their courage, and, moreover, often treated with contempt by their inferiors, both in manner and respectability. More than half Japan (nearly all the Diamios and nobles) were and are opposed to the treaties. They are ever at hand to press the Government to expel the hated stranger from their shores. They are said to direct the murders which have taken place at Yukohama, in order that the foreigner may attempt revenge and demand redress from the Government, and then let me not think of it!—either Japan ceases to exist or the treaties will be waste paper. C. P. H.

P. S.—The late events at Kanagawa and the forcible arrest of Mr. Moss and Mr. Telge, forms a new phase in our relations, and must be reserved for a future communication.

Naval and Military.

The French troops, which were lately reported as having left Toulon for China, or Cochin China, were by last accounts at Alexandria, from which it is of course conclusive that they intend proceeding by overland route.

The *Terrible*, frigate, Captain F. H. H. Glasse, C.B., has been fitted up, and sent to Alexandria to embark Lord Elgin—who is now on his way home from China—for Trieste, his lordship having, it is said, selected that route for reaching England.

The following letter has appeared on the Fatshan boat engagement:—

"TO THE EDITOR OF THE TIMES.

"Sir,—Having read in *The Times* of the 11th that a medal is to be given for the war in China, with clasps for Canton, Taku, and Peking, I beg to suggest that a clasp should also be bestowed on the officers and men actually engaged in the action at Fatshan, on the 1st of June, 1857, under the command of Sir Michael Seymour and Commodore Keppel. It was a most dashing affair, well carried out, and attended with the most complete success under very great difficulties. The force engaged consisted of about 1,400 officers and men, and the cost of the clasp to perpetuate this brilliant boat action would not exceed the sum of £150, which I am sure would be granted with pleasure by the country.—Your obedient servant, FATSHAN."

The Times contains the following notice of gunboats and China:—"Letters received from the gunboat *Janus*, dated at Hope Sound, January 15, state that she had been driven on shore on the 19th of December, during rough weather, by a junk driving down athwart-hawse of the *Janus*, at 3 A.M. that day. At low water the crew could walk round the ship. Everything possible to remove was taken out of the vessel, but it was the 28th of December before she was got afloat again. The weather was exceedingly severe, the thermometer having been down to 20 degrees below freezing point. Several of the crew had their hands very much frost-bitten. The *Clown* gunboat had been driven on shore at the mouth of the Peiho, and was not expected to be got off before spring, even if they succeeded in doing so then. It was reported among the squadron, that the officers and crews of the gunboats would proceed to England in other vessels, the gunboats receiving necessary repairs at Hong Kong, and fresh crews sent out to them from England."

The screw steam gun-vessel *Penguin*, 5, tender to the frigate *Narcissus*, 51, Captain Risk, flag of Sir Baldwin Walker, has left Plymouth Sound under canvass for the Cape of Good Hope.

The Royal paddle yacht *Victoria and Albert*, will be removed from the steam basin in Portsmouth dockyard to-day, and will complete her refit at harbour moorings. It is expected that the yacht will be required about the middle of next month to proceed to Madeira and bring home the Empress of Austria.

Bills are posted in the vicinity of the dockyard gates at Portsmouth, inviting petty officers and seamen to enter for service on board the Great Eastern steamship, offering £4 per month to the former and £3. 5s. per month to the latter, and stating where an officer can be found in daily attendance to ship men. The notification significantly concludes with, "men-of-war's men p eferred."

Her Majesty's screw steam frigate *Bristol*, 51, launched at Woolwich on the 10th of last month, was yesterday undocked, and the screw steam tank-vessel *Wye* was docked in her place, to complete her fitment as a storeship for the African station.

The augmentation which the Government has decided on making in the corps of Royal Engineers, consequent on the amalgamation of the Royal and Indian Engineers, will take effect on the 1st of April, on which date two additional companies will be added to the corps, making the number of companies belonging to this branch of the service thirty-eight. The two new companies will be formed from the Chatham detachments now at head quarters, and each will consist of a hundred non-commissioned officers and men. By direction of the Adjutant-general of the Royal Engineers, the 37th and 38th companies will, on their formation, be attached to head-quarters until they are required to embark for foreign service. The recruiting parties recently despatched from Brompton to raise additional men for the corps of Royal Engineers have been very successful and a number of fine young men, most of them skilled mechanics, have been sent up to head-quarters.

Admiralty orders have been received at Chatham dockyard for a squadron of five steam frigates and other vessels of war to be built at that establishment, in addition to the several line-of-battle and other screw steamers which are now in progress. The following are the names, number of guns, and horse-power of the new vessels:—The Boadicea, 51, 600-horse power; the Pactolus, 22, 200-horse power; the Diligence, 17, 200-horse power; the Selamis, 4, 250-horse power; and the Aloatross, 4, 200-horse power. The above ships of war will be commenced immediately the vessels now on the stocks, several of which are in a very forward state, are completed. The ships building at Chatham are the Bulwark, 91; the Royal Oak, 91; the Belvidera, 51; the Rattlesnake, 21; the Menai, 21; the Reindeer, 17; and the Myrmidon, 4.

The colonelcy of the 6th (Royal 1st Warwickshire) Regiment has become vacant by the death of General Henry James Riddell, K.H., which took place at Oxendon, Dunse, Berwickshire, on the 8th inst.

The following is the official order issued on the subject of the suspension of Major Yelverton:—"Adjutant-General's Office, Dublin, March 18, 1861.—In obedience to an order received from his Royal Highness the General Commanding-in-Chief, the General Commanding the Forces in Ireland directs that Major the Hon. W. C. Yelverton, Royal Artillery, be suspended from all military duties until further orders.—By command, J. S. BROWNRIGG, Deputy-Adjutant-General."

The *Army and Navy Gazette* has the following in connection with China:—

Lieutenant Frederick W. Hallowes, who for upwards of three years commanded the *Bustard* gunboat, has been appointed to succeed Lieutenant Arthur in the command of the *Algerine* gunboat.

Captain M'Cleverty, of H.M.S. *Cambrian*, has been ordered to hoist a broad pendant, and has nominated Mr. Bertram Mitford, Assistant-Paymaster, to act as his secretary.

Lieutenant William Arthur (1854), who was appointed to the *Algerine* in the month of June, 1858, has been nominated to the command of the *Nimrod*, vice Wynniatt, invalided (since dead).

We understand that officers returning home from India via the Cape, in charge of invalids, will be allowed to count as service in India the three months following the date of their departure from that country.

The *Emerald*, 51, screw, Captain Arthur Cumming, at Plymouth, is ordered to be fitted for the reception of a flag, and, it is said, will proceed to Rio with the new commander-in-chief of that station, which Rear-Admiral the Hon. Henry Keppel has refused to accept, and will shortly arrive in this country.

The Royal Commission on the Sanitary State of the Army in India met on the 23rd inst., at the War-office, the Right Hon. Lord Stanley, M.P., in the chair.

Colonel Sir Robert Walpole, of the Rifle Brigade, has been named to the command of a division in India

The command of the 37th and 38th companies of Royal Engineers—the two new companies ordered to be raised at Chatham—has been given to Captain L. C. Barber and Captain W. C. Phillpotts, both of whom have been ordered to join head-quarters for that purpose.

The changes in the different Cavalry regiments are important. They are the result of the deliberations of a committee of officers, of which Sir T. Brotherton, Sir A. Clifton, Lords Lucan and Cardigan, General Lawrenson, and Sir William Russell were members. It is said that the present Light Dragoon regiments are all to be made either Hussars or Lancers, and that the three new regiments, the 19th, 20th, and 21st, will be Hussars.

The 32nd Company of Royal Engineers have embarked for St. Helena to carry out the fortification works ordered for that island.

Warner to the Marlborough; G. Purkis to the Majestic, for service in the Dapper; J. Gill to the Dauntless: H. Bunting to the Hero.

Monetary and Commercial.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

At a meeting of the shareholders of this Bank yesterday, the report presented showed a profit on the past year's transactions of £45,552, from which the sum of £5,000 was added to the reserved fund, and a dividend of 3 per cent. for the half-year was declared. The necessary steps will be taken to procure the sanction of Government to issue Bank notes at Singapore.

The great spring sale of coffee of the Netherlands' Commercial Society has been fixed to take place at Rotterdam on the 17th April, and the quantity to be offered is 462,327 bags.

The Government guarantee has been fully confirmed to the Red Sea Telegraph Company, but no steps have been taken to despatch new cables to repair the damages existing in the line, which, as before stated, are believed to be comparatively trifling.

Intelligence has been received from the vessels in the Mediterranean engaged in the survey of the route for the telegraphic line from Malta to Alexandria, to the effect that no impediments exist to the laying of the cable. The *Rangoon* and *Malacca* are proceeding with their fittings at Greenwich to convey the cable.

The directors of the Chartered Bank of India, Australia, and China have convened a meeting for the purpose of declaring a dividend, and also for obtaining the authority from the proprietors to apply to her Majesty's Treasury for permission to issue notes payable to bearer on demand at Singapore.

India Loan Scrip has not maintained the late advance, a relapse having taken place from 100¼ to 100½. There have been some extensive sales of India bonds, apparently on banking account, and the price has receded to 30s. to 20s. discount. Exchequer bills have been also pressed for sale, and the bills due in June are quoted at 15s. to 10s. discount.

The suspension was announced on 23rd of the old East India firm of J. G. Behrends and Co., with liabilities for about £40,000. Mr. Behrends was struck by paralysis last December, and his recovery being slow, it is considered necessary to wind up the business, its details at the time of the affliction being entirely in his hands, his partner having been only recently introduced.

The following on the line of telegraph to India is from *The Times*' City article:—

The question of the Euphrates telegraph to India was admitted in both Houses of Parliament by members of the present and past Government to be the most feasible, speedy, and economical route, but which was abandoned in favour of the costly Red Sea project through an official breach of faith, almost as deplorable as that committed by the Derby Cabinet with the candidates for the Galway steam contract. This breach of faith has always been attributed to some mysterious deference to the veto of the Emperor Napoleon. Meanwhile, Russia, untrammeled by any necessity for consulting other Powers as to the propriety of establishing the best means of communication with her Eastern possessions, has rapidly pushed forward a line to China, so that in the course of a few months our receipt of the earliest news is likely to depend upon the courtesy of the authorities at St. Petersburg.

ARTICLES OF IMPORT.

TEA.—During the past fortnight the market has been without activity, sales consisting chiefly of Tayshan Congous and good and fine Moning kinds and common to fair scented Capers and Orange Pekoes, and prices remain without material alteration. Low and fair common Congous have been in moderate demand, as also very good common for shipment to Halifax. In flavoury kinds under 1s. 6d. per lb. prices have ruled rather irregularly from day to day. Common to fair Black leaf kinds remain much as before. Good and fine Monings and Kaisows have met with a steady inquiry, the former at fully previous prices, the latter again at rather higher rates. Low Tayshans have sold with difficulty, but fair to good qualities have attracted attention at the moderate prices established. Fine Souchongs maintain their value, as also other qualities. Oolongs and Flowery Pekoes remain as last advised. Large quantities of low and fair Common scented Capers have changed hands at from 8d to 10d. per lb. Fine are still saleable in small quantities. Orange Pekoes have been difficult of sale privately, but at public auction some parcels of fair quality offered without reserve realised former prices. The supply of Green Teas continues moderate, and there is a steady inquiry for nearly all kinds of country Tea at fully former prices. Japan Teas still continue difficult of sale. Some considerable parcels of Canton Gunpowder have been sold at 1s. 2d. to 1s. 3d. per lb. for fair quality, and at 8d. per lb. for low kinds in boxes. The public sales during the fortnight amount to 37,456 packages, of which 15,122 packages were sold, including 12,326 packages offered without reserve.

SILK.—A better disposition has existed since the reduction in the Bank rate, and prices remain at our last quotations, viz.:—

	s. d.	s. d.	Superior. s. d.	s. d.
Tsatlee, No. 1 and 2	22 0 to	23 0		
„ No. 3 and 4	17 6	21 0		
„ No. 5	16 0	17 0		
Taysaam	11 6	14 0	16 0 to	18 0
Ditto, long reel	14 0	16 0	15 0	16 0
Canton	9 0	15 0	16 0	17 0
Chinese thrown	16 0	19 0	20 0	21 0
Japan	13 0	18 0	20 0	27 0
Yuenfa	10 0	22 0		

SUGAR.—The market has somewhat improved. Sales have been made of 350 bags of good mid. China at 43s.; 30 tons of Clayed Manila at 34s. 6d. At auction the parcels have been 2,581 bags Siam, low to good middling white, 41s. to 43s. 6d.; good greyish yellow, 36s. 6d. to 39s. 6d. common brown to low yellow, 31s. 6d. to 36s.; 6 200 bags common Clayed Manila at 33s. 6d.; 484 baskets Java (an indirect import), low middling to good white (part 16s. duty), 41s. 6d. to 43s.; low to good grey, 36s. 6d. to 40s.; brown and low yellow, 33s. 6d. to 36s. The Dutch Trading Company's sale of 70,593 baskets Java, held on the 21st inst., is reported to have gone off rather favourably, the whole having been cleared off at about the valuations.

COFFEE.—Fair inquiry, and sales at full rates. Plantation fetching 69s. to 73s. 6d. for low middling to good middling, and 62s. 6d. to 64s. 6d. for native.

RICE.—Speculative demand has again set in, and sales to arrive have been made at 13s. 3d. for Java, and about 5,000 tons of necranzie, at 10s. to 11s.

PEPPER.—Transactions in this market have again been chiefly confined to the parcels offered by auction, which passed off as follows:—60 bags black Singapore sold at 3¾d. to 4d.; 2,143 bags Penang were mostly disposed of at and afterwards, good quality, 3½d. to 3⅝d.; common, 3⅜d. to 3½d. 2,447 bags Bangkok found free buyers at 3⅝d. to 3¾d., including first class sea-damaged at the same rates; and 300 bags fair Alleppy brought 4¼d to 4½d. Only small quantities have been sold by private contract, Singapore being scarce. 230 bags Penang White went off at full prices; middling to good fair, 6d. to 6¼d.; one lot fine, 8¼d.

SAGO.—Demand slack. Borneo Company's extra large pearl, 18s. 6d. to 19s. 6d; medium, 17s. 6d. to 18s. FLOUR.—Of 1,000 bags at auction, only 150 were taken at 16s. TAPIOCA.—Sales of Penang at 4¼d.

SPICES.—Cinnamon: 236 bales at auction, at 1s. 6d. to 1s. 7d. for first, 1s. 1d. for second, and 7d. to 9d. for fourth. Cassia Lignea: Private sales at 86s. for fair seconds. Cassia Buds: Sales at 195s. Cloves: No sales announced. Mace: 17 cases Penang and 12 Singapore sold at 9d. to 1s. Nutmegs: Sales at 1s. to 1s. 10d. for ordinary small, and 3s. 2d. for good bold.

HEMP.—Market dull, 400 bales at auction all retired.

COTTON.—Speculative demand, and large sales, at 4d. to 5⅛d. for Surat and Madras.

JAPAN WAX.—109 cases sold at auction; ordinary block, 60s.; saucer, 62s. 6d. Galls: 223 cases sold at 33s. to 33s. 6d.

TOBACCO.—Market dull. No sales since our last.

TIN.—Market very dull. Banca is quoted at 122s. to 123s.; Straits 117s. to 118s.

GAMBIER.—Market steady, and sales at 16s. to 17s. 6d. Cutch; Market dull. 2,500 bags at auction, a few only sold, at 23s. to 23s. 6d.

MISCELLANEOUS.—India rubber: Stock in warehouse and afloat very large. Transactions small at 1s. 3d. to 1s. 4d. Camphor: sales at 220s. Sapanwood: 28 tons of Siam at £6. 10s. to £8. 7s. 6d., 30 tons of Manila at £7. 7s. 6d., and 30 tons of Batavia at £5. 7s 6d. to £8. 5s. Soy: very dull, 50 casks of China were offered, but no sales effected. Rhubarb: nothing doing. Mother o'pearl Shells: Singapore in demand. Manila, flat. Star Anniseed: small sales at 75s. to 80s. Sticlac: 143 cases at auction partly fetched 81s. 6d. to 90s. for fair to good. Gum Benjamin: sales of Siam at £16 to £22 for ordinary to good second. Damar: sales at auction at 43s. to 44s. for good picked. Gamboge: No business doing. Rattans: Sales of 17,000 bundles of Singapore and Penang, at 3s. 7d to 3s. 9d. per 100. Elephants' teeth: No sales reported. Vermillion: 54 cases at auction sold at 2s. 7d. to 2s. 8d. for good genuine. Galangal root: Parcels at auction retired. Cubebs: Sales at £6 10s. to £7 10s for middling to good. Dragons' Blood: No business. Rum: Sales of Mauritius at 1s. 8½d. to 1s. 9d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. to £6. 10s.; nail rods, 7. to £7 17s 6d.; hoops, £9. to £9 7s. 6d.; sheets, single, £9. 5s. to £9. 15s.; Staffordshire bars, £8. to £8. 7s. 6d.; rails, £5. 5s.

STEEL.—Swedish keg, £17. 10s. to £18.

COPPER.—Sheet and sheathing, 11½d.; yellow metal, 9½d.

TIN. 124s. for block; 125s for bar. Tin plates, best charcoal, I.C., 29s. to 30s. per box.

On Hong Kong, ditto	4s. 9d.	Do.	4s. 3d.

MANCHESTER MARKETS.

The late improved demand has been to some extent shared in by the cloth-market, but for the most part relates to yarns. The speculative turn in the Liverpool cotton market has perhaps been the leading cause of the greater activity here, and the character of the movement induces caution, as the commercial accounts from abroad are not substantially better. The advance has not been commensurate with the rise in the raw material, but, spinners having relieved themselves of stock to a fair extent, are now refusing in many cases to do business, except at very full rates, and there has been less buying in consequence during the last day or two. A good deal of business has been effected, at an advance of one-eighth.

COMMERCIAL POSTSCRIPT.

CITY, FRIDAY AFTERNOON.

The bar silver brought by the last West India steamer has been disposed of at 60⅛d. per ounce, showing a decline of ⅛d.

The directors of the Labuan Coal Company have made a call of £1 per share, payable on or before April 19.

ARRIVALS NOT INCLUDED IN TABLE.—Feb. 7, at Buenos Ayres, from Canton and New Zealand, Rosetta; 9, at Rio Janeiro, from Batavia Amitia. March 20, at Bremen, from Hong Kong, Herman; 22, at Brouwershaven, from Batavia, Twee Gezusters; 23, from Banjoewangie, Jeannette en Cornelia; 26, at Queenstown, from Manila, Princess Somawaty.

At Liverpool: Carolina, Neville. At outports: Tasmania, Lord Dalhousie, Hougomont, Indomitable, Alfred Miles Barton, York, Sir W. Peel, Henry Moore, Lincelles, Bosphorus, and steamers Mauritius, Adelaide, Powerful.

FREIGHTS AND CHARTERS.

There has been a little more activity in the freight market, and more inquiry for ships, but rates remain pretty much the same. The reduction in the Bank rate of discount may operate favourably, but it must go still lower to produce any great animation.

The tonnage on the berth for India, China, and the Cape of Good Hope, is 54,000 tons. There is some improvement in shipments to Bombay and Calcutta, and for Madras and China there is a fair business doing. The Indian Council invite tenders on the 1st proximo for the supply of 10,000 tons of coals to Bombay, which will have a favourable influence upon freights, and also for the freight of 50 tons of copper to Calcutta, and 110 tons dead weight, with 45 tons measurable stores, to Madras. Few vessels have been fixed for coals to the East since our last. The contractors inquire more freely for tonnage, and vessels are not plentiful. £37 is offered Tyne to Bombay, and £42 to Calcutta, £35 Kurrachee. A small vessel has been fixed for coals to Ningpo at 62s. 6d. per ton. For Hong Kong and Shanghai there is nothing doing. 35s. has been paid to an American ship for salt, Liverpool to Calcutta, which is a rise of 2s. 6d. per ton.

Rates of freight current for vessels on berth to Shanghai, 50s. to 60s. per ton, weight and measurement. To Hong Kong, 50s, weight and measurement. To Singapore, 35s., and Penang, 45s., weight or measurement (nominal). To Manila, 35s. and 40s. To Batavia, 50s. weight, 40s. measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to 80s.

At Hamburg, for Batavia and Singapore, 40s. China and Manila 40s. to 50s.

CASUALTIES.

The Granger, from Queenstown, for Hong Kong, put back March 9.

New York, Feb. 25: The steamer Hankow, Sands, hence to Hong Kong, returned in a disabled state on the 24th Feb. She had experienced most violent gales from N.W. in the Gulf Stream, 19th and 20th Feb., and had both paddle-boxes and houses on deck stove, connecting-rod damaged, and hull strained. She is making some water.

The Charmer (ship), Lucas, from Manila, Nov. 12, for New York, which passed Anjer, Dec. 4, is reported to have been on shore off Banca but got off after throwing a quantity of hemp overboard

The Maria Anna, Van Monnom, which arrived at Helvoet, March 11, from Batavia, had sustained damage, having been in collision.

The Heel, Dietz, from Rotterdam for Batavia, put into Portsmouth, March 16, with loss of jibboom and bow stove on port side, having been in collision off St. Catharine's the same day.

The Queen of the Ocean, Ellison, from Shields for Shanghai, put into Torbay, March 16, having been in collision the same morning with the Jeune Marie (French lugger), which sunk about three minutes after; master and boy drowned; the rest of the crew landed at Torbay.

The Don Juan, of Havre, Gallet, from Havana, for China, was lost in the Bahama Channel, Jan. 25; crew saved.

The Mallard, Barr, from Liverpool, for Shanghai, and the Emma Mathilde, from Liverpool, for Batavia, both put into Studwall Roads, March 16, the latter with loss of jibboom and head sails.

The Beatrice, which sailed from Liverpool, March 20, for Singapore, put back again on the 22nd.

At ST. HELENA, Jan. 22.—Wilhelmine, from Batavia, for Rotterdam. Feb. 2, Rynbrand Lange, from Batavia, and sailed 4 for Amsterdam. 5, Competitor, Hildreth, from Foo-Chow-Foo. 6, Princess Somatvaty, Roy, from Manila, and sailed 7 for Queenstown. 8, Lady Agnes Duff, Bruce, from Whampoa, and sailed for Dublin. 9, Sanderson, Sanderson, from Penang. 10, Janet Willis, Stubbs, from Macao. 11, Bellatrix, Sandberg, from Java. Landbouw, Kleynenberg, from Batavia.

HUBBUCK'S PATENT WHITE ZINC PAINT.

BY their process, which is patented, Pure Zinc Paint is cheaper than White Lead
It does not change colour with the London atmosphere.

Adulterations.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes from 10 to 80 per cent. No workman can produce good work with such material. Those who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

Cheapness – Not only is it cheaper per hundred weight, but two hundred weight of this Paint with six gallons of Oil, covers as much surface as three hundred weight of White Lead and twelve gallons of Oil. Each cask is stamped HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, and PAINT WORKS,
24, LIME-STREET, LONDON.

FIRE. — DESTRUCTION OF THE PLANT, STOCK, and PROPERTY of the Largest Ropery and Ship Chandlery in the Country, Messrs. Frost, Brothers, of Shadwell, London. PRESERVATION of Books, Papers, and Cash, in MILNER'S SAFE, standing by the side of two other safes, (not Milner's) the contents of which were consumed.—See "Times," Sept. 7, 1860.

TO MESSRS. THOMAS MILNER AND SON,
Liverpool, and 47A, Moorgate-street, City, London.

Gentlemen,—We have very great pleasure in bearing testimony to the efficiency of your "Patent" Fire-resisting Safe. In the destructive fire which destroyed the whole of our premises on Sunday morning last, our books, papers, and cash, which were in the safe we purchased from you in March last, were all preserved; and this is the more remarkable because the contents of two other safes, not of your manufacture, standing in the same office within two feet of your safe, were consumed. Our most sanguine hopes have been realised in this severe test, and we leave you at liberty to make use of this letter in any way you may wish.—We are, Gentlemen, yours, &c.
FROST, BROTHERS.
Shadwell, London, Sept. 8, 1860.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE, via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

TO CHEMISTS, STATIONERS, AND CONFECTIONERS.—AGENTS WANTED.

PLUMBE'S GENUINE ARROW-ROOT should be used in preference to any other. It is greatly preferred by the most eminent Physicians in London for invalids, and as the best food for infants.

REPORT ON PLUMBE'S ARROW-ROOT, BY DR. HASSALL.

"I have subjected Plumbe's Arrow-root to careful examination, microscopical and chemical. I find it to be perfectly genuine, and of superior quality; equal in all respects to the best Bermuda, for which so high a price is usually charged. (Signed) ARTHUR HILL HASSALL, M.D."

Directions and testimonials with each packet, which bears the signature of A. S. PLUMBE, 3, Alie-place

Retailed in London by Snow, Paternoster-row; Ford, Islington; Morgan, Sloane-street; Williams and Lloyd, Moorgate-st.; Starling, Islington; Weatherley, Peckham.

HOLLOWAY'S PILLS AND OINTMENT —ART SURPASSES SCIENCE.—In the cure of all diseases experience is the grand handmaiden of nature; to watch the proper moment and to give the appropriate medicine is the chief art in subduing all ailments. As Holloway's medicines remove all obstructions to perfect action, as the watchmaker cleans the works of an ill-going timepiece, they must necessarily restore regularity and order. Such being their benign action they can never be used at the wrong time, nor improperly, if attention be given to the instructions which accompany every package of Pills and Ointment. The weakest, as well as the strongest, may advantageously use them, their action being so cooling, healing purifying, and restorative.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patient in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d; Crest Plate, 5s., with the necessary directions for use. Post free Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

List of Passengers.

PASSENGERS INWARD.

By this Mail, from Hong Kong.—For Southampton.—Purveyor Minney, Lieutenant Beverhaudt, 87th Regt., Major Pownall, 3rd Buffs, Ensign Manning, 3rd Buffs, Lieut. E. B. Batchelor, 99th Regt., Mr. A. L. Inglis, Mr. Tucker, R.N., Captain Knowles, Lieut. Bund, W. Affiex, Assistant Commissary General, Messrs. Midwood and Robinson, Mrs. Fox and child. For Marseilles.—Mr. T. L. Larkin, Colonel Schmidt and servant, Mons. Le Maire, D.onisso Oteisa, S. Y. Banez, and H. Innes.

ARRIVAL OF LORD ELGIN.

LORD ELGIN arrived in town yesterday, having made a short sojourn in Paris.

PASSENGERS OUTWARD.

Per P. and O. str. Indus, 4th April. From Southampton to Singapore: Miss M. Holloway. To Penang: Miss Vermont. To Hong Kong: Messrs. J. P. Duncanson and Weston, F. F. Williams, W. R. Brown, and F. Forckler. To Shanghai: Mr. W. W. Ripley, Mr. Ringer. From Marseilles, 12th April, to Singapore: Capt. and Mrs. T. A. Welstead and Miss Welstead, Messrs. J. H. Reid, and W. Luttenberg. To Hong Kong: Mr. F. A. Rangel. To Shanghai: Mr. L. Oliphant. From Alexandria to Singapore: Messrs. T. J. Leeuwen, Kolff, and A. Driessen.

Per P. and O str. Ceylon, 20th April. — From Southampton to Singapore: Capt. Colyer and three ladies, Rev. Mr. Matheson. To Penang: Mrs. Waller and two daughters. To Shanghai: Mr. J. J. Enslie, Mr. W. Skeggs. To Hong Kong: Mr. F. Forth and daughter, Mr. Goodwyn, Mr. Lutkens, Mr. Forckler, Ens. Pollard, Lieut. Symons, Mr. J. Nutt From Marseilles, 28th April. To Penang: Mr. and Mrs. L. Chasserain. To Hong Kong: Mr. and Mrs. Elzinger and infant, Hon. A. Marsham. To Shanghai: Mr. M. Flowers, Mr. J. Bildeston. To Singapore: Mr. Stricker. From Gibraltar to Singapore: Mr. Balbrian and three friends, Mr. Gonzalez and friend.

Per P. and O str. 4th May.—From Southampton to Hong Kong: Mr. J. H. Beckwith, Ens. Story. To Singapore: Mr. and Mrs. D'Almeida and infant. From Marseilles, 12th May, to Hong Kong: Mrs. Medhurst. To Shanghai: Mr. Thomas. From Malta to Shanghai: Mr. and Mrs. Thorbury.

ADDITIONAL PASSENGERS OUTWARD.

Per P. and O. str., 4th May.—From Southampton to Hong Kong: Mr. Kinzsmill, Mr. A. Simpson. To Shanghai: Mr. E. Fabris. To Singapore: Mr. Otto Sialcken. From Marseilles, 12th May.—To Hong Kong: Mrs. Perceval.

Per P. and O. str., 20th May.—From Southampton to China: Ensign Cotton.

PASSENGERS ARRIVED OUTWARD.

At Hong Kong, per Early Bird, from San Francisco.—Mrs. Ashby, Mr. Brunel, and 150 Chinese. Per West Australian, from London.—Mr. and Mrs. Harding, and two children. Per Nor' Wester, from San Francisco.—Captain D. H. Lynch, W. M. Rundell, H. E. Robinson, W. M. Greenwood, G. A. Taber, and 510 Chinese. Per Peking, from England, &c.—General and Mrs. Valero, Colonel and Mrs. R. miro, Messrs. Livingston, Ellisen, Ritchie, Eyre, Whitley, Parker, Newby, Cock, Lcut. Waller, Pingmarto, Ashton, Anderson, Low, Ensign Stevens, and Franjec. Mr. and Mrs. Hook, and Mr. Willoughby.

Summary of News from the Far East.

JAPAN.

KANAGAWA

The intelligence hastily conveyed by the *Carthage* to Hong Kong by the last mail, of the murder of Mr. Heusken and the departure of all the foreign Consuls excepting Mr. Harris, the representative of the United States, who, it appears, held his ground at Yedo, is now fully substantiated.

It appears that Mr. Heusken had been dining with the Prussian Ambassador on the 15th of January, and was riding home, attended by a guard of mounted Yacunins, when he was attacked and frightfully wounded by five or six Japanese, who left him lying on the ground where he was discovered by some Prussians attached to the Embassy, who carried him to their residence. Medical aid was immediately afforded, but it proved unavailing. Mr. Heusken died in five hours. What became of the guard we are not told. It is obvious that the murder must have been committed with their connivance, and it is certain that the perpetrators of the deed must be well-known to the Japanese Government. Mr. Heusken was a native of Amsterdam, and his name will be familiar to many of our readers from the important services rendered by him to Lord Elgin when negotiating the Treaty at Japan. On that occasion her Majesty's Government presented Mr. Heusken with a gold snuff-box with the Queen's cypher in diamonds, as a token of gratitude. The darling scheme of Prince Mito and his followers is to prevent the settlement of foreigners in the country, and we are not surprised to learn that advantage was immediately taken of this sad occurrence, to urge the foreign Ministers to abandon their position in Yedo. Unfortunately, they have yielded to the representations urged upon them and *Yokuhama*, which has been termed a "second Desima," has become the sanctuary of the fugitives.

Mr. Alcock has addressed a circular on the occasion to H.M.'s Consuls in Japan, accompanied by a letter in which he expresses his hope that it will yet be possible to put an end to the present system of intimidation, enforced by frequent assassinations, and that during his temporary residence at Yokuhama his "relations with the Japanese Government will not be interrupted, nor trade interfered with, while negotiations are proceeding for the more effective maintenance of Treaty rights

Digitized by Google

than has hitherto been found possible." Mr. Alcock adds that his object is not to create a rupture, but, if possible, to avert any such calamity, and it appears that he is ready "to return to the Legation and resume his duties in Yedo whenever he can see such material guarantee for redress in respect to fresh grievances, and security for the future as may warrant this step."

With reference to the assassination of Mr. Heusken, the Dutch interpreter to the American Minister, and the subsequent flight of Mr. Alcock, the *China Mail* writes as follows :—

The intelligence from Japan is important and interesting. Because Mr. Heusken, the Dutch interpreter to the American minister, has been assassinated, Mr. Alcock, the British Minister, has fled from Yedo, and taken up his abode in the irregular commercial settlement of Yokuhama, which previously he had done all in his power to crush. Yet, strangely enough. Mr. Harris, the American minister, and the only official in Yedo who had any right to act in regard to the murder of Mr Heusken, has remained in his post, and has, we understand, drawn up a protest against the action of Mr. Alcock, which protest will be published over the civilised world, and will forcibly illustrate the difference between the policy, the character, and the courage of the two Ministers. In the circular of the 26th of January which he has issued in extenuation of his flight, Mr. Alcock sufficiently discloses the fact that his withdrawal from Yedo is precisely what the authorities there wanted, and that they have been playing upon him by representing themselves as unable to control those natives who are disposed to murder foreigners. In a country so thoroughly organised as Japan is—where a man cannot blow his nose without the knowledge of the Government, it is absurd to suppose that these acts of assassination are committed without the connivance of the Government; and any competent British agent in Mr. Alcock's position would not for a moment have listened to the "warnings" which form the frequent subject of his despatches. When the Japanese Minister for Foreign Affairs threatened him with that bugbear the Prince of Mito and his retainers, he would have said (to himself) —"I have nothing to do with that. I am here as a representative of the British nation under certain clear stipulations, and if anything happens to me, my country knows how to act." That appears to be the position which Mr. Harris has taken, and it is one which recommends itself to common sense, not to speak of courage and chivalrous feeling. There are ten thousand men in England who would readily accept Mr. Alcock's position, with more than his fitness for it, and who would have the courage to enable their constituents to judge of the Japanese by overt acts towards England and its representatives—not by alleged warnings from Japanese Ministers and assassinations of Russian and American officials with which we have nothing to do. Mr. Alcock has caused the life of every foreigner in Japan to be unsafe. The obvious design of the Japanese is intimidation, and they have succeeded.

The Prussian Treaty has been signed; it comes into operation in 1863. Count Eulenberg received material assistance in his negotiations from Mr. Heusken, who acted as interpreter.

CHINA.

TIEN-TSIN.

From Tien-tsin and the extreme North there is almost nothing in the way of news during the fortnight. What there is may be confined to the movements of that portion of the fleet still remaining in the north. Off the Peiho were the *Watchful* and *Clown* gunboats. The *Drake* gunboat and the *Odin* were at Hope Sound. The *Janus* having been got off the reef there, had gone to Shanghai. The *Reynard*, with a mail from Shanghai, could not get within sight of the *Furious* on account of the ice. At Hope Sound the thermometer at noon stood at twenty degrees. Food was scarce and dear. The *Woodcock* is reported at Chefoo.

It is announced that Mr. Wade has been well received at Peking.

The Emperor has not returned to his capital, and it is said that General San-ko-lin-sin has considerable difficulty in checking the advance of the rebels to Peking.

SHANGHAI.

THE EXPEDITION UP THE YANG-TSE-KIANG.

The long-talked-of expedition under Sir James Hope to open up the Yang-tse-kiang left Woosung on the 12th Feb. It consisted of H.M. ships *Centaur*, *Coromandel*, *Cooper*, *Atalante*, *Waterman*, *Banterer*, *Bouncer*, and *Havoc*. The expedition was accompanied by Lieut.-Col. Wolsely, who proceeds on a military survey; Captain Ward, and several officers of H.M.S. *Actæon* for hydrographical purposes; Mr. P. J. Hughes, Consul for Kiukiang, and Mr. Phillips, assistant; a deputation from the Chamber of Commerce, consisting of Messrs. Hamilton, Michie, and Ballance, with a view of ascertaining in some measure the commercial capabilities of the hitherto unfrequented portions of the country they will visit in their progress; Messrs. Wilson, Lewin, Thorne, Drysdale, and Fearon; Lieut. Birch, 11th B.N.I., on leave; and, lastly, though not by any means the least interesting party, the gallant little band of adventurers consisting of Major Sarel, Captain Blackiston, Dr. Barton, and Mr. Schereschewsky, with their attendant Sikhs and coolies, who purpose making their way to India after proceeding as far as practicable in one of the vessels of the fleet. Two French explorers, Mons. Simon and Dupuin, also accompany the expedition. Mr. H. S. Parkes arrived from Canton shortly after the departure of the expedition, and followed in a gunboat. The *Coromandel*, *Havoc*, *Cooper*, and *Banterer*, took the lead, the *Bouncer*, *Centaur* with *Waterman* in tow, and the *Atalante*, bringing up the rear. They proceeded under easy steam until 2.30 P.M., when the *Coromandel*, which was ahead, finding shoal water, made a signal of danger, and took a course more into mid-channel, followed by the other vessels, but the *Centaur*, having the *Waterman* in tow, did not answer her helm so readily, and consequently grounded in fifteen feet of water, on a shoal near the South Bank, about thirty miles above Woosung and two miles due north of the spot marked "Great Bush" on the charts, Plover Point about four miles distant.

The overland party to India, above described, will remain on board one of the steamers as far as Hankow, where a native boat will be hired, after which they must make the best of their way, in the native fashion, up the Yang-tse as far as Chun-king, in the province of Sezhuen, where they intend taking to the land, reaching Ching-tu, the capital of the province, and thence proceeding most likely by the route in which the Abbe Huc was sent back a prisoner from Lassa. From Lassa their course will be along the north side of the Himalayas to the source of the Indus, and then through the mountains, coming out into North-Western India about Simla in October or November.

THE DEFUNCT CONSULATE.

The following extraordinary circular has been issued by the British Consul, who, it is rumoured, is not on good terms with Mr. Bruce, the Pleinpo :—

BRITISH CONSULAR CIRCULAR.

The undersigned, H.M.'s Consul, regrets to have to inform H.M.'s subject that, owing to the reduction in the strength of the Consular establishment during the last eight months, and the gradually increasing ill-health of the undersigned himself, consequent on his endeavours to meet the demands pressing on his attention, it has become necessary to place the functions of this Consulate practically in abeyance, with the exception of its criminal jurisdiction and its routine duties immediately connected with the shipping. Having, by two opportunities, intimated to H.M.'s Envoy and Chief Superintendent of Trade his apprehensions of his being compelled to take this step, the undersigned trusts that whatever inconvenience anyone may sustain from it will be but of a temporary nature.

THOMAS TAYLOR MEADOWS, H.B.M.'s Consul.

British Consulate, Shanghai, 8th Feb., 1861.

Her Majesty's despatch boat *Roebuck*, which was originally intended to form part of the expedition up the Yang-tze-kiang was suddenly ordered off to Kanagawa, in consequence of the unfavourable intelligence from that quarter brought by the Prussian transport *Elbe*.

A meeting of the subscribers, trustees, and treasurer of Trinity Church, was held at H.M.'s Consulate on February the 12th. A committee was formed for the purpose of raising funds and procuring plans and estimates for a new church, and it appears that any enlargement of the present building could only be accomplished at considerable expense, and that the faulty construction of the church would render such an outlay unadvisable.

Peking Gazettes are up to the 15th Jan. :—

The Manchoo soldiers in Peking had mutinied for want of pay. It having come to the Emperor's knowledge that loyal subjects having been imprisoned by the rebels and on succeding in making their escape had been ill-treated and in some cases executed as rebels, H. I. Majesty commands all Mandarins to encourage and protect such subjects.

H. I. Majesty has been pleased to recommend to the Board of Rites the whole body of officers of the province of Kan Su, for the considerable amount of the voluntary contribution fund raised there.

The rebels marched into Hu-peh, but were repulsed by Imperial troops sent against them by the Governor of the province.

A member of the Treasury Board has been appointed to proceed to settle the Russian boundaries on the Amoor.

San-ko-lin sin, though expected in the neighbourhood of Nanking cannot leave Shan Tung just yet, where he has been quelling a rising of the local banditti. He, however, sends on a brave leader, Shing Pao, in whom he reposes a good deal of confidence.

The boisterous merriment of the Chinese on the advent of the New Year, will, for the future, be suppressed. The firing of squibs and crackers, &c., has been forbidden by a proclamation.

Digitized by Google

All shops opened in the city by people who are not natives, will be under the strict supervision of the head man of the street. The City gates are now closed at 3 P.M., with the exception of the French Gate.

A public meeting was held at H.B.M.'s Consulate on the 2nd of February, at which the Municipal Council submitted their report for the past year. The report deals with the usual topics—roads, drainage, police, barracks, taxes, licensing, &c. Under the head of "arrests" it is stated that there is a large increase in the number of prisoners, chiefly owing to cases of drunkenness. The finances are in a flourishing condition.

SWATOW.

From Swatow a correspondent informs us that matters there are calm. Double Island has now begun to exhibit signs of Western occupancy. It possesses a book-club, two billiard-tables, and a bowling alley, not to speak of three Consuls—English, American, and Hamburg—with the full complement of officials, who seem to enjoy each other's society, and go on together in harmony.

HONG KONG.

The Caldwell enquiry case was to be resumed on the 4th March, when Mr. Caldwell would deliver his defence, which, it is presumed, would close the proceedings, and by next mail we should know the decision of the Government as to retaining his services. An amusing letter, which appeared originally in Chinese, in their organ, published by Mr. Murrow, has been translated, and purports to be an *exposé* of Mr. Caldwell's career, but that the Governor now seeing his iniquity, had resolved to disgrace him. A reply has been manufactured, abusing Mr. Murrow. The whole reads like a play, and needs not a wizard to see who is the author. The joke is really well done, as such things generally are by him. Chapter and verse are "all there" as usual.

Mr. Moss, who was deported from the realms of Japan and the jurisprudence of Mr. Alcock, has been induced to postpone his visit to England, and now, we understand, brings his claim of $30,000 into the Supreme Court of Hong Kong.

The *Daily Press*, on the Cowloong Site, says:—

We understand that the plans for the Cowloon barracks have been prepared and will be sent home by this mail. The estimated cost is £200,000. We believe that the Governor granted a conference to the naval and military authorities, with the view of arranging, if possible, the dispute regarding the site—but we are told that His Excellency found them so unreasonable and dictatorial, that it was impossible to do business with them.

Let anyone take a comprehensive impartial review of the present position of our military and naval departments. Together they have the entire frontage, with very small intervals, from the new harbour-master's office to the ordnance stores. Why it must be nearly a mile, and we should suppose would at the present moment, if brought to the hammer, fetch at least a million of dollars. If the military and navy departments would sell off their property on this side and take the Cowloon cession all to themselves, we should bid them God speed. But they will not part with an inch of what they hold until their schemes at Cowloon shall be achieved, by which time land on this side may, and most likely will, have become of much less value than at present, owing either to the trade of the colony retrograding, or to land at Cowloon being put upon the market.

According to a list of vessels published in the *Hong Kong Register*, it appears that during the year 1860 176 Chinese passengers left Macao for Batavia, 52 for Singapore, 2,098 for Callao, 20 for Saigon, and 5,773 for Havana, being a total of 8,119.

The following appointments have been made by the local government:—

J. Sidney Smith, Esq., R.N., Government Surveyor, vice Jabez Loane, Esq., absent in England.

W. T. Mercer, Esq., Colonial Secretary, acting Chairman of the Board of Education, vice Dr. Bridges, leaving for England; and Angus Fletcher, Esq., to a seat at the Board, vice Rev. J. J. Irwin.

Francis J. Hazeland, Esq., Crown Solicitor, vice G. Cooper Turner, deceased.

The following mercantile announcements have been made:—

Mr. D. B. Clinker has been appointed acting Agent for the Commercial Bank of India at Hong Kong.

Mr. Alfred Stowell has been authorised to sign by procuration the firm of Alfred Wilkinson and Co.

The firm of Vargas and Co., of Macao, has been dissolved.

The business of Cooper, Turner, and Hazeland, Solicitors, will be continued by Mr. Hazeland.

The interest of Mr. John Morris (deceased) in the firm of Blackhead and Co., expired on the 21st Jan.

Mr. Edmund Waller has been authorised to sign the firm of Smith, Kennedy, and Co., by procuration.

In a long article in the *Overland Register* on a recent Roman Catholic procession in Macao the old story of Mr. Summers is again brought forward. The writer puts the matter, as far as Protestants are concerned, in a right light when he affirms that, if they cannot conscientiously join in such rites, it is their duty to keep out of the way, and not to offend the prejudices of devout, although mistaken, worshippers by an offensive and ostentatious exhibition of their own belief. Mr. Summers pleaded ignorance of customs, and frankly acknowledged that he would have kept out of the way had he known the ceremony was about to take place.

A cricket match came off on the 1st of March between eleven officers from Canton and a picked eleven of Hong Kong. The game was not played out, and was, therefore, considered as "drawn," but the scorings were considerably in favour of the Hong Kong men. A return match is to be played at Canton this month.

THE RACES.

The following report of the sixteenth meeting of the Hong Kong Races is from the *China Mail*:—

The Sixteenth Annual Race Meeting came off on Tuesday, the 19th instant, and two following days.

On the Tuesday the sport opened as usual with the Wong-nei-Chong Stakes, which went to Saucebox, closely pushed by Clearwell, a fine strong Tartar pony. A tail of five brought up the rear. Distance, once round; time, 2.34.

The Canton Cup fell to Forester, of whom his opponents, Dervish and Lightning, made too little account. Time, 3.15; a slow race for the distance—a mile-and-a-half.

The Westphalian Cup (a handsome gilt embossed claret jug, valued at 70 guineas) was carried off by Affghan; Cheeky Chicken making a good run for it, and Pearl beaten off. The riders of the China ponies that graced the start with their company expressed with the whip their dissatisfaction at being left behind by their more *racy* competitors.

The valuable Cup given by the officers of the Royal Regiment brought out Rowena, Ivanhoe, Templar, Bessie, Mercury, and Garibaldi. The last-named horse was beautifully ridden, and took the lead from Templar about half way up the run in. The colonial horse did well in beating Rowena; Mercury was nowhere, and Bessie exhibited the *varium et mutabile* as became her sex. Garibaldi's victory appeared to give great satisfaction to the public. Distance, twice round; time, 3.42.

The Roadsters' Cup became the property of the Ta Yin on the hill, by reason of the fleetness of Little Wonder, to whom Ten-per-Cent made a good second, and our old friend Omar Pacha (who looked fit to go down a gas-pipe) a bad third. Gaylad took up a sorry position in the rear. Time, 2.8, being slightly faster than the Arab race.

For the Fakei Cup, the most valuable prize of the meeting, three put in an appearance—Snowdon with a bandaged off-fore; Stockham, tender forward, and the indomitable Templar. The race was good and interesting, Stockham swerving up the run in, and Snowdon coming past him with a rush, and winning easily. The owner of Stockham objected that the horse swerved in consequence of Snowdon's stable groom ducking his head through the rails as the horse was passing, and a good deal of evidence was formally taken by the stewards, who set aside the objection, and confirmed the result of the race. Time 2.30—a mile-and-a-quarter.

Saltoun, dead beat, just managed to put his head in before Zampa and get the Galloway Stakes; three feet more, and he must have lost it. Zouave, who had evidently been overtrained, was nowhere.

On Wednesday the Scurry Stakes were pocketed by Pearl, against whom nothing of his class appeared; and the famous Challenge Cup shifted its repository once more, and went to East Point, borne away in triumph by the plucky little Robin Hood, with Garibaldi a good second. Time 4.1—for the two miles.

The Valley Stakes were carried off by the Wong-nei-Chong winner, Saucebox, with Mangosteen well up; and the Arab Stakes by Forester, as was expected. Dervish was second, and Midnight third. Bagdad bolted. Twice round; time, 3.48.

There was a capital scurry for the short Hack Race, the distance suiting Reform admirably, who seized the opportunity. Ten-per-Cent was second, and Gaylad third. Dandy, Nisan, and Shirttails also started. The last-named was forbidden to pull up opposite the Grand Stand for reasons connected with his name.

A most beautiful race succeeded for the Parsee Cup, which was taken by Templar beating Gratis by a head; Ivanhoe third, and Mercury well up. Huntsman was fractious at starting, and lost ground, which he refused to make up subsequently, and kept his word. Time 3.5 for the mile and a half.

Zampa, Zouave, and Saltoun came to the post for the Victoria Plate. Saltoun was somewhat restive, but by dint of a little patience a good start was effected, Zampa getting off in the rear. The previous day's running was reversed, and the Plate was conveyed by Zampa to East Point.

On our arrival at the course on Thursday we noticed the weights proclaimed for the Ladies' Purse (one mile), as follows:—Affghan, 11 st.; Cheeky Chicken, 10st. 4lb.; Pearl, 10st. 2lb.; Exchange and Count Fosco, 9st. 7lb; and Gingerbread, catch weights. Of these, four put in an appearance—Affghan, Pearl, Cheeky Chicken, and Exchange. A new rider being on the Chicken, and unposted in the pony's fancies, the result was a bolt on the part of his Cheekiness at the village turn, leaving Affghan an easy winner. Exchange proved himself a sterling pony. Slow time, 2.18.

The Revenir Cup gave a singular conclusion, showing that not always can the English thorough breds allow the Welshmen a stone, for Gratis won it in beautiful style, with Templer well up, Stockham next, and

Digitized by Google

Rowena tailed off. This was considered Stockham's race up to the last turn, when his off-fore gave way, and his condition when he came in was pitiable. After this race we are told that one of the stewards overheard a remarkable history of Stockham, as detailed by a sporting skipper, fresh from home, to an admiring circle, who evidently regarded him as the oracle of Sport, if not the actual editor of the *Racing Calendar*. "Stockholm," said he, "why, I knowed that horse at home; I seen him run; lie run second for the Derby two years running, and he won here last year too; and now, ye see, he's pretty nigh busted up."

The Setna Cup was an easy victory for Wee Pet, who had no business to be there, save that the wording of the conditions allowed him, so that objection was vain. His opponents were all Chinese and Manila ponies, and he, as an Arab, played with them.

The Barristers' Cup gave the finest race of the meeting, Robin Hood beating Garibaldi by less than a head in a two-and-a-half mile race. Forester was started to make running, but never showed in front at all. The race was won solely by fine riding.

Mercury at 10 stone won the Forced Handicap, Dervish, 10st 2lb., being second, and Lightning a good third, with 10st.; Midnight, even with 9st., had no chance.

The Hack Handicap was won by Little Wonder, beating the two East Pointers, Dandy and Ten-per-Cent., and giving them 10lb. Gaylad was put in to make a run, but pulled up.

Of course the sport finished with the usual race for Chinese riders, which was better ridden than any previous one on the Hong Kong Race Course. Eleven started, and we saw but two empty saddles. Count Cavour brought his Horseboy in first.

In giving this brief sketch of the meeting, we should not omit to mention the interesting scene that the Grand Stand exhibited on the presentation of the Ladies' Purse. Notwithstanding the fatigues of the magnificent fancy ball that came off at Government House on the previous night, the beauty and fashion of the colony mustered in brilliant force. In the front we saw Robespierre comparing books with a Russian peasant girl, Mephistophiles smiling upon Folly, and Henry the Eighth in converse gay with Anna Boleyn, while in the background Louis Quatorze appeared by frequent manipulations of his denuded cheek to lament the loss of his cherished whiskers. Night and Morning were laughing side by side, Macbeth was betting with Diana, and Fra Diavolo was engaged with a French Dame de Conr. But the horses were off, and a stillness came over the scene. Anon the struggle was past, and the jockies were weighed. Up came the victor to receive the prize; and in accordance with a time-honoured blunder, the band played just at the wrong moment. The young lady (sister of one of the donors of the Barristers' Cup), however, delivered her speech and the purse neatly and impressively, though a little tremulously withal; and the bold rider, slightly out of wind, returned his thanks appropriately and well.

And thus ends the "Hong Kong Race Meeting of 1861," which has eclipsed all its predecessors, not only in the sport shown, but in the attendance of spectators, and in the thorough enjoyment that seemed to prevail on every side; and among the recollections connected with it, the fancy ball above referred to will ever hold prominence, for we really believe that the scene there presented could not be surpassed in elegance and splendour within the boundaries of the gorgeous East.

CANTON.

The *Friend of China* makes the following startling announcement:—"A report is in circulation among the Chinese that on the 7th day of the 12th moon—which would be the 17th day of January, or 30 days ago—'Peking fell under the sway of the rebels.' To this we have to add that while our information from native sources is indefinite as to the period and the grand catastrophe, there is much painful anticipation on the part of those in authority, and consequently among those whose hopes and fortunes run with the Manchou dynasty."

A tragedy occurred on board the vessel *Leonidas*, which vessel was about to sail with a cargo of coolies shipped by the French Emigration-office, and was lying at anchor three miles below the Macao Fort. While the officers and men were at breakfast about nine o'clock, the coolies rose and attempted to murder all the Europeans on board, and to set fire to the ship. Owing to the prompt courage of Captain Wood, seconded by his officers and men, the coolies were overcome and the fire quenched. Mrs. Wood had a narrow escape for her life. Assistance was obtained, and the gunboat *Weasel* towed back the *Leonidas* to her former anchorage opposite the Sha-meen. The matter is undergoing investigation by both foreign and Chinese authorities. Of the 290 coolies on board, about 90 are missing, who, having jumped overboard, have been drowned or have escaped on shore. Among eight Europeans who were more or less hurt in the affray, the third officer, Mr. Tucker, is dangerously wounded.

On the subject of the Shameen site the *Friend of China* says:—It seems strange that not a word of solid information can be obtained by the public regarding the proposed site for a British quarter at Shameen. Knowing the desire of the community on this head, we made application at the office of the foreman of works just after Lord Elgin was here, for a sight of the plan submitted to his lordship as that which it is intended to follow; and after a short delay, whilst reference was made to Mr. Surveyor-General at Hong Kong, the answer conveyed to us was as follows:—"On the subject of the plan of Shameen—it has not been approved—is liable to be changed altogether or modified—and it would not only be injudicious, but might mislead the public instead of doing them a service."

Since we received this answer, we have seen it stated in the *Daily Press* that "Our Surveyor-General is deeply and extensively interested in a land speculation at Canton, the success of which is entirely dependent upon the progress of the Shameen site."

PHILIPPINES.

MANILA.

A correspondent of the *China Mail* gives a detailed account of Lord Elgin's arrival at the Philippine Islands, *en route* for England. The merchants of Manila presented his lordship with an address, in which they expressed their profound sense of the great benefit conferred by the late treaties with China. Lord Elgin returned a courteous reply, and expressed his hope that the new treaties would be useful to the interests of that valuable and important colony.

The new Governor of the Philippines, General Lemery, reached Manila from Spain the day after Lord Elgin's departure, and it is expected that with his arrival a new era of prosperity and happiness will dawn upon these possessions of the Spanish Crown.

BORNEO.

SARAWAK.

In alluding to the departure of Sir James Brooke from Singapore for Sarawak, the *Singapore Free Press* has the following comments:—

Sir James Brooke, K.C.B., with Captain Brooke, and other gentlemen belonging to the Sarawak Government, left this for Sarawak. Their presence is very necessary, as owing to the residence of Seriff Masahore at Muka, the trade between that place and Sarawak is still suspended. The Sarawak nakodas are afraid to venture to a port where the chief power is in the hands of a person who has avowed the most hostile feelings against them and the government of which they are subjects. It will be recollected that on the occasion of the last visit of the steamer *Victoria* to Muka, the chief of that place, although professing his desire that the trade with Sarawak should go on as before, acknowledged that there was a person in Muka whose actions he could not control, and the Sarawak nakodas would seem to believe that the chief spoke the truth. It will be Sir James Brooke's first object to endeavour to prevail on the Sultan of Bruné to vindicate his authority by expelling Seriff Masahore from Muka and putting the trade of that place on a more secure footing than has lately prevailed. That the Government of the Sultan will make an effort to accomplish these objects is probable, as the explicit manner in which the British Government has disavowed Mr. Edwardes' proceedings in regard to the Muka business, will probably convince the Sultan and his Ministers that it is a mistaken policy on their part to seek the injury of Sarawak. But should it be found that the Bruné Government either cannot or will not take the necessary measures for putting things right at Muka, it will be requisite for the Sarawak Government to redress its own wrongs, and this it will be able to do with effect, as there is no longer any danger of a British functionary stepping in, and by threats and empty promises securing immunity to assassins and conspirators.

MALACCA STRAITS.

SINGAPORE.

CAPTURE OF FIVE FORTS IN COCHIN CHINA.

Dates from Saigon are up to the 28th of Feb., by the *Granada*, announcing that on the 24th an attack was made by the French and Spanish forces (the latter only 200 men in action) on the Annamese, and, although the Allies came off victorious, it was a much more serious affair than was expected. Five forts were taken, and also a fortified camp, with a large quantity of ammunition and arms.

The loss of the Annamites cannot be ascertained, as they invariably carry off their wounded. Twenty prisoners only were made. The loss of the French is stated to be Lieutenant-Colonel Tesard and midshipman Le Regniere killed, the General and five officers wounded, and 300 rank and file killed and wounded. The Spanish lost five killed, and thirty-five wounded. A Spanish colonel also was wounded.

The day after the steamer left a new expedition was to be organised to follow up the success, and it was hoped that part of the country where large quantities of grain were stored would be secured, meanwhile rice had advanced to $1 65c. Next mail will give particulars of the engagement that was expected to come off on the 29th.

The *Viscount Canning*, which was reported in our last as sold at $74,500, is to run between Bankholm and Hong Kong.

A branch of the firm of Charles, Shaw and Co., in London and Liverpool, has been opened, under the firm of Shaw, Walker, and Co.

Another shock of an earthquake was felt at Malacca on the 23rd Feb.

The United States sloop of war *John Adams*, 18 guns, from

Digitized by Google

Bangkok, 19th Feb., has arrived at this port, and exchanged the usual salutes. She will probably proceed in the course of a fortnight to Hong Kong, unless former orders are countermanded. The *John Adams* bears a letter accompanied with presents from the King of Siam to the President of the United States. The Siamese Ambassadors for Paris had not left.

Sir James Brooke's steamer, *Rainbow*, returned from Sarawak on the 1st March, with dates to 26th Feb., with Capt. Brooke and Mr. Wibsone.

The *Prima Donna* brings dates to the 2nd March. All was quiet at the settlements, and Sir James was in good health, but had not found it necessary to make any immediate changes.

Dates from Labuan are up to the 26th Feb. The coal mines were progressing satisfactorily.

The *Straits Times* and *Penang Argus* agree in condemning the scale proposed for the new Government by the London Committee of Merchants.

A report has been telegraphed to the effect that five forts had been taken by the French at Hirè, Cochin China, but no details have reached us.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CARLOWITZ—On the 16th Feb., at Macao, the wife of R. Carlowitz, of a son.

CUNNYNGHAM—On the 3rd Feb., at Shanghae, the wife of the Rev. W. G. E. Cunnyngham, of a son.

ENTHOVEN—On the 31st March, at The Hague, Holland, the wife of Mr. Henry Enthoven, of a daughter.

FERNANDEZ—On the 24th Jan., at Hong Kong, the wife of Francisco Fernandez, apothecary to the forces, of a son.

FOWLER—On the 2nd inst, at Crookham-end, near Newbury, the wife of Commander G. C. Fowler, R. N., of a daughter.

GOTTLIEB—At Singapore, on 28th Feb., the wife of F. H. Gottlieb, Esq., of a son.

HARDY—On the 2nd inst., at Albion-road, Stoke Newington, Mrs. T. W. Hardy, of a son.

HOBSON—On the 7th Feb., at Shanghae, the wife of the Rev. John Hobson, of a son.

HOWELL—On the 9th inst., at 122, Leadenhall-street, the wife of C. W. Howell, Esq., Secretary of the P. and O. Company, of a son.

JOHNSTONE—On the 25th ult., at Rachills, Dumfriesshire, N. B., Mrs. R G. Hope Johnstone, of a son.

LYALL—On the 31st March, at 5, Upper Hyde-park-street, Mrs. George Lyall, of a son.

PONDER—On the 8th inst., at Elm-grove, Hampton, the wife of S. Ponder, Esq., late of Canton, of a daughter.

WALKINSHAW—On the 28th Feb., at Hong Kong, the wife of W. Walkinshaw, of a son.

MARRIAGES.

BENNETT—CURNOW—On the 25th Feb., at Hong Kong, by the Rev. I. J. Irwin, George, third son of Robert Bennett, Civil Service, of St. Nyotts, Poorwall, to Elizabeth, sixth daughter of Capt. W. Curnow, Penzance, Cornwall.

MILLER—DUFFELL—On the 26th ult., at St. Luke's Church, New-town, Southampton, by the Rev. F. Russell, M.A., Augustus Miller, Esq., of the P. and O. Company, Malta, to Elizabeth, only daughter of J. T. Duffell, Esq., R.N., Royal Mail Steam Packet Company, Southampton.

PALMER—KING—On March 25, in New York, by the Rev. Mr. Littlejohn, William H. Palmer, Esq., of Hong Kong, to Mrs. Kate King, of Brooklyn, N. Y.

DEATHS.

ALLISON—On the 28th Feb., at Hong Kong, Patrick Allison, sergeant of police.

CRACROFT—On the 3rd inst., at Ealing, Major Henry Cracroft, Retired List, Bombay Army, aged 48.

FIRTH—On the 30th of March, at his residence, Hartford Lodge, Cheshire, T. Firth, Esq., banker, Norwich, in the 75th year of his age.

HARRIS—On the 28th Feb., at Hong Kong, Thomas Harris, ship *Rajah of Cochin*.

HILL—Early in February, 1861, at Shanghae, China, Thomas Lancaster Hill, the eldest surviving son of the late Dr. Ninian Hill, of Pau, Basses Pyrenees, aged 22.

LAWFORD—On the 17th Feb. last, on board the hospital screw steamship *Mauritius*, off the Cape of Good Hope, and on his way home from China, Frederick Alexander Lawford, Esq., aged 29, Lieut. 50th Bengal Kative Infantry, and of Fane's Horse, second son of Lieut.-Col. Edward Lawford, H.M.'s Madras Engineers.

LINE—On the 4th inst., at Kilburn Priory, John Line, Esq., formerly of Madras, in his 70th year.

LITTLEDALE—On the 25th ult., suddenly, of disease of the heart, aged 42, Thomas Littledale, Esq., of Highfield, Liverpool.

MATTHEWS—In Hong Kong harbour, on the 14th Feb., on board the British ship *Mystery*, Edward Matthews, Master, aged 51 years.

MEESON—On the 5th inst., at his mother's residence, Stratford, Essex, Richard Stock Meeson, second son of the late Thos. Wm. Meeson, Esq., in the 46th year of his age.

NIGHTINGALL—On the 3rd of March, at sea, Captain T. H. Nightingall, of the barque *Mary Harrison*, late of the ship *Speedy*, aged 39, deeply regretted by all who knew him.

RICHARDS—On the 10th Feb., at Shanghae, Helen Mary, youngest daughter of P. F. Richards, aged 7 years.

RODRIGUES—On the 24th Feb., at Hong Kong, Hygino J. Rodrigues.

WALLIS—In December last, at Tien-tsin, China, Edward Wallis, Assistant-Surgeon, Fane's Horse, son of Charles Edward Wallis, of 44, Great Marlborough-street, and Meadow House, Kensal-green.

WIMM—At Victoria (Hong Kong), at the Seaman's Hospital, on the 21st Feb., Mr. Frank Wimm, late of the American barque *Rival*, aged 21.

COMMERCIAL REPORT.

CHINA—EXPORTS.

TEA.—Shanghai.—Black: In the continued absence of any features of interest in this market, it simply remains to record the business of the fortnight. Settlements are 4,190 chests, of which 2,560 chests are fair Hohows, at 23 to 25 taels, and the remainder chiefly contract parcels of Oolong and common Souchong descriptions. Purchases for the season to date amount to 66,130 chests against 230,800 at same period last season. Stocks, 5,300 chests Congou, and 2,000 chests Flowery Pekoe. Greens: settlements here amount to 7,476 half-chests China, and 6,728 half-chests Japan tea, making to date 74,790 half-chests of the former, and 36,376 half-chests of the latter. The settlements of the fortnight are reported as under:—Congou, 5,100 chests and 2,250 half do., at 10 to 15 taels for dusty and low to fair common, 17 to 19 taels for but mid to mid flavoury, and 19 to 22 taels for fair to good Ningchow. Scented teas, 2,000 boxes at 24 taels, clearing the market. Congou, 4 chops Oopack, at 26 to 32 taels, and 3 chops Oonam, at 21 to 25 taels, 3,000 half-chests Santon packed at 19 to 24 taels.

RAW SILK.—Shanghai: Business not having been resumed since the new year holidays the transactions of the fortnight have been very small. Nothing has been made public as to the prospects of the next yield, but the silkmen evince such firmness that an advance of 10 to 15 taels has been established for the better descriptions on last mail's quotations. Tsatlees, especially fine, are scarce and wanted. Taysaams and Yuenfas are very plentiful. The intelligence from London of the scarcity of good silks caused the market to open sooner than it otherwise would have done. The settlements of the fortnight are reported at 1,500 bales (including 350 bales Japan silk) making the settlements of the season 71,500 bales, against 51,000 bales at corresponding period last year. This mail takes but a limited quantity—say 1,500 bales only. The *Bacchante* and *Glencoe*, now loading for London, have together about 1,500 bales on board. The unsold stock upon the market is estimated at 7,500 bales. The following are current quotations:—Tsatlee, No. 3, Tls. 420 per picul; 4 and 5, 360 to 400; Taysaam, No 2, Tls. 330 to 340.—Canton: Nothing whatever has been done since the holidays. The quotations are—Re-reeled Cumchook, 470 to 480 dols; Kowkong, 400 to 410 dols.; Loonkong, 450 dols. At Macao there are about 100 piculs for sale, the asking rates being, 390 to 400 dols. for Loonkong, 400 to 410 dols. for Kowkong, and 400 to 415 dols. for Kumchook of the usual reel.

DRUGS AND OTHER EXPORTS.—Large shipments are being made of these articles to the Continent; also that the *Shantung*, to London, has taken an unusually large supply of essential oils. Cassia lignea, Canton—the article is scarce; a sale of 200 piculs is reported, in boxes, at 18 dols. In Macao the article is quoted 19 dols. without stock. Cassia oil is quoted 280 dols. at Canton without settlements. In Macao there are 35 piculs on the market, for which 260 dols. is asked. Cassia buds—a settlement of 30 piculs is reported at Canton at 40 dols., and a like quantity at Macao at 36 dols. Star anniseed—there is none at Canton. At Macao 500 piculs are on the market, for which 14 dols. 50c. is asked. Anniseed oil—at Canton, none. At Macao a little is procurable at 160 to 165 dols. Rhubarb is very scarce, and the little for sale at Canton is held at a high figure. Galangal is very plentiful at Macao and dull. Vermillion is in large supply at Canton. Sunshing chop is quoted at $38 per box. Matting—the Canton quotations are, Lintan cargo 10½ cents. per yard for four quarter white, and 11½ cent. for four-quarter checked. Fire Crackers are quoted at Canton 80 cents. per box of 40 packs of the best quality.

CHINA—IMPORTS.

As most of the Chinese traders spend their holidays under the paternal roof at their native places, the business of the fortnight has necessarily been restricted; in fact, even now it has not been fully resumed. The transactions at the various ports during that period, although limited, are nevertheless even larger than might have been expected.

SHANGHAI.—Such goods as are wanted command an advance upon closing rates. Grey longcloths of stout fabric, 60 to 64 reed, white shirtings, and T-cloths are inquired for. American goods are dull, with heavy stocks; the few clearances reported are from sales made before the holidays. Lastings, camlets, and long ells are saleable in small quantities. Spanish stripes are very dull. In metals and Straits produce nothing has been done; the market will probably open for a retail business.

CANTON.—The demand for cotton yarn has been confined to low numbers. Grey shirtings of medium quality are saleable. White shirtings are dull. There is a retail demand for American goods. Woollens are difficult of sale. Iron, though in excessive stock, is saleable occasionally. Lead tends upwards. The following are the sales reported for the fortnight:—Shirtings, 25,500 pieces grey and 2,500 pieces white; yarn, 250 bales; spotted shirtings, 1,750 pieces; American drills, 750 pieces; tea-cloths, 2,000 pieces; long ells, 500 pieces; camlets, 300 pieces; lead, 300 piculs; nail rod iron, 1,700 piculs; quicksilver, 31 flasks.

PROVISIONS, &c.—The already excessive stocks have been augmented by heavy supplies from California. The best Gallego flour will not command more than $7 to $7.50 per brl. Inferior kinds are being worked off for native consumption. Beef and pork are, if possible, duller than before. The best American, are quoted $7 to $8 per barrel for the former, and $10 to $11 for the latter. Other goods under this heading can hardly be quoted. Coals: Supplies have been large. The demand is slack. Quotations afloat $6 for Sydney. $9 for English steam.

Digitized by Google

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6	months sight.	6s. 4d. to 6s. 4½d.	6s. 4d. to 6s. 4½d

At MANILA.—For London: May Shepherd. For Liverpool: Albion, Queen of the East, Sales. For Cork: Melancthon. For Cadiz: Reyna de las Angeles, Teide. For Sydney: Constantine, Nelly, S. H. Talbot.

At SINGAPORE.—For England: H.M.'s ship Nimrod.

SAILED.

From NAGASAKI.—For London: Feb. 4, Juanpore.

From SHANGHAI.—For Liverpool: Feb. 10, Sir Isaac Newton. For New York: 11, Sportsman.

From FOO-CHOW-FOO.—For London: Feb. 19, Morayshire; 21, Yaratilda. For Falmouth: 15, Kingman.

From HONG KONG, MACAO, and CANTON.—For London: Feb 16, Vanguard; 19, Shangtung, Wolverine, Merchantmen. For Liverpool: 21, Chevy Chase (str.) For Hamburg: 5, Silva.

From MANILA.—For London or Liverpool: Feb. 1, Fanny McHenry. For Cork: Jan. 28, Eliza Stewart; Feb. 18, Agamemnon. For Boston: Jan. 28, Kit Carson; Feb. 8, Storm King.

From SINGAPORE.—For London: March 7, Rajah of Cochin. For Europe: 28, Spiridron. For Liverpool: Feb. 25, Jacatra; 26, Viscount Saudron. For Hamburg: March 5, J. H. Bekker.

From PENANG.—For London: Feb. 26, Isabella Harnett.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: Tea, £2 10s. to £3; silk, £4 10s. To New York: Tea, 10 to 12 dols.; silk, 20 dols. Business continued in a very dull state till within a few days, owing to the Chinese new year holidays, when a little more inclination to do business was experienced, and may result in good employment for suitable sized vessels. The only charters reported are 2 vessels to Foo-chow-Foo and back, at 4,300 dols., and 5,000 dols., and one to Ningpo, Nagasaki and back, for 2,100 dols.

At FOO-CHOW-FOO.—To London: £3 10s. All the vessels at this port are engaged, which results from the fact that they are really always taken up elsewhere, though it provides such good employment for shipping. The consequence is that few seeking vessels visit it. The cargo, per the Spartan, which has been condemned, will come forward by the Whirlwind. We have no charters to report.

At AMOY.—Small craft continue to find ready employment, handy vessels being much wanted for the coast and Straits. The following charters are reported:—Fruita to Shanghai, 2,000 dols.; Gustav to Singapore, 1,100 dols.; Amoy Trader to Keelung and back, 1,000 dols.; Sabrina, for four months coast, at 1,000 dols. per month.

At HONG KONG, MACAO, and CANTON.—To London, £2. 10s. To New York, 8 to 10 dols. A good demand is still experienced for handy craft at these ports, though the attention is principally directed to the rice ports, and especially Saigon and Siam. A new feature in the trade is the introduction of a clause into some of the charter parties giving charterers the option of despatching the vessel to the Gulf of Petcheli, which is likely to answer. Vessels for emigration purposes to San Francisco and Australia are in fair demand, but for Demerara and Cuba the season is nearly at a close. The principal charters are:—Weymouth to London, at £2. 10s.; White Star to Sydney, at 20 dols. per passenger; Franklin Haven, at 26 dols. per passenger to San Francisco; Early Bud to San Francisco, with passengers, for 6,500; Lancashire Witch, at £10 per head to Demerara; and Messenger, 65 dols. per head for Havana. Several other vessels are reported for Saigon and back, at 60c. to 65c. per picul; and Bankok and back, at 50c. to 60c. per picul.

At MANILA.—There are no vessels here available for charter, one or two would readily get cargoes for Europe. In this case there are no transactions to report.

At BANKOK.—The Hannah Sulkeld has been fixed to load for Great Britain, at £3, calling at Sarawak if required, and 7s. 6d. extra if to the Continent.

At SINGAPORE.—There are no vessels on the berth either for London or America, there is large quantities of produce waiting shipment to the former, for which advanced rates would be obtained. Vessels are also required for the rice ports. The charters reported are—Spiridron to Great Britain, at £3. 15s., and 5s. extra if to second port. Rajah of Cochin to London, at £3. 10s. to £4. 5s., the cargoes per which will be found elsewhere.

CASUALTIES.

The Commodore (American), from Saigon to Hong Kong, experienced a succession of heavy gales, and was greatly damaged by a large spar drifting across her stern.

The Joshua Bates was slightly damaged in a heavy gale, and lost main topgallant mast. The Joshua Bates has brought a Chinaman who murdered a European at the diggings, but could not be found for some time, he having hid himself under one of the boats on top of the house.

Digitized by Google

The Barbarian, from Greenock, was seen in the English Channel abandoned, foremast gone, and sails all adrift. There was no cargo, provisions, or boats on board, and it is presumed that she had been plundered.

PASSED STRAITS OF SUNDA.

From England and Continent to Singapore: Feb. 11, Macassar; 22, Dick Arnold. From China to England and Continent: 11, Moneka; 12, Powerful (str.); 14, James Paton; 19, Cesarewitch; 21, Orissa, Dawstone; 25, Sir Isaac Newton. To New York: 19, Flying Scud. To Sydney: 16, Psyche. To Havana, 25, Kate Hooper. From Nagasaki to London: 25, Jeanpere. From Singapore to England and Continent: 21, Khersonese (str.), John Hermann; 24, Knight. From Manila to England and Continent: 14, Bonadventure; 16, Fanny McHenry; 28, Agamemnon. To Boston: 11, Kit Carson; 22, Storm King. From Batavia to Amsterdam: 22, Cosmopolite, Sperwer. From Bankok to Falmauth: 25, Main.

THE TROOPS IN CHINA.

The following is a return of the British troops now stationed in China, showing a force of 10,454 men:—

AT SHANGHAI.

Major-General Sir J. Mitchell, K.C.B.; —— Elkington, 6th Foot, A.D.C.; not known, —— D.A.A.G.; Lieut. Allgood, Bengal Army, D.A.Q.M. Gen.; Major Hamilton, 44th Regt., Brigade Major.

Captain Blackiston.

TROOPS FROM CHINA.

The following transports and ships of war, with troops from China had arrived in Table Bay and Simon's Bay, viz.:—

Feb. 3, the *Athleta*, from Hong Kong, with 326 men of the 3rd Buffs, under Lieutenant-Colonel Sargent.

Feb. 3, the *Tasmania*, from Hong Kong, with 429 men of the 3rd Buffs, under command of Lieutenant-Colonel Ambrose.

February 8, the *Sir William Peel*, from the Peiho, with 94 military invalids, and 13 officers, detachments of her Majesty's 31st, 44th, 67th, 87th, and 99th Regiments; Lieutenant Gilmore commanding. The following is a list of the officers' names:—Rev. F. Abbott, chaplain; Mr. F. Taylor, master, R.N.; Lieutenant G. C. F. Sinclair, R.N.; Captain Croome, 2nd Queen's; Major Jackson, R.M.; Staff-Surgeon Rennie, Assistant-Surgeons Snell, Turner, Goodwin, Gray, Lim, and Watson: R. C. Barker, purveyor.

February 10, the *Macduff*, from Hong Kong, with head-quarters of her Majesty's 1st Royals, 421 men and 18 officers; Colonel Holcombe, commanding.

February 10, the *Cressy*, from Hong Kong, with detachment of her Majesty's 1st Royals, 225 men, 10 officers, 3 women, and 3 children.

Feb. 11, the *Hougoumont*, from the Peiho, with 304 men, and six officers of her Majesty's Royal Artillery; Major Potter commanding.

Feb. 12, the *York*, from Hong Kong, with 300 men and nine officers of her Majesty's 87th Regiment; Captain Hamman commanding.

Feb. 12, the *Melbourne*, from Hong Kong, with 95 military invalids; Lieutenant Gratten, her Majesty's 2nd (Queen's), commanding; D. H. C. Martin, M.D., medical officer in charge.

Feb. 14, her Majesty's steamer *Cyclops*, from Struys Bay, with 316 men and eight officers of her Majesty's 3rd Buffs, Major King commanding; taken from the wrecked ship *Miles Barton*.

Feb. 18, the *Mars*, from Hong Kong, with 205 men Royal Artillery of No. 1 Battery, 4th Brigade, and 56 men, No. 5 Battery, 2nd Brigade, and the following officers:—Lieut.-Col. W. W. Barry, Capt. R. H. R. Rowley, Lieuts. H. F. Philpotts and F. R. Dyce, Assistant-Surgeons H. Harrison and J. M. Taylor, Veterinary-Surgeon G. Longman; one man died in the Straits of Banca.

Feb. 18, the *Indomitable*, from Hong Kong, with 302 men, rank and file, her Majesty's 2nd, Queen's, Major James Cornman commanding, and Captains Connor Wolferbier, and Chalmers; Lieutenants Echalay, Gubbins, and Crawford; Ensigns Fosbrook and Jackson; and Assistant-Surgeon Marshall.

Feb. 18, *The Alfred*, from Hong Kong, with 392 men, rank and file, of her Majesty's 1st battalion 2nd Queen's, and the following officers:—Brevet Lieutenant-Colonel Addison; Captains J. Thompson, Sir L. D. Williams, J. C. T. Drake, G. P. Colley and H. P. Phillips; Lieutenants H. H. Mulock, A. H. Haldane, A. W. Gossett, and J. M. Laurents; Ensigns A. P. von Homrigh and J. F. Bougley; Assistant-Adjutant Paymaster George Burton, Quartermaster William Mackie, and Assistant-Surgeon H. J. Rose; Staff Assistant-Surgeon Sainter; Veterinary-Surgeons Appleton, Wilson, and Marshall.

The steamer *Mauritius* also touched at the Cape, but arrived at Portsmouth on 1st inst., which will be found recorded in our naval and military intelligence.

PARLIAMENTARY QUESTIONS.

Colonel SYKES—To ask the Secretary of State for Foreign Affairs whether the undermentioned papers, published in the *North China Herald*, the official organ of her Majesty's Legation at Shanghai, have been transmitted to the Foreign-office by her Majesty's Legation at Shanghai:—Consular Notifications, dated the 18th and 29th of December, 1860. Consular Notification, dated the 2nd of January, 1861. Analyses of the book published by the Prime Minister of the Tae-pings, noticed by Mr. Bruce the 28th of July, 1860. Translation by Consul Meadows of the letter of "Le" to the foreign Consuls, the 21st of August, 1860. Translation by Consul Meadows of the Insurgents' Notification, dated the 23rd of August, and published the 1st of September, 1860. Narrative of the visit to Soochow of the Rev. Mr. Elkins, English missionary, in August, 1860. Narrative of the Rev. E. M. Syle and four other missionaries to Soochow on the 1st of September, 1860. Letters of the American missionary, J. J. Roberts, dated the 26th of September and the 8th of October. Narrative of the Rev. Griffiths John's visit to Nanking, November, 1860. Exports of tea and silk from Shanghai from 1844-5 to 1859-60, inclusive, published on the 10th of November, 1860. Letter from Rev. Messrs. Y. J. Allen and William Lambuth, American missionaries, on their visit to Hangchow, 19th of December, 1860. Letter from B. Jenkins, interpreter to the American Legation, dated the 21st of December, 1860. Edict for the toleration of Christianity by the Tae-ping King, dated the 29th of December, 1860. And to ask whether Consul Meadows has resigned his office; and, if so, on what grounds.

Mr. BUCHANAN—Address for copy of any correspondence or memorials addressed by Consul Meadows, at Shanghai, to Sir John Bowring, Lord Elgin, or any British diplomatic authorities in China, respecting the establishment of European inspectors of Customs at Shanghai and the other open ports of China.

Lord JOHN RUSSELL said in reply,

"Some persons feel an interest with the Germans and others with the Danes, but my hon. friend the member for Aberdeen (Colonel Sykes) is, I think, the only person in the House who takes an interest in the Taipings. (A laugh.) He asks for a number of papers; but if any are granted, I am afraid he must not expect to see them very soon, for the clerks in the Foreign-office and the printing department are now fully occupied in preparing papers which have been ordered by the House. With respect to the papers the hon. member wishes for, I can tell him that some have reached us and others have not."

Continental Intelligence.

FRANCE.

It is said that the Minister of Marine has declined some English tenders which were made for the transport of munitions of war to Cochin China, and has just taken up two French vessels for that purpose.

A letter from Lyons states that the Chamber of Commerce of that city, hoping that a careful examination of the silks said to have been found in large quantities in the Summer Palace of the Emperor of China, near Peking, might be advantageous to the Lyons manufacturers, addressed a petition to the Emperor Napoleon praying that they might obtain, either by purchase or as a loan, samples of these highly-praised stuffs. The Chamber of Commerce received an answer to their petition, saying that all the silks brought to Paris from the Emperor of China's Summer Palace consisted of only two dresses of no value.

RUSSIA.

(FROM OUR OWN CORRESPONDENT.)

St. Petersburg, April 5.

Despatches have just been received from the army in the Caucasus with the details of the military operations in the Kuban territory, under the command of Lieutenant-General Prince William of Baden, which were completely successful, a large number of native auls or fortified houses having been taken and destroyed after some severe fighting, in which the Russians displayed most exemplary courage and discipline, whilst their loss amounted only to one officer and four men killed and one officer and eleven men wounded, whilst the enemy had upwards of a hundred men killed, wounded, and prisoners, and more than two thousand head of cattle fell into the hands of the victors. On the 24th of February the expedition returned victorious to Fort Gregorieffsk, and the Prince of Baden has received from the Emperor the Insignia of the Military Order of St. George.

On the anniversary of the Emperor's accession to the throne his Majesty sent the following most gracious rescript to Count Murawieff-Amoorsky, accepting his resignation as Governor-General of Siberia:—

Count Nicholas Nicholayowitch! Your untiring activity during the last thirteen years has created a firm foundation for the development of the resources and industry of East Siberia. The needful administrative measures for the government of the extensive territory obtained by your exertions—and more especially the improvement of the naval institutions, as well as the extension of the South-Eastern frontiers, and other local affairs, including, above all, the re-organisation of the army—have claimed your whole attention. Your direct and uninterrupted co-operation during the negotiations with China and Japan has been of the greatest importance in securing to us the commercial advantages we derive from our amicable relations with those countries. Whilst sincerely acknowledging the distinguished services you have rendered to the State during your administration of the province confided to your care, I cannot but accept your resignation, on account of your ill-health, with the greatest sorrow and sympathy. Wishing, however, to retain the services of a statesman of such talent and experience in every branch of the administration, I have appointed you, by an ukase of this date, to be Member of the Imperial Council of State; and, in consideration of your long services and support to the throne and country, as well as for the personal bravery you have displayed on the field of battle, and, lastly, for the excellent arrangements and dispositions you have made for the organisation and administration of Siberia, I confer upon you the Grand Cross of the Order of St. Vladimer, with the swords, the insignia of which you will receive herewith, and remain for ever your immutable and well-affectioned

Alexander.

A short time ago it was intended to appoint Count Murawieff-Amoorsky to be Governor-General of Poland, but the late events in that country have assumed such a dangerous appearance, and the Count's inveterate hostility to the Poles is so well known, that the Emperor has decided against the appointment, preferring to pacify that kingdom by conciliatory measures to putting down the insurrectionary movement by the employment of military force.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Amsterdam, April 7.

The new Cabinet is now consolidated, and fairly launched on its political career, with what degree of success and longevity remains to be seen. The Second Chamber of the States General is convoked for the 16th inst., when ministers will submit their programme, and in the mean time are busily engaged in preparing the drafts of the different Bills they intend to introduce. With regard to commercial legislation, the public in this country are decidedly in favour of free trade principles, and no Minister of Finance would dare to propose a protective tariff, for fear of certain failure and exposing himself to general ridicule. Mr. Loudon will have to defend his Bill for the most useful way of employing the surplus capital of the colonial budget, as well as the general budget for the Colonial Department for the Second Semester of this year, which has not yet been voted by the Second Chamber. The Department of Foreign Affairs offers no great difficulties, as peace and non-intervention are the leading features of the Dutch political creed with reference to other countries, but the new Minister of the Interior will, probably, not find it easy to gain the consent of the Chamber to several measures of importance relating to home matters, and of a purely domestic nature, that he intends to bring forward this session.

Since my last letter the compulsory reduction of freights from India by the Netherlands Trading Company has continued to absorb public attention, nor is the general excitement on the subject, by any means, passed by. At a meeting of shipowners of this city held here last week, at the locality known by the appellation of the "Seaman's Hope," upwards of forty shipowning firms resolved unanimously not to tender any of their vessels to the company under the new conditions imposed in such an arbitrary manner, and which they considered as unprofitable to their own interest and derogatory to the credit of the company. They further agreed to send in a representation on the subject to the Colonial Minister, remonstrating in strong terms on the measure and praying for relief. This resolution was duly put in execution, and the result is, that the Minister declines to interfere, considering the company to have the right to fix the rate of freight they can afford to give, and, as all tenders are voluntary, no one is bound to offer his vessels for charter if the terms and conditions do not suit his interests, and he thinks he can obtain better freights elsewhere.

At Rotterdam also the principal shipowners of that city convened a meeting to take the subject into consideration. The *Amsterdam Courant* lately stated that the Rotterdam meeting unanimously sent in their adhesion to the remonstrance made by the shipowners of this city; but I have reason to know that this is not correct, and am enabled to add that though several of the gentlemen present were in favour of the protest, the majority opposed it, and consequently no representation was made by them to the colonial minister. The amount of shipping represented by the former was 23,562 tons, whilst the majority owned 36,551 tons.

In the meantime the Netherlands Trading Company appear to have acceded by tacit consent to the clamour raised by the shipowners, for they have chartered the following thirty-two vessels at the former rates of 110 florins per last of two tons, with 15 per cent. primage for return cargoes from ports in India to this country.

Now in India, or on the outward passage to Amsterdam, *Graaf van Heyden-Reinestein, Stad Dokkum, Willem Hendrick, Zeeploeg, Johanna.* To Dordrecht, *Graaf Dirk III.* To Schiedam, *van der Palm.*

To sail this spring from Dutch ports: to Amsterdam, *Henrica, Cornelia, Peking, Baron Forstner van Dambenay, Margaretha Johanna, Celebes, Holland, Vice-Admiral Gobins, Susanna Johanna, Duiveland, Alblasserwaard, S. van Heel, Cornelis Gyps, Concurrent;* from Rotterdam, *Mary en Hillegonde, Nederland, Vyf Vrienden, Noack, Vriendschap, Weltevreden, Guurtje Maria, Nederland en Orange, Vier Gezusters;* from Dordrecht, *Bernhard Duke of Saxe-Weimar;* from Schiedam, *Christian Huygens.*

The following gentlemen have been confirmed by the King in their appointments made by the Governor-General of Netherlands India: Mr. J. A. W. van Ophuysen to be Resident of the Lampong Districts; Mr. J. van Lingen to be Secretary to the Governor of the West Coast of Sumatra; Mr. H. Kleyn van de Pol, as Resident of Madioen; Mr. C. Wiggers as Resident of Cheribon; and Mr. F. D. de Chauvigny de Blot, as Secretary to the Resident of Samarang.

Civil engineers in possession of diplomas from the Royal Academy at Delft, who may be desirous of employment in the Government service in India, are invited to forward with their application the following documents to the Colonial Department:—1. Their diplomas as above; 2. A certificate of good conduct; and 3, proof of their having fulfilled their military liabilities. The advantages offered them are a gradually rising pay according to their length of service, commencing at 100 florins per month (£100 per annum) from the day of their sailing from a port in Holland; a free passage with accommodation and food as a first-class cabin passenger by a Government vessel to Netherlands India; a sum of 1,000 florins for their outfit; and

Digitized by Google

lastly, an advance of four months' pay (if required), to be repaid in monthly instalments after their arrival in India.

A letter from Harderwyk states that a further detachment of colonial troops, consisting of 100 men, under the command of Rittmeester W. Kaars-Sypestein, of the E. I. Cavalry, returning to his regiment from leave of absence to this country, and accompanied by the Second Lieutenants of Infantry J. Lauer, F. Sieburgh, E. Sieburgh, and J. W. van Eys, and the Medical Officer of the Third Class van der Burg, embarked last week at Nieuwe Deep for Java on board the chartered transport *Staatsraad van Ewyk*, Capt. F. de Winter.

For the approaching election of a member of the Second Chamber for the borough of Zwolle, in the room of Baron van Zuylen van Nyefelt, the new Minister for Foreign Affairs, the candidates in the field are the baron himself, who offers himself for re-election, Mr. van Naamen van Eenenes, and Mr. Meester, the present Burgomaster of Harderwyk.

At Roermond there will also be a contested election for the seat lately held by Mr. Strens, the new minister for Catholic affairs. The candidates are Mr. F. de Keverberg, of Kessel, near Venlo, Mr. J. B. Hengst, formerly member of the Second Chamber, and Mr. C. Cornelis, justice of the peace at Weert.

The King has granted a pension of 3,669 florins per annum to Mr. J. A. Mutsaers, late Minister for Public Worship (Catholic), and appointed him to be member of the Council of State.

A few weeks ago four Swiss soldiers who had enlisted for service in India deserted from the depot at Harderwyk, and gaining the coast, stole a boat and proceeded in it to sea. Without any knowledge of navigation,—in fact, never having seen the sea before,—and not having taken the precaution to provide themselves with a compass or even provisions, their foolhardiness very nearly cost them their lives. After being tossed about at the mercy of the waves for several days, they were ultimately picked up in a most exhausted state by the Belgian fishing-smack *Dolphin*, and landed at Ostend, where they were handed over to the Dutch Consul at that port.

A similar case is just reported from the Helder, where three Swiss recruits belonging to the garrison at that port made an attempt to seize a boat with the intention of crossing over to England to escape their military duties. They had provided themselves with a good stock of bread for their voyage, but were detected in the act of embarking during the night.

Major K. A. Jeckel, late of the India Service, who lately retired from the army with a pension, has received from the King the insignia of the Royal Order of the Crown of Oak.

The Dutch army has to deplore the loss of a meritorious officer, by the death of Lieut.-General Baron van Uttenhove, who spent many years of his life in Netherlands India, where he was Colonel-Commandant of the Cavalry corps. He was born at Utrecht, on the 29th of January, 1802.

The Netherlands Trading Company are making inquiry for a vessel to carry out to Java another detachment of 100 men, supplementary troops, with cabin accommodation for four officers, the ship to be ready to embark the detachment at Nieuwe Deep by the latter end of April.

At the spring sale of Java sugar, prices experienced a heavy fall, as you will perceive by the subjoined table.

The coffee market is firm, and prices wear an upward tendency, notwithstanding the heavy stocks on hand as compared with previous years.

STOCK OF UNSOLD E. I. COFFEE HELD BY THE COMPANY.

31st March, 1861	. . . . .	557,239 bags.
do. 1860	. . . . .	204,900 do.
do. 1859	. . . . .	185,478 do.

Result of the Spring sale of 70,593 kranjangs, and 572 baskets of *Java sugar* held by the Netherlands Trading Company, at Amsterdam, March 21, 1861 :—

All sold, but at prices varying from 2 to 5½ florins below those of the Autumn sale.

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

NEW YORK, March 29, 1861.

MONETARY AND COMMERCIAL.

Money continues abundant and almost a drug at 6 to 7 per cent. The Bank returns exhibit a plethora of specie amounting to about $34,000,000, while the deposits reach about $90,000,000, and the loans to $122,000,000. Sterling exchange has improved, and bankers' bills sell at 107c., and commercial ditto at 105¾c. to 106c.

TEA.—Green continues in good demand, and during the present week about 3,000 half-chests have been sold at full prices. The auction sale last week, consisting chiefly of blacks, passed off with good spirit. Greens are scarce and firm. Fair Young Hysons are to be had below 45c., but not many under 50c. per lb.

COFFEE is steady. Among the sales have been 104 bags Government Java, at 17c. to 17¼c.

SUGARS have ruled at easier rates, with a steady demand. We have no sales of East India to report. The stock comprises 108,000 bags, 21,000 hhds., and 15,000 boxes.

TIN.—The market was quiet at 27c. to 27¼c. for Banca, and at 26c. to 26¼c. cash for Straits.

GUNNY BAGS were steady, with a moderate demand. Sales of 400 bales, part heavy, have been made in Boston ex-ship at 12¼c. cash; 50 ditto at 13¼c. six months; and 275 ditto at 12¼c. to 13c. cash and six months.

GUNNY CLOTH.—The market is heavy, with light sales at 9¼c. cash, delivered in Boston.

SALTPETRE is quiet, and we have no sales of moment to record, except 400 bags crude at Boston, at 8¼c. six months.

HEMP.—The market continues dull, with small sales of Manila at 5¼c. six months.

SPICES.—The market less active and steady. Sales of 10,000 mats cassia have been made at 18c. six months, and 45 cases ditto at 19c.; 100 bales cloves, in lots, at 10c.; 50 cases No. 1 nutmegs at 42½c. delivered in Boston; 275 ditto on private terms, and 500 bags pepper at 8¼c.

DRUGS.—Opium continues steady, with sales of 18 cases at $5 50c. to $5 75c.; 100 bales gambier at 3¼c.; 1,000 lbs. Southern Ginsing at 60c. cash; refined camphor, sales at 45½c. to 47½c. six months.

ARRIVALS.—Abaellino, Hall, at Boston, March 9, from Calcutta; Competitor, Hildreth, at New York, March 14, from Foo-Chow: Swordfish, Crandall, at New York, March 18, from Shanghai; Charmer, Lucas, at New York, March 22, from Manila; Nabob, Baxter, at New York, March 22, from Foo-Chow.

SAILED.—Cromwell, Symmes, from Boston, March 9, for Batavia.

LOADING.—At NEW YORK.—For Batavia and Singapore, Surprise, Ranlett; for Hong Kong, Hotspur, Johnson, N.B. Palmer, Low, Kathay, Stoddard, Maury, Paul.

HER MAJESTY'S IMPERIAL AND INDIAN ARMIES.

The measures for the consolidation of the Indian with the Imperial forces of her Majesty have so nearly approached accomplishment, that we may venture, (says the *Army and Navy Gazette*), to give their main features in a substantially complete form.

In future, every officer to be commissioned and every soldier to be enlisted will belong to the general army, and will be available for service in any part of the empire to which the requirements of the State may call him, and in the rotation hitherto usual among the troops of the line. In the great majority of the regiments what is called the purchase system will prevail as at present; but in three regiments of cavalry and nine of infantry, which are to be formed upon the remains of the local Indian European corps, the promotion will be regulated pretty much on the plan of the company's service—namely, pure seniority in all but the higher ranks. In addition to this army for general service, and the native colonial regiments now in existence for the defence of Malta, Ceylon, the West Indies, &c., there will be in India a number of irregular corps, composed of natives, but officered from the Indian staff, of which six members will be employed in superintending the efficiency of each irregular corps. This Indian staff will in itself form a list of officers who will volunteer to serve in it. Their qualification will consist in their belonging to a regiment serving in India, in their having previously passed two years in that country, and in their proving their fitness by means of an examination. We may obviate alarm by at once stating that the nature of this examination will be settled, not schoolmaster fashion, but by the head of the department in which it is proposed to employ the candidate; that it is intended to be practical, and having reference only to those subjects of which a knowledge is essential to the efficient discharge of the duties to be undertaken. The staff list will be ever varying in its dimensions, and promotions in it will be regulated only by length of service. The qualifying terms are, for the rank of captain twelve years' service, of which four must be in the staff corps; for major twenty years' service, of which six must be in the staff corps; for lieutenant-colonel twenty-six years' service, of which eight must be in the staff corps. Five years' service in the last-named rank will give a right to the rank of colonel, after which the officer's promotion is regulated by his army seniority. The purely military staff—the adjutant-general's and quartermaster-general's departments, the brigade-majors and personal staff—will be filled either by the line, as at present, or by the staff corps, but in every other department the Indian staff will be composed solely of officers who have given up their regiments to join the Indian staff corps. Every military officer in India will therefore belong to and serve with either the Royal Artillery, Royal Engineers, one of her Majesty's regiments of Cavalry or Infantry of the Line, or to the Staff Corps. Exchanges between these several services will be permitted under pretty much the same rules by which they are now regulated between one Queen's regiment and another. This, then, will be shortly and simply the position of the united army as soon as the complications terminate, which must more or less exist during the period in which two military establishments, hitherto regulated by widely different systems, are being welded into one body.

THE THIRD CHINA WAR.

(From the *Gazette*.)

INDIA-OFFICE, March 27.

The Secretary of State for India has received a General Order by his Excellency the Governor-General of India, and a despatch accompanying it, from Lieutenant-General Sir J. Hope Grant, G.C.B., commanding her Majesty's Forces in China, of which the following are copies:—

"GENERAL ORDER BY HIS EXCELLENCY THE GOVERNOR-GENERAL OF INDIA.

"Camp, Jubbulpore, Jan. 17, 1861.

"His Excellency the Viceroy and Governor-General of India has much satisfaction in publishing, for general information, the subjoined letter, dated the 21st of November, 1860, from Lieutenant-General Sir J. Hope Grant, G.C.B., Commander of the Forces in China, bringing to notice the services, during the campaign in that country, of the native troops of all arms which proceeded to China from Bengal, Madras, and Bombay.

"The Governor-General congratulates the troops on the high testimony which they have earned for themselves from their distinguished commander by their exemplary conduct in camp and garrison, and by their valour in the field. And it is an additional source of gratification to the Governor-General, and a matter of which the troops may justly be proud, that their brilliant conduct in the field excited the admiration not only of their British comrades, but also of the French troops which served in the same campaign.

"It will be the grateful task of the Governor-General to make known to her Majesty's Government the report of Lieutenant-General Sir Hope Grant, and to bring particularly to notice the officers specially mentioned by him."

"TO THE RIGHT HON. EARL CANNING, G.C.B., &c.

"Head-quarters, Tien-tsin, Nov. 21, 1860.

"My Lord,—Peace having been concluded with this country, and many of the native troops serving in the expeditionary force being about to return to India, it becomes my duty to bring to your Excellency's notice the services of the regiments and corps of her Majesty's Indian army which have been serving during the campaign.

"The 1st Sikh Irregular Cavalry, under Major Probyn, and Fane's Horse, under Captain Fane, have performed their work most admirably.

"On more than one occasion these regiments have been opposed to, and have successfully charged, a vastly superior force of the enemy's cavalry, and their conduct in the field has excited the admiration of the French as well as of the English troops. It is not only on the field of battle that their services have been so important during the recent campaign, but in performing the numerous other duties required of them, of an infinitely more harassing nature—patrols, escorts, and reconnoissances, as well as the task of carrying letters almost daily between Tien-tsin and Peking (a distance of seventy-five miles), for upwards of a month, during which they were frequently fired upon; their services have been of the utmost value to the expedition.

"I beg to recommend Major Probyn and Captain Fane to your Excellency's most favourable notice.

"The two companies of the Madras Artillery, under Captain Hicks, and the two companies of Madras Sappers, under Captain Shaw Stewart, rendered good and useful services in the operations which preceded and led to the fall of the Taku Forts. The latter corps was most energetic in working without relief at the construction of the batteries, and have always shown themselves to be cheerful and willing workmen. A detachment of the former corps, under Captain M'Intyre, was summoned from its station at Chusan to the assistance of Shanghai, and was fortunate enough to reach that city on the day it was attacked by the rebels, and to assist in repelling their attacks.

"The regiment of Loodianah was stationed at Shanghai during the attack of the rebels on that city, and under the command of Lieutenant-Colonel Walsh contributed to their repulse.

"The 8th and 15th Regiments of Punjab Infantry have accompanied the army in all the active operations in the field, and although, owing to the nature of the operations, they have not come into collision with the enemy so frequently as they have perhaps wished, their services have not been of the less value to the expedition. The 15th Punjab Infantry, however, was particularly forward during the action of the 18th of September, and on the 21st of September a detachment under Lieutenant Harris distinguished itself by crossing the river and capturing a gun which had opened on our lines.

"The 8th Punjab Infantry had been ably commanded throughout the campaign by Captain Brownlow. Captain Shebbeare, an excellent officer, the commandant of the 15th Punjab Infantry, was unfortunately compelled by ill health to leave just when active operations were commencing, but the regiment has been efficiently commanded by Lieutenant Randall.

"The 11th and 19th Punjab Infantry have been employed in garrisoning the depots, &c., while the 3rd and 5th Bombay Native Infantry and the 21st Madras Native Infantry have formed portions of the garrisons of Hong Kong and Canton.

"I have much pleasure in informing your Excellency that the behaviour of the Indian troops, both in camp and in garrison, has been everything that I could wish, and it has given me much satisfaction that the course of events has enabled me to send a considerable portion of them back to their homes in India before the end of the present year.

"I have, &c.,

"J. HOPE GRANT, Lieutenant-General, Commander of the Forces.

THE see of Madras, which has become vacant by the death of the Right Rev. Dr. Thomas Dealtry, includes the whole of that presidency, and is worth £2,500 a-year. The appointment of a successor will devolve upon Sir Charles Wood, the Secretary of State for India.

MR. HENRY B. LOCH has been appointed major of the Queen's Westminster Volunteer Rifle Corps.

Spirit of the Press.

LORD ELGIN AND THE YANG-TSE-KEANG.

The nations are happy whose history is a blank. The aphorism has lost its truth since historians have learned to chronicle other matters besides conquests and revolutions. But we still feel that it has some power left when we open our despatches from the extreme East. There is always some apprehension when the time arrives for a mail from China. It is a very volcanic soil. No one can be quite sure that some new difficulty may not have sprung up which may set us all fighting in this country, create changes of Ministry and dissolutions of Parliament, and end, as every difficulty does end, in an inflammation of the Income-tax and a depletion of the national exchequer. It would be a happy thing for us all if we could compound for the next twenty years to receive no news at all from that interesting part of the world, except the figures which denote the exchanges and the current prices and the statistics of imports and exports. If narrative be an absolute necessity, we would make an exception in favour of that little bit of undeviating mendacity which always comes down from Foochow. From that sequestered mart of teas where steamboats do not go there is never-failing intelligence of some imminent disturbance which never comes to anything, but is always sufficiently alarming to shake the confidence in the home market as to any uninterrupted supply of tea. From long experience we can receive this with unshaken nerves. But from the great centres of politics and intelligence we are only too thankful to find that there is nothing of dangerous importance to record. This time everything is of a quiet and cheering character, and Lord Elgin, who is now speeding homewards from Trieste, may take his seat in the House of Lords with the quiet consciousness that he has once more accomplished what he went out to perform. Mr. Bruce and Prince Kung are getting on together in amity and concord, which, considering the circumstances of their first introduction, are quite as strict as could have been anticipated. The Prince has seen fit to open to British trade, "at the earliest practical period," two ports above Chekiang, on the Great River. As this is something beyond the treaty, we take it for granted that this excellent Prince has also made arrangements for the immediate opening of the great port in Mantchouria, and that he has conveyed assurances of his entire comprehension of the fact that under the most favoured nation clause of our treaty we are become entitled to all the privileges more recently granted to the Russians. We are very content, however, to see the principal attention of our diplomatists and naval officers fixed upon the Great River. This is to China what Fleet-street and Holborn are to London. There is no getting a thorough trade ingress and egress while these thoroughfares are blocked up and forbidden. The Yang-tse is the way to and from every important part of the Chinese Empire. Somehow or other, every canal finds its way into it; all the best teas grow in the provinces it waters, and the best silks get up into the vast cities. The simple divine who found an unnecessary illustration of the goodness of Providence in the fact that good rivers were always sent to flow through great towns might here see his famous idea perfectly developed. All up the river for 1,200 miles its margin is enlivened or oppressed by vast commercial ports. Until we get up to these we know nothing of China. We may be allowed to wander about a few streets in Hoxton and Camden Town, and open a shop in St. John's-wood, but so long as we are shut out of the long lines of Holborn and Fleet-street we cannot be said to have any of the advantages of trading in London. So it is in China. Hitherto they have told us that we cannot go up this river because there are rebels at Nanking. No doubt there are. Show us 1,200 miles anywhere on the face of the globe without some impediment. There are impediments in Fleet-street and Holborn. Some householder who desires to save sixpence a thousand in the price of gas is always pulling up the pavement, or a piratical water company has opened a tremendous trench, or a despotic Imperialist Board of Works has threatened to shut up the whole quarter; or it is Lord Mayor's Day, and Gog and Magog, more terrible to look upon than an army of Taepings, have possession of the thoroughfare. But still we get along as we may, and by some means or other we manage to do business with the shops on our route. So we should on the Fleet-street of China. If they will let us alone, and don't treaty-bind us too much, we shall get along up, taking advantage of our opportunities, dodging the Lord Mayor, waiting patiently till we can overcome the block caused by the economical householder and his gaspipe, and humbling ourselves before the omnipotent Board of Works. Depend upon it, there are means of overcoming the difficulties caused by the rebels without putting them all to the sword. What makes Prince Kung so civil just at present? First of all, the advance upon Peking. That was necessary to induce so exalted a Tartar to look into the business at all. But his after-cordiality has been entirely caused by the discovery which he has made that the Customs at Shanghai are doubling every three or four years, and that there is a tolerable certainty of their coming up next year to the very respectable sum of £2,000,000. We may depend upon it that Prince Kung is by this time fully alive to the advantage of making nests in other parts of China where European hens may come and lay their golden eggs. We may also depend upon it that even the mystic Sovereignty which resides at Nanking would not be very long in discovering it to be to his advantage to receive a toll for police dues or lighthouse dues—although he has destroyed the porcelain pagoda which might have served him for this pretext—or under any other name he might please, from ships passing through the bit of river which endures his sovereignty. The British ships which are now up this important highway deserve much more sympathy and interest than they are likely to obtain. When Captain Sherard Osborn carried Lord Elgin up during his first embassy, we only knew of its course and its banks what the Jesuits had told us. Now we know all about it. Now we know that the buyers and sellers are really all congregated in those parts; and that, although they are cruelly plundered by hosts of foragers from the Emperor at Peking and from the Emperor at Nanking—plunderers whom they abhor with an impartial dread, still they buy and sell. Lord Elgin's voyage was a voyage of discovery; Admiral Hope's voyage is a voyage to found a settlement. There is by this time a gunboat anchored off Chinkiang, and a Consul, to whom we hope that the terrible memories of what happened in that city twenty years ago will procure respect and safety.

Digitized by Google

There is another gunboat, we hope, off Nanking, and possibly some means may have been found to surmount diplomatic delicacies and to accredit some consular agent even to the Taeping Chiefs. The account says that a Consul and a gunboat are to be left even at Hangkow. Now, Hangkow is the great emporium of China. If we can settle ourselves there we shall have done all we can desire the Government to help us to do. We shall then have thoroughly opened up China Proper. The rest must, of course, depend upon ourselves. We shall be able to buy our teas and silks in open market, with a country as large as Europe to supply us with goods, and to buy our goods if they like the quality and the prices. We shall then also be able fairly to settle the question which now troubles some of us—how far the clause in the Russian Treaty which gives that nation a free trade in goods across the land frontier will enable it to undersell us in the centre provinces. Admiral Hope invited the merchants of Shanghai to go with him, to sow seeds of commerce as they pass along. The greatest among them are, we fear, too busy and too well to do to have a taste for such ventures; but it is to be hoped that there are some young and adventurous spirits who, even at Shanghai, are not too rich and too contented to move, and who may have gone up with him. We are very anxious to receive a trade report from "John Bull, Brothers, of Hangkow," and we greatly desire to hear that they are only one of the numerous firms who enjoy in the neighbourhood of that large, but not beautiful or fragrant city, a fine European settlement, and a bund convenient for charitable talk. We hope that they may own fleets of steamers in the three miles of broad waters which divide the quarters of the enormous city, and may have pleasant residences among the lakes which are not far away. We hope to see this, because this is the sort of thing which has come to pass, and which has answered so wonderfully at Shanghai; and because whenever this may happen in the interior it will be at once a symptom and a cause of mills being in full work in Lancashire, and tea plentiful with the good housewives of Great Britain.—*The Times.*

Literature.

In the current number of the *British Quarterly Review* (Jackson and Walford) there is an important article entitled "Our Commerce with China." The writer evidently thinks that British interests are liable to be injured by the encroachments of Russia, and dwells on the fact that in less than three years the Russian Empire has made a complete sweep over the vast Manchoorian plains on either side of the Amoor, the previously semi-neutral condition of which "was held by Asiatic politicians to be essential to the independence both of China and Japan."

He affirms that it is our interest to support the Manchoo dynasty against Russians and Taepings. Several of the statements made in the article are highly interesting, and it is well worthy of perusal.

Some years ago Dr. August Pfitzmaier translated into German a Japanese romance, and the *National Review* for April (Chapman and Hall) gives an article on the subject, and an outline of the story, which is curious and amusing. Dr. Pfitzmaier is at present engaged on a Japanese Dictionary.

Messrs. Smith, Elder, and Co. have just published Mr. Anthony Trollope's novel, entitled "Framley Parsonage," which appeared originally in the pages of the *Cornhill Magazine*. It has already won golden opinions, and will, doubtless, be warmly welcomed in its new shape. The tale is illustrated by Mr. Millais.

Everybody is reading "Silas Marner," by the Author of "Adam Bede" (Wm. Blackwood and Sons), and a charming tale it is. Though a mere sketch when compared with the "Mill on the Floss," the genius and exquisitely artistic craft of the author are as obvious as in that more elaborate production. And the moral is beautiful. In this respect, indeed, it is superior to either of George Eliot's former tales.

Mr. Blanchard Jerrold is endeavouring to organise a "Book Union," on the principle of our Art Unions, the prizes won being books instead of pictures. The idea is a good one, and we hope, 'ere long, to see it effectively carried out.

Among the literary publications or announcements we may chronicle the following:—

"Life of the Right Hon. William Pitt," by Earl Stanhope. Vols. 1 and 2 (John Murray.)—a work written in the same attractive style which charms us in his "History of England." Lord Stanhope has broken up much new ground, and throws light on an important period of English History.

A new edition of the "Letters and Works of Lady Mary Wortley Montagu" (Bohn) will afford fascinating reading for those leisure hours which the most busy of us generally manage to secure.

Messrs. Hurst and Blackett have in the press a volume of "Essays from the *Quarterly*," by Mr. James Hannay. The very Rev. E. B. Ramsay, Dean of Edinburgh, has written a new series of his "Reminiscences on Scottish Life and Character," which will be published by Messrs. Hamilton, Adams, and Co.

Mr. James Blackwood announces a memoir of the "Life and Writings of Wm. Tennant, LL D.," Professor of Oriental languages in the University of St. Andrews, by Mr. F. Conolly, Town Clerk of Anstruther, and "Biographical Portraiture; or, Sketches of the Lives and Characters of a few Illustrious Men," by John Leaf.

We have already mentioned that "The Voyage Round the World of the Austrian Frigate *Novara*" (Saunders, Otley, and Co.), will be shortly published, and we believe that Mr. Ravenstein's important work, "The Russians in the Amoor Country" (Trubner and Co.), is nearly ready. It is said that Mr. Ravenstein will put Mr. Atkinson's accounts of Central Asia to severe question and test.

Ten Weeks in Japan. By GEORGE SMITH, D.D., Bishop of Victoria (Hong Kong). Longman and Co., Paternoster-row.

WE have only space and time in our present issue to announce the publication of this interesting volume. There is scarcely a subject in connection with Japanese life and manners, on which the Bishop of Victoria does not touch. He is already well known to the reading public as a traveller and writer, and every one interested in Japan will be delighted with the picturesque descriptions, the vivid sketches of character, and the many curious and suggestive remarks which abound in the volume. We have read it through with great delight, and can promise our readers a treat in the perusal. "Ten Weeks in Japan" will be fully reviewed in our next number.

The China Directory for 1861. SHORTREDE AND CO., Hong Kong. F. Algar, 11, Clement's-Lane, London.

To everyone who has business relations with China this Directory will be found indispensable. This is the second year of the publication. Let us hope, that though youthful at present, a long and useful life is before it. We miss the admirable map of Hong Kong which accompanied the former issue.

The Singapore Review and Monthly Magazine. January, 1861. Conducted by E. A. EDGERTON, *Straits Times* Office, Singapore: F. Algar, 11, Clement's-lane, London.

WE heartily hope that this new periodical will become a great success in the Straits Settlements, and it is possible that the information it contains will be of considerable service to friends at home. Mr. Egerton speaks strongly, but assuredly not too strongly of the demoralising influences at work at Singapore, as in most other of our colonies where a few Christians are surrounded by idolators. It is well, he says truly, that there should be such a mixture of Saxon and Celt, of the Nomadic Orientalist of Arabia, the caste-worshipping Hindu, the disciple of Confucius, and the man of no faith at all; but it is not well "when these influences foster in us the notion that all moral peculiarities and forms of faith are alike valuable, when we learn indifference to all truth, and call this new feeling superiority to prejudice." A good literary review at Singapore will do good in many ways, and may prove a healthy element in a community devoted, over-much it may be, to mercantile pursuits.

APPOINTMENTS IN CHINA.—The following appeared in the *Observer* and in most of the daily papers. Our readers will perceive that most of the announcements have already appeared, and some are in practice. The appointment of Mr. Winchester to Hakodadi we gave in our last issue:—Mr. A. B. St. Clair, now Second Paid Attaché to her Majesty's Mission in China, is appointed First Paid Attaché, in the room of Mr. De Norman, deceased. Mr. G. H. Wyndham, now Unpaid Attaché, is appointed Second Paid Attaché, in the room of Mr. St. Clair. The following arrangements have taken place in the new ports in China, opened to trade by the Treaty of Tien-tsin:—At New Chang.—Consul, Mr. T. T. Meadows; first assistant, Mr. T. Adkins; second assistant, Mr. A. Devenport. At Ningpo.—Consul, Mr. F. E. B. Hervey; interpreter, Mr. P. J. Hughes; assistant, Mr. G. Philips, At Swatow.—Consul, Mr. G. W. Caine; interpreter, Mr. C. Alabaster; assistant, Mr. W. C. Cooper. At Tung-chow.—Consul, Mr. W. H. Medhurst; assistant, Mr. H. G. Howlett. Mr. C. A. Winchester is to be Consul at Hakodadi, vice Mr. C. Pemberton Hodgson, resigned.

NEW INTERPRETERS FOR CHINA.—Lord John Russell proposes to nominate six student interpreters for China and two for Japan. Candidates for the appointment will be required to compete before the Civil Service Commissioners. Lord John Russell has addressed a letter to his Royal Highness the Chancellor of the University of Cambridge, offering to include in the list of candidates the names of any three gentlemen of the University whom his Royal Highness or the Vice-Chancellor may recommend for that purpose. Six candidates will also be selected from King's College, London. We believe that the Government propose erecting a college at Peking or at Tien-tsin for British interpreters.

THE special Sunday evening services in Westminster Abbey are attracting monster congregations. The Bishop of Labuan preached on the 7th instant.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

Correspondents and Newspaper Publishers in INDIA, CHINA, JAPAN and the EASTERN ARCHIPELAGO are requested to address all communications, newspapers, &c., *via* Marseilles, to the Editor, Box No. 70, General Post-office, London, E.C., which has been opened specially for the same.

Post-office orders should be made payable at the Lombard-street Office, to MORTIMER WRIGHT.

The London & China Telegraph.

LONDON, SATURDAY, APRIL 13, 1861.

LORD ELGIN'S RETURN.

HER MAJESTY'S PLENIPOTENTIARY in China has at length arrived in England from his second expedition to the Far East. After a short stay in Paris Lord ELGIN landed at Dover on the 11th inst., amidst the warm cheers of the populace, and salutes of ordnance from the Castle and from the Western Heights. It was an honest English welcome, and one as merited as it was genuine. It is pleasant to read that Lord ELGIN'S bronzed countenance exhibited "much gratification at the warmth and cordiality of his reception;" pleasant to know that the address read by the Town Clerk, and replied to by his Lordship, was not a mere matter of formal courtesy, but the expression of an universal belief that Lord ELGIN has amply vindicated the honour of the British name, and that he has successfully achieved a work, the importance of which it is impossible to over-estimate. The mingled feelings of gratitude and pride with which his Lordship was welcomed by the Mayor and Corporation of the most famous of our Cinque Ports, are, we repeat, the feelings of the nation. No party bigotry, no misconception of Asiatic politics, can possibly obscure a triumph, won with such ability and wisdom. Lord ELGIN'S mission was indeed "difficult and delicate," but we believe that it has been successfully fulfilled; that he has laid a broad and lasting foundation for the security of British commerce in China, and that under the ægis of the New Treaty, Christianity and civilisation will unite in blessing that vast Empire.

The greatness of this little island of ours is a matter of which Englishmen may well be proud, but it is doubtful whether many of us ever experience any particular feelings of exultation from considerations of that kind. Born to empire, we have from the earliest times always accepted our high position in the world simply as a thing of course. It never occurred to our ancestors, when the whole extent of their power lay within even less than the compass of these islands, that because their country, territorially considered, was about one-third the size of France or Spain, it should therefore necessarily be less powerful than those nations. On the contrary, we were rivals of the greatest powers even then, as the actions of our EDWARDS and HENRIES proved, and when the whole island, just two hundred and sixty-one years ago became subject to the same Government, the Englishmen of that age, although their colonial empire was then hardly founded, modestly prefixed to the name of their country the distinctive epithet GREAT. This they did, not in any spirit of boastfulness, which was not of their nature, and least of all with the express intention of comparing the greatness of their island with that of any other country, but simply because it was a matter of necessity to find a new style and title for two powerful kingdoms when united under the same sceptre. Nor were they wrong in their appellation, for, as was justly remarked the other day by Mr. GLADSTONE at the Mansion House, the seeds of England's power are centred wholly in herself. Yet, upon her possessions abroad the sun never sets, from the extreme East to the furthest West, all round the globe; and from all quarters are continually arriving her numerous prefects and pro-consuls, her statesmen and soldiers, who have recently laid down high office, if not Imperial power, to give an account of the manner in which they exercised their great trust, and to receive from their fellow-citizens in this little island the meed of praise or the tacit censure which their deeds have merited. The former is considered their noblest reward, while the latter, let us be thankful, is so rarely deserved as almost to be unknown. And after having for years thus wielded kingly power—after having waged successful wars, annexed large provinces, and concluded treaties of peace with Imperial potentates fifteen thousand miles across the sea—they return to their island home, and shorn of all the emblems of their greatness, mingle modestly with the mass of their countrymen, after a time not specially noticed, though for their great services never forgotten.

Lord Elgin, one of the greatest of those statesmen who have done England illustrious services abroad, has just returned to reap the reward which his countrymen know so well how to bestow upon the meritorious. The approbation of a united country—the praise of Queen, Parliament, and people—is not often so unanimously accorded as it has been on the present occasion. At great personal inconvenience, and after having only recently returned from the Far East, his lordship, at the call of duty, at once set out again to the scene of his former labours, to undertake a task, the weight of which few men would have been enabled so successfully to sustain. Canton, Tien-tsin, Japan, and the Yang-tze are names which recall the high achievements of his first mission; and it was no fault of his lordship's if the somewhat over-sanguine expectations formed by the public as to the results of his work were not strictly fulfilled. The Chinese now fully understand that they cannot depart from the spirit of their agreements with us. Sure as fate, unswerving as time, if the bond be broken, it will infallibly be restored, and re-ratified with additional securities, and under circumstances that cannot but leave a lasting impression on their minds. And so let the Chinese, no matter by what motives impelled, cease from their cunning; let them abide now by what they have again ratified, even in the heart of their capital, where foreign force never marched before; let them think by day and dream by night of the penalty of not doing so; let them have night-mare visions of being burnt amidst summer palaces flying up in miles of sparkling embers high into the air; let them do and bethink them of all this, and the realised results will soon repay their passive good faith in speedily producing such a thriving and contented condition, both as regards their people and Government, that to war with us for the future would be regarded only as stark madness. Lord Elgin's second mission could not produce a nobler result, both to our own country and that enormous empire.

One of the surest ways to bring about such a wished-for consummation, and one of the works for which, we venture to say, Lord Elgin in after-times will best be known, will be the opening of the Yang-tze to the commerce of the world. What London is to England so is that noble stream to China—the mart of the whole country. Its picturesque banks are lined with some of the largest cities in the East; and at a point six hundred miles from the sea, at the junction of the Yang-tze and the Han, on whose banks, facing and close to one another, are situated the three emporiums of Hankow, Hanyang, and Wuchang, a British Consul is by this time posted to preside over the initiation of a commerce which bids fair to surpass that of any other place in China. At all seasons of the year there are at least eleven feet of water available throughout this long line of river communication, and when the stream is flooded by the summer rains and the winter's snows, even ocean steamers drawing sixteen feet of water can ascend as high, as the *Furious* did with Lord Elgin in November, 1858. Opposite Hankow the river is a mile broad, and excessively deep, and though fault has been found with its sand-banks, it is an easier river to navigate than even the Ganges or the Indus, upon which steamers ply throughout the year as high as seven hundred and a thousand miles from the sea. The various articles of commerce to be found in these great marts are as plentiful as they are valuable. Iron, copper, tin, lead, and coal, mostly of excellent quality, and agricultural and manufactured produce of every description abound. The inhabitants, though sadly fallen off in numbers, on account of the ravages of the rebels, appear generally to be exceedingly well-to-do, while the country for hundreds of miles along the river's banks is everywhere dotted with farms, homesteads, and hamlets, peeping out amidst the most exuberant vegetation, and surrounded by highly fertile and cultivated fields, teeming with a vast population, all desirous of purchasing our goods. In short, a finer and more promising market—one never yet broached—could nowhere be found; and that we are now to have it opened to us can be attributed chiefly to the wisdom and energy of Lord Elgin, who was the first to explore its treasures, and who, though now amongst us, gave directions for that expedition which, having started about the middle of February, must by this time have founded several settlements on its banks. The only difficulties by which we can be opposed in this grand enterprise are those with which we are already familiar, and which we have before so often overcome—we

Digitized by Google

mean Chinese duplicity and cunning, and the rebels who inopportunely hold Nanking. At Shanghai only the other day these latter gentry were taught a salutary lesson, and they have doubtless not yet forgotten the redoubled attention and vigour with which we returned their anything but friendly salutation when we first ascended the river so high in 1858. We, therefore, do not at this juncture anticipate any opposition whatever from these people, who possess, we believe, neither the will nor the power to work us any harm. The coast, then, appears clear; and if those visions of peaceful commerce which now crowd all our views of China are only partially fulfilled—though we see no reason why they should not be accomplished, even in excess of our anticipations—the labours of Lord Elgin, if he had achieved nothing more, could not but be deemed most successful and valuable, in having opened to us so vast and plentiful a source, whereby, morally, physically, and commercially, the wealth, power, and happiness at least of China, if not also of England, may be immeasurably increased.

THE REBELLION IN CHINA.

To those who know anything of the Chinese character—the native love for antiquity and the innate reluctancy to change, which is its natural characteristic—it must be refreshing to see the disposition to argue on points of doctrine and discipline which is shown by the rebels of Nanking. Were no political element in the matter it would be marvellous, and we must then acknowledge it to be a true work, and a step in that direction most ardently longed for by the earnest missionary there and by all good Christians at home. But the Kan-Wang, whose confessions we have received by the late mail in the shape of a confidential report intended for publication—the Kan-Wang has let out the secret. When too closely questioned (query 5), by the inquiring missionary on the absurdity of the Celestial King requiring all nations to come and serve at his Court, and stating that Jesus Christ and the Eastern and Western Kings are own brothers, he laughed aloud, and candidly confessed that it was a matter among themselves, and only connected with their success; in other words, that they said just what was *convenient* about God and Jesus Christ, and did not think the outside people would take the trouble to discuss the matter. And we are not at all surprised to hear that they now deny some of the dogmas which they once professed, for when they find that these opinions of theirs run counter to their interests with foreigners, it will be to them the easiest matter in the world to contradict themselves, and profess *à la Chinoise* that there was nothing at all in it—the thing was said or done just to ensure their own success.

We should advise all well-meaning missionaries, if we may be allowed to suggest, to beware lest they be found countenancing not mere heresy but blasphemy, while they uphold the doctrines of these infatuated rebels. What the precise nature of their conviction is, we are at a loss to make out; they appear to us to be neither Unitarians nor Trinitarians, for they profess a belief in Christ as the Saviour of the World, and as having a sort of connection with the Supreme, more than mortal men have, but they deny his equality with the Father. Then, in a proclamation from his Celestial Majesty, there is a delightful mystery and confusion. He speaks about the Spirit-Parent of all, and God the Holy Spirit, being the Holy Father of all; Jesus, the Elder Brother, coming down to save mankind from sin, and promising a Comforter, to wit, the Eastern King, who is now come from China. The line of argument, if such it may be called, which the Chief takes, is not unworthy of the style of the celebrated "Essays and Reviews." He, in fact, takes the Bible not as the infallible word of the living God, but as a work on which to exercise his "verifying faculty," which (alas for China!) we fear is but a poor instrument of investigation in his native land. Anthropomorphism also forms an element of their creed, because it suits the purpose of the chief to represent God coming down and delegating authority to him to destroy the idolators and set up the celestial realm.

It is certain that this Tai-ping-Wang is a man of no ordinary ability. He has studied the history of his own country, and is apparently anxious to know all he can find out about other nations. That he intends to root out idolatry, and that he is doing this, as Mr. JOHN says, "in a most masterly manner," we have not a doubt: but that Christianity, in the commonly accepted sense of the term—pure Protestant Christianity—will succeed in this new empire, we cannot believe; on the contrary, we fear that an enormous heresy, unequalled in modern times, will be the result. The argument of Mr. JOHN in favour of the Tai-pings, drawn from the opposition they meet with from the Roman Catholics, is very weak. No one, we think, can tax Roman Catholics with an inconsistent yielding to heresy, they require certain elements of faith as much as we do, for admission to their communion, and if the rebels will not agree about these they look upon them as heretics; and we are inclined to believe they are right. If there be any use in creeds, let them be binding. We are unwilling to dispense with the ancient symbols—they are summaries of Scriptural truth, and if the rebels will not receive them, but persist in adding notions of their own out of some new Testament, which they have recently received, by way of revelation, we cannot imagine how they can properly be called Christians. No doubt they are as much Christians as the Mormons, but few persons will agree that that is a desirable form of Christianity to encourage. As for uprooting idolatry, this was the project of Mahomet, and he carried it out very well too, but there is a very suspicious look about a religion which is being propagated by the sword; and Chinese are not made of stuff suitable to produce martyrs. We will not say that there is no real patriotism among them: this we believe in, a man of China may die for his country, but it would be a hard thing to die for his religion, when he does not possess a particle of it. So the way of the Rebel Chief, as far as opposition to his plan for clearing away idolatry is concerned, will be tolerably easy; it is the political element which creates opposition to his advance.

One word more about our position with respect to the rebels. Mr. GRIFFITH JOHN'S views on this subject accord very nearly with our own. He says, "the interests of religion, commerce, "and civilisation, point out *neutrality* as the only legitimate "ground for Western nations to take." By neutrality is meant non-intervention, and this not unfrequently signifies—as the great Talleyrand observed—intervention. Why, we are acting now against the rebels, and properly so; we are going up the Yang-tse in spite of them, and holding aloft our power as a warning to them to preserve a respectful distance. We cannot agree with Mr. JOHN in blushing for the part we took at Shanghai *versus* the Rebels. Such a cool repulse as we gave them on that occasion will abide in their memories for their guidance on future occasions. As for "*official* intimation of "our intention," they did not require that; they knew well enough that the English intention was to oppose them; indeed the less official intimation generally the better. The Chinese have had too much diplomacy and too little plain dealing, and that is the reason why the great expedition in the last war was forced upon us. Mr. GRIFFITH JOHN, in his peroration, has been led to write a great deal that has nothing to do with the real question at issue. We agree with him about neutrality and non-intervention, but we have no right to assume that the present "dynasty is doomed speedily to fall," or that the "vitality it has it does not deserve." That is no business of ours, and therefore we cannot be taxed with folly and sin in just leaving the matter alone. And as for putting down the insurrection, the Government of this country has, we are sure, no notion of doing such a foolish thing. The present revolution may bear comparison with those of past history and suffer nothing, but still it is a revolution, and one in the same category with those of past times, for the cruel desolation which it has caused.

Let the insurrection go on, and England will, we trust, neither help the Emperor to put it down, nor assist the rebels to set up a new government. Let the old dynasty consume, and let the new dynasty arise from its ashes in a natural way; only we warn the missionaries and all else whom it may concern, not to expect very much from the religious element in the rebellion. It may be the offspring of the missionaries' teaching, and have grown deformed, but there are certain qualities requisite to truth, and if the religious belief of the rebels is so misshapen as to be divested of the grand lineaments of Christianity, how can we recognise it as such. We shall be glad to learn that we are wrong in our estimate; it may be that the field will turn out a flourishing one for the church, but unless the missionary can reach the spot to sow the seed, we cannot expect it to fructify. We must wait and see how the rulers of Nanking conduct themselves towards foreigners during their passage to and fro on the Yang-tze. If they are wise they will prove to us their good-will by giving every facility to both traders and missionaries to ply their avocations, and thus enable us to treat them with the like consideration.

THE STRAITS TRANSFER QUESTION.

WE have vainly endeavoured, for some months past, to raise the veil which hangs between the public and the sacred precincts of the Colonial-office. A long period has elapsed since the inhabitants of the Straits made known their wishes on the transfer question, and immediate attention should have been paid to their petition. Singapore deserves to be viewed in a different light from most of our settlements, since it owes its prosperity entirely to the labours of the mercantile classes; the neglect, therefore, with which their views have been treated reflects great discredit on all concerned.

We know that the Secretary for India, and the Governor-General in Council, have expressed their willingness to consign the Straits to the care of the Colonial Secretary. The obstruction, therefore, must come from the latter. The Duke of NEWCASTLE, we believe, demanded information as to whether these Settlements were able to defray their own expenses, but the India House did not afford it. A body of merchants in London waited on his lordship, and on learning the result of his application, are preparing the fullest information they can collect on the subject for presentation to the DUKE, so that we hope in a short time the Secretary for the Colonies will be in possession of facts that will enable him to decide on the advisibility or otherwise of the scheme. We are inclined to believe that the disinclination on the part of the DUKE is more deeply rooted than the public conceive, andthat any information he may obtain will not alter his opinion. His belief is that the Straits Settlements will not defray their own expenses, and that even if most of the charges can be defrayed by the revenue, troops would have to be provided at the Government expense. But the subject is too important to be simply considered from an economical point of view. The real question is, whether the Settlements should remain as heretofore notoriously neglected, or whether by being placed under the supervision of the Colonial-office their resources should be fully and advantageously developed.

One of the first results of the transfer would be that the Settlements would obtain officials who would be more capable of grappling difficult subjects in connection with trade, than the military and civil servants of the East Indian Government whose ideas are limited to a stereotyped system of government from which they are not likely to stray. The resources of the Straits have been so clearly set forth by the newspapers, that this delay on the part of the Colonial Secretary appears to us a mere evasion of responsibility, and on him, therefore, rests the neglect of a colony that we believe is destined, under good management, to add materially to the commercial welfare of England.

CHINESE GUNS.—In the *Illustrated London News* of the 6th inst. there are some interesting sketches of Chinese guns, made by Mr. George Banks, Surgeon in the Royal Navy. Mr. Banks, after alluding to the enormous difficulty which has always existed of casting guns strong enough to resist the explosive force of gunpowder—a difficulty which has of late been almost overcome in the Whitworth and Armstrong guns, says, "Judge of my astonishment when as I was walking through the Taku Forts, at the entrance of the Peiho, I came upon a lot of cast-off Chinese guns, evidently very old, but made almost upon these principles, and rejected about the end of the seventeenth century, when the famous Ferdinand Verbrest taught them to manufacture cast guns of brass and iron."

The steamer which we announced in a late issue for Messrs. Lane, Harper, and others, was launched on the 28th of March from Messrs. Wingate and Co.'s yard on the Clyde, and named the *Swatow*. She is about 300 tons and 60-horse power, and on a trial trip attained a speed of 11 knots. She will proceed in about ten days to Hong Kong, under the command of Captain Minto.

Monsieur C. de Montigny, late Minister at Siam and Consul at Shanghai, has been appointed to receive the Siamese Ambassadors expected by the next mail on a visit to Paris.

The rumour gains ground that the Duke of Newcastle is appointed as the new Governor-General. Some journals even assert that he will proceed to India in May.

THE RED SEA TELEGRAPH COMPANY'S STEAMER.—The *Cape and Natal News* says:—"The little steamer *Telegraph*, 131 tons, commanded by Captain Kidder, put into Table Bay on the 30th of January for coals. She left Plymouth on the 7th of October, bound for the Red Sea. She encountered a gale of wind in the Bay of Biscay, was dismasted, and received other damages, which compelled her to put into Corunna for repairs. The *Telegraph* belongs to the Red Sea Telegraph Company, and is to attend upon the cable."

LOSS OF THE TRANSPORT SHIP "MILES BARTON" FROM CHINA.—The ship *Miles Barton*, 1,000 tons burthen, chartered as a transport ship, commanded by Captain James Shelford, has been totally lost while on her homeward passage to England from Hong Kong. She sailed from the latter port on the 16th of last December, with 320 men of the 3rd Regiment, under the command of Major King, and a crew consisting of thirty-two hands. On the 8th of February the ship had made Simons Bay, and was under full sail, proceeding westward, when about midnight she struck on a reef of rocks, twenty miles to the eastward of Struys Bay. The officers and men were startled out of their sleep by the sound of the vessel scraping and bumping on the rocks. All hands and the troops immediately came on deck to ascertain the cause, when they found the crew endeavouring to wear the ship, but all endeavours to do so were of no avail, and finding this to be the case, all idea of moving her was abandoned, as it was feared that if she was taken into deep water she might founder. The troops exhibited no symptoms of fear or alarm, and, to keep their attention engaged, the officers stationed many of them to take spells at the pump. About half an hour after the ship first struck, a fire was reported to have broken out in the galley, but that was soon extinguished. The sea was running very high, and it was not considered expedient to land the troops that night, particularly as they were unconscious as to the actual distance it was off. At daybreak the ship was discovered to be nearly two miles from the shore. High waves were continually breaking along the whole distance, and the shore seemed deserted and bare, presenting only barren sandhills, and no one knew whether it was habitable or not. However, immediate preparations were made for disembarking the men. It was attempted to get them down by the side-ladder, but the surf, breaking so high, washed it away. Another ladder was taken to the port bow, and suspended from there to enable the men, with the assistance of ropes, to descend into the boats. At first the two lifeboats were loaded, but not without considerable difficulty and danger. In one or two instances men fell into the water, but were fortunately recovered. The long-boat also made two successive trips, when a sea carried her high up on the beach and stove her. It was nearly four o'clock in the afternoon when Major King left the wreck with the remainder of the men. The captain, officers, and crew followed them, and that night the troops were encamped on the sandhills, without covering of any kind. But fortunately each man had a day's supply of provisions and water with him. Here they waited till the arrival of her Majesty's ship *Cyclops*, which was despatched by the Governor-General at the Cape, immediately on the intelligence of the wreck reaching him. On the 12th the whole of them embarked on board the *Cyclops*. Only one casualty occurred. A private, of the name of Macnamara, was drowned by a boat capsizing. When the *Cyclops* left the scene of the wreck, the *Miles Barton* was broken right in two, but still held fast in the rocks. The officers and men had a great quantity of valuable Chinese curiosities, from the Emperor's Summer Palace, but all has been lost with the baggage.

THE LATE MR. ROBERT JAMIESON.—We regret to announce the death of this gentleman, late of the firm of Messrs. Jamieson, How & Co., of China, at his house in Gloucester-square, on the morning of the 5th inst. As an enlightened philanthropist, he had for many years devoted much time and wealth in endeavours to improve, civilise, and raise the native races of Africa from the barbarism in which they have been so long involved. This he sought to accomplish by establishing commercial relations with the country, by means of the rivers that flow from the interior into the Atlantic. In this view, in 1839, he built and fitted out at Liverpool, with much care and expense, the *Ethiope* steamship, appointing to her command the late Captain Beacroft, to whom he gave minute and ably written instructions for his guidance in exploring and trading voyages. In compliance with these instructions, the *Ethiope* made numerous attempts at discovery, in the great rivers and their tributaries, ascending to higher points in some instances, than had ever previously been reached by Europeans. Narratives of these voyages were published by Mr. Jamieson, and others are given in the journals of the Royal Geographical Society. The success of his well concerted plans was marred by the well-meant, but ill-judged, interference of our Government, and when the unfortunate "Niger expedition" was projected, Mr. Jamieson, being convinced of the unsoundness of the scheme, published two "Appeals to the Government and People of Great Britain" against the project. When the disastrous consequences followed which he had foreseen the orders that he had given to the *Ethiope* enabled Captain Beacroft to rescue from impending destruction her Majesty's ship *Albert*, one of the vessels employed in the expedition, while by carrying her down to Fernando Po he saved those on board from perishing by fever. In 1859 Mr. Jamieson published a tract, entitled "Commerce with Africa," pointing out the benefits that might be obtained by establishing a short inland communication between Cross River and the Niger, to avoid the swamps of the Delta; but his advancing years and failing health precluded further active exertions. In 1840 the Institute d'Afrique of France proposed to Mr. Jamieson to become one of their vice-presidents; but this he declined.

MALTA AND ALEXANDRIA CABLE.—The *Malacca*, Captain Gilpin, is now fully loaded, having on board about 520 miles of cable, which is coiled in the water tight compartments built in the holds of the vessel to prevent heating, as announced in previous numbers of the *London and China Telegraph*. It is expected that this vessel will sail in about a week. The *Rangoon* is now fitting water tight tanks by the Thames Iron Ship Building Company, at the works of Messrs. Glass, Elliott, and Co., the cable contractors. The cable saved from the wreck of the *Queen Victoria*, at Plymouth, is still on board the Government hulks at Hamoaze. By recent letters from Malta we find that in reference to this cable, Bombah, on the coast of Barbary, which had been proposed for one of the telegraph stations, has been rejected, owing to its want of protection from attack by the natives of the neighbouring country—a predatory and savage race, who not long ago murdered the crew of a French vessel, which was so unfortunate as to be cast on its inhospitable shore. The points at which it has now been determined to land the cable are Bengazi and Tripoli. At Malta it will be landed in the Bay of San Giorgio, on the south-east coast of the island.

THE appointment of Mr. Winchester as Consul at Hakodadi, noticed in a previous issue, appears in yesterday's *Gazette*.

HER MAJESTY'S SHIPS ORDERED HOME.

The following ships have been ordered home from the undermentioned stations:—

Acorn, 12, Commander R. B. Pearse, from China. This ship, which was built at Plymouth in 1838, has been condemned, and is to be paid off at Hong Kong, and the commander, officers (except Mr. A. J. A. Parks, the master, and three warrant officers), and the ship's company are to take a passage to England in the Khorsonese, transport. The master and warrant officers will also leave as soon as the transfer of stores has been effected.

Adventure, 2, troop ship, Commander Lacy, from China. She took her departure from Hong Kong for England on the 15th of January.

Alert, 17, Commander W. Pearse, from the Pacific.

Cambrian, 40, Captain M'Cleverty, C.B., from China.

Cordelia, 11, Commander Hume (acting), from Australia.

Cruiser, 17, Commander Bythesea, V.C., from China. She sailed from Hong Kong on the 15th January.

Cyclops, 6, Commander Pullen, from China.

Esk, 21, Captain Sir R. M'Clure, from China.

Furious, 16, Captain Oliver J. Jones, from China.

Fury, 6, Commander Wilson, left Hong Kong for England on the 15th January.

Ganges, 84, Captain Fulford, with the flag of Rear Admiral Sir Robert L. Baynes, K.C.B., left Valparaiso for England on the 18th January.

Herald, 8, Captain Henry M. Denham, from the Fejee Islands.

Highflyer, 21, Captain William A. J. Heath, from China.

Inflexible, 6, Commander Brooker, of Good Hope and England.

Iris, 26, Captain Vernon, from the Australian station.

Jasper, Lieutenant Commander Pym, from North America.

Lyra, 9, Commander Oldfield, from the Cape of Good Hope.

Magicienne, 16, Captain Commerell, V.C., from China.

Niger, 14. Captain Peter Cracroft, from Australia.

Nimrod, 6, arrived at Singapore, from Hong Kong, on her way to England.

Persian, 12, Commander Buckley, from the Cape of Good Hope.

Plumper, 12, Captain Richards, was to leave Vancouver's Island, for England, early in February.

Pylades, 21, Captain De Courcy, was in Tobago Bay, Panama, on the 23rd ult., refitting for the voyage to England.

Roebuck, 6, Commander Francis Marten, from China.

Sampson, 6, Captain Hand, C.B., arrived at Singapore, on her way to England, on the 8th of January.

Sharpshooter, 8, Lieut.-Commander Gibbons, from the west coast of Africa.

Sparrowhawk, 4, Commander John C. Byng, from China.

Vixen, 6, Commander Frederick W. Richards, left Valparaiso for England on the 11th of January, prior to which the following officers had joined her:—Lieutenants Ernest Rice (acting), and John Eliot (acting); Assistant-Surgeon Raymond H. Carroll, as acting surgeon. Mr. Robertson had been appointed acting master, vice Ball, sent to the hospital.

Naval and Military.

The hospital screw steamship *Mauritius*, Captain D. Cruickshank, arrived at Spithead on the 1st of April. She has brought home 132 military and 55 naval invalids, many of the former having greatly distinguished themselves during the Indian mutiny and the Chinese war. One soldier of the 85th Regiment wears the Victoria Cross for deeds performed before Delhi. The invalids on board are in medical charge of Surg.-Major M'Donald, principal medical officer, assisted by Staff-Surg. Daniel and Assist.-Surgs. White, Barnewell, Kerans, and Murtaugh. The ship's passenger list comprises Staff-Surg. Cunningham, Surg. Morgan, R.N., Assist.-Surg. Fagan, R.N., Staff Assist.-Surg. Longmore, Assist.-Surg. Hawkins, R.N., Lieut. Gilmore, 1st Royals; Messrs. Collier and Wilson, engineers, R.N.; Purveyors Knapp and Robertson, and Messrs. Chapman, Dawson, and Becker. Thirty-one men of the Army Hospital and Medical Staff Corps have been in attendance upon the sick during the voyage. The passage home was fine up to the Cape and thence to St. Vincent's, but from St. Vincent's to Cape Finisterre strong northerly gales were experienced, the ship for three days only making 120 miles. The sea time of the *Mauritius* since leaving Hong Kong has only been 71 days, she having laid at anchor 10 days at the Cape of Good Hope and three days at St. Vincent's. Two officers (military) died on the passage—Lieut. Lawford, 1st Sikh Cavalry, from dropsy contracted in North China; and Capt. Cobham, 13th Light Infantry, from dysentery contracted in British Caffraria. Lieut. Gilmore will probably be detained some time at Chatham to give evidence before a Court-martial he has caused to be called with reference to some incidents which occurred on the passage home.

The Times says:—The late China war has furnished the Government with some valuable statistics on the cost of sea transport. At one period during our war with the Celestial Empire there were employed no less than 63,861 tons of sailing shipping, and 12,447 tons of steam shipping; the former averaging 22s. 6d. per ton per month, and the latter 35s. The above does not, however, represent the actual pay of this fleet of sailing vessels and steamers, the tonnage given being their registered tonnage, whereas they were paid by their gross tonnage, which may be taken as adding one-third to the amount of pay given by their registered tonnage. As an instance of how fortunes are at times made by a lucky owner of a ship on the outbreak of a war, an old lumbering North American built ship, owned by an English house, left Cardiff in January, 1860, with 1,000 tons of coal on board, for Shanghai. On arriving at her port of destination she was immediately engaged by the British authorities to convey her freight to the North, for the use of the fleet, at £1,500 per month. She sailed for the North, and in due course got rid of 600 tons to the various men-of-war off the Peiho. With the remaining 400 tons as ballast, she was started off to Japan, to fill up and return to the fleet, which she did, and, after again discharging 600 tons, retained the 400 tons left, as before, for ballast, took in some old stores as additional ballast, and sailed from the North for Hong Kong to pay off. The last news of this lucky vessel received from China was to the effect that, in January last she was seen to discharge 50 tons of the Welsh coal shipped on board her at Cardiff twelve months previously on board a steam transport bound to England. Possibly by this time she may have cleared ou the whole of her cargo.

The General Order of the 4th of March, 1861, which exempts the officers of the Royal Engineers from passing the Staff examination in order to qualify themselves for appointments in the General Staff of the army, has caused much surprise among the officers of the Royal Artillery, the grounds of exemption in the General Order being given "in consequence of the high standard of examination the officers of Engineers are required to pass before obtaining their commissions." It appears that the officers of the Royal Artillery have a well-grounded cause of dissatisfaction, as an undue partiality has been thus conferred on the sister branch of the service, of which the Commander-in-Chief cannot be fully cognizant. From the high opinion publicly expressed on various occasions of the scientific qualifications of the Royal Artillery on his Royal Highness's inspection and review of the regiment at Woolwich, it is considered that, if the anomaly were brought under the Duke's notice, it would cease to exist.

We regret to learn that Col. R. R. Dawson, C.B., of the Royal Engineers, died on Thursday morning, at his villa at Blackheath, from congestion of the lungs. He had been assistant-commissioner and head of the Survey Department of the Commons Inclosure and Copyhold Commission, which office becomes vacant by his decease. The late Colonel, who was much respected in the service, was in his 63rd year.

We have to announce the death of Major-Gen. D. A. Gibsone, which occurred lately at an advanced age. The deceased entered the Royal Marines at an early age, and had seen considerable service.

The line of-battle ship *Bombay*, 90, and the *Arethusa*, 51, in dock at Chatham, converting from sailing ships to screw steamers, are to have the portion of their hulls below the water-mark covered with Muntz's patent metal, which is to be used for those vessels instead of copper sheathing. Upwards of 100 cases of the new metal have arrived at the dockyard from London, and have been taken into store. The *Bombay* and *Arethusa* will, when complete in their alterations, and fitted with their machinery, be attached to the second division of the steam reserve at Chatham.

The French navy has, by command of the Emperor, been organised into five divisions. Each of these divisions is to be placed under the orders of an Admiral. Three steel-plated frigates are to be attached to each naval division.

The death of General H. C. E. Vernon, C.B., which took place on the 22nd March, will occasion the following promotions:—Lieutenant-General W. H. Scott, Colonel of the 36th Regiment, to be general; Major-General John Geddes, K.H., Colonel of the 27th Regiment, to be lieut.-general; Colonel William Sullivan, C.B., Inspecting Field Officer at Bristol, to be major-general; Lieutenant-Colonel C. J. Conway Miles, 94th Regiment, to be colonel; Major Andrew Hunt, Unattached, to be lieutenant-colonel; and Captain M. Pennefather Lloyd, 59th Regiment, to be major in the Army.

The 30th and 31st companies of Royal Engineers have been placed under orders to embark for the Mediterranean. Lieutenant-Colonel H. W. Montague, R.E., the commanding Royal Engineer at Sheerness, has been appointed commanding Royal Engineer at Malta. Major F. H. de Vere, R.E., who has been appointed second in command at Malta, is now undergoing a course of general instruction at the Royal Engineer establishment, Chatham, to qualify himself for the appointment.

Lieutenant-General Sir W. Rowan has exchanged from the Colonelcy of the 19th Regiment to that of the 52nd, v. Sir A. Maclaine, deceased, and the vacancy thus created in the 19th has been filled up by the appointment of Major-General Sir A. J. Cloete, C.B.

Major-General G. H. Lockwood, C.B., has been appointed to the 12th Lancers, v. Lieut.-General Sir L. Lovell, deceased.

Lieut.-General Sir Charles Gore, K.C.B., takes the Colonelcy of the 6th Foot, vacant by the death of the late General Riddell, and the command of the 91st has been conferred upon Major-General Charles Murray Hay.

Messrs. Cox and Co., the well-known army agents, obtain by these changes the agency of the 91st, being the first time since its formation that it has fallen to their share. The 52nd likewise returns to them.

Correspondence.

CHINESE PIRATES.

(To the Editor of *The London and China Telegraph.*)

SIR,—The letter of your correspondent, "J. F. W.," which, in rather a discourteous manner, attempts to refute some of my statements, serves to prove their correctness.

The piracies committed on every vessel he names, the attacks made upon the different gentlemen he mentions, all took place *before* the Kwang-tung rebellion began, or any of the powerful fleets were collected. Even your correspondent cannot bring evidence to prove a single instance of piracy against the fleets which were so ruthlessly destroyed by the British cruisers. I know that in some instances they interfered with the junks under convoy of foreign vessels, but I never have been able to discover that any foreign merchant vessels not conveying were ever attacked by the fleets which were assembled on the coast of China after the Kwang-tung rebellion broke out, and which were no doubt in some way connected with it. Your correspondent, in quoting from my pamphlet, inserts the word "pirates" instead of the "fleets" to which I allude, and thus distorts my meaning for his own purpose.

After the treatment these fleets received at our hands it would not be surprising if any of the vessels which escaped should afterwards attack foreign ships and murder their crews; but I believe that every Englishman would condemn the principle at one time adopted of destroying sometimes whole crews, and sometimes keeping one man to give evidence against the others after they were killed, and then not making the evidence public after all! The vessels which were fitted out in Hong Kong for piratical purposes, and brought their booty to that colony for sale, did far more harm to foreign vessels than any of those powerful fleets which were able to do so much mischief, but which were all destroyed before our war with Yeh began—a war which arose out of the piratical character of the lorcha *Arrow*.

During a civil war, in which we were declared to be neutral, there was no neutrality when we destroyed fleets belonging to one party, and which the other party were not strong enough to cope with. There are many instances to prove that the Tartar Government of China was so weak upon the coast that it frequently took actual pirates into its service, and there are cases to prove that the vessels belonging to the fleets destroyed by our cruizers were employed in convoying native craft from Foochow to Ningpo.

The fleets on the coast were in no way connected with the Taeping rebellion, but the flags taken from some of them distinctly proved that they were entitled to some political status.

If you publish "J. F. W.'s" letter in your edition for the East, I shall feel obliged by your also publishing this letter at the same time.

I remain, sir, yours, &c., JOHN SCARTH.

Edinburgh, 4th April, 1861.

(To the Editor of the *London and China Telegraph.*)

SIR,—Your correspondent, "C.P.H.," in his paper entitled, "Of what Benefit to Japan have the New Treaties, Politically, Socially, or Morally, been?" which appeared in your last number, has cast a most serious imputation on the British merchants who were resident at Yokuhama on the 2nd November, 1859. He says with reference to the much-vexed currency question in that country, that the merchants are alone to blame for the stoppage which took place in the exchange of itzabons, as "merchants, or men calling themselves so, owning only some thousand dollars, put down applications for millions, under the gentlemanly names of 'Nonsense,' 'Snooks,' 'Jack Ketch,' &c." It is not my intention to defend the conduct of the persons who made use of the gentlemanly names alluded to by your correspondent; but to point out a fact to "C.P.H.," which he has either overlooked or is ignorant of—viz., that the custom of handing into the Treasury at Yokuhama several applications for itzabons, representing enormous sums of dollars, was first of all instituted and proposed by the very Japanese officials themselves, who, your correspondent wants the British public to believe, have been so grossly ridiculed and mocked by us coarse-minded British merchants.

I myself have been told by many of the highest officials in the Treasury at Yokuhama that, if I only sent in one application stating the actual sum of dollars I wanted exchanged for itzabons, I could not expect to receive more than a *pro rata* share, in accordance with the number of applications sent in by other people; and, if I wanted a large sum of dollars exchanged, I had better send in a great many names for very large amounts. I remonstrated with the officials, and told them that I thought that was a very absurd course to pursue, but they persisted in having their own way, and repeated that, if I wanted many itzabons, it was absolutely necessary to send in a great many applications (any names they said would do), representing enormous sums, and I would then stand some chance of getting as many dollars changed as my neighbours.

I trust the above may show your able correspondent "C.P.H.," and your numerous readers, that the practice of applying for ridiculously large sums of itzabons in exchange for dollars at the Treasury in Yokuhama was not made use of by British merchants (to many of whom I know it was most obnoxious) to mock or insult the Japanese Government, but to please them, they having been the originators of it themselves.

I am, sir, your obedient servant, SHIMPI.

London, March 30, 1861.

Monetary and Commercial.

THE AGRA AND UNITED SERVICE BANK.

The following report, which will be read at a meeting of the shareholders on the 13th inst., confirms the statements we lately made on this institution:—The directors have the pleasure to place before the proprietors the audited accounts for the twelve months ended 31st December last, and to report that after making ample provision for all bad and doubtful debts, the net profits of the bank for the year amount to £130,345. 14s. 4d.; this sum added to £12,302. 0s. 2d., the unappropriated balance of the preceding year, will amount to £142,647. 14s. 6d. Out of this sum the directors have declared, free of Income-tax, two half-yearly dividends at the rate of 10 per cent. per annum each, and have added to the last of these a bonus of £1 per share, thus making the return equivalent to 12 per cent. per annum on the paid-up capital of one million sterling. Out of the remaining surplus the directors have placed £10,000 to credit of the Reserve Fund, thus increasing that fund to £200,000. They have also placed such a sum to the credit of the Superannuation Fund as raises that fund to £5,000. A balance of £12,647. 14s. 6d., as appears by the annexed audited account, is carried to the profit and loss for the current year.

The directors have to report that owing to the rapidly increasing business at Kurrachee they have established a branch of the bank at that port.

Mr. Mackintosh Balfour, the manager of the Calcutta branch, has been appointed General-manager, in place of the late Mr. Francis Robert Neilson, deceased, but before he assumes his duties, it has been deemed expedient that he should visit each of the branches, for the purpose of a thorough inspection of their business. In the meantime, Mr. William Shipman, the London manager, is officiating as General-manager, until Mr. Balfour returns to England.

The Union Steam Ship Company (Cape line) have declared a dividend of £1 per share, free of Income-tax, being at the rate of 10 per cent. per annum.

With reference to the tea and sugar duties, the circular of Messrs. Travers and Sons has the following:—

The sum collected from the extravagant taxes on these articles was as stated in our circular of the 2nd inst. (for 1860), on tea, £5,444,157; on sugar and molasses, £6,094,073; and enormous as the amount is, there seems no hope of any material reduction until greater economy is effected in the public expenditure, and that economy cannot be effected whilst war expenses in time of peace are sanctioned by public opinion. The grocers are deeply interested in this question, for whilst the large majority of them have for years been selling sugar, the principal article in which they deal, at a loss, it has been taxed to the extent of 30 per cent.; and a reduction in this tax would enable them to derive a fair profit. Tea is taxed 100 per cent., and the consumption is not only limited by this heavy duty, but also by the extra profit the retailer is forced to place upon this article to repay him for the loss he sustains on his sugar. Of the entire revenue of the country more than one fourth is collected by the grocery trade, and of the customs revenue, £18,000,000 out of £23,000,00 are derived from articles sold by grocers, who credit the public and take risk of collection to this amount.

Mr. Bonamy Dobree completed his two years' term of office yesterday as Governor of the Bank of England. He will be succeeded by Mr. Alfred Latham, of the East India firm of Arbuthnot, Latham, and Co., and Mr. Kirkman Daniel Hodgson, of the firm of Finlay, Hodgson, and Co. in the China trade, will be the new Deputy-Governor.

The revenue returns for the year show that Mr. Gladstone will have to provide in his forthcoming budget for a deficiency of nearly £1,000,000 upon the past year, while the estimates for 1861-62, notwithstanding some apparent reductions, lead us to expect an expenditure in excess of income.

The amount of bullion by the mail of the 4th inst. from Southampton was:—In gold, to Ceylon, £3,000; Madras, £7,204; Calcutta, £2,245; Singapore, £2,000. In silver: Calcutta, £29,000; Singapore, £800; Hong Kong, £12,781; Foo-chow-Foo, £13,294; Shanghai, £21,292.

The Board of Trade returns for February last show a falling off as large as was anticipated in the declared value of our exports, the reduction being £2,348,222, or 21½ per cent., compared with Feb., 1860. and £1,240,425, or 11½ per cent. compared with Feb., 1859. Last year, however, having been Leap Year, about £380,000 must be allowed on that account, which would reduce the present falling off to £1,968,222, or about 18 per cent., instead of 21½. The most adverse figures are under the head of cotton goods and yarns, the total diminution in the shipment of these articles being £1,086,891, or 27 per cent.; the United States having taken only £293,373, which is £238,428 less than in Feb., 1860, and India only £558,940, which is £472,789 less than at that period. Therefore, of the total falling off of £1,086,891 as much as £711,217 occurred from the contraction in our trade to those two countries, the change as regards India being by far the most important.

ARTICLES OF IMPORT.

TEA.—The numerous arrivals have afforded a good selection, and the trade have bought with tolerable freedom the sorts most in demand, or of which sales have been pressed; the chief transactions being in Tayshan Congous, good and fine Monings, and common to fair Scented Capers, and Orange Pekoes—prices showing no material alteration, although occasionally in favour of buyers. The deliveries for home consumption showed, for the two months ending 28th February, an increase of over 1,000,000 lbs., compared with last year, but this during the month of March has been more than lost, the clearances having been small, to be prepared in the event of any alteration being declared in the duty on the 15th inst., as to the probability of which there appears some difference of opinion, but in the present position of the public finances it can, we think, hardly be anticipated, unless under some further increase in direct taxation, for which the country does not seem prepared at the present time. There has been a fair inquiry for low to fair common Congous at about previous prices, whilst good common, with unbroken leaf, has been in demand to a moderate extent for Halifax at 1s. to 1s. 1d. per lb. Of flavoury kinds under 1s. 6d. per pound supplies have been large, and prices have ruled rather irregularly, tending in favour of the buyer. Common to fair Ho-Hows have sold rather lower. Good Ho-Hows and Ning Chows command about former prices. Good to fine Kaisows continue in request, and from their scarcity command full prices. Good to fine Monings and Wopaks have sold steadily; some from Foo-chow-Foo have met with attention, and prices are firmly supported. Low Tayshans have been difficult of sale, even at very low prices, but the fair to good qualities have attracted attention, prices being now moderate relatively with black leaf Congous. In common to medium Souchong business has been to a fair extent at former prices; finer descriptions have sold well. In Oolongs there is no feature of interest, prices remaining steady. Flowery Pekoes continue without inquiry, and quotations are nominal. Large quantities of low to fair Scented Capers have been sold at from 8d. to 10d. per pound: good and fine are saleable in small quantities at about former prices. Orange Pekoes have been difficult of sale, and show a decline of fully 1d. per pound for fair to good descriptions, both of Canton and Foo-chow-Foo make; fine have been better supported. In Green Teas business has been moderate, owing to the want of a fair assortment of consuming qualities, but there has been a steady inquiry, which has maintained prices at fully their former rate for all country kinds; Hysons having commanded more attention than for some time past. Japan Teas still continue difficult of sale, though from the scarcity of Shanghai kinds the trade are beginning to pay them more attention. Fair to good Canton Gunpowders have sold from 1s. 2d. to 1s. 4d. per lb. in boxes; common kinds remain as before, low kinds in boxes selling at 8d. per lb. The public sales during the month comprise 46,171 packages, of which 3,045 packages were Assam Teas; of these nearly all the Assam Teas and 17,454 packages China Tea found buyers, 13,653 packages being offered without reserve. The stock on the 1st of March of all descriptions of black was in London, 57,458,197 lbs., and 5,657,960 lbs. The total delivery was 17,886,969 lbs. of black, and 2,536,872 lbs. of green. The stock at Liverpool was of black, 3,044,879 lbs., and of green, 30,334 lbs. The total delivery was of black, 1,765,262 lbs. of black, and 141,447 lbs. of green. The imports in London to the 1st of March have been 28,669,504 lbs. of black, and 2,041,633 lbs. of green, and at Liverpool, 2,699,101 lbs. of black, and 140,828 lbs. of green. According to the circular of Messrs. Mitchell, Aspinall, and Skipper, the amount of tea afloat at the present time is 20,086,920 lbs., against 18,373,492 lbs. at the same period in 1860.

SILK.—Notwithstanding there has been much hesitation by buyers, large quantities have found their way into consumption—the deliveries being the largest for the last eight months. At one moment the pressure upon the market was rather severe, and prices were pushed to a very low point for common silk, but that is rather passing away—the arrivals being less heavy—and in some cases an advance of 6d. to 1s. per lb. has been realised. Japan silk shared in the generally large business and depression of prices, and is now participating in the partial improvement. Chinese thrown silk continues to be completely neglected.

SUGAR.—Transactions have been on rather a large scale, at fair rates; 6,000 bags of brown Siam sold at 31s.; 2,100 baskets of Java at 27s. Of 1,170 bags of China nearly all were bought in at 36s. 6d. to 39s. for fine brown to mid. yellow, and 44s. 6d. for good mid. white. 1,747 bags of Penang sold at 34s. 6d. to 35s. for brown; 37s. 6d. to 39s. for low to good mid. yellow.

COFFEE.—No public sales, in consequence of short stock. Small sales, at 63s. to 64s. for good ordinary native.

RICE.—The demand is steady. A few cargoes of Bassein and Necranzie sold at 10s. 3d. to 10s. 9d.

PEPPER.—This market is still very barely supplied, and with few inquiries only small sales have been made. Singapore 3¾d. to 3d. 15-16th cash. Of 79 bags Penang white, in auction, one-half fair to good quality, fetched 6¼d. to 6½d., the rest, inferior, being bought in at 6¼d.

SAGO. - Market dull. Of 360 boxes at auction, all retired. FLOUR.—Small transactions at 16s.; 300 bags at auction retired at 16s. 6d.

SPICES.—Cinnamon: Market dull, quotations nominal at 1s. 5d. to 2s. 1d. for first sorts, and 1s. 2d. to 1s. 8d. for seconds. Cassia Lignea: Sales small, at 83s. to 92s. Cassia Buds: Small sales at 180s. to 195s. Cloves: 8 cases Penang partly sold at 1s. 3¼d. to 1s. 3½d. for good. Mace: Sales of 52 cases of Penang at 9d. to 1s. 2d. for ordinary to good reddish. Nutmegs: Of 189 cases at auction nearly all sold at 3s. 3d. to 3s. 6d. for fine bold, and 1s. to 1s. 7d. for ordinary small.

HEMP.—Of 2,000 bales nearly all sold at £21 to £22. 12s. 6d. for common to fair.

COTTON.—Market firm, but transactions small. Quotation 4d. to 5¾d. for Surat.

JAPAN WAX.—Market steady: of 2,544 cases at auction, about 700 sold; block, 58s. to 60s.; saucer, 65s.

TOBACCO.—Java is in steady demand, at 7d. to 9d.; no Manila is in the market.

TIN.—Banca is now quoted at 120s. to 121s.; and Straits, 115s. to 116s. Antimony ore, £16. 2s. 6d.

GAMBIA.—Market active; sales of 2,168 bales at 16s. 6d. to 16s. 9d. for good.

CUTCH.—Market flat; small sales at auction at 24s.

MISCELLANEOUS.—India-rubber: In demand, at 1s. 4d. Camphor: sales of 122 chests, at £10. 5s. to £10. 7s. 6d. Sapanwood: 130 tons of Siam sold at £7. 15s. to £9. 5s. Manila, £5 16s. to £6. Soy: market still very dull, and no sales announced. Rhubarb: market flat, 8 cases at auction retired. Mother-o'-pearl shells: 170 cases at auction all retired. Star anniseed: of 250 boxes at auction no sales were effected. Quotation, 75s. to 80s. Sticlac: firm, at 75s. to 90s. Gum benjamin: 4 cases of Siam sold at £12. 12s. 6d. to £13 for third quality. Damar: no sales. Gamboge: sales at £7. 7s. 6d. to £7. 15s. Rattans: large supplies, and sales at 2s. to 3s. 11d. per 100. Elephants' teeth: no sales. Vermillion: prices lower; sales of about 25 cases at 2s. 6d. for genuine. Galangal roots: no sales. Cubebs: of 71 bags at auction all retired; quotations £6. 10s. to £7. 10s. Dragons' blood: no transactions. Galls: fine blue scarce; 527 cases China and Japan at auction, sold at 38s. 6d. to 43s. 6d. per cwt. for fair to good; 25s. 6d. to 32s. 6d. broken, and 15s. 6d. to 16s. siftings. Rum: sales of Mauritius at 1s. 9d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 to £6. 10s.; nail rods, £7 to £7. 17s 6d.; hoops, £9 to £9. 7s. 6d.; sheets, single, £9. 5s. to £9. 15s.; Staffordshire bars, £8 to £8. 7s. 6d.; rails, £5. 5s. to £5. 10s.

STEEL.—Swedish keg, £17. 10s. to £18.

COPPER.—Sheet and sheathing, 11d.; yellow metal, 9¼d.

TIN.—124s. for block; 125s. for bar. Tin plates, best charcoal, I.C., 29s. to 30s. per box.

LEAD.—English pig, £20. 15s. to £22. 5s.; shot, patent, £24. 10s.; sheet, £22; spelter, £18. 5s. to £18. 10s.; zinc, English sheet, £24; quicksilver, £7 per bottle.

The export of metals from London and Liverpool to Singapore up to the 31st of March has been as follows:—Yellow metal, 52 tons; copper, sheet and sheathing, 40; iron, bars, 115; nail rods, 250; spelter, 25; tin plates, 300 boxes; pig lead, 70 tons; English steel, 2; foreign steel, 15. To Hong Kong: Yellow metal, 77 tons; copper, sheet and sheathing, 5; iron bars, 47; sheets, 2; nail rods, 497; spelter, 25; tin plates, 2,400 boxes; pig lead, 621 tons; sheet, 12; foreign steel, 20; quicksilver, 22,116 lbs. To Shanghai; Yellow metal, 11 tons; iron bars, 41; hoops, 76; nail rods, 422; spelter, 50; tin plates, 210 boxes; pig lead, 670 tons; foreign steel, 5; quicksilver, 1,600 lbs. To Manila: Iron bars, 180 tons; hoops, 17; sheets, 24; pig lead, 31. To Batavia: copper, sheet and sheathing, 38 tons; rods, 2; iron bars, 106; hoops, 15; sheets, 84; spelter, 25; zinc, 6; English steel, 3; foreign, 10.

COMMERCIAL POSTSCRIPT.

CITY, SATURDAY AFTERNOON.

No further steps can, we understand, be undertaken by the Red Sea Telegraph Company, for the repair of the cable, until Government has decided on the course to pursue in reference to its guaranteed dividend. It is quite probable that Government may take over the undertaking, and reimburse the Company for their present outlay.

The small steamer *Telegraph*, lately despatched by the Company to the Red Sea, noticed in another column, will, we understand, be ordered to Suez or Bombay for sale.

Messrs. Pixley, Abel, and Langley in their last circular, quote Mexican dollars as in demand at 59⅝d.

At the meeting of the Agra Bank held this day, the report which we give in our monetary article was adopted, but time does not permit a more lengthened notice of the meeting.

ARRIVALS NOT INCLUDED IN TABLE.—April 4, off Portland, from Batavia, Zeelust; 5, at Hambro, from Macao, Cecilie; 6, at Texel, from Batavia, Landbouw; from Samarang, Rembrandt; March 24, at Holmes Hole, from Manila, John Land; April 6, off Falmouth, from China, Patna; March 24, at New York, from Canton, &c., Swallow; from Manila, Eagle; 11, off Penzance from Hong Kong, Athleta; 7, off Scilly from China, Queensberry; 12, at Liverpool from China, Seawfell; 11, Lady Agnes Duff; 10, at Queenstown from Batavia, Hebe.

DEPARTURES.—April 9, from London in ballast, for Toulon and Hong Kong, Wm. Mitchell; 5, from off South Foreland, for Batavia, Capella, Maria; 6, from Pill, for Shanghai, Joseph Peabody. March 7, from Santa Cruz, for Manila, Concepcion; 11, from London, for Singapore, Magnificent; 6, from off Dover, for Singapore, Judel; 9, from off the Eddystone, for Nikolojewski (Amoor River), Magnus; 10, from off Dungeness, for Batavia, Henrietta; 11, from Swansea, for Singapore, Thames; 5, from off South Ireland, for Batavia, Geertruida Maria; 12, from London, for Toulon and China, Lady Alice; for Toulon and Hong Kong, Beucleuch.

SPOKEN.—Bilderdyke, Amsterdam to Batavia, Jan. 8, 38 S., 29 W.; Elise Henriette (Dutch barque), Amsterdam to Batavia, Feb. 18, 5 N., 28 W.; Macduff, China to England, March 20, 9 N., 32 W.

NEW YORK.—March 26: The John Land, which arrived at Holmes's Holes on the 24th of March from Manila, had on board the crews of one English and two American ships, picked up at sea, seventy men in all.

LAID ON AT LONDON.—For Toulon and China, General Wyndham; for Singapore, Ocean Bride; at Liverpool, for Hong Kong and Canton, Koh-i-noor; for Batavia and Singapore, Eleonora; at Glasgow, for Singapore and Hong Kong, Swatow (s.s.).

BRITANNIA, Liverpool to Batavia, Jan. 28, 41 S., 43 E.
FREDEN (Russian bark), Ningpo to St. Thomas, March 12, 22 N., 42 W.
KONING WILLEM III., Nieudiep to Batavia, Feb. 20, 1 N., 25 W.

EXPECTED.

From CHINA.—At London: Sunbeam, Ranee, Chilo, Patna, Minerva, Henry Miller, Athelstan, Merse, Lady Ann, Harkaway, Melbourne, Gabalva, Queensberry, Northern Cross, Patrician, Bride of the Seas, Cambalu, Heroes of Alma, Scawfell, Oithona, Pruth, Bankside, Moneka, Southern Cross, Spartan, Spray of the Ocean, Jung Yu, James Paton, Dawstone Orissa, Wolverine. At Liverpool: Carolina. At outports: Tasmania, Lord Dalhousie, Hougomont, Indomitable, Alfred York, Sir W. Peel, Henry Moore, Lincelles, Bosphorus, Sparrowhawk, Congo, Witch of the Seas, Khersonese, Highflyer, and steamers Adelaide and Powerful.

From SINGAPORE.—At London: Reward, Beatrice, Balaklava, Patriotess, Xiphias, Maldon, Robert Small, Knight, Lincelles.

FREIGHTS AND CHARTERS.

Dulness still pervades the freight market, but the further reduction on the 4th inst. in the Bank rate of discount will, no doubt, exercise a quiet but increasing influence, and produce more activity. The Admiralty received tenders on the 5th inst. for the conveyance of 1,238 tons stores, chiefly shot and shell, from the Thames to Gibraltar; also 810 tons navy provisions, and 430 tons of shot and shell for Malta. There are 50,000 tons of shipping on the berth for India, China, and the Cape of Good Hope, and lower rates of freight are offered by the loading brokers.

The coal contracts for Bombay and Mauritius, noticed lately, were both taken at low rates, and the Indian Government has just concluded a contract of 10,000 tons of coals for Bombay, at a price under 38s. per ton cost, freight, and insurance. So little has been done of late in coal charters to the East, and the contractors necessarily getting into arrears with their contracts, we fully expect more activity and improved rates.

Rates of freight current for vessels on berth to Shanghai, 40s. to 50s. per ton, weight and measurement. To Hong Kong. 35s. to 40s, weight and measurement. To Singapore and Penang, 35s. to 45s., weight or measurement (nominal). To Manila, 35s. and 40s. To Batavia, 45s. weight, 40s. measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to. 80s.

At Hamburg, for Batavia and Singapore, 40s. China and Manila, 40s. to 50s.

CASUALTIES.

The Menam, Andrews, from Manila to London, with sugar, hemp, and cigars, sprung a leak Jan. 26, in lat. 4 N., lon. 20 W., and continued making water until Feb. 6, when she was abandoned with six feet water in her hold; crew taken off by the Bachia (Fr. barque), and taken to Cayenne, whence they were conveyed by a French frigate to Martinique, and there put on board the homeward bound steamer.

The Pauline Constance, Eleanore (Dutch brig), from Tagal to Amsterdam, put into Cape Town, Jan. 3, leaky, and had to discharge part of her cargo. She sailed again for her destination Feb. 3.

The Jacqueline and Elise (Dutch brig), from Batavia to Amsterdam, put into Cape Town Jan. 26, leaky, and discharged part of her cargo.

The Miles Barton (tpt.), from Hong Kong, struck upon the rocks near L'Agulhas, at midnight, on Feb. 9, is a complete wreck and is advertised for sale; all hands saved.

The Claramont, Burgoyne, from Hong Kong for Demerara, left Cape Town on the evening of Feb. 21, but drifted in shore and struck the rocks off Green Point the same night during a thick fog and carried away her rudder; she subsequently hauled off and was towed back to Cape Town the following day for survey and repairs.

The Kelso, Coulson, from Sunderland for Hong Kong, arrived at Gravesend April 4, having been in collision.

The Mascate, Gefflot, from Samarang to St. Nazaire, put into Mauritius, Feb. 11, for repairs, having experienced a very heavy gale on the 2nd, in lat. 23 S., long. 67 E., which lasted fourteen hours, and during which she was thrown on her beam ends, and had to cut away her main and mizen-masts and throw part of cargo overboard.

At ST. HELENA, Feb. 12.—Eliza Thornton, Maxwell, from Singapore and Batavia, and sailed 14 for London. Neville Kerr, from Whampoa, and sailed for London. 13, Senior Swart, from Padang, and sailed 15 for Amsterdam. 19, Henry Miller, Putt, from Hong Kong, and sailed for London. 20, Aibuera Elmsley, from Manila, and Beatrice Rogers, from Singapore, and both sailed 21 for London. 21, Elizabeth Owen, from Singapore, and sailed for Liverpool. Henrika v. Alburg, from Batavia, and sailed 22 for Rotterdam. Bougainville, Lavignac, from Singapore, and sailed 23 for Bordeaux. Maria Luisa, Barraza, from Singapore, and sailed 22 for Hamburg. 22, Athletæ, Potter, from Hong Kong, and sailed for Spithead. 23, Tasmania, Nourse, from Hong Kong, and sailed for Spithead. 24, Isabella Page, from Java, and sailed for Queenstown. 25, Jupiter, Burggraff, from Java, and sailed 26 for Amsterdam. 26, Sumatra, Erivel, from Java, and sailed for Dordt. 27, Reyna del Oceans, Sarachaga, from Macao, and sailed 28 for Havana. 28, Waverley, Upton, from Whampoa, and sailed March 1 for London. Zeenimph v. Roggen, from Batavia, and sailed for Amsterdam. 21, off St. Helena, Joan Melchior Kemper, from Sourabaya for Amsterdam. Minerva, from Whampoa for London.

At TABLE BAY, Jan. 22.—Fire Dart (s.), Johnson, from New York, and left 27 for China; Stad Assen, Haverbult, from Stockholm, and sailed Feb. 19 for Batavia. 25, Eagle, Williams, from Manila. 28, Greyhound, Bridges, from Canton. Feb. 3, Anna Maria, Hunter, from Singapore, and sailed 5 for the Clyde. 11, Francis Ire (s.), Courts, from Macao, and left 12 for Havana. 15, Johanna and Geertruida, Flens, from Banjoewangie, for Rotterdam (with loss of spars in a gale off Algoa Bay). 18, Claremont, Burgoyne, from Hong Kong; Indomitable, Career, Mars, Anderson, and Alfred, Pope, from ditto; Mauritius (s.s.), Cruikshank, from China; Sebastopol, Lowther, from Hong Kong. 21, Melbourne (s.s.), Benson, from Singapore. 27, Augusta, Robertson, from Batavia. 30, Susan, Le Gros, from Batavia. Jan. 26, Yarra, Graham, sailed for Singapore. Off Table Bay, Feb. 23, from Sourabaya, Mary.

At SIMON'S BAY.—Feb. 6, H.M.S. Harold, from Sourabaya. 8, Sir Wm. Peel (st. transport), from Peiho. 11, Cressy, Gooch, and Macduff, Blacklock, from Hong Kong; Hougomont, Flamank, from Singapore. 12, York, Redpath, from Singapore. 14, H.M.'s str. Inflexible, from Singapore. 21, H.M.S. Magician, from Hong Kong; H.M.S. Sampson, from Singapore.

AT ALGOA BAY.—Jan. 23, Soberana, Guardiola, from Liverpool, with damage, having experienced a heavy gale, and sailed Feb. 13 for Manila, after repairing rudder-head. 28, Lootse, Kross, from Hong Kong.

THE "FIRE DART."—The American steamer *Fire Dart*, from New York to China, having been supplied with coal at the Cape, proceeded on her voyage. The *Fire Dart* left Table Bay on Jan. 27, and would touch at Point de Galle, Ceylon.

PLUMBE'S GENUINE ARROW-ROOT should be used in preference to any other. It is greatly preferred by the most eminent Physicians in London for invalids, and as the best food for infants.
REPORT ON PLUMBE'S ARROW-ROOT, BY DR. HASSALL
"I have subjected Plumbe's Arrow-root to careful examination, microscopical and chemical. I find it to be perfectly genuine, and of superior quality; equal in all respects to the best Bermuda, for which so high a price is usually charged. (Signed) ARTHUR HILL HASSALL, M.D."
Directions and testimonials with each packet, which bears the signature of A. S. PLUMBE, 3, Alie-place.
Retailed in London by Snow, Paternoster-row; Ford, Islington; Morgan, Sloane-street; Williams and Lloyd, Moorgate-st.; Starling, Islington; Weatherley, Peckham.

HOLLOWAY'S PILLS.—Stomach, Liver, and Cutaneous Disorders.—The piercing winds, with warm sunny days, are trying to health, and subject comfort and appearance to a severe test. The warmth drawing the blood to the surface only to be repelled by the cutting blasts, disturbs the balance of the circulation, and leaves the digestion or the skin in a deranged if not diseased condition. Holloway's Pills prevent or correct either result. In impaired digestion and in all ailments of the liver they invariably cure without stringent regulations for amusement or diet. By resorting early to these purifying Pills the dyspeptic and sallow are speedily restored to their natural and healthy state. They raise the drooping spirits, and confer renewed animal energy.

JEAN MARIA FARINA Cologne; London, 2, Salters'-hall-court, and 16, St. Swithin's-lane, E.C., begs to recommend his Stock of EAU DE COLOGNE and LAVENDER WATER in Bond — Double, at 9s.; Single, at 5s. 6d. per dozen. Duty paid—Double, at 21s. Sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

NOTICE TO PASSENGERS BY THE OVERLAND ROUTE, via EGYPT.

PHILIP ZECH, Proprietor of the two well-known Hotels in Alexandria, the Hotel d'Europe, and the Peninsular and Oriental Hotel, begs to inform his friends, and Travellers in Egypt in general, that he has purchased SHEPHEARD'S HOTEL in CAIRO, which will still continue to bear the same name; and in returning thanks for the extensive patronage enjoyed by his two houses in Alexandria, hopes that the preference may likewise be extended to his house in Cairo, which will be managed in first-rate style, and in a manner intended to give every satisfaction to its frequenters, both as far as table, wines, internal and external service are concerned. Many alterations and ameliorations are being carried out at the present moment.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

MANUFACTURER OF IMPROVED INDIAN LAMPS.

"Messrs. TUCKER & SON. "Edinburgh, Sept. 11, 1856.

"Sirs,—I have much pleasure in bearing my testimony to the excellence of the Lamps supplied by you to me when in India last year. They give a brilliant light, are not affected by the punkah, and are in every way suited to the Indian climate. In short, they are the best lamps I have seen in the country.

(Signed) "A. Ross, Bengal Civil Service."

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT.

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker. T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

Summary of News from the Far East.

JAPAN.

The news from Japan is more favourable than might have been expected. Mr. Alcock and the other representatives who fled from Yedo have returned thither under assurances of protection from the Government. The following are among the conditions acceded to by the Court of Yedo:—

"His Majesty the Tycoon to send a special letter of invitation to return.

"The forts of Yedo to salute the French and English flags with twenty-one guns, which will be returned by the men-of-war to the Japanese flag.

"The Tycoon's body guard, the Ministry, and all the great Officers of State to receive the Envoys with becoming ceremony on landing.

"An Embassy to proceed to Europe to acquaint itself with the power and civilization of those States Japan is in treaty with.

"All obstructions to trade at the open ports to be swept away.

"Custom-house espionage and squeezes to be abolished, and the posts erected for these purposes at Yokuhama to be demolished.

"Consulate residences to be removed from Kanagawa, and sites for new ones to be selected on the 'location' called the Bluff,' the remainder then to be allocated to foreigners for private residences.

"Consular offices henceforth to be at Yokuhama.

"A delay of seven days was accorded for their consideration and acceptance, prior to the expiration of which a second interview took place, at which the Japanese Minister attempted unsuccessfully to obtain some modifications, but ended by frankly accepting everything in its integrity. Thus, after an absence from the capital of exactly five weeks, the Ministers returned to Yedo on the 2nd March."

According to the *China Mail* of the 16th ult., the recal of our envoy is due in great measure to the decided position assumed by Mr. Harris, the American representative. It will be remembered that he alone remained at his post after the murder of Mr. Heusken, and his reply to the other foreign ministers on their requesting him to take joint action with them in the late demonstrations, shows how fully he understood the importance of his position. His firmness has, in all probability, been the means of securing our interest in Japan, which the tidings brought by the last mail appeared so fatally to threaten. Mr. Harris's official letter to Mr. Alcock, acknowledging the receipt of a *compte-rendu* of the Conferences held at Her Majesty's Legation in Yedo in January, is extremely able, and throws considerable light on the whole subject. Mr. Alcock requests the American Minister to sign a protocol, stating that the *compte-rendu* is a correct record of the Conferences referred to, to which Mr. Harris replies that, as he was not invited to assist at the meeting of the 21st January, and consequently was not present, he is unable to judge of the correctness of the report. He then sums up the conclusions to which Mr. Alcock and the other ministers arrived, viz.:—

'That no confidence can be placed in the good faith of the Japanese Government; that the members of the different Legations are exposed to assassinations by remaining in this

Digitized by Google

city; and that for the double purpose of securing personal safety, and to produce a visible effect on this Government, it is advisable that the Legations should retire to Yokuhama," and replies to them with considerable force and ability. His arguments are, to our thinking, irrefragable. He shows that it has ever been the desire of the Government that the foreigners should use the same precautionary measures adopted by the Japanese themselves, and asks whether it is just to require the Japanese to protect us with other appliances than those used for their own security? Mr. Harris observes that the murder of Mr. Heusken was owing to his neglect of the warnings of the Government against his constant exposure of himself at night. A broad, sensible view is then taken of the conduct of the Government with respect to foreigners in past years, and of the difficulties occasioned by a change of policy. A barrier is suddenly removed, many men of high rank and political influence in Japan are violently opposed to the innovation, a spirit of hostility is aroused, and, however friendly may be the feelings of the Government, it is out of its power to control the fierce passions of the anti-foreign party. This reasoning appears obvious enough, and we do not well see how it can be answered. Mr. Harris then alludes to what he deems a great mistake into which the ministers fell at the Conference—a mistake which led to the still greater error of the flight from Yedo. Thus he writes:—"It strikes me that all the arguments at the Conferences referred to are based upon the assumption that the Japanese Government represented a civilisation on a par with that of the Western Powers. This is a grave error—the Japanese are not a civilised but a semi-civilised people, and the condition of affairs in this country is quite analogous to that of Europe during the Middle Ages. To demand, therefore, of the Japanese Government the same observances, the same prompt administration of justice, as is found in civilised lands, is simply to demand an impossibility; and to hold that Government responsible for the isolated acts of private individuals I believe to be wholly unsustained by any international law. This principle is not acted on in the Western World. Not long ago a London jury exultingly acquitted a conspirator against the life of the Emperor of the French. I did not learn that the French Legation in London retired to Dover in consequence of this failure of justice. Again, in one of the greatest thoroughfares of Naples the French Minister was savagely assaulted at midday, and although hundreds of people witnessed this assault, the would-be assassins effected their escape, and to this day they have not been arrested. Did the French Legation retire from Naples in consequence of the failure to arrest the criminals? In March last, the Regent of Japan was assassinated. Only a part of the murderers have thus far been arrested, and of those not one has been punished yet. This delay in effecting punishment on the assassins, of one so exalted in rank as the Regent, shows that the Japanese mode of procedure is different from that of the Western World. I desire to put on record my firm belief, that as long as I observe the precautions recommended by the Japanese Government, and used by the Japanese themselves, my residence in this city is a perfectly safe one. To retire to Yokuhama with the intention of producing an effect upon the Japanese Government, will, I think, prove a mistake. There was not one article in the American Treaty more difficult to obtain than the one securing a residence in Yedo of a diplomatic representative of the United States. The Japanese Ministers on that occasion warned me of the grave difficulties which a residence of Foreign Ministers was sure to create in Yedo, and they were very solicitous that I should accept a permanent residence in Kanagawa or Kawasaki, with the right of coming to Yedo whenever my duty required."

In conclusion Mr. Harris trusts that patience and forbearance may yet have the desired effect, and adds that he "would sooner see all the treaties with this country torn up, and Japan return to its old state of isolation, than witness the horrors of war inflicted on this peaceful people and happy land."

We will not quarrel with Mr. Harris for the slight tinge of romance which leads him to describe Japan as "peaceful and happy." There are two sides to the picture, and for the moment he is glancing at that which is glowing in the sunshine. So be it, he has a right to look cheerfully on a land in which he has acted with such consistency, and if he over-estimates the happiness of the people, he does not in the slightest degree exaggerate the importance of our retaining a friendly relation with them. Let us hope, however, that the errors of the pa will not lead to any mischievous results in the future, and that the British Minister will return to Yedo "a wiser and a better man."

CHINA.

TIEN-TSIN.

From Tien-tsin we have nothing important; the British and French Ministers were patiently awaiting the return of spring to proceed and take up their residence in Peking, where, it is said, the Chinese high officials evince most friendly feelings to a few members of the foreign legations who are in the capital.

SHANGHAI.

The London mail of 10th Jan. arrived on 4th March by Messrs. Dent and Co.'s steamer, *Ly-ee-moon*.

Here everything is remarkably quiet and in suspense until some judgment can be formed as to the advantages likely to accrue to foreign trade in the market on the banks of the Yang-tze-kiang and in the northern ports still closed by ice. In a month or two these questions will probably be solved. By the latest accounts the Expedition up the Great River had not proceeded beyond Nanking. Some communication had been held with the rebel chiefs who expressed a desire to conciliate the good will of foreigners and encourage trade.

PROGRESS OF THE YANGTZE EXPEDITION.

Mr. Parkes arrived in the steamer *Yangtze* from Hong Kong on the 18th Feb., and proceeded in the *Bouncer* a day or two after to join the Admiral at Nanking. On the 16th the *Couper*, drawing only 7½ feet, took the ground and remained fast until the 23rd. During their detention the party went frequently on shore foraging and shooting. The people were very civil, and appeared exceedingly poor. A bullock or two were purchased at $23 each, some fowls and ducks at 350 cash, and eggs at 6½ cash. Mr. Phillips has been placed on board the *Bouncer*, gun-boat, to act as Consul, the city being in ruins, without inhabitants or houses. At Nanking Captain Ward, of the *Actæon*, and Mr. Ashby, landed and had an interview with the third in command, Chung-wang, Messrs. Hughes and Muirhead interpreting. The Teen-wang (1st in command) was at Nanking, but does not hold interviews. The second was absent about 30 miles away with an army; Messrs. Muirhead and Michie, with Col. Wolsey, had gone to see him. On the Chung-wang being told that a man-of-war would be left at Nanking, he was somewhat displeased, but expressed the desire of his party to keep on friendly terms with foreigners, and said it was their intention to occupy all the towns on the banks of the Yang-tze, that they had taken Kiu-kiang and daily expected to hear of Han-kow also being occupied by their forces. Nanking has been recaptured by the Imperialists, and it is now again beseiged by the insurgents. The Rebels have given orders for 18 churches to be built in Nanking. The reason they give for not having organised an efficient government is, that they have been constantly in a state of siege, but now, having more leisure, when the country is at peace they purpose sending to England for steamers, and engineers to establish railways! The Chung-wang, in his interview with Capt. Ward, said opium would be interdicted in our trade on the Yang-tze. The Admiral is said to have declined to entertain the subject, but declared that for any insult offered to the British flag they would be held responsible.

Several warlike junks were passed in a creek, the whole left bank of the river is traversed by earthworks with embrasures, but no guns were to be seen. Only a few scattered villages and scarcely any human beings were visible. The country is thickly wooded. A correspondent says it has been wisely suggested by one of the surveyors that every five years soundings of all the banks in that changing part of the channel should be systematically taken and recorded. Indeed something of the kind will be quite necessary when steamers with valuable cargoes are running on the river, for although flat-bottomed boats may escape many a danger that would fall to the lot of deeper craft, they are more subject to be carried further on to the bank by the current than vessels of greater draught, and consequently would be more difficult to get off.

The *Waterman* left the squadron, about eighty miles from Woosung, on the 26th Feb. They were to proceed up the river on that day. The *Waterman* and a gun-boat will go up in a day or two to survey the Lang-shan crossing where the *Couper* was aground.

ANOTHER ACCOUNT.

The following letter is from a correspondent of the *North China Herald*:—

I sent you a few very hurried lines on the 9th to inform you of the mishap which had occurred to the *Centaur* and which had interrupted our progress. The *Coromandel* with the Admiral's flag, and the *Waterman* in tow; the *Couper* with its numerous passengers, and the *Atalante* with the Consuls and the party for the overland route, *via* Thibet, started again on Friday the 15th and commenced threading their way cautiously through the broad part of the river opposite the Lan-shan Hill. The *Centaur* had taken up on the previous day one of the pilots who thought he knew the channel, but it proved that the stream had either taken a different course or his recollections were imperfect. Fortunately, however, all the difficulties of the Lan-shan crossing were passed without serious accident, the *Waterman* touched, but was quickly drawn off by the *Coromandel*, and the little squadron anchored some miles above the village and creek of that name, and closed to the north bank at half-past 6 in the evening. This is the most difficult part of the river, as many know who have been up from Shanghai for a few days' trip up the river; the passage here is very broad, and the channel is liable materially to shift its position.

On the 16th the squadron started by times, but the weather had become very thick and wet with southerly winds, but mishaps await all navigators

Digitized by Google

by rivers, and after a run of about two hours the *Couper* very quietly put herself on a bank to the north of the channel, and with a falling tide no endeavours prevailed to draw her from the soft bed where she reposed for the remainder of the day. On the 17th also all attempts to move her failed, and the Admiral determined to leave her for the higher tides which may be expected to make in two or three days, and run on with the *Atalante*, and, accordingly, on Monday the 18th we started, leaving the *Waterman* to aid the unfortunate *Couper* and her passengers, who will have to bestow their company on the village of Nan-tung-Chow, and i may be allay the fears of the inhabitants regarding the rebels, from whom they expect an attack by water, against which they are making utterly useless precautions in the strictest accordance with the examples set by Imperial mandarins in other parts of the Empire. By the kindness of the Admiral two of the deputation were provided with accommodation on board he *Coromandel*, and thus proceeded with the leading steamers. The day was fine and clear, and we reached Keang-yin soon after eleven. This is a large walled town of some importance, at the mouth of a junction with the Grand Canal. It was taken by our troops in the expedition in 1842. The river opposite is very broad – five or six miles—and shallow on the left (north) bank, which still shows the same unvarying dead level of alluvial soil; while, on the south bank, hills of the character with which most of us are familiar on the Chinese coast come down to the water's edge. We passed quickly on for the remainder of the day, soon leaving the hills, and keeping generally on the north bank. The country is well wooded, and apparently very well cultivated, with a well-kept bund with spaces left for canals, probably chiefly for irrigation, indicating that the waters of the river must sometimes rise very considerably from their present level. The stream is usually at its lowest at the end of the winter, and will receive its first increase from the melting of the snow on the nearer ranges of hills. A boy who had been heaving the lead, had his hands frost-bitten this morning. It was fortunately seen that they were so by an officer on board, and proper remedies applied.

There are a few mandarin stations on the banks, and some small war junks are generally anchored at the mouths of the larger creeks, rich in the usual display of flags. We anchored this day at nightfall after a successful run of over sixty nautical miles.

The morning of the 11th broke clear and cold with a light fall of snow visible on the picturesque range of low hills called Choo Shan. There is a pagoda on the top of the highest which is an excellent land mark. We still see only a very few country boats, none apparently making any long voyage; and it is a noticeable fact that we saw a large boat loaded with straw or unthrashed grain being tracked down the north bank. We arrived without accident off Chinkiang about 2, receiving a salute from a man-of-war Junk of 3 guns which was promptly returned. There are 2 square rigged vessels, a brig and a brigantine, the latter the coaster known as the *Mastiff* in former days in Shanghai. Mr. Hughes and Mr. Phillips landed with the Admiral's Secretary to call officially on the principal mandarin, and were received with the utmost civility. Two other parties were on shore walking through the city and the site of the suburbs. All bring the same report of ruin and utter desolation. "Silver Island" has been spared. Golden Island and the whole of the large suburbs to the west of the city toward the Grand Canal, is utterly desolate. Fuel has been so scarce that not a trace of wood is to be seen in any of the ruins. Almost the whole of the city within the outer wall has been destroyed. There is one mean street inhabited with some poor shops for the sale of provisions and common wearing apparel, but by far the greater part, even of the inner city, is in ruins. There are some desultory attempts at defence. Five or six guns mounted on platforms in different places, and the approach to the wall near the south-west gate where some troops are quartered, is staked. The chief defences however seem in a fort outside and to the east of the city, which is now being enlarged by further entrenchments. From its position it is evidently designed rather for the personal safety of the garrison, than the defence of the city. There is a large village, Kwa-chow, on the opposite side of the river, where the refugees are probably located; we also had noticed some five to fifteen miles down the river, a good many huts of reeds and mats with some of the inhabitants evidently of a superior class—all signs of the uncertainty and fear which is the worst evil of long protracted war.

The next day brought us to Nanking; the only place of consequence we passed was Uching, where there was more appearance of activity than in any other part we had passed.

We brought up nearly opposite the batteries where so useful a lesson was taught to the Taepings in 1858, and could see that only peaceful designs were harboured respecting us. Mr. Hughes landed with Mr. Asby, the Admiral's Secretary, to inform them of his intention to station a man-of-war there with a view to prevent any misunderstanding to preserve the strict neutrality which was to be observed as regards them and the Imperialists. The authorities were very friendly in their tone, and requested that their answer might be received on the next day at 3 P.M. Some other parties also were out on shore and about the city and suburbs. It appears that the north of the city was, as is common in China, very little built upon, but devoted to gardens and fish ponds. The walls must be fully twenty-five to thirty miles round, and in the greater part follow the outer-line of a low range of hills giving them great strength. Our shell and rockets on that occasion must have fallen into this part of the city and the suburb, and done little damage, but as the "moral effect" seems to have been sufficient this is rather a cause of congratulation. The city itself to the north is in great part a ruin, but the people look well, though a suspicion of samshu attached to many of them, by the water side especially. They do not, as is commonly supposed, cut off their tails; on the contrary, encourage the growth of these appendages, and ornament and increase them with coloured silk in many instances, generally winding them round the long hair, which also they grow, and the absence of which is held to be proof presumptive of the party of the wearer, and renders him liable to decapitation. On the next day a large party went in to receive the answer of the Tien Wong. He, it appears, is in the city, but keeps himself sacred and aloof, especially since the two successive rebellions of the "Eastern and Northern King," both involving the Taeping part in civil war, quenched only in the unsparing flow of the blood of the ambitious aspirants to the "Heavenly" throne. The second in rank, and one possessing also great influence, is his cousin Khang Wong, now with a large army about thirty miles off. The third, Tsan Wong we saw in a hall, behind a table, with attendants on either side, dressed in the yellow robes, hoods, and caps, embroidered with the dragons and fancy striped borders with which the "Peking loot" has rendered Shanghai so familiar. Indeed the tendency of affairs in the Nanking court, is closely to imitate the state and ceremony of Peking. After some conversation, the message of the Tien Wong was received to the effect that he would be glad to have communications and to trade with foreigners, and would hand over any foreign offenders to their own authorities, but did not see the use of having a foreign man-of-war stationed there. This led to some discussion and explanation both as to the necessity of the step and the determination of the British Admiral that it should be taken, and the end is reference to Khang Wong.

Mr. Muirhead has given much assistance, both in communication during the later interview, and also will do so with those to be held. Chang Wong, who, as a man well acquainted with foreign affairs, will see the just bearings of the measure proposed; and we doubtless shall find all arranged on our return. The Taeping movement certainly shows signs of great strength. They expect this year to effect a junction with a large body of insurgents in Kiangsi and Kwangtung, who, after a vain attempt for some time to found a separate kingdom, have sent in their adhesion to the Taeping dynasty. They have allies also in the north, and the breaking forth from its bounds of the Hoang Ho has worked in their favour. The men supported by dredging it, some 50,000 benig thrown out of employment, have joined the side which seems to them most likely to find them food.

Neither Imperialists nor their troops. They find rations—plunder must be the remuneration. Mr. Roberts is at the Court wearing the Imperial yellow, though it is doubtful whether he possesses any real influence. The idiosyncrasies of the Chinese are too strong to admit of their being very submissive pupils to teachers, and if they are to become Christians at all, it will be on their readings of Scripture, not on foreign interpretations.

The work of reconstruction has not recommenced as regards buildings in the city, and it must be admitted that though they have been over eight years in the southern capital, it was only last year that they broke through the lines of circumvallation of the Imperial army, routed them utterly, and freed themselves from pressing danger. They were, we are told, reduced to almost the last extremities at that period, as it will be remembered, was confidently asserted by Imperialists in Shanghai, but three armies were recalled from the provinces which they had occupied, and the successful sally of the besieged joined the forces in one army irresistible to the Imperialists, two hundred of whose camps were said to have been swept away. Their tone is now one of calm confidence, and they expect to take Kiu-Kiang and Han-kow, in the course of the season. The religious element underlying the whole movement, appears strong and marked, and that religion they are determined to propagate by the sword. It would be out of place—nor would my time or your space admit of following further this perplexed question.

As regards trade, opium is wanted, also; of course, arms and ammunition. Souchow silk brocades also, we heard, were very much wanted, but all demands at present would be of a very limited and retail description; but their supplies of foreign goods seem to have been very much curtailed. We were told that their flags were made of silk as cheaper than calico, but the former probably were the results of the loot of Souchow. The Taeping Treasury is said to be well supplied, and they are anxious to buy steamers and other European aids to war. Very few Europeans seem to be in their pay. The *Coromandel* is now returning to bring up the rest of the squadron; and, as both the *Centaur* and *Couper* have probably been floated ere this, we may conclude the negotiations at Nanking in the course of next week. Your correspondent remains at Chinkiang, and will avail of the next opportunity to send further rough notes of the expedition. He must now close with an apology for the unavoidable haste with which this has been written.

The report of the sale of the British steamer *England*, the property of Messrs. W. S. Lindsay and Co., London, has been confirmed. It has been purchased by the Prince of Satzama for $120,000.

At the Sinhakee barracks a fire broke out on the night of the 27th Feb. It appears to have arisen from the defective building of the house, for the earthstone in the mess-room had become heated and ignited the joists supporting it. The fire was soon extinguished, but not before considerable damage had been done.

The *North China Herald* contains an interesting account of the meeting of the North China Branch of the Royal Asiatic Society. A paper, the production of a native Christian, was translated by the Rev. W. G. E. Cunnyngham, and read at the meeting. It was entitled the "Narrative of a Journey from Shanghai to Nanking."

From the same paper we hear that the weather throughout the winter at Shanghai has been "very cold at times and generally very disagreeable, changing ever from wet to fair and the wind from South to North." The writer of the paragraph deplores the loss of "the fine Shanghai winters of older days."

FOOCHOW.

The *Spartan*, which vessel went on shore on the banks at the entrance of the river, on her passage for London, and was obliged to return to port, is nearly discharged, and the ship *Panic* has left with most of her tea. Nothing can be done with the wreck, though, were she in Whampoa, she could be repaired; her back is broken, and the new dock, though nearly ready, will not be able to take her in till it would be too late

Digitized by Google

The season's tea is now nearly all gone; there is one vessel loading here for London, which will start in a few days.

AMOY.

The French transport wrecked here some time back, is now nearly gutted by those who bought her; they purpose blowing up what remains of her.

SWATOW.

The deportation from this port of Chinese coolies calls for remark. It is the slave trade in its worst form. Five hundred coolies have been recently despatched to Singapore for sale. The whole subject of this coolie slave trade demands investigation. It appears that it has become an adjunct of the gambling-table, and that the miserable gamester will often stake his body for the sum it will fetch at the emigration depot. *The Friend of China* affirms that the same evil is at work in Canton.

HONG KONG.

Mr. Inglis, the Harbour Master of Hong Kong, has, we regret to observe, been obliged to quit his post and return to England in consequence of ill health. His case is one of peculiar hardship, as he would have been entitled to a pension had he remained two years longer in the colony. Mr. Inglis has left behind him a good name in Hong Kong, and the warmest regrets are expressed that he has been thus unhappily compelled to leave. The *China Mail* only expresses the universal feeling of every Englishman in China who was acquainted with Mr. Inglis. The following is an extract from an article on the subject in that journal of March 16th:—

"We understand that some steps are being taken by the friends of Mr. Inglis to present him with such a testimonial as may be of use to him in his present position, and certainly few men have been more deserving of such honour. Ever ready to oblige, ever ready to place at the disposal even of strangers the resources of his Chinese knowledge, he has been known among his friends by so much humour, so much quaint and curious information, gathered in so many lands, and under such varying circumstances, that his society has always had a rich zest—sharp yet kindly, not without bitterness yet without gall. But while trusting that this private effort may be successful, we cannot help urging on the Government the expediency and duty of meeting all such exceptional cases in a liberal spirit. Governments can rarely afford to be generous, but their efficiency is always increased by a wise liberality; and as Mr. Inglis never stinted the Hong Kong Government in giving it his services, it would be a graceful act on the part of the Colonial Office to act liberally towards him now in its interpretation of his claims to a pension. Mr. Inglis was not one of those officials who get through a certain amount (sometimes as little as possible) of routine work; he was emphatically the man for a new and rising colony, for he was able to take the initiative; he possessed the power of organising departments; and he was always ready at any hour to undertake any service which he could accomplish, however removed from his duties. In such different offices as Registrar, or Protector of Chinese, Joint Superintendent of Police, Governor of the Gaol, Harbour Master, Emigration Officer, and Justice of the Peace, a great deal of the hardest work which has been done in the colony has fallen on his shoulders; and it is such work—that of getting things into working order—which tells most upon a man's health in this treacherous climate."

In endorsing the opinions thus expressed, we cannot but urge upon the attention of the Government the services rendered by this gentleman in Hong Kong. That something will be done for him we hope, that something ought to be done we are sure, and we must add, that "if 'twere well 'twere well done, then 'twere well 'twere done quickly."

H. G. Thomsett, Esq., R.N., is appointed to discharge Mr. Inglis's duties during his absence.

The Appropriation Bill has passed under the title of "An Ordinance to apply a Sum not exceeding Sixty-six Thousand One Hundred Pounds to the Public Service of the Year 1861."

By this mail a set of plans have been sent home for barracks and hospitals on Kowloong, the estimated cost of which is £160,000.

Permission has arrived for Mr. Rawling, of the Royal Engineer Department, to set about the waterworks contract, the design for which he prepared a year ago. H.E. the Governor applied for Mr. Rawling's assistance exactly eight months since, and this is the first notice that has been taken of his application.

The Customs at Canton (says the *China Mail*) and the other ports still continue to be disliked and evaded; but they are evaded in a way that greatly benefits Hong Kong, for China traders find it more profitable to purchase here and take the goods away to the smaller ports, which form as convenient an inlet as those where the Anglo-Chinese Customs are established.

On the departure of Mr. Wilson, the *China Mail* says:—"By the time our readers peruse this week's *Mail*, Mr. Andrew Wilson, who has for three years acted so ably as its editor, will be upon the wide ocean on his way to San Francisco, *en route* for England, whence we trust he will continue to address them in a bi-monthly correspondence."

General Sir Hope and Lady Grant left for England by the present mail, and General Sir J. Michel has assumed the command.

On Mr. Caldwell's case, the *Hong Kong Register* says:—"In our last overland we mentioned that Mr. Caldwell was expected to give in his defence on the 4th March. Circumstances having prevented him from fully preparing it, the time granted him for that purpose by the commission, has been extended to the 19th, when it is hoped that this long-pending and vexatious inquiry will be brought to a termination. The Chinese shopkeepers of the colony have published a declaration, highly commendatory of Mr. Caldwell."

The departure of the Rev. Mr. Lobschied is noticed, in consequence of ill-health. Our readers will remember that he lately took an active part in the emigration to the West Indies, in conjunction with Mr. Austin, the Government Agent.

CANTON.

We extract the following items from the *Friend of China*:—

The British troops garrisoned at Canton, were reviewed by His Excellency Sir Hope Grant, commander-in-chief of H.M.'s Force in China, the following being the order of the going:—At eleven A.M., a detachment of the Royal Artillery, H.M.'s 99th European Regiment, and the 3rd and 5th Native Indian Regiments, assembled on the parade-ground near the north-east gate. Shortly afterwards his Excellency made his appearance, accompanied by General Crawford, the commander of the Forces at Canton, and their respective staffs, who then proceeded to inspect the men drawn up in a line extending nearly a mile in length. After going through their customary evolutions, they separated, formed into companies headed by their bands, and then marched past the commander-in-chief, who had stationed himself near the flag in front; the bands discoursing their martial music as column after column passed by.

The troops then took up their original positions and prepared for battle. One of the native regiments was thrown out as a skirmishing party, supported by the artillery, and, after heavy firing, they gained the summit of the Hospital Hill, which represented a besieged fort. The 99th Regiment then marched round the base of the hill and took possession of the road, so protecting the rear. The artillery in the meanwhile, having placed their guns in a commanding position on the heights, opened a terrible fire on the (imaginary) retreating enemy, under cover of which the gallant troops made a sally and drove their foes right into the city. Orders were then given to retire into the fort which was speedily done, and then, after a short but desperate *melee* the battle ended.

The regiments then formed in the plain below, and after their usual review, returned back to their several quarters. The day was lovely. A goodly sprinkling of ladies were present, and at one time were actually under fire, which they stood most valiantly. The beautiful uniforms, martial strains, glistening bayonets in the sun, &c., and the picturesque scenery combined, made quite a delightful break in the monotony of a somewhat tedious existence in Canton.

The following extract is taken from the "News Letter" of the same journal:—

There has not been a ship in the Blenheim Reach this season, and the only use made by foreign craft of that branch of the river is in the passing up or down of ships intending to load or loading for the Havana and Demerara markets. The forts knocked down by the Americans during the war have had even their foundations dug up and carried away by the contractor for the Shameen site; and but for the appearance here and there of some untrunneled pieces of iron in the shape of guns, we should hardly know that forts had ever been there. *Sic transit gloria mundi!* French Folly is not gone entirely; heaps of granite blocks, which first formed walls, still lying, as do the forts at the Bogue, in very regular disorder from the effect of gunpowder mines. Dutch Folly is but a common mound of earth, with two or three trees, in the middle of the river. Even its red sandstone river walls have been carried away piecemeal. The Bird's nest Fort is intact, but unpatronised by living soul. The Macao Passage Fort has a small British garrison still.

And now let us take a bird's-eye view of the river's banks off Canton; and the first object noted is the Allied or Commissariat landing-place near the old French Folly. Off the pier here, Martin and Co. have a store-shop for supplying the garrison with such articles as they may not be able to send to Hong Kong for; and hereabout, there are seldom less than two gunboats at anchor, one French and one English. On the City side, the only foreign brick buildings below the old factories are the quarters of ten missionaries. These are located about the quarter known as Sun Sha, about a mile below the *Friend of China* office, which stands as far east of the old factory gardens on one side, as the new Custom House does on the other.

At nearly the extreme end of Shameen, on the main, are several other foreign-looking houses, being, besides the emigration establishments of the British West India and Cuban agencies, the residences of Dr. Happer, and Messrs. Chalmers and Turner, and Dr. Wang, London Society Missionaries. Above Shameen, at Wong Sha, reside the Reverends

Digitized by Google

Vrooman and Nevins; and this is about all that has to be said of foreign domestic arrangements on the City side. From Sun Sha up to the Custom-house there is little to see besides the ruins of the old hongs destroyed by fire during the war: the old factory site, containing a few squatters, who would move directly if they were told authoratively.

The French Consul, M. le Baron Tranqualie, flies his *pavillon* on board a Chop boat, moored between Dutch Folly Island and the city; while the flag of the Spanish Consul, Don Jose de Orbeta, floats over another chop a little distance above the Custom House. The British Consulate is still below the Honam Temple—the Peruvian a little above it;—the Portuguese by the Pak-tye Mew landing-place, the American a short distance further up, and the Dutch at the furthest end of Honam. Of foreign houses on Honam the number is about thirty, only a few of them being occupied by the principals of firms. On Honam, too, we find the Old and New China-street shopkeepers, the lacker ware, ivory and porcelain dealers on much smaller scales, however, than they before gloried in. Silk piecegoods, any way out of the common, have to be sought on the city side.

Sir Hope Grant has directed the troops at Canton to make their arrangements for another year's stay.

The Shameen site is said to be nearly complete, and hopes are entertained of a revival of commercial prosperity.

A larger business was done in Canton during the first fortnight of March than for some considerable time.

MACAO.

The subject of education in Macao is at length under consideration in the colony. Hitherto the wealthy Macaenses have been compelled to send their children abroad for education to Singapore, Penang, Calcutta, or even to England. But for the poorer classes there have been no means of education whatever. Baron de Cercal now proposes to endow a scholastic institution in his native city for instruction in the Portuguese, Latin and English languages. The school is to be under the exclusive direction and immediate inspection of the founder, assisted by a consultative committee composed of competent persons chosen by himself. Voluntary donations are requested.

The *Daily Press* (March 13) speaks in strong terms of the depression of the colony, and affirms that since Hong Kong was ceded it has lost all its prestige, and that trade was scarcely ever at so low an ebb. At the same time the revenue is large, which arises, according to the same paper, from the fact that "it is simply a tax on outlawry and upon the indulgence of those immoralities which the Chinese law forbids. Thus there is a tax on gaming, a tax on brothels, a tax on opium, and until the evil was shouted down, there was a tax on manstealing. To call the place a colony is a misnomer; it forms no more a part of the body politic of Portugal than does an iceberg."

PHILIPPINES.

MANILA.

The Philippines, notwithstanding the restrictive policy of the Spaniards, continue to progress. From the *Diaro Manila*, as translated by the *Overland Register*, we learn, that while in 1850 the expenditure exceeded the income by £15,368 in 1860 the revenue exceeded the expenditure by £2,179. From private sources we learn that in commemoration of Lord Elgin's visit to the cigar manufactories, a first quality cigar will, in future, be turned out, called the "Elgin Cigar."

We have had some heavy rains, with thunder and lightning—quite an anomaly at this season. A plan of an iron tubular bridge across the river Pasig has been published by the Government. It is much to be wished that the long-talked-of supplying the capital with good drinking-water were carried into effect, for to the utter want of that necessary element, in a wholesome state, may be attributed nearly all the diseases so prevalent just now, and by which so many are removed from amongst us.

The ship *Elvezia*, which arrived here in a damaged and leaky state, could not be repaired nor made seaworthy, owing to there being no dock nor slip here, and she has been sold by auction. She fetched $9,550, independent of the extra stores, &c.

SIAM.

BANKOK.

The death of the white elephant in Bankok is the only event recorded by this mail. It was supposed that her recent journey from the interior, in company with his Majesty the First King, had hastened her end. Her death is looked upon as a national calamity. The usual ceremonies for her funeral were being performed.

It appears that the earthquake which has been felt at the ports in the Straits was also felt at Bankok on the 16th February.

BORNEO.

SARAWAK.

The following interesting account of the arrival of Sir James Brooke in his steamer *Rainbow* at Sarawak not having reached us in time for publication in our issue of the 13th inst., we now give it:—

By the Sarawak steamer *Rainbow*, which arrived here at 1 P.M. on the 1st of March, we have advices from that place to a late date. The *Rainbow* made the run from the Moratubas entrance of the Sarawak River to Singapore in fifty hours. She had very heavy weather, and a gale from the north-east, but proved herself an excellent sea boat. She left the brig *Prima Donna* and schooner *Dido* inside the bar, where they had been lying for a good many days, unable to leave, owing to the very severe weather outside.

The *Rainbow* arrived at the town of Kuching from this on the 11th February, with Sir James Brooke, &c., on board. The Rajah was most affectionately welcomed back by his people, and on the night of his arrival the town was illuminated by all classes, Europeans, Chinese, and Malays. In honour of the event the courts were closed and a week's holiday was proclaimed. Chiefs from all quarters continued to arrive daily up to the time of the steamer's departure, to pay their respects to the Rajah.

On the 20th the usual New Year's-day boat-races, which had been postponed until the Rajah's arrival, came off with unusual spirit. The first race, contested by upwards of twenty large boats, manned by some three hundred men, was a beautiful sight. Other sports, such as sack races, climbing a greasy pole, &c., succeeded, and the greatest hilarity prevailed. The Sarawak flag was then formally hoisted on board the *Rainbow*, under a salute of twenty-one guns. On the 22nd a grand *fete* was given by Mr. Helms, the manager of the Borneo Company, to inaugurate the opening of their extensive steam machinery. The machinery was set in work by Sir James Brooke, and worked admirably. It is calculated that this manufactory will turn out ten tons of sago flour or tapioca per diem. The process is similar to that of starch making in England. It is simple, and promises to be very economical, compared with the rude process of the Chinese. Connected with this factory are extensive saw mills, &c. Great credit is due to the active manager of the company in Sarawak for the successful erection of this complicated machinery under great difficulties. As soon as it was known that the company intended to manufacture tapioca, considerable quantities of the *kaya ubi* were brought from the neighbouring islands, and its cultivation on a large scale has been commenced in Sarawak by Chinese, Malays, and Dyaks. The machinery is adapted to the manufacture of sugar, and the cultivation of sugar-cane is also being entered on with great zeal by the natives.

On the 23rd the festivities closed with a feast given by the Rajah to the Malays. A large building was erected for this purpose, and decorated with flowers and flags. At three o'clock, all being prepared, Sir James, surrounded by the European and principal natives, sat down on a raised dais at one end—the rest of the building being filled by upwards of seven hundred of his people—when all partook of a plentiful repast. There was afterwards a rifle match for a kris.

Sarawak was perfectly quiet, and the traders were actively preparing their boats for a trading expedition to Java. This trade has been almost entirely relinquished of late for the more lucrative Muka trade, but has revived, as these shrewd men know full well there is no security in trading with a country filled with their bitter enemies, as Muka is at present. Some boats have lately arrived from Oya reporting that Muka was being again very strongly fortified by Seriff Massahore and his followers, who were oppressing the unhappy Muka people in every way. All classes were suffering greatly from famine, produced by the interruption of their trade with Sarawak, from which place they formerly drew their supplies of rice, salt, tobacco, &c. A number of persons from Muka had fled to Sarawak, while others had retired into the interior to escape the exactions of Serif Massahore.

We understand the steamer *Rainbow* will run regularly twice a month between Sarawak and Singapore, carrying the mails, passengers, and light cargo. This increased intercourse will no doubt do wonders for Sarawak, and induce many of our enterprising townsfolk to take a trip there from Singapore, and see and judge with their own eyes of the capabilities of a country so much talked of but as yet so little known.

Ship-building is being prosecuted with spirit, and this branch of industry is capable of being largely developed, the forests of Sarawak affording inexhaustible supplies of suitable timber. A handsome schooner of some 150 tons was lately launched at Kuching.

Subjoined is a statement of the trade of Sarawak for the last seven years. The result presented is satisfactory, but it would have been much more so had not the unfortunate suspension of the trade with Muka occurred last year:—

COMPARATIVE STATEMENT OF TRADE, REGISTERED AT THE PORT OF SARAWAK, EXCLUSIVE OF THE TRADE REGISTERED COASTWISE.

MALACCA STRAITS.

SINGAPORE.

The Hon. Mr. Edwardes, Governor of Labuan, was expected at Singapore by the first opportunity on his way to England. It is supposed he has resigned his appointment in consequence of

Digitized by Google

the disapprobation expressed by Her Majesty's Government of his conduct in the Muka business.

With reference to the remarks in our last issue on the case of the prosecution against a police officer, which fell to the ground, we learn that the Governor of Singapore, Colonel Cavanagh, on his own authority, dismissed the offender from the Government service. The Governor was doubtless convinced, from the evidence before the court appointed by himself to inquire into the charges against the inspector, that he was guilty. His Honour's decision has raised a storm of indignation against him. We rejoice that Colonel Cavanagh acted with such firmness.

PENANG.

Under a heading large enough to represent the title of a leader in a weekly newspaper, we observe that the *Penang Argus* notices as a "charming invention" Mr. Debain's *piano mechanique*, which, as the writer mentions, has been recently advertised in our columns. "To exiles in the East," he observes, "it will be of priceless value."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CONOLLY—On the 26th March, at Clunagh House, King's County, Ireland, the wife of Andrew Conolly, Esq., (of Shanghai), of a daughter.

CROSLEY—On the 21st inst., at De Crespigny-park, Denmark hill, the wife of Alexander Crosley, Esq., of a daughter.

DENT—On the 17th inst., at 42, Thurloe-square, the Lady Beaujolois Dent, of a son.

DAUELSBERG—At Sanssaussi, on the 7th March, Mrs. H. Danelsberg, of a daughter.

FARQUHAR—At Singapore, on the 22nd March, the wife of W. Farquhar, Esq., M.D., Madras Army, of a daughter.

GIFFORD—On the 14th inst., at Ampney-park, the Lady Gifford, of a son.

GROSVENOR—On the 22nd inst., at Down's, Park-road, Lower Clapton, the wife of A. W. Grosvenor, Esq. (of Hong Kong), of a daughter.

HEWETT—On the 18th inst., at Surbiton, the wife of Commander W. N. W. Hewett, Royal Navy, of a son.

LANGE—At Transit Lodge, Singapore, on the 12th March, the wife of Captain C. Lange, of a son.

RANKIN—On the 16th inst., at Little Stambridge, Rochford, Essex, the wife of Alfred Rankin, Esq., of a son.

RIACH—On the 23rd inst., at 18, Lansdowne-crescent, Kensington-park, the widow of the late John Riach, Esq., Oriental Bank Corporation, London, of twin daughters.

SEWELL—At Singapore, on the 11th March, the wife of H. F. H. Sewell, Esq., Lieutenant and Adjutant H.M.'s 40th Regiment M.N.I., of a son.

WAGNER—At Hong Kong, on the 18th January, the wife of Christian Wagner, musician, of a son.

MARRIAGES.

MELDRUM—KEASBERRY—At Singapore, on the 6th February, Mr. James Meldrum, to Eliza, eldest daughter of the Rev. B. P. Keasberry, of the Protestant Malay Mission.

DEATHS.

BROWN—At the general Hospital, Hong Kong, on the 5th March, Thomas Brown, Colour Sergeant, 44th Regiment, aged 31 years.

DUNFORD—On the 22nd March, at sea, on his return from China in the Melbourne hospital-ship, of dysentery, C.W. Dunford, Non. Com Officer Royal Artillery, aged 27, son of Mr. Dunford, Victoria terrace, Notting-hill.

GUTIERREZ—At Victoria, Hong Kong, on the 11th March, of consumption, Apolinario Gutierrez.

MOTTLEY—On Jan. 30th, at Yandoit, in Australia, Mr. George Mottley, surgeon, late of Shanghai, China, in his 46th year.

MURPIN—At Hong Kong, on the 9th March, on board H.M.S *Princess Charlotte*, W. A. Murpin, Assistant Engineer of the 1st class

NICOLSON—On the 19th inst., at 15, William-street, Lowndes-square, Augusta, wife of Captain Sir Frederick Nicolson, Bart., R.N.

PASLEY—On the 19th inst., at 12, Norfolk-crescent, Hyde-park, General Sir Charles W. Pasley, K.C.B., Royal Engineers, in his 81st year.

COMMERCIAL REPORT.

CHINA—IMPORTS.

The markets for British and American imports generally are hardly so good as might have been expected in so far as demand goes. Rates, however, are fully maintained, holders being firm in the hope of a demand springing up from the north so soon as the ice shall have broken up. Hopes are also entertained of a good business being transacted up the Yang-tze so soon as the expedition now on that estuary shall have fulfilled its functions.

SHANGHAI.—The Harkaway from England is the only arrival. Grey shirtings of 6 to 6¼ catties incline upwards. White Shirting and T-cloths are saleable. American goods are held at above ruling rates. Camlets and Long Ells are coming into better demand, but Spanish Stripes continue dull. Metals, especially Iron, are without demand. The following are the clearances of the fortnight:—*Shirtings*, grey 18,300 pieces; white, 550 pieces; T-cloths, 3,000 pieces; spotted shirtings, 3,850 pieces; brocades, 3,000 pieces; handkeachiefs, 540 dozen; Chintz, 13,000 pieces. American goods: drills, 16,346 pieces; (stock, 290,245 pieces); sheetings, 2,025 pieces; (stock, 29,865 pieces); jeans, 775 pieces; (stock, 20,500 pieces); woollens, Spanish stripes, 246 pieces; longells, 40 pieces; camlets, 170 pieces; lastings, 150 pieces; iron, 1,250 piculs; rattans, 140 piculs.

HONGKONG.—Low numbers of yarn are saleable—high numbers are dull. Grey shirtings continue to move in fair quantities, white being saleable, though the rate is low. T-cloths dull. Long ells, camlets, and lastings saleable; other woollens dull. Metals in very limited demand. Straits produce generally improving. The following are the sales of the fortnight:—Yarn, 210 bales; long cloths, 23,500 pieces grey, and 3,500 pieces white; T-cloth, 16,000 pieces; long ells, 1,500 pieces; camlets, 240 pieces; lastings, 480 pieces.

CHINA—EXPORTS.

TEA.—At Shanghai there has been literally nothing done in Black Teas, and settlements for the season to date still continue to be 66,180 chests, against 245,350 chests at the same time last year. Stocks amount to 5,800 chests of Congou of all kinds, and 2,000 chests of Flowery Pekoe, and we do not hear that any important additions are likely to be made thereto during the present season. It is said that a large quantity of tea is already accumulated at Hankow, in anticipation of the speedy arrival of foreigners at that place. There seems to be no reason to doubt the truth of this rumour, and although the means of transport from Hankow to this place will not be very extensive for the next few months, it will probably not be long before considerable supplies are received. In the absence of all demand, quotations are quite nominal.—Greens: A small business has again been done in these kinds, the bulk of purchases being still for the United States. Settlements for the past fortnight amount to 7,390 half-chests China, and 1,049 half-chests Japan teas, making to date 82,180 half-chests China, and 37,425 half-chests Japan, against 396,500 packages at same period last season. Stock of China, 4,700 half-chests, of Japan, 4,000 half-chests, and an estimated stock of 20,000 packages of the former at Ningo. Prices have undergone a small decline, but are still excessively high. At Foochow Messrs. Tussell and Co.'s circular says we have but little to communicate; settlements of Congou have been to a fair extent, showing in some instances, an advance of fully one tael per picul, taking quality into consideration, but the rates paid prevent us from altering our quotations. Some 2,000, 15-catty boxes of Country Green Tea have lately reached this, for which no price has yet been named. The supplies to this market since last mail have been 7,000 chests Congou, and 200 chests Flowery Pekoe. At Canton prices for finest descriptions of congou have declined 1 to 2 taels, but other classes show little alteration in price. Country greens are still taken at high figures, the supply continuing very unimportant. Further arrivals are expected during the next three or four days to the extent of 3,500 packages, subsequent supplies still continuing uncertain. The settlements of new congou for the month in Canton consist of 14 chops, leaving a stock of 60 chops on the market.

SILK.—The market in Shanghae re-opened after the Chinese Holidays with increased firmness, the silkmen succeeding in establishing an advance of 10 to 15 taels per picul. Accounts from the country report the greatest difficulty in obtaining Tsatlees, and this, together with the belief that little more really good silk would be received this season, induced the holders to be very firm in their demands. The unsold stock of all sorts is barely 5,000 bales. Settlements for the month are estimated at 4,000 bales. The total settlements from 1st July to date, are estimated at 73,000 bales, against 54,000 bales for the corresponding period last year. Quotations are: Tsatlee No. 3, 415 to 425 taels per picul.; Taysaam, No. 1, 360 to 370 per picul.; No. 2, 325 to 340 per picul.; No. 3, 295 to 310 per picul.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6 months sight.		6s. 4d.	6s. 4½d. to 6s. 4¾d

From China to England and Continent, Feb. 28, Vanguard; March 2, Wolverine; 8, Chevy Chase (steamer). From Cardiff to Singapore, 6, Garland. From Boston, 11, Hollander. From Manila to Liverpool, 2, Albion.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From London, Feb. 28, Harkaway. From Newcastle: 22, Madras. From Cardiff: 22, St. Joseph.

At HONG KONG, MACAO, and CANTON.—From Liverpool: March 7, Rapido. From Newcastle: 3, Laertes. From Cardiff: 5, Regina Maris; 7, Jan Hendrik; 9, Dictator, Fanny Fern. From Toulon: 12, Malaba. From Boston; 3, Andes; 7, Don Pedro II.; 9, Sherwood.

At MANILA.—From Liverpool: Feb. 27, Flora. From Cadiz: March 4, Duque de Tetuan.

At BATAVIA.—From London: George and Henry. From Liverpool: Ferdinand Brunim, Governor General Duijmaer van Twist, Frederick. From Glasgow: Christopher Newton.

At SINGAPORE.—From London: March 12, Sea Belle. From Liverpool: 11, Jeddo (steamer); 21, Skiddaw. From Hamburg: 9, Cuba; 17, Macassar. From Sunderland: 10, Dick Arnold. From Cardiff: 13, Jan de Witt; 18, Eliza Susanne. From Glasgow: 17, Sappho. From Amsterdam: 21, Martha Theresa.

SAILED.

From SHANGHAI.—For London: March 3, Bacchante. For New York: Feb. 26, Onward.

From FOO-CHOW-FOO.—For London: Feb. 25, Panic; March 2, Humphrey Nelson.

From HONG KONG MACAO, and CANTON.—For London: March 5, Merchantman; 11, Corea. For Hamburg: March 2, Rostock; 3, Caroline; 6, Dr. Jurius Jantzen. For New York: 15, Comet. For Demerara: March 1, Chapman's; 2, Mystery; 12, Montgomery.

From MANILA.—For London: March 1, Mary Shepherd. For Liverpool: Feb. 23, Albion; 27, Sales; 7, Queen of the East. Fo Cadiz; 3, Reina do las Angeles.

From PENANG.—For New York: March 9, Ferdinand and Louis.

LOADING.

At KANAGAWA.—For London: Medina.

At SHANGHAI.—For London: Bacchante, Egmont, Glencoe. For New York: Eliza and Ella, Mary and Louisa.

At FOO-CHOW-FOO.—For London: Excelsior, Europe, and Whirlwind. For Australia: M. R. Mitford, Melbourne.

At HONG KONG, MACAO, and CANTON.—For London: Strathmore, Weymouth. For New York: Comet. For Havana: Tides, Messenger, Independence. For Demerara: Lancashire, Witch, Sea Park. For Sydney and Melbourne: Arabia. For San Francisco: Bald Eagle, Early Bird, Franklin Haven, Nor Wester, Willy, Challenge, White Swallow.

At MANILA.—For London: Avalanche. For Cork: Melancthon. For Cadiz: Teide. For New York: Sultan. For Sydney: Nelly, S. H. Talbot. For Melbourne: Joshua Bates, Pekin. For San Francisco: Imperial.

At SINGAPORE.—For London: Sappho. For Liverpool: Crill, Champion.

At PENANG.—For London: Rajah of Cochin.

FREIGHTS AND CHARTERS.

At SHANGHAI.—To London: tea, £3 10s. To New York: tea, $9 to $10, silk, $20. Business at this port still continues in a very dull state, and the charters made since our last are as follows:—Vision, to load at Kanagawa for London, at £3 10s. per ton of 50 feet. White Falcon, to Foo-chow-Foo and back with spars, 50 lay days, for $5,000 Mex. May Queen, for three months, at $1,000 per month, for Yangtse River.

At FOO-CHOW-FOO.—To London, £3 10s. To New York nothing offering. There are a few vessels loading for London at the above rate, and three for the Colonies.

At AMOY.—Business at this port still continues in a satisfactory state, remunerative employment for moderate sized vessels being readily procureable. The Henry and Oscar is reported to Wanchen and back 35 days, at $3,300, and Wodang to Singapore and Penang, 35 days, at $2,200.

At HONG KONG, MACAO, AND CANTON.—For London: £2 10s. to £3. For New York: No quotation. Tonnage at these ports continue in very active demand. The departures being considerably in excess of the arrivals, will most probably cause a scarceness of tonnage. Business for the home trades is the dullest, so many more ships offering than are required, the owners being desirous of having their ships return. The demand is principally for the rice ports, and free and hired emigration, but the season for these trades will soon be over, and consequently leave more tonnage on the berth. The charters reported are—Strathmore to London, at £2 10s. to £3. Commerce and Premier from Singapore for rice, at £3 15s. to £4 to Great Britain, and 10s. extra for continent. Bertha, from Manila to colonies, at £3 5s. White Swallow, Nor'-Wester, and Imperial, to San Francisco with passengers, the first at $23 50c. per head, the second at $34 per head, and $7 per ton; and the latter from Manila, to call at Hong Kong, at $18,000. Eight vessels for Saigon and back, at 60c. to 70c., and thirteen vessels to Bankok and back, at 54c. to 66c. per picul. The Andes has been sold on private terms.

At MANILA.—The Avalanche is loading here for London, at £3 15s. to £3 17s. 6d. per 20 cwt. of hemp; £4 10s. per 50 feet of measurement goods; at 30s. per ton for current sugar for ballast.

At BATAVIA.—To the continent, £3 10s. to £3 12s. 6d. Owing to the scarcity of produce, rates have declined. The Victoria and Alette Auguste are loading for Rotterdam, and a few more remain to be fixed.

At SINGAPORE.—To London, £3 10s. to £4 5s. A brisk demand is still experienced for homeward and country voyages, and the disengaged ships being few, freights have an upward tendency. The charters are—Dick, Arnold, for Liverpool from Rangoon, at £3 15s., and £3 17s. 6d. if from Bassein. Troy, for Liverpool, at £3 17s. 6d. from Rangoon or Bassein; Alfred Herman, to Macao, for $18 25c.

At PENANG.—To London, £3 10s. to £4 5s., at which rate several ships are loading.

CASUALTIES.

Eighteen men (two fatally) were wounded on the 2nd March, on board the Columbian, by the cat-fall breaking; the anchor fell, and above 100 fathoms of chain ran out, the ship having head-way at the time. Medical assistance was procured for the men beside the surgeon on board. She was detained three hours.

The Dannebrog, from Hong Kong, August 25, to Sydney, has been totally lost. From 10th October to the 10th November she experienced nothing but squalls, gales, and contrary winds, when she struck something with her stern-post in lat. 7.40 N. and long. 142.25 E., and threw the man at the helm to leeward. She was hove to and brought round, and in six hours time she had three feet water which was no sooner cleared than she again filled. On the 14th made for the island of Guam, and when within a cable length of the shore all the men entered the boats and attempted to land but the surf prevented. After twenty-four hours pulling another attempt was made, when one boat capsized with the cook, steward, and captain's wife, and were drowned. The captain and crew proceded to Agana, and after a stay of three months, proceeded in the Hibernia to Hong Kong, which port they reached on the 10th March.

The Agra from Shanghai to Saigon, with French stores, got ashore on the South Bank, where she remained two hours, and has had to put into Hong Kong leaky.

The Wezer struck on a quick-sand near Saigon, and has completely disappeared, only 150 tons of cargo being saved from her. Several vessels have got aground here owing to the scarcity of pilots.

The Wide Awake was run into on the 11th Feb. outside the Light Ship, by the Sir Isaac Newton, and cut off about 6 feet of the bows, and passed on without taking any notice, the boat having hoisted her Ensign Union down, and the captain of the light-ship firing guns for the Sir Isaac Newton to render assistance.

Continental Intelligence.

FRANCE.

A bill is now before the French legislative bodies for the immediate organisation of a postal communication with China and other parts of the Far East. According to the plan proposed a steamer is to leave Suez once every month, and after touching at Aden, Point de Galle, and Singapore, proceed to Saigoon. From Aden a branch steamer is to run in direct connection with the trunk line to Reunion (Isle of Bourbon), a distance of 625 leagues, and another from Point de Galle, by way of Pondicherry and Madras to Chandernagor (450 leagues), a third from Singapore to Batavia (180 leagues), a fourth from Saigoon to Manila (300 leagues), and a fifth from Saigoon to Hong Kong and Shanghai (570 leagues). The execution of this proposal is to be confided to the company known as "the Messageries Imperiales," who are to receive an annual subsidy of six millions of francs (£240,000) for twenty-one years. There are to be six steamers each of 500-horse power for the main line, and eight of 228-horse power each for the service on the different branch lines. A corresponding line of steamers between Marseilles and Alexandria, is, of course, intended to perfect the line. In order not to have the appearance of entering into hostile competition with the Peninsular and Oriental Company subsidised by the British Government, it is proposed to make an arrangement with that company, so that the two lines may not interfere with each other, whilst the public will reap the advantage of having three mails every month to and from the East, instead of only two as at present. It is, therefore, proposed that the mails for the French line of steamers shall be made up in London and Paris on the 1st of each month, and those by the English line on the 11th and 21st, giving, in fact, an interval of only ten days, instead of fifteen or sixteen. The proposal has been favourably received, and there is little doubt but that it will receive the legislative sanction.

Among other items of news I may mention that Admiral Charner has demanded 3,000 men for Cochin China, that the budget of the French Marine Department for 1862 amounts to 126,165,419f., being 1,577,000f. more than in 1861; and that it is said a Russian fleet will assemble at Cherbourg before the spring is far advanced. If this last piece of intelligence be true—and for my part I must confess I am a political pyrrhonist, and believe in no event till it occurs—a very stormy summer awaits us Europeans. The state of the continent just now resembles the normal condition of Japan. An earthquake, or whatever is similar to it in the political world, is almost daily expected.

RUSSIA.

ST. PETERSBURG, April 15.

(FROM OUR OWN CORRESPONDENT.)

In my letter of Dec. 31 (No. 52), I mentioned that a scientific expedition to the Amoor was being organised at Paris, and that the needful inquiries had been made of the Russian Government through the French Embassy here if the expedition could rely on the support and protection of the Russian authorities, which I need hardly add, were most cordially promised. I have now to report the arrival in this city of the two leaders of the expedition, Dr. G. Meynier, and M. Louis d'Eichthal, who are busily engaged in making purchases and other preparations for the due performance of the mission they have undertaken in the cause of science. As soon as these are completed they will set out on their interesting expedition, which is calculated to last for at least two years, and the expenses of which are to be borne by the Paris Association for the Acclimatisation of Plants and Animals. The above gentlemen have also received a set of instructions connected with different scientific subjects from the Academy of Arts at Paris.

From official tables just published by the Privy Councillor Troinitzky, member of the Imperial Department for Statistics, we learn that according to the returns made of the tenth census (1859), the total number of serfs in Russia, in Europe, Siberia, and Trans-Caucasus amounted to 23,069,631, of whom 11,244,913 were males, and 11,824,718 females. As the total population of the Empire was 67,081,167, it follows that the proportion of serfs was 34 39-100 per cent., or more than one-third of the whole number. Of these serfs, 22,558,748 were settled in European Russia, 506,545 in Trans-Caucasus, and only 4,338 in Siberia. By far the greater part (22,284,876 souls) belonged to private individuals, and the rest were serfs on the Imperial domains. As the respective owners of serfs we find 3,703 nobles holding 12,286 males, and 103,194 commoners with 10,683,853. As a curiosity, it may here be mentioned, that in the year 1859, no less than 44,166 landed estates with their 7,107,184 serfs were in pawn for the total sum of 425,503,061 silver roubles. This is equal to two-fifths of the estates and two-thirds of all the serfs belonging to landed proprietors. You will already have seen in the *Patrie* that three out of the six *corps d'armée* of which the active force of Russia is composed, are placed on a war footing, and that two of the corps, each 50,000 strong, are destined to occupy Poland.

HOLLAND.

AMSTERDAM, April 23.

(FROM OUR OWN CORRESPONDENT.)

Since my last letter this city has been in a state of the greatest excitement and put on a most festive appearance, having had the honour of a visit from the King and Court, which lasted for a whole week. His Majesty, accompanied by the Queen, the Prince of Orange, the Prince and Princess Henry of the Netherlands, with other members of the Royal family, and attended by a large suite of officers, arrived here by a special train from the Hague, on the 9th inst., and prolonged his stay till the 16th, taking up his residence at the Royal Palace. The King was everywhere received with the greatest enthusiasm, which may be in part attributed to his kindness of heart as illustrated by the deep sympathy he manifested on so many occasions with the sufferers by the late inundations, of which I have given you several instances in my former letters. The King's entry into the good city of Amsterdam may be compared to the triumphal entry of a conquering hero. All the shops were shut, and all business suspended for the day. Most of the houses were gaily decorated with many-coloured banners and flags, evergreens, embroidered carpets hanging down over the balconies, and the open windows were thronged with the traditional "elegantly-dressed ladies," all anxious to obtain a sight of their beloved sovereign, and to welcome him by a loyal display of their pretty faces. Across most of the streets were suspended orange-coloured streamers, embroidered with flattering devices and inscriptions in gold letters, such as "Gratitude to the Father of his People," "Honour to the Kind-hearted King," "Welcome Noble Orange," "To the Benefactor of the Distressed," and similar compliments, the work principally of fair hands. Then there was no end of audiences, loyal addresses and deputations from the trades, corporate bodies, scientific and commercial associations, not only of this city, but from many of the neighbouring towns and villages, all anxious to give expression to their loyalty. These processions and deputations formed by themselves one of the most striking parts of the pageant; for there is perhaps no other country in Europe that maintains so great a regard as Holland for keeping up the picturesque national costume, and which differs not only in every province, but in most of the different towns and districts. In most instances the holiday dress of the people is handed down from generation to generation, and thus we have displayed the dresses worn by their forefathers and foremothers.

On the return of the King to the Hague, he wrote a letter to the burgomaster of this city, expressing his thanks to the inhabitants for their loyalty and attachment to his person and throne, and sending the munificent sum of 20,000 florins for distribution among the charitable institutions and the poor of the metropolis.

Scarcely has the country had time to recover from the effect of the inundations during the past winter, when fresh accounts of similar disasters in Netherlands India, are received by the overland mail, which have made a deep sensation everywhere, and even had the effect of depressing the Dutch funds to the extent of one per cent., from which they have not yet recovered. The merchants and wealthy capitalists of Amsterdam have, as usual, taken the lead in forming a committee for the purpose of receiving and forwarding the voluntary contributions of their fellow-countrymen to the distressed sufferers in the East, and at Rotterdam a branch association has been started by eighteen mercantile houses connected with the Java trade, who have already issued an appeal to the sympathy and charity of the public at home, and, after writing after each of their names the munificent sum of a thousand florins, declared themselves willing to receive and forward subscriptions that may be sent them for that purpose.

Government has received intelligence of the safe arrival in

Digitized by Google

Table Bay, on the 24th of January, of H.N.M. steam corvette *Harlemmer Meer*, Lieutenant Commander P. de Koning, from the Texel, for Batavia. All well on board.

The screw corvette *Reteh*, Lieut. H. P. de Kock, also bound to Netherlands India, and which sailed about the same time as the above, arrived in Table Bay on the 14th of February. In the Bay of Biscay she fell in with the Swedish schooner *Frya*, Capt. Lindgreen, dismasted and in a sinking state, and was so fortunate as to save from a watery grave the whole of the crew consisting of seven men, whom she landed at Teneriffe, where she touched for the purpose of coaling.

By Royal decree of April 7 (No. 67) the King has instituted a medal to be conferred on surgeons and physicians for meritorious services and valuable scientific discoveries. The medal will contain on the obverse the King's bust in high relief, surrounded by his name and title, and on the reverse a wreath of oak and laurel, with the legend "*Bene meret: de republica qui civium valetudinem tuetur.*" The medal will be issued in silver and bronze, and is to be worn on the left breast suspended by a blue ribbon with orange-coloured edges.

At Zwolle the contested election for a member of the Second Chamber of the States-General, ended in Count van Zuylen's being returned as the victorious candidate with 484 votes, his opponent Mr. A. van Naamen van Eemnes having polled only 346. At Roermond the election terminated in favor of Mr. K. L. Cornelis, who polled 590 votes, whilst Mr. Hengst could only produce 417. As, however, in neither election was there an absolute majority (the number of voters at Zwolle being 1,491, and at Roermond, 1,285), there must be another election in both places, when the relative majority will decide the contest.

The King has been pleased to grant his Royal license and permission to the following gentlemen connected with Netherlands India, to accept and wear the several decorations, as under, conferred on them by the Emperor of Austria:—Knight Commander of the Order of Francis Joseph: Colonel W. C. van Schierbrand, commandant of the Royal Engineers in Netherlands India, and Mr. C. van der Moore, Resident of the Preanger Regencies. Third-Class of the Order of the Iron Crown: H. W. de Kock, First-Lieutenant of the East India Cavalry, and Aide-de-Camp of the Governor-General of Netherlands India. Knight of the Order of Francis Joseph: Mr. G. Wassink, head of the Medical Department in Netherlands India; E. Netscher, Government Secretary in Java; Mr. J. Munnich, member of the Royal Society of Arts and Sciences at Batavia; Mr. D. A. Junius van Hamert, formerly resident of Batavia, now Director of Finances and Domains, at present in this country on leave of absence; Wira Nata Koesoema, Native Regent of Bandong; Dr. F. W. Junghuhn, Inspector of Collections of Natural History in Java; Mr. S. van Deventer, jun., formerly Assistant Resident of Buitenzorg in Java, now Resident of Banjoemaas; and Mr. A. G. Fischer van Gaasbeek, late Assistant Resident of Bandong, in the Preanger Regencies, now on leave of absence to Holland.

Professor W. H. de Vriese, of the University of Leyden, has just returned to this country from Netherlands India, after an absence of three years and a-half, whither he was sent by the Home Government on a special mission, the objects of which were to obtain practical knowledge of the system of cultivation of all articles of export, especially of those adapted for sale in the European markets; the capabilities and possible method of improving the soil; the means of increasing the cultivation, and finally to ascertain what European commodities were likely to find an extensive sale in the East. The learned professor is now engaged in drawing up his report to the Government, which, when finished, will probably be laid before the States-General, and perhaps published, if the contents are found to be of sufficient importance.

The Netherlands Trading Company have again chartered the following thirty-eight vessels:—

TO SAIL FROM ROTTERDAM: Soceberg, Schwartz; Julia, van der Tas; Cornelia Hendrika, Meulen; Netherlands Yacht Club, Zack; Julie, Brem; Maria Anna, van Monuom; Madura, van Bruggen; Hollands Trow, Keuker; Luconia, Huhlshof; Catharina Maria, van Tak; Pièter, Hoogewerff; Rhynvés Feith, Lammertz. From AMSTERDAM: Prius Hendrik, Verloop; Stad Assen, Haverbult; Gebroders, de Groot; Wilhelmina and Clara, Abrahanisz; Jacoba and Christina, Jasky; Jacob Roggeveen, van Marken; Azia, Molinaar; Willem Daniel, Meester; Capella, Landwehr; Tyllingsie, Ouwehand; Zwaan, van Hemert; Baron van Hardenbrock, van Renny; Minister van Hall, Haas; Doctrina and Amicitia, Strootman; Eugenie, Bergman; Admiral van Hemskerk, Koning; Eerstelling, de Zeeuw; Tagal, Gobel; Columbine, Malbrone. From DORDRECHT: Euterpe, Kuipers; Helvoetsluys, Vos; Kosmopoliet, Bouton. From SCHIEDAM: Liduina, van Brink; Juno, Micolai. From MIDDELBURG: Regina Maris, Ouwehand; Subbana Elizabeth, Smidt.

A letter from Harderwyk states that on the 14th inst., a detachment of one hundred and fifty men (supplementary troops), under the command of Capt. A. F. de Vassy, of the E.I. Infantry, returning from leave of absence and accompanied by the Second Lieutenants O. van Dyke, and R. P. Bowles, marched thence to Rotterdam, and embarked at that port on board the *Johanna Anthonius*, Capt. A. van der Voogd, for Batavia Another detachment, consisting of one hundred and twenty men, under Captain B. Loggere, of the E.I. Army, returning from furlough, and accompanied by Second Lieutenant D. L. de Rochemont, and the medical officer of third class, J. P. Ermerins, marched from Harderwyk, on the 20th inst., to Rotterdam, and embarked on board the chartered transport *Concurrent*, Capt. A. van der Horst, for Java.

P.S.—I have just received a letter from the Hague, stating that two separate committees have been formed for collecting subscriptions for the relief of the sufferers by the inundations in Java. Amongst the names on one of these committees, I notice those of H.S.H. Prince Bernard, of Saxe-Weimar, Mr. J. Rochussen, Mr. G. L. Baud, Mr. J. C. Reynst, Mr. A. D. Kock and Mr. J. W. Smisaert. In the other are Messrs. Green van Prinsterer, Macay van Ophemert, and Elout van Soeterwonde.

COMMERCIAL.

The raw sugar market is firm, with but scanty stocks. A parcel of Java (3,390 bags), No. 14, was sold yesterday at the average rates of the March sale.

BANCA TIN.—The only parcel sold this week was one of 900 blocks at 74 florins.

COCOA NUT OIL.—The Netherlands Trading Company's sale of 159 casks of Cochin China went off rather under the valuation, viz.:—

		Valuation.	Sold at
90 casks, 34,610 kilog.,	prime white	31 fl.	30¾ fl.
39 „ 24,640 „	good	30	29¾
30 „ 14,540 „	ordinary	29	29½

At the Company's sale of Japan raw silk the quantity offered was al sold as follows:—

2 bales and 17 chests at 17 fl. 50c. to 26 fl. 25c.
60 „ (private trade) „ 15 „ 37 75

SPICES firm, in spite of the Company's sale, which is announced for the 3rd of May, and will consist of 74 casks nutmegs, 22 casks mace, 146 casks Amboyna cloves, and 224 bales Java cinnamon.

CASSIA FISTULA.—A sale was effected to-day of 1,129 packages, ex *Kortenaar*, at prices that did not transpire.

Two cargoes of tea, direct from China, ex *Thomas Sparkes* from Foochow-Foo and *Balnaguith* from the same port, were sold at Rotterdam at very fair prices, viz.:—Common Congou, 100c. to 105c.; fine ditto, 123c. to 130c.; superfine ditto, 150c. to 160c.; superfine flowery Pecco, 170c. to 210c. A part of the cargo of the latter vessel consisted of 108 boxes of finest black Japan tea (mark M L), which found purchasers at from 85 to 90 cents.

The Company has just advertised the following for sale by public auction on the 14th of May:—9,127 pieces gutta percha, 321 packages India-rubber, 115 bales Japan camphor, 289 chests gum dammar, 899 chests Japan vegetable wax, 360 chests pearl sago, 735 bales sago flour, 357 packages cassia vera.

Subjoined I send you the full particulars of the Company's spring coffee sale:—

Result of the spring sale of East India Coffee by the Netherlands Trading Company, held at Amsterdam, April 17, 1861:—

All sold, but at prices lower than were anticipated. Whilst but three qualities realised a figure above the valuation, upwards of twenty found purchasers only at a reduction of from 1 to 2¼ cents.

UNITED STATES.

(FROM OUR OWN CORRESPONDENT.)

NEW YORK, April 8, 1861.

MONETARY AND COMMERCIAL.

The Government loan of $8,000,000 was bid for at an average of $93.18, but the Secretary of the Treasury rejected all below 94. The result was this amount only reached $3,000,000, leaving the remainder to be provided for by new proposals, or by the issue of Treasury notes.

Sterling exchange, after having reached 108¼ to 108½, has become dull, and closed yesterday heavy and nominal at 107⅞.

In China and East India goods the market has become less active for most articles, and prices tame and irregular.

TEA.—Greens continue in good demand, and sales have embraced 8,000 half-chests, and 3,500 new crop, ex *Phantom* and *Swordfish*, at improving prices. Blacks were also firm, with sales of 3,000 half-chests at full prices. Greens closed firm at 50c. to 52c.

TIN continues very dull. Holders of Straits, however, in the face of large receipts, are firm. Small sales of Banca are making at 27c. cash, and of Straits at 25c. to 25½c. cash.

INDIGO.—The market is firm, with a better demand for jobbing lots. Sales have embraced 23 to 28 cases Manila at 45c., a few chests Bengal at $1 45c., and 5 cases Madras at 85c. 6 months. A public sale of Manila and Madras came off on the 3rd, and was well attended. The prices obtained corresponded pretty much with the prices at private sale.

DRUGS.—The sales have embraced 9 cases of opium at $5 25c. to $5 50c.; 400 lbs. superior southern ginsing at 60c. cash; 20 cases shellac on private terms. Camphor is held at higher rates; 100 bls. have been sold (refined), at 47½c. to 50c., closing firm at the latter figure.

SALTPETRE.—Crude continues dull, the stock being large; 1,000 bags sold in Boston at 8¼c. to 8¾c. six months.

SEEDS.—Linseed is less active, but holders are firm; 1,000 bags Calcutta have been sold in Boston from stone at $1 75 cash, and 2,000 do. Bombay sold here at $1 75c. cash.

COFFEE.—The market has been steady, with a fair amount of business. Java has been sold to the extent of 5,000 to 6,000 mats at 13¾c. to 17c.

GUNNY BAGS.—The demand has subsided, and the market is dull and nominal.

GUNNY CLOTH is inactive, and prices are unchanged, while sales are trifling.

SUGARS.—The market has been more active, though prices have rated low. A good deal has been done on speculation. Among the sales have been 1,188 bags white Siam at 6¾c., less 1 per cent. The stock embraces 10,531 bags Siam, 45,494 ditto China, and 1,800 ditto Batavia.

HEMP.—The market is unchanged, while the sales include 692 bales of jute, part at $90 per ton. The stock comprises 31,581 bales of Manila, and 559 ditto jute. A sale of 200 bales of Manila have been made at 5¼c. 8 months.

In addition to the foregoing market reports, we notice sales of 2,000 mats Cassia at about 18c., 50 bags pepper at 8¼c., and 50 cases No. 1 nutmegs at 46c., 6 months. Green teas continue scarce and firm, while blacks exhibit no change of moment. The sales within two or three days have embraced about 6,000 half-chests at steady prices. Raw silk is quiet, and sales limited at unchanged prices. We have no movement of importance to notice in opium, ginsing, hemp, indigo, gunnys, sugars, or coffee, which remain about the same.

ARRIVALS.—Nabob, Baxter, at New York, March 23, from Foochow; Eagle, Williams, at New York, March 24, from Manila; Swallow, Morton, at New York, March 24, from Hong Kong; Agnes, Lyttle, at New York, March 28, from Padang; Pursuit, Sanford, at New York, March 29, from Shanghai; Haze, Holmes, at New York, March 30, from Macao; Cygnet, Moses, at New York, March 31, from Manila; Cyclone, Ingersoll, at New York, March 31, from Padang; Lucky Star, Van Winkle, at New York, March 31, from Penang; John Sand, Bearse, at Boston, March 29, from Manila; Ceylon, Leckie, at New York, April 1, from Singapore and Penang; Snow Squall, Lloyd, at New York, April 4, from Amoy; Wizard, Woodside, at New York, April 5, from Manila; Samuel Russell, Winshull, from Hong Kong, March 30th.

CLEARANCES.—E. F. Willetts, Williams, from Philadelphia, March 22, for Shanghai; Surprise, Ranlett, from New York, March 25, for Singapore; Hotspur, Johnson, from New York, March 25, for Hong Kong; N. B. Palmer, Low, from New York, April 1, for Hong Kong.

LOADING.—At NEW YORK.—For Hong Kong, Kathay, Stoddard, Maury, Paul. For Hong Kong and Shanghai, Almera.

At BOSTON.—For Hong Kong, E. Cushing, Pritchard.

Parliamentary Intelligence.

HOUSE OF COMMONS.

FROM THE 10TH TO THE 24TH APRIL.

THE TAEPINGS AND THE ENGLISH MISSIONARIES.—(13.) Colonel SYKES asked whether a series of thirteen papers, beginning with consular notifications dated the 18th and 29th Dec., 1860, and the 2nd of Jan., 1861, comprising narratives of missionary visits to Soochou and Nankin in 1860, letters and other documents, and ending with an edict for the toleration of Christianity by the Taeping King, dated 29th Dec., 1860, papers which had been already published in the *North China Herald*, the official organ of her Majesty's Legation at Shanghai, had been transmitted to the Foreign Office by her Majesty's Legation at Shanghai; also whether Consul Meadows had resigned his office, and if so, on what grounds.—Lord JOHN RUSSELL in reply, said that although there were many hon. gentlemen in the House who might feel a partiality for Germany or for Denmark, the hon. and gallant member for Aberdeen was the only one who took an interest in the Tae-pings—(a laugh). The hon. and gallant member had asked many questions on matters he had read in the *North China Herald*. In reply to his request, it could not be promised that any papers which the Government could give him on the subject should be very quickly laid on the table, because the clerks in the Foreign Office were now fully employed in copying, and the printers in printing, other documents to be laid before the House. The noble lord then particularised the papers relative to the Chinese rebellion which he should be able to produce.

INTERPRETERS FOR JAPAN.—(18.) Mr. LEFROY asked the Secretary of State for Foreign Affairs whether his letter to the Chancellors of the English Universities, with respect to the appointment of student interpreters in China and Japan, was confined to those Universities, or whether Dublin University and the Queen's University in Ireland would be allowed to partake of the same advantage.—Lord J. RUSSELL said that his letter to the Chancellors of the English Universities had reference simply to those institutions, but it was intended to enlarge the number of students, and when that had been done communications would be addressed to Ireland and Scotland with respect to the nomination of candidates.

CHINESE INDEMNITY.—(18.) Mr. FITZGERALD asked her Majesty's Government whether they could inform the House of the amount claimed by the British mercantile community at Canton as indemnity for the property destroyed; and whether it was proposed that the indemnity of 2,000,000 taels fixed by the Treaty of Pekin should be paid out of the money first received from the Chinese Government.—Lord J. RUSSELL said the amount claimed by the mercantile community of Canton was somewhat over £450,000. Altogether £656,000 had been already received from China. With respect to the mode of distribution, there was nothing in the Treaty of Peking settling that point. Instructions had gone out to Mr. Bruce to the effect that if he decided to make rateable payments of the money according to the instalments received her Majesty's Government would approve that course, but that if he had made any other arrangement they would not pronounce a decision in the case until they had heard what he had done, and the reasons assigned for his mode of proceeding.

THE CHINESE VOTE OF CREDIT,—(18.) Sir S. NORTHCOTE asked the Chancellor of the Exchequer what proportion of the vote of credit (£3,800,000) taken for the expense of the China war had been actually expended and paid out of the Exchequer. What proportion was estimated to be still payable out of the balances in the Exchequer in respect of expenditure chargeable to that vote. Whether it was intended to surrender the right of drawing from the Exchequer any, and, if any, what portion of the sum so voted before applying to Parliament for a further vote of credit. And whether he could explain to the House why a further vote of credit, to the amount £1,000,000, was likely to be required, when there was an unexpended surplus approaching £800,000 on the vote taken last year.—The CHANCELLOR of the EXCHEQUER, beginning with the question, what proportion of the vote of credit taken for the China war had been actually expended and paid out of the Exchequer, said information on that point had been given by him generally on Monday and was explained precisely in the balance-sheet of income and expenditure which had been laid on the table of the House that morning. As to the proportion estimated to be still payable, he might add that the whole of the remaining portion of the vote was payable out of the balances in the Exchequer. With reference to the latter part of the question the Chancellor of the Exchequer entered into details, and added that he was not sure it was absolutely necessary for him to have authority to pay £1,750,000. The nature of a vote of credit was very peculiar, and one of its incidents was that it would generally come to a final settlement in a year subsequent to that in which it was granted. By the terms in which the House of Commons voted any sum of money as a vote of credit it was not appropriated to any particular service, and perhaps his hon. friend would be surprised when he stated that no final expenditure had yet taken place under the China vote of credit of last year, except to the extent of £450,000 in the settlement of a previous account of the Indian Government. Large sums had been paid, but they had been paid on account, and the vote of credit could not be finally settled—no expenditure on its account could be finally allowed—excepting on the making up of the army and navy accounts for the year. The army and navy accounts for the year were not made up until eight months after the expiration of the year for the navy, and twelve months after the expiration of the year for the army. It was only on the final making up of those accounts that he could ascertain how far the expenditure, including the China war, might have been in excess, and that excess was the measure of the degree in which the Treasury was authorised by law finally to apply and allot the vote of credit in aid of the regular and ordinary grants for the year.

CONSULS IN CHINA AND JAPAN.—(19.) Colonel SYKES rose to call attention to a consular notification dated Shanghai, Feb. 8, 1861, in which Mr. Consul Meadows announced his intented withdrawal from that port. No doubt Mr. Meadows found himself in a false position the Treaty having imposed upon him duties which were undermined by the Tartar authorities. In the *North China Herald* there was an advertisement that the office of Inspector of Customs would be closed for two days, upon the occasion of the Chinese new year. Thus, it appeared that we had established Inspectors of Customs at each of the Treaty ports, who collected the duties and handed them over to the Tartar Government to be employed for any purpose. During the late war a large amount of duties was collected at Shanghai, and handed over to the Tartar Government, who employed it in fighting us. Great complaints were made to the British Consul at Shanghai of the oppressions practised by the Chinese authorities, but he was unable to do anything to redress them. The coolie slave-trade was carried on with all the atrocities that marked the African slave-trade, yet our consul could do nothing, although we were looked upon as accessories to these slave captures. These disorders were not

Digitized by Google

confined to Shanghai, but were extending throughout China. A rebellion, independent of the Taepings, had sprung up, and it was said that Prince San-ko-lin-sin had been beaten by the insurgents. Another account was, that the Tartar troops had mutinied at Peking for want of pay. With these prospects of anarchy he was afraid the expectations of the Chancellor of the Exchequer of benefit to the revenue from the trade with China would not be fulfilled unless some other policy were adopted. It was right the House should know that we had forty-nine steamers and ten sailing vessels in the waters of China. How long was this source of expenditure to last? He also begged to ask the noble lord on what grounds the Consul-General in Japan had abandoned his position at the capital? He understood that when he left he was guarded by one hundred and sixty Japanese and two field-pieces, so that there was no reason to be apprehensive for his personal safety.—Mr. BUCHANAN thought the question raised was one of very great importance. He was afraid our present system of policy in China would involve us in constant collisions. He wished to know when the correspondence of Consul Meadows, for which he had moved on a previous day, would be ready.—Lord JOHN RUSSELL, in reply, corrected an error he made the previous evening, and stated that the sum actually received for the Chinese indemnity was £212,000. He stated that Mr. Meadows' health rendered him unequal to the performance of his duties—a circumstance which he much regretted. After explaining the general policy of the Government with reference to the Taepings and the established dynasty, and observing that what had been done was to recognise the present authorities of the empire, he entered into an explanation with reference to affairs in Japan. When he received further accounts, he would not object to present the papers.

THE CHINESE INDEMNITY.

In the House of Commons last night the adjourned debate on going into a committee of ways and means, was resumed.—Mr. S. FITZGERALD could not understand the grounds upon which Mr. Gladstone expected to receive the sum of £750,000 from China. He believed from the stipulations of the treaty of Tien-tsin, that not one farthing of this sum could come to the hands of the Chancellor of the Exchequer.—Mr. M. GIBSON said the calculation was based on the statements of Lord Elgin and Baron Gros.—Mr. MOFFATT did not believe that if justice were done £100,000 would find its way into the Exchequer of the sum expected from China.—Several members opposed the repeal of the paper duty, and considered that if there were any surplus in the revenue, the duties on tea and sugar should be remitted.—On the other hand, Mr. MARSH, Mr. MAGUIRE, and other members argued that the abolition of the Excise duty upon paper would be one of the greatest boons conferred upon the country.—The debate was adjourned till the 29th.

Colonel SYKES has revived his question on China and Japan, and General PEEL is to ask what steps the Government took to ascertain if Capt. Brabazon was murdered.

LORD ELGIN AS GOVERNOR-GENERAL OF INDIA.

Few conquerors have brought back brighter laurels than Lord Elgin. Yet, if all serve our Queen as honestly as he has served her, it is but for a brief space that he will be suffered to enjoy his glory peacefully at home. Before he went to the East, his career in Canada had stamped him as one gifted with the highest administrative faculties (for Canada then, as India now, was but slowly recovering from the ill-feeling engendered by a defeated attempt at rebellion); and it is long since the public voice has unanimously designated him as by far the fittest person for the government of India, where Lord Canning's term of office is on the point of expiring. That noble lord, suddenly finding himself in a situation of unforeseen and unexampled difficulty, has borne himself through it, sometimes wisely, always bravely, and, on the whole, with very fair success. But it is no disparagement to him to say that his successor will have to encounter more arduous toils and more important cares than have ever yet greeted a British governor. The finances of a vast country, hitherto sadly mismanaged, are to be re-established; its resources, hitherto sadly neglected, are to be developed; the conciliation of the natives, wisely and well begun by Lord Canning, is to be completed; and all remains of discontent and disaffection to be eradicated; the dangerous disputes between the ryots and indigo planters are to be terminated by equitable arrangements, which it will require a wise head to frame, a firm hand to enforce; our own army, lately put upon a new footing, and parts of which have displayed a sullen insubordination, must be carefully watched, its tendency to disorder sternly repressed, its loyal feeling continuously called forth and cherished. The civil servants and councillors of the Government must be looked to with equal vigilance, lest the prejudices and fondness for old customs, however vicious, in some; lest the inclination to claim novel powers and to encroach on the rights of their superiors shown by others, should frustrate the well-devised schemes, or imperil the authority of the Supreme Government. To discharge these varied duties, each arduous enough to task the energies of any ordinary mind, the public voice in England unanimously looks upon Lord Elgin as incomparably the fittest man. The feeling is not unshared by a large portion of our countrymen in India, though there are some of the civil servants of the old company, naturally eager for the advancement of a comrade, and filled with grateful and well-deserved admiration of the great services of Sir John Lawrence, who have expressed a wish once more to see a governor-general selected from their own ranks. It is true that among the illustrious men who, in that high office, founded, and consolidated, and enlarged our Indian empire, the greatest of all was trained in the civil service of the company; but, in spite of the glorious precedent of Warren Hastings, for three quarters of a century the rule has been to select a person more intimately acquainted with European politics than a man can well be who has spent his entire manhood abroad, and more closely connected with the Ministry at home. And at the present crisis we cannot help thinking that it will be a positive advantage for the new Governor-General to be a stranger to India, to Indian precedents, to Indian jealousies, to Indian intrigues; that nothing but an entire absence of all previous connection with such hindrances to his independent action can secure, we will not say his impartial exercise of his unfettered judgment, but that universal belief in that impartiality and independence which can alone ensure from all classes that undoubting acquiescence in his decisions, and that cordial co-operation in his designs, without which the former must lose much of their force, the latter their best chance of success. But though there is and can be no possible question that among our English statesmen no one can be found to fill this most arduous and important post comparable to the former Governor of Canada, it is no secret that intrigue has been for some time busily at work at home to deprive him of that honourable office; we would rather say to deprive India of the great benefit of his services. It is no secret that more than one noble lord, thinking more of the emoluments of the office than of his own capacity to discharge its duties, and probably led by the apparent tranquillity of the country to under-estimate the vast and varied difficulties which still await the Governor-General, has been for some time seeking the post with every means of solicitation in his own and his friends' power. To the solicitations and intrigues of this selfish and unworthy ambition, we call on Lord Palmerston not to listen for a moment. India is a possession of too great an importance, of too tremendous a responsibility, to be sacrificed to a job, to be made over as a trial-ground for incompetence, or as a plaything for conceit. Under a great governor it will be a great country, prosperous in itself, and the cause of great prosperity to the nation that is its queen. Under any but a great governor its hopes will be baffled, its promise disappointed, its fine fortunes wrecked, while the metropolitan kingdom that might have looked to it for riches, and power and glory, will find it an impoverishing burden, a perplexity, and a disgrace. On the Prime Minister's firmness in this matter the prosperity of above a hundred millions of human creatures in India, the credit of England deeply staked in that prosperity, the present and future welfare and renown of both countries greatly depend. Never and nowhere has there been more urgent need of the right man in the right place; and as he himself is reported to have no doubt who that right man is, we call on him to act resolutely on his own convictions, and by so doing to earn the applause of all England, except those few whom his decision will personally disappoint, and the gratitude of all India, to whom that decision will afford as sure a hope of a glorious future as can be founded on human courage, human wisdom, and human virtue.—*London Review.*

THREATENING STATE OF AFFAIRS IN JAPAN.

The British Consuls at Jedo and Kanagawa have acted in a manner so reprehensible and obnoxious, that not only the Japanese, but their own countrymen have been driven to an avowal of disgust. They have alternately violated the native laws, misinterpreted the spirit of the treaty between Great Britain and Japan, sacrificed their personal honour, and tyrannized over the subjects of their own sovereign. In like manner the unofficial community of foreigners seem to have habitually acted with an almost total disregard of the rights and prejudices of those in whose country they were sojourning, on the sufferance of the very people they were offending. As a matter of course, the indiscretions of individual foreigners affect the entire foreign population, and every obnoxious or unlawful act committed by an Englishman, an American, a Frenchman, or any other countryman, is prejudicial to the welfare of all aliens, and goes to strengthen the argument of the conservative party of Japanese politicians in favour of the exclusion of foreigners, and the closing of the ports. We learn by the last mails, that the secretary of the United States legation at Yedo has been murdered by Japanese, and that all the consular authorities, save Mr. Townsend Harris, the American minister, had been forced to retire from the metropolis and seek refuge in Yokuhama, the port a few miles down the bay. Great alarm prevailed among the whole foreign population, and even a massacre was anticipated. This intelligence, we find, has created considerable sensation in England, and great indignation is expressed towards the British Consuls referred to, whose recal is earnestly demanded. We shall deplore hearing of a worse state of feeling than at present exists between the native and alien population of Japan; but if worse comes we shall be compelled, although not without reluctance, to say that the foreigners brought it all upon themselves. Englishmen and Americans must learn that they cannot go into a foreign land and violate every civil and moral law without incurring the danger of a fearful retribution. We know nothing as yet of the murder of the secretary of our legation, but much will depend upon these as to the judgment we may eventually form of the unfortunate affair. Meanwhile, we believe there is no fitter man than Mr. Harris for maintaining the national honour in the far Orient, and from his moral and friendly influence over the Japanese Government he will doubtless be able to obtain justice. It is a melancholy reflection that, after all our hospitality to the late embassy, such an untoward circumstance as this and such a threatening state of affairs, should have so quickly supervened.—*New York Herald.*

BAPTIST MISSION TO CHINA.—The first annual meeting of this mission was held last week in London. There was a numerous attendance. The Rev. J. Taylor, of Ningpo, gave an elaborate sketch of missionary work in China. It was a mistake, he said, to suppose that the Chinese are a literary people, but still a great many could read, and their spoken language was so simple as to be easily acquired. He believed that the population of China was at least four hundred millions of people. According to the census of the Empire, which was taken every year for governmental purposes, it was four hundred and four millions. The number was too vast to be conceived. Placed rank and file, ten abreast, they would almost surround the globe at its equator, and marching at a rapid pace be over two years passing a particular spot. One out of every three persons on the face of the earth was a Chinese. This was the way to regard that country. He could testify that the people were easily accessible to the Gospel, and now there existed no hindrance whatever to its propagation, hundreds of missionaries ought to be sent out.

MR. TOWNSEND HAMBLIN, of Oxford-street, offers the public an entirely new fabric, called the New India Paper; unlike the ordinary foreign paper it is extremely pleasant to write on, and well adapted for rapid writers.

THE Earl of Elgin presented himself in the House of Lords on his return from the East, and was warmly welcomed by the members of the Ministry and other noble lords. During his stay in Paris, the noble lord had the honour of a private audience of the Emperor.

LONDON, FRIDAY, APRIL 26, 1861.

THE FRENCH IN COCHIN-CHINA.

THE fable of the husbandman and the serpent is calculated to convey a useful lesson to children of a larger growth and more matured experience than those who usually study Æsop in our schools. Everyday life, both public and private, is crowded with exemplifications of the truth of the old tale; and it is observable that not the kindest hearted only, but even the sharpest witted men are sometimes bitten by those whom they have nourished and preserved. History shows us that the same is true with regard to nations. We English, indeed, should not now be inhabiting this island but for a very flagrant instance of the serpent warming itself into life in the bosom which it afterwards stung. But without seeking for proofs of this fact in past history, let us point out one illustration of it in our own day. It will be readily admitted that we ought to know how to avoid fostering the designs of others to our own disadvantage. Yet in the Far East our conduct has been so indiscreet that it is impossible to predicate even such negative good of ourselves. In that quarter of the globe, where so many of our greatest interests are established, we have unwisely and needlessly encouraged a most formidable rival to our power, which, consequently, upon the first convenient opportunity, will be within the reach of that rival to injure or destroy. We allude to our very good friends and cordial allies across the Channel, who, having through our instrumentality been introduced into China, are now to all appearances determined to make it, though to them a most uncongenial clime, one of their permanent abodes.

Those of our readers who have a personal knowledge of the East will bear us out when we say that the time has not long passed since a Frenchman in China was looked upon as a sort of natural curiosity. There was something indescribably ludicrous in the very idea of his being there at all; a fish out of water, or a goose upon a turnpike road, are the only things of which we can conceive as at all approaching the unnaturalness of his situation. The fact is, that the Gaul had, and still has, no business there, while China is one of the busiest places in the East. It is not a part of his nature to thrive out of his own country. We English sail round the world, and wherever we find a convenient spot, we settle down, and there all the evidences of a perfect and permanent prosperity grow up around us in an incredibly short space of time. "From China to Peru," from the frozen plains of the North to the sunny fields of the South, in the newest of our colonies, as well as in those longer established, we are surrounded by the most bustling life, bearing with us from the old country the quiet but determined demeanour of business men and possessing our home comforts ever fresh around us. The signs of wealth that everywhere appear are not more surprising than the confiding and even daring manner in which so much is trusted without any apparent protection to the good faith of the people amongst whom we dwell. Very different from this is the aspect of a French colony. The first thing done on the barren soil is to mount huge guns everywhere. Go to Algeria, and you will there find the prevailing type of French colonisation to be a few Arabs cultivating some scrubby fields under the guns of a mud fort. Even in the most favoured localities, the chief object from the first is not trade or commerce, but the erection of fortresses; the crowding together within a small space of as many forts, batteries, and entrenchments as is possible, although there is little of their own to protect, but perhaps a great deal belonging to others which they will ere long do their utmost to destroy. Bearing all this in mind, when we read of the French capturing five forts in Cochin-China, and establishing themselves in a fortified settlement there, we are tempted to ask the reason why they are so engaged, to ascertain the ultimate objects they have in view, and in default of any definite reply, to look around and extract from trustworthy facts and circumstances a satisfactory one for ourselves.

If the French had a large commerce in the East we should willingly acknowledge the necessity of affording it adequate protection. But it is not in their nature, as we have already said, to establish commercial communities abroad, and therefore if they occupy a position in any foreign land it must be for other objects and with a view to conquest. When, then, we hear of a new French settlement in Cochin-China, we must understand it to be the wish of our Allies to establish a fortified position there, overshadowing with the frown of its guns the peaceful pursuits of trade. This is what they call supporting the legitimate influence of their country, this is power, and to attain it, they will ardently and persistently devote all their efforts, systematically directing all their operations, gigantic in extent, to the same end. Hence their desire to increase their navy, and to build by stealth their iron ships-of-war. Hence, simply to show their power, they follow us with their intrigues and their insidious plots everywhere. Hence, throughout the East, they dog our steps; watch all our actions; and while in a lighthouse on the island of Perim they can see a second Cronstadt, think it impossible they can be too active themselves. Thus, in Syria they are ready at a moment's notice to intercept our communications with the Far East through Egypt; in the Red Sea they are establishing stations and forming alliances with the nomade chiefs on its coasts; in Abyssinia they are exerting an influence altogether disproportioned to any imaginary interests which they can possibly be supposed to possess in that country; in India they would, if they could, work us harm; and in Cochin-China they are progressing at such a rate that they bid fair soon to establish themselves there firmly as a most dangerous wedge in the very heart of our power. A firmer footing, and a finer prospect, the French have not possessed in the East since the time of Dupleix, and considering that the Neapoleonic idea of Eastern conquest has ever been a large one, we may expect to see vigorous attempts made to improve the situation now attained, so as to derive from it the most advantageous results. We cannot but give our neighbours credit for the judgment which they have displayed, for it would have been difficult to lay hold of a finer country than Cochin-China, abounding as it does in excellent harbours, and being one of the richest provinces of a vast empire measuring more than 300,000 square miles, and containing a population which has been roughly estimated at 20,000,000. When once established there, France will no longer require the services of such nondescript and mountebank adventurers as the individual who calls himself D'Orgoni, to sow the seeds of distrust, and to breed disaffection against us at the native courts on the borders of India. She will then be able to stretch forth her hands in a hundred different directions, with the prestige and influence of a great Eastern Power; and to maintain our many important possessions, in the heart of which she will then be situated, we shall have to engage with her in another contest, compared with which the one we victoriously emerged from in the same quarter of the globe, more than one hundred years ago, will be cast entirely into the shade. For these reasons we earnestly deprecate the establishment of a French empire in Cochin-China, which cannot be intended for commercial or philanthropical purposes, and which must inevitably lead to frequent and disastrous wars between that Power and ourselves. Let us, then, while yet there is time, narrowly watch the course of events in that quarter, and if possible influence them so as to avert the threatened evil, lest we, too, like the simple husbandman, should get stung by a serpent.

THE STRAITS TRANSFER QUESTION.

WE have just had the pleasure of perusing the pamphlet presented by several influential gentlemen connected with the commerce of the STRAITS SETTLEMENTS to the Duke of NEWCASTLE, extracts from which have already appeared in the Straits papers. We think the principals in this movement deserve the greatest credit for the disinterested manner in which they

Digitized by Google

nave devoted their time to a subject which more nearly affects the present inhabitants of the Settlements than the subscribers of the pamphlet themselves. If any doubt existed in the mind of the Duke of NEWCASTLE as to the value of the STRAITS POSSESSIONS and their solvency, it will be dispelled by an attentive perusal of the pamphlet; and we earnestly hope that measures will at once be adopted to effect the transfer.

The pamphlet begins with a description of the STRAITS SETTLEMENTS, and trenches on their History, Geographical Position Government, Administration of Justice, Municipal Arrangements, Military Expenditure, Population, Agriculture, Trade, Revenue, and then enters into their scheme for the establishments necessary under the new régime. We have nothing to say in reference to the first twelve pages of the pamphlet except the suggestion to renew the tax on gambling, which we consider unconstitutional and objectionable in the extreme, and from the diverse opinions we have seen expressed in the columns of our contemporaries, we cannot subscribe to the opinion of the writers of the pamphlet that, "there is now a strong feeling amongst the residents in the STRAITS in favour of the revival of the gambling farm." The remarks on the advisability of appointing a second judge and magistrate are judicious. In consequence of the unexpected arrival of the mails, we must postpone our comment on the scheme of salaries, &c., proposed.

NEW STEAMERS FOR CHINA.

The formation of a company, in which Captain Morice is engaged, for navigating the Yang-tze-Keang, was announced in a previous issue of this journal. We have now to notice another company, to be styled, we believe, the "China Coasting and Inland Steam Company," which is promulgated by Capt. T. A. Boulton, lately in the India and China trade. Another company is also spoken of, and Messrs. Robertson and Co., the well-known brokers in the China trade, will, we believe, have a part in its formation.

Of the private steamers lately noticed as building in this country, we have now to notice the departure from Glasgow of the screw steamer *Swatow*, belonging to Messrs. Lane, Harper, and others, under the command of Captain Minto, for Singapore and Hong Kong. The new boat for the same owners, building by Messrs. Wingate and Co., Glasgow, is expected to leave in October, under the command of Captain Bell, late of the *Berwickshire*. She is, we undertand, to be a very fine screw boat.

The boat building by Captain Castilla, at Glasgow, for Messrs. Lyall, Still, and Co., of Hong Kong, for the Canton River traffic, is to be a paddle-wheel vessel, about 200 feet in length, and 180 horse-power.

The boat building by Messrs. Mare and Co., Blackwall, under Captain Gibson's superintendence, and intended also for the Canton River traffic under Parsee ownership, is to be ready by next June. She is to be 220 feet in length, and propelled by paddle-engines of 200 horse-power.

The tug steamer intended for Shanghai, building at Liverpool by Captains Macfarlane, Grosvenor and others, will shortly sail for Shanghai. The steamer for Messrs. Jardine, Matheson, and Co., is, we understand, to be a paddle-wheel, for the coasting trade, about 300 feet in length, and 400 horse-power. The steamer for Messrs. Apcar and Co., will shortly be ready to launch. Another vessel is also building in the United States to follow the *Fire Dart* and *Hankow*.

Literature.

There is not much news in the book world during the last fortnight—not much, at least, that is likely to interest our readers. We shall therefore briefly chronicle a few of the more prominent items of literary information. From the gossip of a contemporary, we learn that Miss Evans has received, or is supposed to have received, £2,500 for "Silas Marner;" Professor Longfellow has a new poem in the press, which he considers his best. "Save me from my friends!" he may justly exclaim, for the *Illustrated News of the World* speaks of his "elegant and mild verses," which is assuredly "damning with faint praise." Gerald Massey has just published a new volume yclept "Havelock's March; with other National Poems" (Trübner and Co.). Massey is vigorous enough, we imagine, to escape the laudatory adjectives bestowed on the American poet. There is a rumour that the much-talked-of new daily Conservative journal will soon appear. A company is in course of formation, and the names of some influential persons are mentioned for the directory. The title of the new paper is stated as *The Day*.

As to books of travel, the most important work by far is reviewed in this number of our journal. Messrs. Sampson Low, Son, and Co., have just published a volume entitled, "From Calcutta to Peking, a Personal Narrative of the late War. By J. H. Dunne, Esq., Captain 99th Regiment, with portrait of Prince Kung, from a photograph in possession of the author, and a Plan of the Peiho Forts." We have given the announcement in full. Who can resist the temptation of possessing a real likeness of the immortal Kung? Captain Dunne tells us in his preface that he has not time to revise or even to read over what he has written, and he hopes that this statement will save him from severe criticism. We do not see the force of the argument, indeed it almost justifies the criticism he deprecates. Yet we must allow that, in spite of literary defects, the little volume is lively and amusing.

Mr. Quaritch, of Piccadilly, has issued a catalogue of books which will prove interesting to Oriental scholars. It contains a number of rare and highly valuable works selected from the library of H. Hayman Wilson, the late Boden Professor of Sanskrit, at Oxford.

Messrs. Adam and Charles Black have just published a "History of the Siege of Delhi;" by an officer who served there.

"A Standing Navy; its Necessity and Organisation," by Captain Forbes, is among the new works announced by Mr. Murray.

Sir John Bowring has employed some of his leisure in translating from the German the far-famed Peter Schlemihl. It is illustrated by George Cruikshank, and published by Mr. Hardwicke, of Piccadilly.

The "Russians in the Amoor," which is looked for with much interest, will not be ready until June.

Ten Weeks in Japan. By GEORGE SMITH, D.D., Bishop of Victoria (Hong Kong). Longman and Co., Paternoster-row.

IN some respects Japan is at the present time the most interesting country in the world. We know just enough of it to give a zest to our curiosity, but so much still remains in obscurity that we gladly welcome any addition to our knowledge. Travellers' stories have indeed been plentiful as blackberries, but so many of these have been proved false, so many are semi-fabulous, that reliable information, however limited its range, is exceedingly precious. By searching old works, some of which are extremely rare and others extremely voluminous, it is indeed possible to gain an accurate notion of Japan as it existed before the downfall of the Jesuits in 1639. But the stand-point of such men as Kämpfer or Titsingh is not ours, and though the conservatism of Eastern nations may have so prevailed in Japan as to stereotype many of its customs, our relations with that marvellous country are so novel and peculiar that we want fresh light thrown upon old facts, and new life and colour to revivify the faded pictures of the past.

If any one wishes to appreciate the present aspect of the country as it appears to an observant, clear-headed, impartial, genial traveller and travel-writer, we recommend him to take up "Ten Weeks in Japan." The Bishop of Victoria has visited this strange land with the honest determination to form his own impressions without relying on the statements of former travellers. The country, the people, the state of morals, the habits of society, the position of parties, the religious creeds, the sports and pastimes, the literature and the politics of the Japanese—all pass in review before him, and are all graphically illustrated in the volume. If he destroys some current fictions he supplies their place with well authenticated facts; if he represents the Japanese as Mr. Dicey has just represented Rome—with a greater eye to truth than to picturesque effect, we must allow at the same time that he has done the people full justice; that he has shown what noble material there is in them, and how we may cherish the hope that it will be freely developed in the years to come. There is no pretence about the Bishop of Victoria, no assumption of position, no dogmatism in his assertions. He writes plainly, vigorously, and without any apparent effort, and there is a manly straightforwardness in his style, which is singularly attractive. In the preface to the volume the author terms it a simple record of facts, and renounces all pretension to having composed "a profound or elaborate treatise on Japan." Yet although the Bishop of Victoria claims nothing more than is due to a truth-telling and observant man when narrating incidents of travel in a strange country, he describes so clearly what he saw, and draws such sensible inferences from it, that he places all his readers in a position to judge for themselves and to correct the mis-statements and exaggerations which form so prominent a feature in many works on Japan. It is impossible within our limited space to do justice to the volume, yet we must endeavour to give our readers some notion of its contents by touching lightly on a few points which have struck us in its perusal. It is natural as well as right that the Bishop should give some space to a description of the religious creed or scepticism of the

Digitized by Google

Japanese. He believes that there is more earnestness in their character than we meet with in the Chinese, and in describing the worship in a Buddhist temple, he adds that he "seldom beheld in a Pagan country an assemblage of native worshippers so nearly approaching the appearance of a Christian assembly, and the details of an ordinary Christian service." Dr. Johnson had a friend who never went into a church, but always took off his hat on passing one; and it appears that on certain occasions some of the Japanese are apt to perform the same act of devotion "as a compromise for the actual visit within the temple exacted from faithful Buddhists by the prescriptive etiquette of Buddhism." But the reverence which may attach to the temples does not prevent some portions of them from being turned to profane or, at least, ordinary uses. Strangers are lodged within them, and their courts sometimes resound with lively shouts of merriment. In describing Sinto worship, the primitive religion of the country, and picturing devout worshippers kneeling at the shrine of the "Sun Goddess," and ringing a bell or clapping their hands to attract her attention, the Bishop adds:—"On the very spot in which the two senior Japanese had recently prostrated themselves before their chief deity a number of boys had collected themselves in a group, and proceeded to indulge in the boisterous pastimes of a playground. Close to the very shrine they danced, leaped, wrestled, and threw summersaults in the air, and shook the roof with their merry laughter as they tripped each other up by the heels. Not even the sacred bell was spared. Seizing the bell-rope, they vied with each other in trying to climb, or pull themselves by the hand, to the ceiling, and in converting the whole place into a gymnasium."

The Japanese (says the Bishop) are one of the most licentious races in the world; and he adds that "no delicacy, no modesty, no sense of shame appears to be recognised among the courtesies of life." Handsome girls are constantly sold by their parents, and consigned to a life of degradation, but this does not prevent their marriage when the term of service is expired. When the nuptial ceremony is performed, when the hairs are extracted from the eyebrows, and the white teeth of the maiden are dyed black, no further license is allowed, and the virtue of the matron is preserved with Roman strictness. Domestic life in Japan possesses some English characteristics. Girls and boys are equally beloved, and tenderly cared for. "A family scene in the middle rank of society is not the least pleasing and redeeming feature of Japanese life;" and the fact that women share to a large extent their husbands' cares and pleasures, and are not kept in seclusion, as in most parts of the East, is a highly favourable feature in the social condition of the country.

We are told that "it is not an unfrequent sight to see a husband and wife eating their meals in common, sitting together in the same room, exposed to the public gaze of passers by, and assisting each other in the ordinary transactions of their business and trade." Pleasant is the picture drawn by the Bishop of Victoria of rural life and country beauty in Japan. Nature has, indeed, been bountiful in that glorious country, and the patient labour of the husbandman has added to the charm of the scenery. Crops of wheat, barley, and rice cover every available rood of ground in the neighbourhood of the cities. The hills are crowned with firs or coppices of cedar, and trees of the finest timber and richest foliage adorn their sides. "The Japanese are among the best and most skilful arboriculturists in the world, and every rising undulation bears testimony to their taste in planting trees." Then, how beautiful are the long, deep lanes, luxuriant with creepers and honeysuckles! How pleasant, at least to outward appearance, the cottage homes, surrounded by flowers, or bearing them in a *parterre* formed upon the summit of the sloping thatched roofs! Flowering shrubs of every variety—hill and valley, deep shaded ravines and open pathways—neat looking farm-houses and public wells—light-hearted merry villagers at work in the fields, respectful in manner and good-humoured in their curiosity—women and boys standing at their cottage doors and offering flowers—suburban inns, where busy travellers or holiday-makers from the city enjoy their simple refreshment of cakes and tea, and listen to the songs of female minstrels—all this touches the imagination of the reader as he follows the traveller's footsteps, and he is ready to exclaim with *Touchstone*, "Ay, now am I in Arden." But unhappily there is another side to this pleasant picture. Dr. Thunberg, who wrote about Japan nearly a hundred years ago, describes it as a sort of Utopia. The Bishop of Victoria speaks of it in a very different strain. Intoxication, he tells us, is so common that at Nagasaki, after 9 P.M., nearly half the adult population are inebriated. Other vices too there are of a still more degrading character which are yearly destroying thousands of the people, and sad indeed are the temptations to which young Englishmen are exposed who take up their residence at Nagasaki, Kanagawa, or Yokuhama. Then, again, although the people are disposed to be very friendly to foreigners, Prince Mito and his adherents, who may be called the Conservative party, are so strongly opposed to the recent turn of events, that British subjects are compelled to be continually on their guard, and we need not say that the past conduct of Mr. Alcock has considerably aggravated the danger. His most recent act might possibly prove a death-blow to our trade with Japan were it not for what the Bishop of Victoria terms the hopeful elements of our commercial prospects, namely, "the friendliness of the common people, the free-trade predilections of some of the territorial princes, the desire of improvement inherent in the Japanese race, and a gradual loosening of the prejudices of the Imperial Government by contact with the diplomatists and statesmen of Western Christendom." At present, however, the policy of most of the Japanese officials appears to be obstructive, while at the same time outward civility is observed.

"Ten Weeks in Japan" abounds with passages beloved of reviewers, which can be fitly transferred into the columns of a journal. Many of these we had marked for quotation; descriptions of scenery, of Japanese interiors, of domestic manners, of public festivities. Then, too, we should like to have followed in the wake of the Bishop, and glanced at the language and literature of the country, its political and social status, its geographical peculiarities, the statistics of its trade, the prospect opening up for missionary operations, and, finally, the relation which the land bears to China, and the prominent traits which distinguish the two countries. On these topics we could willingly have dwelt, but newspaper columns lack elasticity, and we are compelled to close abruptly. This, however, is perhaps the less to be regretted, since we have drawn our readers' attention to a fascinating volume, which they will doubtless peruse and enjoy for themselves.

The Cotton Manufacture of Great Britain Investigated and Illustrated, &c. By the late ANDREW URE, M.D., F.R.S.; to which is added a Supplement, Completing the Statistical and Manufacturing Information to the Present Time. By P. L. SIMMONDS, F.S.S. 2 vols. H. G. Bohn, York-street, Covent-garden.

THIS is a valuable edition of a most valuable work. Cotton trade and cotton growth are not now indeed what they were when Dr. Ure published his investigations, but his book is an absolute authority, as far as it goes, and Mr. Simmonds has so ably supplied what was wanting in his carefully written supplement that the reader will find the whole subject brought before him, and every particular furnished for its full investigation. At the present moment the cotton manufacture, the means of supply, and the possibility of opening up fresh fields for the growth of the plant, are questions occupying the attention not only of merchants but of statesmen. As an admirable handbook on the subject, these two well-written and well-edited volumes merit an extensive circulation.

LORD ELGIN'S RETURN.

At Dumferline, Lord Elgin's native town, he has been greeted with an address of congratulation. The following is a portion of his reply to the citizens. It will serve as a text to *The Times* leader which is inserted in another portion of our paper:—After a touching allusion to his connection with the town, and the many years during which he had been a wanderer, the noble lord said:—

"When I first entered on public life in the year 1841, I little expected that duty would call me away from this country. I was received in the House of Commons with that courtesy which is so uniformly extended to a new member in that great assembly, who shows a disposition to take an earnest and patriotic part in its deliberations. Before I had been many weeks a member of that great and august assembly, I sustained a calamity which not only deprived me of an affectionate parent—I need not speak of his virtues in an assembly like this, where there are so many who themselves remember him—but, in point of fact, my public career seemed for the moment to be entirely interrupted; for, by succeeding to a Scotch peerage, I was expelled from the House of Commons without being admitted into the House of Lords. At that time the Earl of Derby, then Lord Stanley, did me the high honour to ask me to undertake the government of Jamaica. In the position in which I found myself, I thought it my duty to obey that summons. To Jamaica I went, and remained there five years. At the end of that time I came back,

Digitized by Google

and found myself still in the same position as a Scottish Peer. I was then invited, in the most gratifying manner, by the then Colonial Secretary, with whom I was not personally acquainted, to undertake the government of Canada. I again accepted the post, and remained there eight years. Soon after my return I was asked to go to China. I don't conceal from you that there were some of my friends who rather dissuaded me from undertaking that task. I was told that the China question, owing to circumstances which will be fresh in your recollection, and the divided state of feeling in the country, was a very ticklish subject to meddle with. I was told it was a task, if I succeeded, in which success would offend the consciences of some people, and, if I failed, failure would hurt the pride of England. But I considered that the simple rule in such a case for a public man—a rule I have always followed in life, and which I trust I shall follow to the end—was to undertake any public duty in which he thought that his services might be valuable to his country—(cheers). I undertook that task, and I need not ask you to-day whether I have any reason to repent of it—(applause). Well, gentlemen, here I am, after all I have gone through, after a good many years, not quite used up yet, but still not so young as when some of us first became acquainted—(cheers). This is not an occasion for going at length into these matters; but there is one point on which I wish to say something to the people of Dumferline, because I think they are entitled to any explanations from me, and I think I can give them one which will be satisfactory. When I went to Japan in the year 1858, to negotiate a treaty, I found myself there in a very difficult position. In the first place, I had only a fortnight and no more—owing to an obligation which I was under to return to China to arrange a tariff with the Chinese Commissioners—from the day of my arrival in Yedo to perform the whole business. It was a curious thing, but I am never allowed more than a fortnight for such negotiations. When I went to the United States in 1854, I was allowed only a single fortnight to negotiate a treaty which has admitted the whole produce of British North America to be brought into competition with the products of the United States in their own markets, and which likewise put an end to the risk of collision on the subject of the fisheries between this country and America, which was the most serious risk which had presented itself during the whole time I have been a public servant—(applause). I was in the same position in Japan. I found that the American Minister, who had been resident for some years in the country, had succeeded in obtaining a treaty which involved a very considerable accession on the part of the Japanese, and was a great advance on the former state of their relations with foreign countries. I found that the Japanese were exceedingly unwilling to go beyond the conditions of that treaty. They were willing to give me a treaty on the same conditions as they had negotiated with the United States, but they were very unwilling to go beyond the provisions of that treaty. And you will understand that their disinclination was not very unreasonable, when you reflect that by those treaties we deprive them of the same control over their fiscal affairs which we enjoy in this country. When we want, in this country, to make any alteration of customs, or any other fiscal matters, we get our Chancellor of the Exchequer to deal with them as Parliament or the nation thinks they require; but we bind these Oriental nations by treaties which deprive them of any power, whatever exigencies may arise, to impose other duties. It is very desirable, therefore, and it is only fair to them, that these treaties should be all, as nearly as may be, in the same terms, otherwise merchants would go and pick and choose among the articles, and the result would be an amount of confusion which neither the merchants nor the Japanese could disentangle. I therefore agreed to accept the American treaty. If you compare my treaty with China, which was my own making, with the treaty with Japan which was made with the American Minister, I think you will perhaps agree with me in liking the Chinese one the best."

"THE TIMES" ON LORD ELGIN.

The Times of April 20th reviews the early difficulties of the Earl of Elgin, and the obstacles he has had to encounter in struggling up to fame. The opening paragraphs although, of course, ably written, need not be repeated, but the remainder of the article is too suggestive and too true to be omitted from our columns. Thus it runs :—

When Lord Elgin had been excluded from both Lords and Commons, and was simply nowhere, he was sent, in the track of the "condemned regiments," to take the Government of Jamaica. What a vision does this suggest of yellow fever, spoilt digestion, ruined appetite, and broken spirit! Lord Elgin remained there five years, and five very long years no doubt, they seemed. On his return he was asked to go to Canada, where a quiet man was wanted to keep things smooth and straight, and get on well with the Yankees. The great work of British America was supposed to be done, and all that was required was a man to do nothing as well as nothing could be done. Lord Elgin went to Canada, far away from the stirring scenes of the Free-trade agitation, in which names were lost and won, and parties shipwrecked and constituted. Going up and down the St. Lawrence, visiting remote improvements, and now and then crossing the line in the States, he seemed to have an easy and inglorious time of it. But his quietness and all but insignificance disarmed hostility, and by and bye Lord Elgin found that he could do what nobody had done before him, or could do. It was but a bloodless paper triumph—indeed, it was no triumph at all, but something in which both sides had all they ought to desire. He established a commercial unity between the Colonies and the States. He was there eight years, which, added to the West Indian time, makes thirteen on the other side of the Atlantic. When he came home he was asked to go to China, where some hard work was to be done. His friends were of opinion that Lord Elgin had been victimised long enough, and that he ought to look to something better than the very ugly job which the cupidity of our merchants and the obstinacy of our officials had made for us in the East. However, he was too shrewd to refuse work, so he resolved to make the best of it, and went to China, and subsequently to Japan. He had to negotiate treaties, and in so doing to push with firmness, to feel his way with tact, to take advantage of what had been done by the Americans and others—in a word, to do a great deal in the quietest possible way. What was worse, and what we commend to the consideration of our readers, is that he commonly found, as he told the people of Dumferline the other day, that he had to do his most difficult pieces of business in a fortnight. When it came to the point there was just that time, and no more, to learn the whole state of things, to get up the whole subject, to beware of a thousand schemes, to provide against all loopholes, and so to establish a treaty that was to last for ages. He had to deal, not with barbarians, but with diplomatists, who had good reason to be vigilant and tenacious, as the treaties overruled and circumscribed the power of their Governments. The end was that he did all he wanted, and on the Chinese having the folly to take advantage of his return to England, and try to upset the treaty, Lord Elgin was once more compelled to return to China, which he hoped to have left for ever. How he then did his work we all know. He did it thoroughly, and China at this moment is a better neighbour and customer than France—France the magnanimous, the heroic, the civilized, the "generous," and the brave. All this has been done in the way of duty, without having to make a single factious speech, without the opportunity of one factious vote, without any display, except an occasional demonstration of physical force and corresponding determination of purpose. We will venture to say that a dozen men who have kept themselves carefully in the front rank of politics during the last twenty years, and who would no more have gone to Jamaica than they would have taken the governorship of Pentonville Prison, would now be glad to exchange their career for Lord Elgin's. For all ages to come his name will be associated with the opening of China and Japan. He is the man who has broken through the door, and admitted two-thirds of the human race to the company of the remaining third. We do not wonder that the *Almanac de Gotha*, being somewhat at a loss for Royal and Princely personages to illustrate this year's number, has admitted Lord Elgin to fill up the gap. Such a career is not without sacrifice. Twenty years of the best period of life spent among planters and colonists, in armies and navies,—everywhere except at home, are a considerable price to pay, we say, not for fame, because for nearly all the period there was no chance of fame, but for doing one's duty. But will it be pretended, with such work achieved already by a man still young, that nothing now remains to be done, and that our young heroes, issuing in crowds from the Universities, are really starved out for want of opportunity? Is all barren from Dan to Beersheeba? We don't think so. Matters are not worse now than they were in 1841, when Lord Elgin went off to his genteel banishment in the West Indies.

THE AGRA AND UNITED SERVICE BANK (LIMITED).

On the 13th April the twenty-seventh annual general meeting of proprietors was held at the head office, Cannon-street; Major ROBERT GUTHRIE MACGREGOR in the chair.

Mr. W. SHIPMAN (the officiating general manager), having read the advertisement convening the meeting, the report of the directors (which appeared in the last number of this journal) was taken as read.

The CHAIRMAN said the report, he was happy to state, showed that the business of the bank continued to progress satisfactorily, and the result of their operations at the head office and at the different branches might be considered, and he hoped would be found by the proprietors, successful. The audited accounts for the twelve months had been submitted to the proprietors in abstract, and the details of those accounts were in the books upon the table. With regard to that point he might mention that it would be pleasing to the shareholders, and merely carrying out the views of the directors, that a detailed statement of accounts, drawn out as fully as was considered desirable, should be laid upon the Board table one week before the general meeting, so that every proprietor before such meetings would be able to obtain any information which he desired. The net profits of the year were something less than those of the preceding year, which arose from several causes, of which he need only mention one, namely, that the rate of money in India, in Bombay particularly, had during the greater part of the year been very low indeed. They had large balances unemployed, and it had not been thought desirable altogether to refuse the receipt of further deposits, so that they were, in some degree, exposed to the payment of interest beyond what could be put out in business at the usual profit. The result of that state of things, consequently, had not been so favourable as otherwise it would have been. They had been obliged to invest more than usual of their capital in Government securities, which, although at a fair interest, had not produced so much as if the same capital could have been employed in the ordinary general business of the bank. With the reduction, which that explanation accounted for, it would however be seen that the net profit of the past year was within a small amount of what it was the previous year, and that it had enabled the Board to give the proprietors a dividend of 10 per cent., and a bonus of 2 per cent., making 12 per cent. per annum upon their paid-up capital. That amount of dividend was given upon a capital of one million sterling. He thought some notice should be taken of the amount of their capital, inasmuch as some proprietors were in the habit of measuring the value of their dividend without reference to the amount of capital paid-up. The greatest institution of the kind in India—which commanded the greatest money market in India, and where centres the greatest trade between India and the home country and between India and our other Eastern colonies with all its advantages, a note circulation of three millions, giving no interest, and holding, large Government balances, paid only 6½ per cent. It would be seen from the report that the directors had placed to the credit of the reserve fund the sum of £10,000, by which that fund was increased to £200,000. It might, therefore, be interesting to the proprietors to know what were the views of the Board with regard to further increasing that fund. The Board were of opinion that for the present the reserve fund should remain at the amount at which it at present stood—(hear, hear). Of course, if the business of the bank very greatly increased, there might come the time when it would be considered expedient to recommend a still further increase, as the Board were strongly in favour of the principle that as the business of the bank increased to the same proportionate extent should their reserve fund be also increased, as it was much fairer to measure it by their trad-

Digitized by Google

ing capital than by their paid-up capital. Now, upon their paid-up capital their reserve fund was 20 per cent., but upon their trading capital, reckoning it prospectively at £4,000,000, it would be 5 per cent.; but their trading capital had not yet reached that sum, as the balance-sheet showed that it amounted to £3,300,000. In the last paragraph of the report allusion was made to the provision which the Board considered it necessary to make for bad and doubtful debts. There was one claim, the circumstances connected with which had already been before the proprietors—he referred to the claim upon the London and Eastern Bank. That claim was now reduced in the bank's book to £16,438, and the amount they held on security was £13,040, leaving a difference of £3,398. There was no doubt a much larger sum than that would be recovered from the London and Eastern Bank shareholders. That was the chief of the doubtful debts, and the others being much smaller in amount he would not detail them. That was a debt of considerable amount in the commencement, and therefore it was satisfactory that it had been reduced to its present dimensions, and for which dimensions they had an equivalent security, yielding an interest until they chose to realise it. Another paragraph of the report stated that Mr. Balfour, the manager of the Calcutta branch, had been appointed general manager in the place of the late Mr. Neilson, deceased. Mr. Balfour having for a series of years managed the Calcutta branch very much to the satisfaction of everybody with whom he transacted business, the Board felt that they were performing a duty to themselves and to the shareholders in appointing Mr. Balfour to the office of general manager. Before assuming his duties, however, the Board had deemed it expedient that he should visit each of the branches, for the purpose of a thorough inspection of their business, and moreover his presence in India at the present time would, no doubt, be of essential assistance to the bank. The cessation of further appropriations to the reserve fund might induce proprietors to expect an increase of dividends for the future, and he hoped the Board would be able to declare them; but he would not go further than express a hope, because they had a great deal to do—they had to reinforce their Indian staff, they had to meet various expenses with regard to their new branch at Kurrachee, and also the expenses of a permanent inspector. But shareholders might rest perfectly satisfied that the Board would keep down their expenses to the lowest possible limit consistent with efficiency. Another point which the directors might mention, was one in which they felt confident they would carry with them the sympathy of the shareholders. It had been seen by the newspapers that efforts were being made towards raising a fund for the relief of the sufferers by the Indian famine. The bank, besides its contributions in India, had contributed to that fund the sum of £300; and when they considered the extent of the suffering occasioned by the famine and its probable duration, when they considered that theirs was still in a great measure a *quasi* Indian institution, that most of those present were of Indian service or connection, and that to India many of them owed almost everything, he thought he did not too strongly express the opinion of that meeting when he anticipated, as the directors had anticipated, the concurrence of the shareholders in subscribing that amount,—(loud cheers). He knew it was, to a certain extent, beyond the authority of the Board, but they would not hesitate adopting the same course on any similar occasion, though it might be beyond their immediate authority, if they considered that by so acting they were promoting the character of the institution and the wishes of the proprietors,—(hear, hear.) He concluded by moving that the report and statement of accounts be adopted.—Mr. GEORGE GORDON MACPHERSON, the deputy-chairman, seconded the resolution, which was unanimously carried, without any discussion.

The CHAIRMAN said the next business was the re-election of the retiring directors.—Colonel BAZETT with much pleasure proposed the re-election of the retiring directors. He believed their directors were doing their duty most conscientiously, efficiently, and thoroughly. In them he had the greatest confidence, and therefore it was that he had much pleasure in proposing the re-election of those members of the Board who went out of office by rotation.—The motion was seconded by Colonel MARSHALL.—Dr. RICHARDSON believed there was no bank in London conducted upon better and sounder principles than their own, and there was no body of directors in whom he had more confidence than the Board of the Agra Bank; but what he wished the directors to do was to waive their right to fill up vacancies that might occur in the Board between the general meetings, and allow those vacancies to be filled up by the shareholders.

The CHAIRMAN said that the question referred to by the hon. proprietor had some time ago been considered by the Board, and had the question been put in the shape of a substantive motion the probability was that the Board would have to a very great extent been in favour of the opinion expressed; but there were some reservations to be made. For instance, to fill up a vacancy occasioned by the retirement of a service director belonging to a presidency where our field of choice was comparatively limited, from our having fewer proprietors there than in Bengal, and also of a commercial member, it was very desirable that the qualifications of the persons proposed to be elected should be known; and to know which the Board had better opportunities than proprietors outside. In such cases, though the Board would probably be found willing to waive the power of actual appointment, they would indicate to the proprietary any such persons whom they were inclined so to recommend. The proprietors having confidence in the Board, would, he thought, give them credit for recommending only such a person as would best fill the vacancy, and represent the proprietors' interests. Having done so, they would in such a case leave the actual election to the proprietors; and in all other intermediate vacancies it would be left to them entirely.

Colonel CHARLES HUNTER proposed an amendment to the effect that the vacancies created by the outgoing directors should not be filled up, not from any ill-feeling, for he entirely concurred in every acknowledgment of their good services for their attention to the duties of the bank, but simply with a view of reducing the number of directors upon the Board.—Mr. MORLAND entirely concurred in the sentiments expressed by Colonel Hunter, but should vote against the amendment, because no notice had been given. It would be scarcely fair to the outgoing directors to be so summarily treated—(hear, hear),—without any sort of notice.—Mr. W. NEWMARCH was strongly in favour of the resolution, upon the ground that the extensive and intricate business of their bank was very different from the business of an ordinary bank in London, and therefore their present Board was not too numerous. They must not forget that the Agra Bank was continuing to make a satisfactory progress among the British public as a commercial institution, and upon that ground alone he thought the amendment should not be put.—Colonel WESTERN opposed the amendment, feeling quite satisfied that if it were adopted a very great injury to the marketable value of their shares would be the result. The amendment being put was negatived, there being but three hands held up in its favour. The resolution was then put and carried, with three dissentients.

Mr. J. THOMSON, in a few appropriate remarks, acknowledged the compliment on behalf of the retiring directors. He would rather refer to the past as an evidence of the future, and prefer accepting the confidence of the proprietary, which he hoped he might be permitted to accept, both for himself and colleagues, by what they had done, rather than by any promises—however truthful and sincere—of what they would do in time to come. He could conscientiously say that they took the warmest interest in the bank, knowing it to be a solid, sound, and substantial institution; and it paid them a satisfactory, if not a handsome, return for their investments. If those dividends were honest, which they certainly were; if their capital was intact, which it certainly was; and if their reserve fund now amounted to £200,000, being equal to one-fifth of the capital stock, free and unfettered, and the field of their operations large and improving, he thought everyone acquainted with the commerce of India would agree with him that their operations were likely to become largely extended. Looking at all those circumstances and facts, he thought they had all good reason for satisfaction and ground for congratulation, both with regard to the position of the bank and with regard to its future prospects. He was assured they had every reason to regard that bank upon a higher basis than upon the mere selfish reasons that it served their purpose, for it served the purpose of the public. He would take that opportunity of referring to the nature of their business as compared with what it was in its early days. He knew it was termed a United Service Bank, that it had derived its capital from the services, and that it had been of essential benefit to the services, which had creditably performed all their obligations. The business of the bank became so prosperous that Agra did not afford a sufficient field for its operations. A branch was then opened at Calcutta, and there an extensive and profitable field was found in the commerce of the country; and from that hour the bank became an important commercial institution, and its business gradually increased, so important indeed, that in course of years it was deemed expedient to remove the head office from Calcutta to the great mistress of the world, London, and from that time up to the present moment their bank had been mainly a commercial bank, as now only one-tenth of their business consisted of service business, the remainder being purely commercial business, and therefore the same proportion of profits realised resulted from commercial transactions. That change had come to pass by force of circumstances and passing events. When they looked at the state of the commerce—at the commercial intercourse between England and India, and when they considered that the business, the trade, and commerce of India must gradually expand year by year, being now almost in its infant state, they should congratulate themselves that they were not now so dependent upon the business of the services, and that they had got a firm hold of the commerce of that important empire—India—(cheers).

A resolution was then passed re-electing the auditors (W. Newmarch, Esq., and J. H. Williams, Esq.), and increasing their remuneration to £300 per annum. A unanimous vote of thanks was then passed to the Board of Directors, which was acknowledged by the CHAIRMAN. Thanks were then accorded to the manager and officers of the bank, which was acknowledged in a few graceful remarks by Mr. W. SHIPMAN (the officiating general manager), and a special resolution was passed by a majority of 37 to 7 (the directors not voting) increasing the remuneration of the directors from £200 to £300 per annum each, which brought the proceedings to a close.

Naval and Military.

We have to announce the arrival at Spithead of the following vessels with troops from China:—the *Cruiser*, 17, screw, Commander J. Bythesea, K.C., arrived at Spithead on the 22nd inst., from the China station—last from Falmouth. She has been officially inspected, and her crew exercised at great gun, small arms, cutlass drill, &c.

The hired transport *Melbourne*, Captain Benson, has discharged 24 invalids (who have been sent to Chatham), 2 women, and 3 children, belonging to the 13th and 85th Light Infantry; 10 officers, 12 sergeants, 3 corporals, 112 men, 2 women, and 3 children. 50 men belonging to regiments remaining in China were landed at Cape Town for the Sanatarium. 11 deaths occurred on board during the passage from Hong Kong. She has since sailed from Spithead for Bristol, where she will be thoroughly overhauled and repaired.

The *Athletæ*, hired sailing transport, with the following officers and men of the 3rd Foot (the Buffs):—Lieut.-Col. J. N. Sargent, in military command; Capts. T. Kains, E. K. V. Arbuckle, and W. Henry; Lieuts. A. G. Huyshe, C. D. Baillie, and W. F. Ker; Ensigns:—H. T. Halahan, and H. Harrison; Assist.-Surg. J. H. Beath, M.D.; 10 sergeants, 12 corporals, 4 drummers, and 330 privates. Three deaths have occurred during the voyage. On the order being given at the Cape to heave up the anchor for England, the ship's crew refused to work or obey the orders of their commander. The ship was then taken in hand by the military on board, 28 of whom, volunteers, were appointed to do duty aloft, the remainder working the ship on deck, which continued for a week after leaving the Cape, when the seamen came aft and begged of their captain to allow them to return to their duty.

The hired transport *Tasmania*, Captain Norse, has arrived at Spithead from China, with 13 officers and 441 soldiers, forming the left wing of the 3rd Buffs.

The *Macduff*, transport, arrived at Spithead on Wednesday, with headquarters of the First Royals, from China, under the command of Colonel Holcombe.

Digitized by Google

The *Sir William Peel*, No. 17, screw transport, Commander A. G. Froud, arrived at Spithead on the 22nd, from China and the Cape. She brings home the detachment of the 1st battalion 3rd Buffs that were wrecked in the hired transport ship *Miles Barton*, at the Cape, comprising the following officers and men:—Major H. J. King, in command; Capts. G. N. Roe and H. V. Anley; Lieuts. W. A. Daubeny, F. T. Jones, and F. T. Hobson; Ensign W. F. Kerr; Assist.-Surg. T. Teeran, 10 sergeants, 3 drummers, 9 corporals, and 298 privates. She also brings 14 non-commissioned officers and men of the Army Hospital and Medical Staff Corps, and the following passengers:—Staff-Surgeons Rennie, Assist.-Surgs. Snell, Low, and Watson; Major Jackson, Royal Marines, and servant; Capt. Croome, 2nd Queen's, and servant; Lieut. Sinclair, of her Majesty's ship *Sampson*; and Mr. Taylor, Master of her Majesty's ship *Sphinx*; 9 rank and file, 59th Regiment; 2 privates R.A., 2 privates R.E., 1 private Cape Mounted Rifles.

The *Hougoumont*, No. 36, hired sailing transport, J. Flamank, master, arrived on the 22nd with Royal Artillery from the Peiho. The officers and troops on board consist of Major C. Rotton, commanding, Capt. A. Harrison, Lieuts. J. H. P. Anderson, W. G. Braneker, G. S. Harvey, Surg. A. K. Prescott, 19 sergeants, 3 trumpeters, and 284 privates. The troops will disembark from the ship at Portsmouth, and take over a portion of the guns and horses of Lieut.-Col. Turner's Armstrong battery at Haslar.

The *Cospatrick* arrived off Plymouth on the 22nd inst. The *Mars* and the *Indomitable*, from Hong Kong, the former with 261 men of the Royal Artillery, who will disembark at Portsmouth, and the latter with 302 men of her Majesty's 2nd Queen's, have also arrived in the Channel.

The paddle-wheel steam frigate *Magicienne*, 16, Capt. John E. Commerell, at Devonport, will be ready for paying off her crew on the 30th inst.

The *Inflexible*, 6, paddle, Commander Brooker, has been officially inspected at Spithead, and her crew exercised at target practice from her great guns, &c. She was ordered to proceed into Portsmouth Harbour to strip and pay off to-morrow.

The *Sampson*, 6, paddle, Capt. G. S. Hand, C.B., arrived from China at Portsmouth yesterday.

A court martial has been held on board the flagship *Impregnable*, Capt. Lord Fred Kerr, at Devonport, to try Mr. John Rivers, assist.-paymaster of her Majesty's ship *Magicienne*, on a charge of drunkenness on board that ship on the night of the 11th of January, 1861. The court found the charge proved, but, in consideration of prisoner's former good character, merely sentenced him to be placed at the foot of the list of paymasters and to be severely reprimanded.

The head quarters of the 1st Royal Regiment has arrived, and is stationed at Manchester. The *Cressy*, with the detachment under Colonel Urquhart, is daily expected. The 2nd (Queen's) remains at Portsmouth, where it disembarked, and the 3rd (Buffs) has taken up quarters at Dover. Capt. Taaffe, of the Royals, died on the passage home.

The *Gazette* states that preparations are being made for the distribution of the amount awarded for the destruction of pirates in the China seas on the 4th of August, 1858, by her Majesty's gunboat *Saunch*; for the destruction of pirates in the China seas on the 28th and 29th of September, 1858, by her Majesty's ships *Magicienne* and *Algerine*; for the destruction of pirates in the China seas on the 16th of October, 1858, by her Majesty's ships *Magicienne* and *Fury*; and for the destruction of pirates in the China seas on the 13th of May, 1859, by her Majesty's ship *Clown*.

The colonelcy of the 41st Foot has become vacant by the death of Gen. C. Ashe A'Court Repington, C.B. K.H.; and the command of the Royal Engineers is likewise vacant by the demise of General Sir C. W. Pasley, K.C.B.

In reference to the amalgamation scheme, we believe there will be nine line regiments and three horse. All officers at present in the Indian service will be offered a commission in one of these, or allowed to join the staff. The Horse Guards will manage all these the same as the present British army, and officers will be allowed to exchange to other line regiments from the new ones. The business of the Indian army is now being transferred from the India House to the Horse Guards, so that all may be managed by one; but it will be some time before all the details are settled.

NAVY.

APPOINTMENTS.

COMMANDER.—J. E. Bickford to the Forte, flagship on the south-east coast of America.

LIEUTENANTS.—A. Dent to be flag-lieutenant to Rear-Admiral Warren; H. M. Carre to the Cambridge; H. Dolphin to the Marlborough; G. V. Phillips (additional) to the Cumberland.

CHAPLAINS.—The Rev. T. Davis to the Cornwallis; Rev. D. Carson to the Pembroke.

SURGEON.—C. D. Shephard to the Imaum.

PAYMASTERS.—C. G. Burney, advanced to second class; J. M. Sweatman, advanced to third-class; W. E. Kelly to the Royal Adelaide, in lieu of a clerk; H. T. Read to the Hornet; T. H. Stote to the Dauntless, in lieu of a clerk; H. F. Pullen to be secretary and assistant-paymaster to Rear-Admiral Warren; J. T. Wells to the Renown; W. G. McKnight to the Amphion.

ASSISTANT-SURGEONS.—E. Dance to the Procris; J. C. Grigg, confirmed to the Hydra.

ASSISTANT-PAYMASTERS.—J. H. Mooney to the Ajax; J. Haslar to the Impregnable; W. K. Harriot to the Princess Royal.

MASTER'S ASSISTANT.—William Maxwell to the Porcupine.

ACTING ASSISTANT-SURGEONS.—E. W. Dubue to the Cossack; F. B. Hurley, M.D.; E. Dann, M.D., and R. Nelson, to the Victory, for Haslar Hospital; W. J. Thomason, W. Graham, and E. Mulesby to the Impregnable, for Plymouth Hospital; G. E. Farr to the Goudon.

SECRETARY'S CLERK.—V. D. J. Rickcord to Rear-Admiral Warren; A. H. Riddell to the Victory.

CHIEF ENGINEER.—W. M. Biden, to the Cumberland, for charge of the machinery of the Undaunted.

ASSISTANT-ENGINEERS.—First Class: W. B. Fabian, to the Fisgard, in charge of the machinery of the Driver.

MR. ROBERT SWINHOE, her Majesty's Consul at Amoy, has been proposed as a corresponding member of the Zoological Society of London.

ONE curious reason given by Mr. Wingrove Cooke for appearing in Marylebone was that when in China he had been in the habit of going into "pestilential places."

IN the Civil Service Estimates just issued we find the sum of £110,000 for loss on discount on bills drawn in China, and an increase of £4,000 for the Consular service in Japan. The balance-sheet shows that the expenditure for the war in China in the past financial year, amounted to £3,000,000.

MR. RIMMEL, the noted perfumer, has recently invented a Perfume Vaporizer, for diffusing the fragrance of flowers in apartments and public rooms, and purifying the air. This is a charming improvement on the old-fashioned pastille. Drs. Letheby and Hassall have testified to the beneficial qualities of the invention in very flattering terms.

COMMERCIAL POSTSCRIPT.

CITY, FRIDAY AFTERNOON.

Matters in the City are all quiet, Consols 92.

The amount of specie that will be taken by the outgoing steamer with the Bombay mail on the 12th is £397,140, of which £2,000 in gold is for Alexandria, and £66,150 in gold and £328,990 in silver are for Bombay. The Government remittance on this occasion is £90,370.

ARRIVALS NOT INCLUDED IN TABLE.—April 24, at Deal, from Batavia, Wilhelmina. 22, off Dungeness, Krimpen aan de Lek; at Cowes, from Akyab, Reyerward. 23, at St. Nazaire, from Singapore, Cecilie from Akyab, Veloze. 25, at Deal, from Maulmain, Lorenzo. 25, at Liverpool, from Akyab, Wallace.

DEPARTURES.—April 24, from Portsmouth for Batavia, S van Heel; 25, from London for Shanghai, Julia.

SPOKEN.—Cossack, Liverpool to Batavia, April 13, 46 N., 22 W.; Amazone, Batavia to Amsterdam, 25 Feb., 26 S., 5 E.; Mary and Hillegonda, Rotterdam to Batavia, 13 April; Constantia, Banjoewangie to Amsterdam, 21 Feb., 21 S., 20 E.; Nephew (?), from Hong Kong, 16 Mar, 3 N.; Yorkshire Lass (?), Foo Chow Foo to London, 8 April, 46 N., 32 W.

ST. HELENA, March 14.—The Eagle, of London, Malone, from Cardifi to Manilla, was abandoned Feb. 2. off Mauritius. She had experienced a hurricane on January 29, had been thrown on her beam-ends and obliged to cut away her masts.

Monetary and Commercial.

The public funds and securities generally have, during the past fortnight, been steady at about previous rates. Consols have ranged 91¼ to 92. Some little excitement existed on the eve of the announcement of the Budget on the 15th. As intimated in the last number of this journal, the duties on tea and sugar have not been reduced. The Paper Duty is proposed to be repealed and a penny taken off the Income-tax. The reduction of the duty on Tea to 1s. is as remote as ever. Further details of the Budget will be found under "Parliamentary Intelligence."

The rate of interest at the Bank of England now stands at 5 per cent., and first-class short bills have been done at 4. It is probable that the Bank rate may shortly come down to 4 per cent. With this ease in the money market, business has revived. By a printer's error in omitting the letter "*w*" in our last "Summary" business was represented as showing no (instead of now) signs of improvement.

The *Money Market Review* notices the purchase by Government—for remittance to India—of £848,362 in silver from the Bank of England. In consequence of this and the non-arrival of the usual remittances, the rates for bar silver and Mexican dollars has advanced. The quotations will be found in the latest intelligence.

The course of exchange at New York on London for bills at 60 days' sight is 107¾ per cent., which, when compared with the Mint par between the two countries, shows that the exchange is against England. But, after making allowance for interest and charges of transport, the rate leaves no profit on the transmission of gold to the United States.

The prospectus of the Natal Land and Colonisation Company (Limited) is issued. The object is to purchase and re-sell land in this rising colony. In the first instance, 250,000 acres, held under grants from the crown, have been bought, at an average price of 11s. 6d. per acre, from some of the principal settlers, who have accepted the whole of the purchase-money (£140,000) in paid-up shares of the company.

The report of the Royal Mail Company (West India), recommends the usual dividend of £2 per share free of Income-tax. The receipts for freight and passenger traffic, especially the former, exhibit an augmentation, partly owing to improved arrangements in connection with the Pacific Mail Company for the conveyance of merchandise to and from the west coast of America.

Digitized by Google

The East India and China Association have just issued their usual statement of the number and tonnage of ships, both British and foreign, that have entered inwards and cleared outwards with cargo from and to places "within the limits of the late East India Company's Charter," for the three months ending March 31, in the years 1861 and 1860 respectively. From this it appears that in the past three months of 1861 there were 305 vessels of 175,785 tons, while in the like period of 1860 there were 330 vessels of 217,510 tons for the entries inwards, showing a falling off of 25 vessels and 41,725 tons. The entries outwards for the like period were 311 vessels of 214,777 tons in 1861, against 347 vessels of 253,432 tons in 1860, exhibiting a decrease of 36 vessels and 38,655 tons.

At a special meeting of the Chartered Bank of India, Australia, and China, the resolutions passed at the annual meeting on the 29th ult., approving the application to the Treasury for a supplementary charter to empower the issue of notes at Singapore, and authorise the postponement of the annual meetings from March to April, were confirmed.

The annual meeting of the Agra and United Service Bank was held on the 13th inst., and the report printed in our last, was adopted. A full report is given in another column, and will be found to confirm the prosperous condition of this institution, which was noticed in a previous issue. The allowance to the directors, it will be observed, has been increased not without some opposition, and we understand that in consequence of such, the gentlemen acting as directors, declined to receive the increase at which some of the shareholders so far over-stepped the bounds of fair jurisdiction, as to say that the directors had no right to decline *any* resolution of the shareholders but should obey the same *nolens volens*.

The annual meeting of the Oriental Bank was held on the 22nd, Mr. H. G. Gordon in the chair, when the report was adopted and a dividend and bonus declared of 9 per cent. for the past half-year, making a total distribution for 1860 of 16 per cent. free of Income-tax. In answer to questions, it was mentioned that no loss has been incurred by the London and Eastern Bank. It is not the present intention of the directors to increase the reserve, the amount at which it now stands—viz, 20 per cent. of the paid-up capital being considered sufficient. Annexed are the report and accounts:—

The general statement of affairs, and balance-sheet for the year 1860, now submitted, show the net profit of the corporation for that period to amount to £214,757, after defraying current expenses and providing for all bad and doubtful debts. The dividend and bonus for the half-year ending the 30th of June, 1860, already paid (dividend 5 per cent. and bonus 2 per cent.), have absorbed £88,200 of this amount, leaving £126,557 available for present distribution. This sum it is now proposed to appropriate to the payment of a dividend of 5 per cent. for the half-year ending the 31st of December, 1860, and a bonus of 4 per cent., which together will require £113,400, and leave a balance of £13,157 to be carried forward to the credit of the next year's account. The present dividend and bonus, equal together to 9 per cent. or £2. 5s. per share, will be payable, free of Income-tax, making, with the previous payment, a distribution of profit for the year 1860 equal to 16 per cent. on the capital of the corporation.

BALANCE-SHEET, DECEMBER 31, 1860.

THE MALTA AND ALEXANDRIA AND RED SEA CABLES.

The *Malacca*, with the first portion of the Malta and Alexandria Cable, has not yet left. The reports from the Mediterranean are all favourable to the undertaking.

No further steps can, we understand, be undertaken by the Red Sea Telegraph Company, for the repair of the cable, until Government has decided on the course to pursue in reference to its guaranteed dividend. It is quite probable that Government may take over the undertaking, and reimburse the Company for their present outlay. The small steamer *Telegraph*, lately despatched by the Company to the Red Sea, will, we understand, be ordered to Suez or Bombay for sale.

The amount of bullion by the steamer *Indus* from Southampton, on the 20th April, was as follows:—Madras, gold, £4,359; Calcutta, gold, £15,900, silver, £176,200; Singapore, gold, £3,879; Hong Kong, silver, £27,497; Foo-chow-foo, £2,250; Shanghai, £14,485; making a total of £24,138 in gold, and £220,432 in silver.

ARTICLES OF IMPORT.

TEA.—During the past fortnight business has continued on the same quiet scale as before, but as the assortment of good teas has become less plentiful, a firmer tone has been evident for these kinds, and prices of all grades above 1s. 3d. per lb. show an upward tendency. The question of the reduction of the tea duties being, we suppose, now set at rest for another year, leaves the market to the natural operation of supply and demand, and as it is now apparent that the supply of good tea is not in excess of the requirements of the trade, we look for a steady market for these kinds, with gradually hardening prices. The clearances during the past week have been very large, showing that the prospect of a change of duty had materially interfered with the delivery, which we may now expect to see recover the advance which had been lost in the month of March. Low and fair to good common Congous remain much as before, the inquiry being moderate. Flavoury kinds from 1s. 1d. to 1s. 2d., have been difficult of sale at former prices. Fair to good Kaisows have been in request at very full prices. Fair to good Ho Hows and Ning Chows have been saleable at former rates; also good and fine Monings and Wopaks. Fine Kaisows are very scarce, and the few to be met with command extreme rates. Tayshans continue to be taken at about former prices. Souchongs remain without altera ion, as also Oolongs. The small sales making in Flowery Pekoes are at very low rates. Common Scented Capers remain saleable at former prices; other kinds much as before. In scented Orange Pekoes sales of medium qualities, Foo Chow make, show a slight reduction, other descriptions ruling at about former prices. In Green Teas there has been an active demand for all kinds under 2s. per lb. for export both to Canada and New York. All the Japan kinds of Twankay and Young Hyson under 1s. 8d. per lb. have been taken at an advance of about 2d. per lb. In teas over 2s. per lb. there is less alteration except in fine Moyune kinds, which are inquired for at an advance of 2d. to 3d. per lb. Ping Sueys remain without change. The public sales comprise 28,550 packages, of which, 6,550 were sold, 3,000 being without reserve. Further sales are advertised for the 25th and 26th inst.

SILK.—Market quiet, at about our last quotations. No sales of any importance to report. According to a circular of Messrs. Arles Dufour and Co., the Lyons silk market since the latter part of March has gradually recovered. Certain recent experiments made in various parts of Italy and France, although varying in results, tend to prove the disease to be still existing in the generality of seed.

SUGAR.—The market has been active at rather advanced rates. 20,000 bags clayed Manila sold at 35s. to 35s. 6d., and another lot of 23,464 bags partly sold at 34s. 6d. to 35s. for common, and 35s. 6d. to 36s. for good. 1,600 baskets of Java at 38s. to 42s. 6d. for good grey to middling white.

COFFEE.—Parcels at auction have found ready buyers. Plantation Ceylon, ordinary to low middling, 67s. to 70s. 6d., and a small lot of Java at 67s.

Digitized by Google

RICE.—Market flat, and 4,000 bags of Bassein offered at public sale were with other lots withdrawn.

PEPPER.—Sales small; 200 bags common Singapore, white, sold at 5¾d.

SAGO.—Private sales of about 1,000 boxes at 15s. for medium pearl.

FLOUR.—Small sales at 16s. TAPIOCA.—Sales of Penang at 5½d.

SPICES.—Cinnamon: sales are announced for the 29th inst. Cassia lignea: market firm. Sales at 83s. to 90s. for third to fine seconds. Cassia buds: no stock. Offers at 195s. Cloves: small sales at 4¾d.; market dull. Mace: 33 cases of Penang and Singapore sold at 9d. to 1s. 4d. Nutmegs: prices rather higher. Sales of 180 cases at 3s. 4d. to 3s. 6d. for fine bold.

HEMP.—Of 3,500 bales of Manila at auction nearly all sold at £19. 15s. to £22. 5s for common to good roping.

COTTON.—Market more active, and rates on the advance. Sales of Surat at 5d. to 6d.

JAPAN WAX.—135 packages sold at auction at 58s. for middling block.

TOBACCO.— No sales, and market quiet at previous quotations.

TIN.—Rates have advanced considerably. Banca is now quoted 126s. to 128s., and Straits, 124s. to 125s. Antimony ore, £16. 2s. 6d.

GAMBIER.—Sales at 15s. 6d. to 16s. 3d., for a parcel not quite in order.

CUTCH.—Market flat; and of 2,700 bags at auction, a few only sold a 23s. to 24s. 6d.

MISCELLANEOUS.—India Rubber: Portion of a lot of 300 packages sold at 1s. 3d. to 1s. 4d., but holders now demand an advance. Camphor: No transactions. Sapanwood: No sales, but inquired for. Soy: Market dull, and of 12 casks at auction, no sales were made. Rhubarb: Sales of 200 boxes of Shanghai and 150 of Canton, at 2s. 7d. to 2s. 8d. for good flat, and 2s. 4d. to 2s. 5d. for round. Mother o'pearl shells: No sales. Singapore scarce. Star Anniseed: Quiet, and sales trifling, at 75s. to 80s. Sticlac: Sales at 78s. to 79s. for good quality. Gum Benjamin: Sales of 80 cases of Siam, at £11 10s. to £12. For third quality, and 50 cases Sumatra, at £13. 15s. to £14 for good seconds. Damar: No sales. Gamboge: A small lot at auction found no purchasers. Rattans: Sales of 4,000 bundles, at 2s. 2d. to 3s. 2d. Elephants Teeth: Quotations nominal, no sales. Vermillion: Of 20 cases at auction, a few only sold at 2s. 6d. Galangal root: Sales announced in a few days. Cubebs: Sales of 55 bags, at £6 10s. for mid. Stocky holders now ask £8. Dragon's blood: No sales. Galls: No sales of Japan. Rum: Sales of about 200 puncheons of Penang and Mauritius, at 1s. 9d.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 5s. to £6. 10s.; nail rods, £7 to £7. 17s. 6d.; hoops, £9 to £9. 7s. 6d.; sheets, single, £9. 5s. to £9. 15s.; Staffordshire bars, £8 to £8. 7s. 6d.; rails, £5. 5s. to £5. 10s.

STEEL.—Swedish keg, £17. 10s. to £18.

COPPER.—Sheet and sheathing, 11d.; yellow metal, 9¼d.

TIN.—125s. for block; 126s. for bar. The plates, best charcoal, I.C., 20s. to 30s. per box.

LEAD.—English pig, £ 20. 15s, to £22. 5s.; shot, patent, £24. 10s.; sheet, £22; spelter, £18. 10s.; zinc, English sheet, £24; quicksilver, £7 per bottle.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers:—

	Gold.	Silver.
Shanghai	—	£199,841

United States Gold Coin	3 16 8
Silver in Bars	0 5 1¼
Mexican Dollars	0 5 1
Carolus Dollars	0 6 6

MANCHESTER MARKET.

The market remains without any particular alteration since our last. Owing to the high rates of cotton, producers are very firm in their quotations, and are asking prices with check transactions. It appears that a considerable business has been done in India and China cloths, at an advance of 1½d. to 3d. per piece for shirtings. There is a steady and rather more active demand also for T Cloths, and a fair sale has taken place in these fabrics at hardening rates. The better sorts of printing cloth have advanced a little in price, but other qualities are entirely neglected. The market for yarns has been very stiff, and there is not much actual business, owing to the high and still rising prices asked by spinners. Such as it is, the business is fairly divided between German and Mediterranean houses, as well as those operating for India and China, though all continental demand remains very cautious. Mr. Mendel's Circular, of the 23rd, says:—"With some increase in the demand during the past few days, the improvement noted last week has gained strength, but at the advanced quotations; buyers both yarns and goods limit operations. The high price of cotton, and the lessened production by turn-out, materially assists in sustaining extreme rates."

From BATAVIA.—At London: West. At Falmouth: Koning Willem III.

From BANKOK.—For Falmouth: Benledi, Main.

FREIGHTS AND CHARTERS.

There is more inquiry for tonnage, and rates are firm, though not higher. The Indian Council have received tenders for the conveyance of 300 tons, chiefly coals, with 315 tons measurable stores, including 223 tons of spars, to Bombay. For Calcutta, they have 75 tons' weight, with 108 tons measurement; and 32 tons steam engines, &c., for Madras.

The number of tons loading for India, China, and the Cape of Good Hope is 54,000. For several of the ports ships are required. In coal freights business has been limited, and rates show a tendency to advance, especially for the Cape of Good Hope and Bombay. For the former place, the Cape Town Railway and Dock Company received tenders on the 19th inst. for 1,000 tons; and the Admiralty on the 23rd inst., for 5,000 tons coals to Singapore, and 2,500 tons to Sierra Leone. There is nothing doing to China. Salt freight Liverpool to Calcutta is higher, and two vessels have been fixed at 34s. per ton. Homeward charters are firm at 65s. Calcutta, 70s. to 72s. 6d. from the Rice Ports, 65s. to 67s. 6d. Ceylon; 90s. to 95s. teak from Moulmein, 65s. to 70s. from Java.

Rates of freight current for vessels on berth to Shanghai, 40s. to 50s. per ton, weight and measurement. To Hong Kong, 35s. to 40s., weight and measurement. To Singapore and Penang, 35s. to 45s., weight or measurement (nominal). To Manila, 35s. and 40s. To Batavia, 45s. weight, 40s. measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 40s. to 50s. Shanghai, 50s. to 60s. Singapore, 30s. to 45s. Batavia, 30s. to 40s. Manila, 50s. to 60s. Nominal quotation for Yedo, 70s. to. 80s.

At Hamburg, for Batavia and Singapore, 40s. China and Manila, 40s. to 50s.

CASUALTIES.

NEW YORK, March 26.—The John Land, which arrived at Holme's Hole on the 24th March, from Manila, had on board the crews of one English and two American ships, picked up at sea, seventy men in all.

NEW YORK, March 28.—The Hotspur, Johnson, for Hong Kong, has put back, leaky, having, while going out yesterday in tow, it blowing very hard from S.E. at the time, with a heavy sea on, struck on the outer edge of the bar; she will have to discharge.

NEW YORK, March 29.—The Surprise, hence for Batavia, while proceeding to sea yesterday morning, struck upon the bar, but came off, was examined, found to have sustained no damage, and proceeded.

The Catherina Maria, from Batavia to Holland, put into Simons Bay, February 27, leaky, and with loss of sails, boats, &c. She would have to discharge a considerable portion of her cargo which was damaged, having experienced a typhoon in lat. 27 S. lon. 72 E.

The Wizard, Woodside, which arrived at New York, 5th April, from Manila, had encountered a heavy gale from W.N.W., April 2.

The Sancho Panza, Hale, from Foo-chow-Foo, was spoken Jan. 29 in lat. 12, long. 100 E., by the Snow Squall, Lloyd, arrived at New York April 5. She reported having been in a typhoon on Jan, 4, during which she was hove down for four hours, losing sails, bulwarks, &c., and had seven feet of water in her hold when she righted.

ALICANTE, APRIL 17.—The Salvador, Orta, from Manila to Barcelona, with cotton and staves, put in here April 15, fire having broken ont in the fore-part of the vessel, but it was soon got under, a Spanish man-of-war having fired into her. The cargo is being unloaded, the deck remaining partly under water.

At ST. HELENA, March 3.—May Queen, Jordan, from Macao, and sailed 5 for Havana. Herman v. Velthoven, from Batavia, and sailed 4 for Amsterdam. Anna Bok, from Batavia. 4, Mercia, Hudson, and Edwin Fox, Ferguson, from Manila; Hougomont, Hamand, from Peiho; Laure and Adele v. Noel, from Batavia, and sailed for Amsterdam; Thusnelda, Meyer, from Batavia; Bride of the Seas, M'Donald, from Foo-chow-Foo; Eerstelling, Mann, from Banjoewangee; Cressy, Gooch, from Singapore; Billiton, Ganswyk, from Java; Dionysia Catharina, Berkelbach, from Batavia; Gil Blas, Morin, from Macassar. 5, Patriotess, Russell, from Singapore; Maria v. Wulven, from Batavia; Stad Gouda, Ruelles, from Sourabaya; America, Gordia, from Manilla; Dolwyk va. Putte, from Batavia; Virginie, Prehn, from Hong Kong, and sailed 12th March for Falmouth. 12, Exact, Moulin, from Sourabaya; Clara, Pizzey, from Penang; Ortelius, from Batavia. 11, H.M.S. Inflexible, from Hong Kong, and left for England; H.M.S. Sampson. 5, D'Artagnan au Bedah, from Singapore, and sailed 7 for Bordeaux; York, Redpath, from Singapore, and sailed 8 for Spithead; Henrietta, Melin, from Pasarveang, and sailed 7 for Queenstown. 9. Southern Cross, Bristow, from Foo-chow-Foo, and sailed for London.

TABLE BAY, Feb. 23.—Mary, Silversparre, from Sourabaya, and sailed 25 for Falmouth. 27, Edward, Frost, from Penang.

LAUNCH OF THE NEW IRON STEAMER "ITALIAN."—This magnificent screw steamer has been successfully launched at Belfast. The *Italian* is the property of Messrs. J. Bibby, Sons, and Co., the extensive shipowners of Liverpool. Her principal dimensions are as follows:—Length over all, 340 feet; extreme breadth, 34 feet; and her tonnage is estimated by builder's admeasurement at 2,500 tons. She will be supplied with engines of 250 horse-power. Her masts will comprise three of tubular iron, and one of wood. The bowsprit will also be of tubular iron. She is to be rigged in the fore-and aft style, and will be furnished with all the most recent appliances for setting and furling her canvass. Mr. Harland, brother of the late lamented Dr. Harland, of Hong-Kong, is the builder of the vessel, and he deserves to be congratulated on his success in gaining the patronage of such a firm as that of Messrs. Bibby and Co. He employs, we believe, 1,400 men, and Belfast may therefore regard him as one of her most useful citizens.

P. AND O. STR. "MOOLTAN."—The new monster steamer, *Mooltan*, built for the Peninsular and Oriental Company, will, it is expected, be ready to take out the India, China, and Australian mails on the 20th proximo. She is built with all the improvements in shipbuilding and steam machinery on board abridging every kind of heavy labour.

The Hamburg barque *San Francisco*, Captain Nicholas Stortenbecker, just arrived in the Channel from Singapore, sailed from Hamburg in December, 1859, since which she has made some of the most rapid voyages on record. Thus, she sailed from Cuxhaven to Falcahuano, in Chili, in 74 days, thence to the Amoor in 68 days, from the Amoor to Shanghai in 21 days, and is now arrived at Falmouth from the Straits of Sunda in 75 days. The *San Francisco* is a new ship, belonging to the firm of Joh. Cesar Godeffroy and Son, of Hamburg, and was built at their own shipbuilding establishment on the banks of the Elbe.

RUSSIA AND CHINA.

THE RUSSIANS ON THE AMUR;

HISTORY OF DISCOVERY, CONQUEST, AND COLONISATION UP TO THE TREATY OF PEKING IN 1860.

With a detailed description of the Country, its Inhabitants, Productions, and Commercial Capabilities; together with Personal Accounts of Russian Travellers.

By E. G. RAVENSTEIN, F.R.G.S., Corresp. F.G.S. Frankfurt.

With an Appendix on the Navigation of the Gulf of the Amur, by Captain Prutz, and 3 Maps, 4 tinted Lithographs, and above 60 Woodcuts.

TO BE PUBLISHED IN JUNE.

Contents.—Part I.—Historical. I. Manchuria and the Amur before the Appearance of the Russians. II. First News of the Amur, 1636; Poyarkof's Expedition, 1643-46. III. Khabarof, 1647-52. IV. Stepanof, 1652-61. V. Discovery and Occupation of the Shilka, 1652-69. VI. Albazin, 1669-82. VII. War with China, 1683-87. VIII. The Treaty of Nerchinsk, 1689. IX. The Amur after the Treaty of Nerchinsk, 1689-1848. *a.* The Russo-Chinese Frontier. *b.* The Russian Mission at Peking. *c.* The Amur and Sakhalin under the Dominion of China. X. Roman Catholic Missionaries in Manchuria, with Letters by de la Brunière and Venault. XI. Recent History of the Amur, 1848-60. XII. Present Condition of the Russian Settlements. XIII. Historical Sketch of Geographical Exploration.

Part II.—Geographical, Statistical, and Commercial. XIV. The River Amur, with Radde's Stay in the Bureya Mountains. XV. The country North of the Amur, with the Explorations of Middendorf and Usultzof. XVI. The country South of the Amur, *a.*); the Coast of Manchuria, *b.*); the Usuri; Veniukof's Journey, *c.*); the Sungari. XVII. Sakhalin; Schrenk's Journey. XVIII. Climate. XIX. Plants. XX. Animals. XXI. Minerals. XXII. Inhabitants: Orochon, Manyarg, Daurians, Chinese, Manchu, Golde, Olcha or Mangun, Orochi, Oroke, Gilyak, Aino, &c. XXIII. Commercial.

Appendix.—Index and Glossary.

The late acquisitions of Russia on the confines of China and along the sea-board of the Pacific have attracted much attention. The country of the Amur has been visited by Schrenck, Maximowicz, Maack, and many others, but the results of their explorations have either been laid down in voluminous works not attractive or even accessible to the general reader, or they are dispersed in periodicals. We look forward, therefore, to the publication of the above work with some degree of interest. It will consist of two parts, one historical, the other geographical, statistical, and commercial. The former will give the history of Russian adventure on the Amur in the 17th century to the treaty of Nerchinsk; the Amur, whilst in possession of China; the labours of the Romish missionaries in Manchuria, and lastly, the proceedings of Russia since the appointment of General Muravief-Amursky as Governor-General of Eastern Siberia in 1848. Very few of these late events have become known to the public, and the author has been able to avail himself of information communicated to him by gentlemen who have themselves taken a part in the occupation of the country. The second part will give a detailed description of the country, its inhabitants, productions, &c. This part will be profusely illustrated, and the interest naturally attached to the description of a country which has so recently been opened to European enterprise, will be enhanced by the introduction of personal accounts of Russian travellers, and numerous woodcuts and lithographs.

In the chapter on commerce the author will not only show the present condition of the commerce going on there, but will also enter upon its probable development. This work will be appreciated both by English and Russians. In Russia no work on the Amur containing all the above topics has been published. True, we have Mr. Maack's book; its price, however, is 40 roubles, and it only gives the results of one year's exploration in 1855. The works of Maximowicz, Schrenck, Middendorf, and others, are interesting to scientific men alone.

TRÜBNER AND CO.,
60, PATERNOSTER ROW, LONDON.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

Reviews of the Work.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

The Book concludes with numerous varied and interesting cases, to which is added the Author's Receipt of a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in India, China, and the Colonies can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG.

KALOS GEUSIS SAUCE, as Improved by Mons. A. SOYER, and so highly valued in our East and West Indian Colonies as a stomachic, is prepared by I. M. ROBSON, 32, Lawrence-lane, Cheapside, London.

FOR FAMILY ARMS.—Send Name and County to the Royal Heraldic Studio and Library; in a few days you will receive a Correct Copy of your Armorial Bearings. Plain Sketch, 3s.; in Heraldic Colours with written description, 6s.; Large Size, 12s. Family Pedigrees, with original grant of Arms, to whom and when granted, the origin of the name, all traced from authentic records, fee Two Guineas. An Index, containing the Names of nearly all persons entitled to use Arms, as extracted from the British Museum, Tower of London, Heralds' College, &c. &c. The Manual of Heraldry, 400 Engravings, 3s. 6d., post free, by T. CULLETON, Genealogist, Lecturer on Heraldry at the Mechanics' Institute, 25, Cranbourn-street, corner of St. Martin's lane, London, W.C. The Heraldic Colours for Servants' Liveries, 5s.

STAMP YOUR OWN PAPER—with Arms, Crest, Initials, or Name and Address, by means of CULLETON'S PATENT EMBOSSING PRESS, 15s. Best Make, 21s. Any person can use them.—T. CULLETON, Die Sinker to the Board of Trade, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

WEDDING CARDS—For Lady & Gentleman—5s. each. 50 Embossed Envelopes, with Maiden Name printed inside, 13s. Visiting Cards—A Copper Plate engraved in any style, with name and 50 Cards, printed for 2s., post free. N.B.—All orders executed by return of post, for stamps or cash. T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

FAMILY ARMS, &c., Emblazoned for Painting on Carriages or Needlework, 6s.; Best Style, 12s., Gothic and Modern Monograms Designed, 5s. Arms Quartered, Impaled, and Painted on Vellum, according to the laws of Heraldry. By T. CULLETON, Seal Engraver and Die Sinker, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

ARMS, CRESTS, &c., Engraved in the Best Style. Crest on Seals or Rings, 7s. On Steel Die, 6s. Initials, 1s. 6d. per Letter. Book Plate, Engraved with Arms, 10s.; or Crest, 5s. Postage and Registered Letters 1s. extra.—T. CULLETON, Heraldic Engraver by Appointment to the Queen, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

SOLID GOLD RING (18 Carat, Hall Marked), Engraved with Crest, 42s.; Large Size, for Arms, 75s. On receipt of P. O. order the size will be sent to select from.—T. CULLETON. Seal Engraver, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

THE PEN SUPERSEDED.—Mark your Linen. The best and only method of Marking Linen, Silk, Stockings, Coarse Towels, or Books, so as to prevent the Ink washing out, is with CULLETON'S PATENT ELECTRO-SILVER PLATES. By means of this novel invention a thousand pieces of linen can be marked in a few hours. Initials, 1s. each; Name, 2s. 6d. Set of Moveable Numbers, 2s. 6d.; Crest Plate, 5s., with the necessary directions for use. Post free. Certificate from the eminent Dr. Sheridan Muspratt, F.R.S., Professor of Chemistry, &c.

"Several trials with Mr. Culleton's Patent Electro-Silver Plates, for marking linen, induce me to pronounce them excellent; the letters are beautifully marked in a deep black colour, without blotting, and after a long boiling, with either potass or soda, they remain unaltered. Other plates which I tried decomposed the ink, and in many cases burned holes in the linen. I can testify Mr. Culleton's Plates are incorrodible, and will not hurt the finest fabric.—(Signed) "SHERIDAN MUSPRATT.

"College of Chemistry, Liverpool.

"May, 15, 1854."

All orders to be sent to the Patentee and Sole Maker.

T. CULLETON, 25, Cranbourn-street, corner of St. Martin's-lane, London, W.C.

All Orders executed by Return of Post.

FACILITIES in BOOK-KEEPING DRAPER'S PATENT SEMI-DETACHED DOUBLE REFERENCE INDEX effects great saving of time, and expedites posting. All descriptions of Account Books fitted with Patent Index. Account Books, Copying Machines, and Stationery supplied, of the best quality Wholesale and for Exportation, 5, Tower-street, London. Sample of Patent Index can be seen at Mr. GEORGE HOLMES', Hong Kong. Sample Book of Papers, with prices, forwarded on application.

HOLLOWAY'S OINTMENT and PILLS.—THE SCROFULOUS and CONSUMPTIVE will find in these noble remedies the means of casting out the bad humours which originate and prolong their sufferings. The Ointment should be well rubbed twice a day upon the skin, as near as possible to the part affected. It will penetrate and act most wholesomely and energetically on the diseased structure. It manifests a wonderful power in removing all taints from the blood, and consequently in curing a multitude of chronic ailments which seemed to be almost irremediable. In all constitutional complaints Holloway's purifying Pills should be taken while his Ointment is being used; both remedies will readily bring about a cure of scrofula, scorbutic eruptions, and ulcerations.

BANKERS.—THE CITY BANK.

SOLICITOR.—B. BURNELL, Esq., 10, Fenchurch-buildings. **ACTUARY.**—THOMAS WALKER, Esq., B.A., F.I.A.

ADVANTAGES OFFERED TO ASSURERS BY THE "WHITTINGTON."

THE GUARANTEE OF AN AMPLE SUBSCRIBED CAPITAL.—Careful selection of Lives. Economical Management.

FOREIGN RESIDENCE.—Travelling to, and residence in, any part of Europe allowed without any additional charge, and the extra Premium charge for voyage to, and residence in, any other Foreign Country, or for active Naval and Military Service, or any other Special Risk, are fixed on a moderate basis.

Prompt Payment of Claims.

The Tables of Premium combine economy with safety; and the Rates, compared with those usually charged, give assurers with this Company the benefit of a reduction equivalent to a large Bonus.

Four-Fifths (or Eighty per Cent.) of the Profits appropriated to Policies in the Participating Branch.

A Declaration of Bonus was made to 30th April, 1860, on Policies effected for the whole term of Life on the Participating Scale, which has been appropriated, at the option of the Assurer, either by adding the amount of Bonus to the sum Assured by the Policy; or, by altering the term of the Policy, so that it may become payable during the lifetime of the Assured.

ANNUAL PREMIUM TO INSURE £100.

WHOLE TERM OF LIFE.

Premiums paid yearly, half-yearly, or quarterly. REDUCED RATES FOR INDIA AND CHINA.

The Extra Rate for residence in India and China (unless under exceptional circumstances) will be from £2 to £2 10s. per cent., with Bonus according to age; without Bonus, from £1 10s. to £2 per cent. according to age. As these rates are much below those hitherto charged in consequence of a want of experience of the climate, it is hoped that Residents in India and China will avail of them more generally.

Detailed Prospectusses, with Forms of Proposal and every additional information, may be obtained on application at the Chief Offices, or at any of the Agencies of the Company.

FRANK L. H. COLLINS, Secretary.
